Each outside pipe installation, steam, air, water, etc.
Each sewer installation, storm or sanitary.
Paving. Each complete installation.
Each shop fence or wall installation.
Any applicable unit under account 16, "Station buildings".

Account 21, Locomotive Shops and Engine Houses

A complete building, including attached platform.
A complete platform structurally detached from a building.
A turntable.
A turntable pit.
A transfer table with machinery.
A transfer table pit.
A cinder pit. Each complete installation.
A sand storage and handling and drying apparatus.
Outdoor bins. Each complete installation.
A smoke stack not mounted on boilers.
A lorry track system (outside).
A boiler washing plant. Each complete installation.
An overhead crane, outside.
Each outside pipe installation, steam, air, water, etc.
Each sewer installation, storm or sanitary.
Paving. Each complete installation.
Each shop fence or wall installation.
Any applicable unit under account 16, "Station Buildings".

Account 22, Storage Warehouses

A complete building, including attached platform.
A complete platform structurally detached from a building.
For additional items, see accounts 16, "Station buildings", and 59, "Shop equipment".

Account 23, Wharves and Docks

A timber float bridge.
A steel float bridge.
A wharf (including pile clusters).
A timber incline.
A bulkhead.
Jetties or breakwater.
Ferry racks (including pile clusters).
Float racks.
Each complete machinery installation.
For additional items, see account 3, "Grading", 6, "Bridges, trestles and culverts", and 59, "Shop equipment".

Account 24, Coal and Ore Wharves

Car dumper complete.
Timber bridges.
Steel bridges.
Each complete machinery installation.
A loading or unloading machine complete.

V 41 153 AUG 6 76 UMI

Each coal or ore pocket installation.
For additional items, see accounts 6, "Bridges, trestles and culverts", 16, "Station buildings", 20, "Car shops", 23, "Wharves and docks", and 59, "Shop equipment".

Account 25, TOFC/COFC Terminals

A complete building.
A complete building, including attached platform and ramp.
A complete platform and attached ramp, structurally detached from a building.
A portable ramp.
A complete fence.
Paving, each complete installation.
An overhead crane, complete.
Each sewer installation.
A truck or tractor used exclusively at TOFC/COFC terminals.
Each floodlighting pole or tower installation.
Each floodlighting installation.
A power distribution system, complete.
Any applicable units listed under other accounts.

Account 26, Communication Systems

A complete mile section or complete installation if less than a mile of pole line including cross arms, wires and appurtenances.
Each mile or complete installation of cable with associated parts.
Each mile or complete installation of conduit with associated parts.
A complete tower.
A complete installation at each location constituting a separate means of communication, such as radio, radar, carrier telephone, teletype, or other communication systems.
For additional items see account 16, "Station buildings".

Account 27, Signals and Interlockers

A signal system installation complete, or section thereof, with associated parts, including masts, batteries, relays, ladder, etc.
A complete mile section or complete installation if less than a mile, or pole line including cross arms, wires and appurtenances.
Each mile or complete installation if less than one mile of cable with associated parts.
Each mile or complete installation if less than one mile of conduit with associated parts.
Switch movement with associated parts.
A complete building.
An interlocking plant complete (excluding machine).
An interlocking machine.
Signal bridge complete.
Each highway crossing protection installation complete.
Each car retarder installation complete.
A traffic control or C.T.C. system installation complete.

Account 29, Power Plants

Any applicable units listed under accounts 16, "Station and office buildings", 20, "Car shops", and 21, "Locomotive shops and enginehouses".

Account 31, Power Transmission Systems

A continuous mile, or a separate installation if less than a mile, of catenary complete including catenary hangers, trolley wire and appurtenances.
A continuous mile, or a separate installation if less than a mile, of transmission line, including poles, wires, transformers, switches, and other appurtenances.
Each outside steam, air, etc., pipe line installation.
A manhole.
Substation or switching station complete.
Each mile, or installation if less than a mile, of third rail.
A catenary bridge or support.
A high-tension transmission tower.
Any applicable units listed under accounts 26, "Communication systems", and 27, "Signals and interlockers".

Account 35, Miscellaneous Structures

A complete building, including attached platform.
A complete platform structurally detached from a building.
A conveyor system complete.
An elevator system complete.
A blowing system complete.
Any applicable units listed under other accounts.

Account 37, Roadway Machines

Each roadway machine complete including accessories.
Each on and/or off-track automotive vehicle complete, including appurtenant special-purpose machinery.

Account 39, Public Improvements—Construction

Any applicable units listed under other accounts.

Account 52, Locomotives

Diesel electric, lead or booster, i.e., "A" or "B" units.
Diesel electric. Extra or spare engines.
Electric locomotive.
Gasoline locomotive.
Radio control locomotive.
Steam locomotive, complete.
Steam locomotive, exclusive of tender.
Steam locomotive tender.
Steam locomotive booster.

Account 53, Freight-Train Cars

A complete car.
Motor equipment of a motor driven car.
A propulsion motor including generator.
A freight container, complete.

Account 54, Passenger-Train Cars

A complete car, including interior furnishings.
Motor equipment of a motor driven car.
A propulsion motor, including generator.

Account 55, Highway Revenue Equipment

A complete vehicle.
A chassis.
A container.
A bogie.

Account 56, Floating Equipment

A complete vessel or boat, exclusive of machinery.
Machinery: a boiler, a motor, an engine.

Account 57, Work Equipment

(a) Rail equipment:
(1) A complete car or machine.
(2) A boiler.
(3) An engine.
(4) A motor.
(5) Machinery equipment (with or without tractive machinery) such as concrete mixer, snow plow, derrick, steam shovel, or pile driver.
(6) A complete motor equipment.
(b) Floating equipment—Work:
(1) A complete vessel or boat.
(2) A boiler.
(3) An engine.
(4) A motor.
Any applicable units listed under other accounts.

Account 58, Miscellaneous Equipment

An airplane.
A complete vehicle.

Account 59, Shop Equipment

A machine (including foundation and motor, if any), such as lathes, shapers, slotters, boring machines.
Equipment, such as ash handling.
A furnace.
A boiler installation complete.
A motor vehicle used in shops only.
Testing equipment.
Overhead crane, complete.

Account 60, Power Plant Equipment

A power plant machine, including foundation, such as a turbine, rectifier, dynamo, generator.
Any applicable unit listed under account 59, "Shop equipment".

INSTRUCTIONS FOR MAINTENANCE EXPENSES

3–1 *Items to be charged.* (a) The accounts provided for maintenance of road property and of equipment are designed to show the cost of repairs and also the loss through depreciation of the property used in transportation operations, including expenses resulting from ordinary wear and tear of service, exposure to the elements, inadequacy, obsolescence, or other depreciation, or from accident, fire, flood, or other casualty.

(b) These accounts shall include the cost of labor, materials and supplies, work-train service, floating equipment work service, special machine service, contract work, privileges, protection from casualties, and other analogous items of expense in connection with the maintenance of the plant used in railway service. The cost of materials and supplies, which shall include small tools, shall include the cost at the point of free delivery plus freight charges of foreign lines, and the costs of inspection and loading assumed by the carrier; also a proportion of store expenses. Such costs shall not include expenses of transportation over the carrier's line. Royalties for patent rights on mechanical appliances used in repairs of equipment shall be included in the cost of the repairs. The cost of boarding, traveling, and other incidental expenses of employees shall be included in the accounts to which the pay of the employees is chargeable, except where otherwise specified in the text of the accounts. In calculating the cost of materials used proper allowance shall be made for the value of unused portions and of cuttings, turnings, borings, etc., and for the value of the material recovered from property repaired and from temporary tracks, scaffolding, cofferdams, and other temporary structures used in repair work.

(c) The cost of repairs shall include the cost of inspecting to determine the repairs necessary, and of adjusting or repairing parts, both of road property and of equipment, such as the repairing of locomotives, cars, frogs, switches, rails, etc.; the cost of inspecting and testing after repairs have been made such as the testing of locomotives after repairs to determine whether the repairs have been properly made, and the running of repaired locomotives light in order to break them in for regular service; incidental costs of repairs, such as the construction

or removal of false work in connection with maintenance, cost of demolishing retired road property and disposing of the wreckage therefrom when the property is dismantled by or for the carrier; cost of maintaining or protecting traffic during the progress of construction work, including the cost of constructing, maintaining and removing temporary tracks required for maintaining traffic during the progress of the work; cost of mowing and beautifying grounds around buildings; repairing fences, sidewalks, driveways, and streets within or adjacent to such grounds; cost of removing snow from roofs of buildings (when not removed by those employed in the buildings); cost of periodical restoration of seasonal features, such as gardens, shrubbery, and lawns; cost of operating hothouses in connection with the work of beautifying grounds; and cost of clearing and removing casual incumbrances, such as ice, snow, and fallen timber.

INSTRUCTIONS FOR DEPRECIATION ACCOUNTS

4–1 *Method.* (a) There shall be charged monthly to operating expenses or other appropriate accounts and credited to account 763, "Accumulated depreciation; Road and equipment property", during the service life of depreciable road and equipment property, includible in accounts classed as depreciable, amounts which will approximate the loss in service value not restored by current repairs or covered by insurance. The charges for accruing depreciation currently shall be computed in conformity with the group plan by applying to the cost of property such percentage rates as will distribute the service value by the straight-line method in equal annual charges to operating expenses or other accounts during the estimated life of the property. For road property, the cost shall be original cost or estimated original cost, as used in the valuation records, adjusted to current date. If a carrier submits proof that the actual cost of depreciable property is substantially different from cost figures in the valuation records, the carrier may, with the approval of the Commission, use such cost figures as the depreciation base.

(b) The term group plan means the plan under which depreciation charges are accrued upon the basis of the cost of depreciable property includible in accounts classed as depreciable using the service lives of the individual depreciable units in the accounts and properly weighing to determine the composite annual rate of depreciation.

(c) For the purpose of the group plan of depreciation accounting the following primary accounts are classed as depreciable accounts:

Road accounts:
1. Engineering (as appropriately assigned, but not distributed, to the other depreciable accounts in arriving at the amounts used as the depreciation base).
3. Grading (depreciable property recorded in this account).
4. Other right-of-way expenditures.
5. Tunnels and subways.
6. Bridges, trestles and culverts.
7. Elevated structures.
13. Fences, snowsheds, and signs.
15. General office buildings.
16. Station buildings.
17. Roadway buildings.
18. Water stations.
19. Fuel stations.
20. Car shops.
21. Locomotive shops and enginehouses.
22. Storage warehouses.
23. Wharves and docks.
24. Coal and ore wharves.
25. TOFC/COFC terminals.
26. Communication systems.
27. Signals and interlockers.
29. Power plants.
31. Power-transmission systems.
35. Miscellaneous structures.
37. Roadway machines.
39. Public improvements—construction.

NOTE.—With respect to account 3, 4, 5, and 39, carriers may confine the accruals to the depreciable property recorded therein by applying the percentage rates to the aggregate cost of such property (omitting nondepreciable property), in computing depreciation charges, or they may request composite percentage rates to be applied to the total amount recorded in each of the accounts in computing depreciation charges.

Equipment accounts:
52. Locomotives.
53. Freight-train cars.
54. Passenger-train cars.
55. Highway revenue equipment.
56. Floating equipment.
57. Work equipment.
58. Miscellaneous equipment.
59. Shop equipment.
60. Power-plant equipment.

(d) When abandonment of a branch line or other important segment of the track structure or other part of the plant for which depreciation charges are not includible in the accounts is foreseeable within a reasonable period of time due to exhaustion of traffic, obsolescence or other causes, application may be made to the Commission for authority to create a suitable reserve in anticipation of probable loss.

4–2 *Rates of depreciation.* (a) A separate composite annual percentage rate for each account covering depreciable property shall be used in computing depreciation charges. Such composite rates shall be those which are from time to time prescribed or otherwise authorized by the Commission. Where property is acquired for which no rates have been prescribed or otherwise authorized and also in the event annual percentage rates prescribed for any class or type of property become no longer currently applicable because of material changes in property, premature obsolescence, exhaustion of traffic or other causes not given effect in the existing rates, carriers shall so inform the Commission promptly and, at that time, shall submit revised annual percentages rates and supporting details developed in accordance with the method indicated in instruction 4–1.

(b) In computing monthly charges the annual percentage rates shall be applied to the depreciation base as of the first of each month and the result divided by twelve.

4–3 *Depreciation records to be kept.* (a) The carrier shall maintain for each class of property in convenient and accessible form engineering and other data bearing on prospective service lives; and shall be prepared at any time upon direction of this Commission to compute and submit for approval, new percentage rates to take the place of those based on service lives or value of salvage deemed to be inaccurate.

(b) The carrier also shall keep such records of depreciable property and property retirements as will reflect the service life of each class of property which has been retired, or will permit the determination of service life indications by past experience of useful life tenure of comparable property, turnover, or other appropriate methods; also such records as will reflect the percentage of value of the salvage for property retired from each class of depreciable property.

(c) For purposes of analysis the carrier shall maintain subsidiary records in which the reserve is broken down into component parts corresponding to each primary account showing in these records in complete detail by each primary account the current credits and debits to the reserve. Such detailed information shall be reported annually to this Commission. For balance sheet purposes, the depreciation reserve shall be treated as a single composite reserve for property.

4–4 *Leased property—depreciation.* (a) The carrier shall include in operating expenses charges for depreciation on road property and equipment used but not owned, the rent for which is includible in rent for leased roads and equipment, and shall maintain the same records of service lives, salvage values, etc., as provided for owned road property and equipment. The excess of the total compensation paid over the amount chargeable for depreciation shall be included in the rent account. If settlement between the carrier and the lessor is not currently made, the amount of depreciation accrued during the period of the lease shall be credited by the carrier to account 861, "Estimated liability; Leased property". The necessary adjustments of the difference between the balance thus accrued in that account and the actual amount of settlement shall be made appropriately through accounts 519, "Miscellaneous income", or 551, "Miscellaneous income charges", at the time settlement for depreciation on the property is made with the lessor.

(b) The carrier shall not include in the depreciation account in operating expenses any charges for depreciation of equipment used but not owned when the rents therefor are included in the rent for equipment and joint facility rent accounts.

4–5 *Jointly used property—depreciation.* The owning carrier shall include in the depreciation accounts in operating expenses the charges for depreciation on units of depreciable property jointly used with one or more other carriers. The owning carrier shall credit and each using carrier shall charge the appropriate joint facility accounts in operating

V 41 153 AUG 6 76 UMI

expenses with the amounts billed by the owning carrier against each using carrier for its proportion of the service loss on property retired from service whether billed currently as depreciation or when retirements occur as the loss in service value. The using carriers shall be required to account for depreciation or retirement of units of road property jointly used but not owned only to the extent of their contract liability. The same principle shall apply to terminal companies and their nonowner tenants in accounting for depreciation accruals or retirement charges recorded in the accounts of the terminal companies.

INSTRUCTIONS FOR INCOME AND BALANCE SHEET ACCOUNTS

5–1 *Current assets.* (a) In the group of accounts designated as current assets shall be included cash, those assets which are readily convertible into cash or are held for current use in operations, current claims against others and amounts accruing to the carrier which are subject to settlement in the ordinary course of business within one year. There shall not be included in this group of accounts any amount the collection of which is not reasonably assured within one year because of the known financial condition of the debtor or otherwise. Such items shall be included in account 781, "Other assets", at an amount not in excess of a reasonable estimate of realizable value. Items of current character but of doubtful value shall be written down or written off by charge to account 130000, "Uncollectible accounts", or account 553, "Uncollectible accounts", as appropriate. Adjustment of these items of doubtful value shall be made by direct reduction of the asset account in which such items are carried or by provision in account 729, "Allowance for uncollectible accounts", for the estimated uncollectible amount.

(b) The carrier shall provide for significant losses due to obsolescence in materials and supplies by equitably distributing the losses among the accounts ordinarily chargeable for such classes of material, and concurrently writing down the materials and supplies account.

5–2 *Recorded value of securities owned.* (a) The investment in securities other than those issued or assumed by the accounting company shall be recorded in these accounts at the cost, at the time of acquisition, of the consideration given therefor by the accounting company, but excluding amounts paid for accrued interest and accrued dividends. The accounting company shall write down the ledger value of any securities to the extent of impairment in their value or write off entirely if there is no reasonable prospect of realizing any value therefrom, but fluctuations in market value are not to be recorded. Adjustments in the ledger values of securities shall not be delayed beyond the year in which a loss is claimed for income tax purposes. The amount of the adjustment for loss in value written off may be recorded in the accounts by providing an allowance for such loss through concurrent credits to accounts 753, "Adjustments; Investments and advances—Affiliated companies," or 757, "Adjustments; Other investments and advances", as appropriate. Losses in value of securities written off shall be charged to account 551, "Miscellaneous income charges". Under no circumstances shall securities be stated in these accounts at an amount in excess of their cost to the accounting company.

(b)(1) For financial statement purposes the carrier shall follow the principles of equity accounting for (1) all investments in corporate joint ventures (see definition 21(c)), and (2) all investments in voting stock or affiliated companies giving the carrier the ability to significantly influence the operating and financial policies of an investee (see definition 21(b)). For purposes of this instruction an investment of 20 percent or more of the outstanding voting stock of an investee will indicate the ability to exercise significant influence over an investee in the absence of evidence of the contrary.

(2) Since the equity method is not to be effected by entries in the books of accounts but is to apply only in financial reports to the Commission, the carrier shall establish worksheet or memorandum accounts. Three basic worksheet or memorandum accounts are needed:

(i) An investment account to include (*a*) equity in the undistributed earnings or losses of the investee since the date of acquisition (see definition 21(g)); (*b*) accumulated amortization of the difference between cost and net assets at date of acquisition (see (b)(3) below); and other adjustments for disposition or writedown of investments.

(ii) An income account to include (*a*) the investor's share of the investee's undistributed profits or losses for each reporting period subsequent to acquisition of the investment except that in the year of acquisition such amount shall be determined from the date of acquisition; (*b*) amortization for the reporting period of the difference between cost and net assets at date of acquisition. This account shall be closed at year-end to the retained earnings memorandum account discussed to paragraph (c) below.

(iii) A retained earnings account to include (*a*) equity in the undistributed earnings or losses of the investee since the date of acquisition; (*b*) accumulated amortization of the difference between cost and net assets acquired at date of acquisition (see (b)(3) below).

(iv) Other memorandum accounts will be needed for such adjustments as gains and losses on disposition of investments, recognition of impairments in value, the investor's share of extraordinary and prior period adjustments reported in the investee's financial statements (see instruction 1–2(d)), and provision for deferred taxes where it is reasonable to assume that undistributed earnings of an investee will be transferred to the investor in a taxable distribution. These memorandum accounts shall be closed at year-end to the retained income memorandum account discussed in paragraph (c) above.

(3) The carrier shall retain the following information for each investee in support of the worksheet or memorandum accounts:

(i) Original cost of investment.

(ii) Equity in net assets of investee at date of acquisition.

(iii) Allocation of difference between cost and equity in net assets, namely, to specific assets of investee or to goodwill.

(iv) Accumulated amortization of difference between cost and equity in net assets.

(v) Unamortized balance of difference between cost and equity in net assets.

(vi) Equity in undistributed earnings/losses for each year since date of acquisition.

(vii) Dividends received since date of acquisition if determinable.

(viii) Proceeds from sale of investments.

(4) Any difference between the investor's cost and its share of the net assets of the investee at date of acquisition shall be allocated to specific assets of the investee to the extent the difference is attributable to them. When the difference is allocated to depreciable or amortizable assets, depreciation and amortization (through the investment and income memorandum accounts) should absorb the difference over the remaining life of the related assets. If the difference is not related to specific accounts, it should be considered goodwill and amortized over a reasonable period not to exceed 40 years. For investments made prior to November 1, 1970, amortization of goodwill is not required in the absence of evidence that the goodwill has a limited term of existence.

(5) The financial statements of the investee that are used for equity accounting should be timely. If the accounting year of the investee differs from that of the investor then the most recent available financial statements may be used. The lag in reporting should be consistent from period to period.

(6) Material profits or losses on transactions between the investor and investee shall be eliminated until realized by either company as if the two were consolidated.

(7) A transaction of the investee of a capital nature that affects the investor's share of the investee's stockholder's equity should be reported in the financial statements as if the two were consolidated.

(8) The investor shall deduct any dividends applicable to outstanding cumulative preferred stock whether or not declared, and any other dividends declared when computing its share of undistributed earnings or losses.

(9) The investor shall suspend application of the equity method when the investment (including the investment memorandum account) together with any net advances made to the investee is reduced to zero. Additional losses shall not be provided for unless the investor has guaranteed obligations of the investee or is otherwise committed to provide further financial support for the investee. If the investee subsequently reports net income the investor shall resume applying the equity method at such time as its share of that net income equals the share of net losses not recognized during the period of suspension.

(10) When the investor's voting stock interest falls below the level of ownership described in paragraph (b)(1) of this instruction, the investment no longer qualifies for the equity method. Should dividends received on the investment in subsequent periods exceed the investor's share of earnings for such periods, the investment memorandum and income memorandum accounts shall be reduced by the excess amount.

(11) When the level of ownership of an investment increases to that described in paragraph (b)(1) of this instruction, the equity method shall be applied. The memorandum accounts for the investment, income (for current year's equity in undistributed earnings less amortization), and retained earnings (for prior years' equity in undistributed earnings less amortization) shall be adjusted retroactively on a step-by-step basis determining the equity in net assets at date of acquisition, amortization adjustment, and equity in undistributed earnings or losses at each level of ownership. Where small purchases are made over a period of time and then a purchase is made which qualifies the investment for the equity method, the date of latest purchase may be used as date of acquisition.

(12) Information having significance with respect to the investor's ownership in investees shall be disclosed in notes to financial statements of annual reports filed with the Commission in accordance with generally accepted accounting principles.

(c) When securities with a fixed maturity date are purchased at a discount (i.e., when total cost including brokerage fees, taxes, commissions, etc., is less than par), such discounts may be amortized over the remaining life of the securities through periodic debits to the account in which the securities are carried (preferably coincident with entries recording interest accruals) and credits to the same account in which interest income is credited. No debits shall be made in respect to discounts upon securities held as investments or in special funds if there is reason to believe that such securities will be disposed of by redemption or otherwise at less than par or will not be paid at date of maturity. When securities with a fixed maturity date are purchased at a premium (i.e., when the total cost including brokerage fees, taxes, commissions, etc., is in excess of par), such premium may be amortized over the remaining life of the securities through periodic credits to the account in which the securities are carried (preferably coincident with entries recording interest accruals) and debits to the same accounts in which the interest income is recorded.

NOTE.—The carrier shall follow generally accepted accounting principles where an interpretation of the rules for equity accounting is needed or obtain an interpretation from its public accountant or the Commission.

5–3. *Discount expense, and premium, on debt.* (a) Ledger accounts shall be provided to cover the discounts, expense, and premiums at the sale or resale of each subclass of funded debt and of receivers' and trustees' securities issued for the benefit of or assumed by the company. The amount of the debt expense shall be charged to account 782, "Other deferred debits". The total of the net debit balances for discount shall be included in account 844, "Unamortized debt discount", and the total net credit balance in account 845, "Unamortized premium on debt".

(b) Each accounting period there shall be charged to accounts 548, "Amortization of discount on funded debt," and 551, "Miscellaneous income charges", on a consistent basis, as appropriate, a proportion of each of the debit balances in account 782, "Other deferred debits", and 844, "Unamortized debt discount." There shall correspondingly be charged to account 517, "Release of premiums on funded debt," a proportion of the credit balances in account 845, "Unamortized premiums on debt." The amounts for the respective debit balances for discount and expenses applicable to a particular issue of obligations may be charged directly to accounts 548 and 551 at time of issue when the aggregate of such amounts does not appreciably affect the accounts.

(c) When any funded debt which has been actually issued to bona fide holders for value is reacquired by the accounting company, that proportion of the balance remaining in accounts containing discount, expense and premium on funded debt for the subclass of the security reacquired applicable to the portion reacquired shall be credited or charged thereto, as may be appropriate, and concurrently charged or credited to account 519, "Miscellaneous income", account 551, "Miscellaneous income charges"; or to account 570, "Extraordinary items", as may be appropriate, in accordance with the text of these accounts. Such proportion shall be based upon the ratio of the par value of the security reacquired to the par value of all the securities of the subclass actually outstanding immediately before such requirement.

5–4 *Discount, premium, and assessment on capital stock.* (a) Separate ledger accounts shall be provided for each subclass of capital stock issued or assumed by the accounting company to cover discount suffered and premium realized at the time of sale of capital stock. General levies or assessments against stockholders shall be credited to the appropriate ledger accounts for the subclass of capital stock against which the levy or assessment is made.

(b) The total of net debit balances in these ledger accounts shall be included in account 911, "Discount on capital stock", and the total of net credit balances in account 912, "Premiums and assessments on capital stock".

(c) Discount on each subclass of capital stock may be offset or reduced by charges to account 912, "Premiums and assessments on capital stock", to the extent that net gains from premiums or assessments have been included therein or to account 913, "Other capital," to the extent that the net gains from reacquisition and resale of retirement of capital stock applicable to such subclass have been included therein. Any remaining discount may be amortized by charge to account 616, "Other debits to retained earnings," or may be retained and carried in account 911, "Discount on capital stock," until the stock to which the discount applies is retired.

(d) In case the accounting company is permitted and elects with the approval of the Commission, to distribute all or any part of the net balance of other paid-in capital to its stockholders, the amount thus distributed shall be charged to account 913, "Other capital."

(e) When capital stock is reacquired, either by purchase or donation, and is retired or cancelled, account 901, "Capital stock", shall be charged with the par value, stated value of no par stock, or if no par stock without stated value, the proportionate amount at which the particular class of stock is included in account 901. Any excess of reacquisition cost over the recorded value of the stock shall be allocated between account 913, "Other capital," and account 616, "Other debits to retained earnings." Any excess of recorded value over reacquisition cost shall be credited to account 913, "Other capital."

(f) When capital stock is reacquired, either by purchase or donation, and is not retired or cancelled, nor properly includible in sinking or other funds, the reacquisition cost shall be charged to account 931, "Treasury stock".

(g) When treasury stock is resold, account 931, "Treasury stock", shall be credited with the cost paid for it. Gains shall be credited to account 913, "Other capital." Losses shall be charged to account 913, "Other capital," to the extent that previous net gains from sales or retirements of the same class of stock are included therein; otherwise, to account 616, "Other debits to retained earnings."

5–5 *Joint liabilities.* The accounting company shall state as a liability in its balance sheet the difference between the total par value of securities jointly or severally issued by it and others and the portion of such liability which, under the joint arrangement, it is expected will be liquidated by the other party or parties to the joint arrangement. The amount of the jointly or severally issued securities it is expected will be liquidated by the other party or parties shall be shown as a contingent liability in accordance with instruction 5–6 pertaining to contingent assets and liabilities.

5–6 *Contingent assets and liabilities.* Contingent assets and liabilities shall not be included in the body of the balance-sheet statement, but items of material amount shall be shown in a supplementary statement to the balance-sheet. Contingent assets are those without value to the accounting company until the fulfillment of conditions regarded as uncertain. Contingent liabilities include items which may, under certain conditions, become obligations of the

V 41 153 AUG 6 76 UMI

company, but are neither direct nor assumed obligations on the date of the balance sheet. Examples of contingent liabilities are items which may become obligations as a result of pending or threatened litigation, assessments or possible assessments of additional taxes, guarantees of indebtedness of others, and agreements or obligations to repurchase securities or property. Where the outcome is reasonably forseeable, such as probable tax assessment which the carrier may not reasonably expect to contest successfully, such liabilities are to be reflected in the accounts and are not to be treated as contingent liabilities.

PROPERTY ACCOUNTS

Road

0 Road.

The several primary accounts included in this general account are designed to show the cost of land and road property owned by the carrier and devoted to transportation service.

1 Engineering.

This account shall include the pay and expenses of engineers, assistants, and clerks engaged in the survey and construction of new lines and extensions, or in making additions to and betterments of the carrier's road, including wharves and docks.

LIST OF OFFICERS AND EMPLOYEES

Chief engineer.
Assistant engineers.
Bridge and signal engineer.
Architects and draftsmen.
Chief clerk and other clerks.
Transitmen and levelmen.
Rodmen and chainmen.
Cooks and porters on business cars.

ITEMS OF EXPENSE AND SUPPLIES

Atlases and maps.
Barometers.
Books for office use.
Business car service.
Cameras; compasses.
Camp equipage.
Chains for surveyors.
Drawing boards.
Drawing instruments.
Field glasses.
Furniture repairs and renewals.
Heating and lighting.
Magnets and magnifiers.
Official train service.
Paper, blue-print.
Periodicals and newspapers.
Photographic supplies.
Printing and stationery.
Provisions for business cars.
Rent and repairs of offices.
Rods for surveyors.
Sextants and slide rules.
Telegraph and telephone service.
Traveling expenses.
Triangles and tripods.

NOTE A.—When employees designated above are engaged in the maintenance of the road, their pay and expenses while thus employed shall be charged to operating expenses.

NOTE B.—Expenditures for tentative or preliminary surveys shall be carried in account 782, "Other deferred debits", until it is determined whether or not to continue the work. If the project is continued, expenditures for all surveys in connection therewith shall then be transferred to this account, and, if abandoned, to appropriate income accounts.

NOTE C.—The cost of designing, making plans and specifications, and supervising the construction of equipment shall be included in the cost of the equipment.

NOTE D.—The cost of stationery and printing supplies used for accounting purposes in connection with engineering work shall be included in account 77, "Other expenditures; General", when not directly assignable to specific road or equipment accounts.

NOTE E.—Fees and expenses of architects specially employed for designing or supervising the construction of buildings shall be included in the accounts appropriate for the cost of the buildings constructed.

2 Land for transportation purposes.

This account shall include the cost of land of necessary width acquired for roadway; the cost of land for station, office, shop, and other grounds; for ingress to or egress from such grounds; for borrow pits, waste banks, snow fences, sand fences, and other railway appurtenances; and for storage of material adjoining the right of way; the cost of land for wharves and docks and the cost of riparian or water rights necessary therefor; the cost of removing from the right of way and locating elsewhere the property of others, and the cost of the necessary land for relocation of the property when such costs are assumed by the accounting carrier.

The carrier's records shall be kept in such manner as to show separately the cost of land purchased. Proceeds from the sale of timber or of improvements purchased with right of way, less any cost of removal, shall be credited to this account.

ITEMS OF EXPENSE

Abstracts.
Appraisals.
Arbitrators in condemnation cases.
Commissions paid to others.
Condemnation expenses, including court costs and special counsel fees.
Damages to property of others.
Deferred payments for right-of-way.
Ditches for waterways when part of consideration.
Judgments and decreed costs to clear or defend titles.
Notarial fees.
Plats.
Premiums on condemnation bonds.
Recording deeds.
Payments for relinquishment of cattle passes and other rights.
Removal and relocation of buildings and other structures not purchased.
Rent of land when part of consideration for purchase.
Right-of-way agents' compensation (engaged solely in acquiring right of way).
Taxes accrued and assumed at time of purchase.

NOTE A.—The cost of land acquired in excess of that necessary for transportation operations shall be included in balance sheet account 768, "Property used in other than carrier operations." When the purchase of land acquired for transportation operations involves land not used for such purposes, the charges to this account shall be based upon the estimated cost of only that portion which is used for such purposes, and the cost of the remaining land shall be included in account 768, "Property used in other than carrier operations." Only the actual cost borne by the carrier for right-of-way and other lands acquired through vacation of streets and highways shall be included in this account. No donation should be considered as involved in the acquisition of such property.

NOTE B.—Amounts paid for options to purchase land for use in transportation operations shall be charged to account 782, "Other deferred debits." If the carrier subsequently purchases the land, the amount of the option payment shall be transferred to this account. If the carrier does not acquire the land and forfeits the option paid, the amount shall be charged to account 551, "Miscellaneous income charges."

3 Grading.

(a) This account shall include the cost of clearing and grading the roadway, and of constructing protection for the roadway, tracks, embankments and cuts.

(b) When a part of a bridge or trestle, or the entire structure, is converted by filling into an earth embankment, and the bridge or trestle is used in lieu of a temporary trestle which would otherwise be required for the filling, the estimated cost of such temporary trestle shall be included in the cost of the filling, and charged to this account. (See Note A, under account 6, "Bridges, trestles, and culverts.")

(c) When a tunnel is converted into an open cut, the cost of clearing, grubbing, and excavating shall be included in this account.

(d) When the carrier applies additional ballast to raise the height of track and leaves the old ballast in the roadbed as part of the subgrade, the cost of the excess quantity in the subgrade over the former established standard shown by the carrier's records, shall be charged to this account based on the cost of the old ballast or current grading prices, whichever is lower.

DETAILS OF ROADBED AND ITEMS OF EXPENSE

Advertising for contractors' bids.
Berm ditches.
Blasting.
Breakwaters.
Bulkheading.
Clearing land.
Cribbing.
Dikes (including those of earthen construction which are intended to function indefinitely).
Ditches (not required by right-of-way agreement).
Dressing slopes.
Excavation for conversion of tunnels into open cuts.
Filling bridges, trestles, and culverts.
Grading outfits.
Grubbing land.
Material taken from borrow pits.
New channels for streams.
Operations of steam shovels.
Payments for privilege of wasting material on the property of others.
Payments for waste banks off the right-of-way.
Retaining walls.
Revetments.
Riprap.
Spoil banks.
Temporary trestles for fills.
Tools for grading.
Wing dams.

4 Other right-of-way expenditures.

This account shall include the cost (in excess of cost of railway facilities installed, if any) actually borne by the

carrier of improvement projects (other than public improvement projects), such as the construction of canals, farm and other private passes, pipe lines, drains, and other facilities across the carrier's right-of-way.

5 Tunnels and subways.

This account shall include the cost of tunnels and subways for the passage of trains, including apparatus for ventilating and lighting and safety devices therein, other than signals.

NOTE A.—The cost of tracks, including guard rails, in tunnels shall not be charged to this account.

NOTE B.—Station subways not highway crossing are includible in account 16, "Station buildings".

NOTE C.—If a tunnel is converted into an open cut, the ledger value of the tunnel shall be credited to this account, and its service value charged to account 763, "Accumulated depreciation; Road and equipment property".

6 Bridges, Trestles, and Culverts.

This account shall include the cost of the substructure and superstructure of bridges, trestles, and culverts which carry the tracks of the carrier over watercourses, ravines, public and private highways, and other railways.

DETAILS OF BRIDGE STRUCTURES

Abutments.
Bridge signs.
Cofferdams.
Concrete and masonry ends for culverts.
Cribs.
Decking, including gravel for fire protection.
Dike protection.
Drainage systems.
Draw protection.
Drawbridge engines and machinery.
False work.
Guard timbers.
Ice breakers.
Painting (except repainting).
Pier protection.
Piers and foundations.
Pipe culverts.
Retaining walls.
Riprap around abutments.
Riprap at culverts ends.
Supports.
Water channels.
Waterproofing.
Wing dams.
Wing walls.

NOTE A.—When a part of the entire structure of a bridge or trestle is converted, by filling, into an earth embankment, the ledger value of the struuture, or of the portion thereof filled, shall be credited to this account. In case the bridge or trestle is used in lieu of a temporary trestle for the purpose of filling, the estimated cost of such temporary trestle shall be charged to account 3, "Grading". The ledger value of the structure or portion thereof, filled, less the value of the salvage and the estimated cost of trestle charged to account 3 shall be charged to account 763, "Accumulated depreciation; Road and equipment property".

NOTE B.—The cost of bridges to carry the carrier's tracks over undergrade crossing, including the necessary piers and abutments to sustain them shall be included in this account.

7 Elevated structures.

This account shall include the cost of elevated structures and foundations of elevated railway systems. This account is applicable to structures other than earthwork, which are for the purpose of elevating tracks above the grade of streets, and which are not properly classible as bridges or trestles.

NOTE.—The cost of stations and other structures built on elevated structures shall be accounted for according to the class of the structure thus superimposed and not in this account.

8 Ties.

This account shall include the cost of cross, switch, bridge and other track ties used in the construction of tracks for the movement or storage of locomotives and cars (including tracks in shops, fuel stations, supply yards, etc.), and the cost of additional ties subsequently laid in such tracks. (See Instruction 2–9(a) covering replacement betterments.)

NOTE A.—The cost of labor for unloading, distributing and placing the ties in tracks and the cost of train service in connection with the distribution of ties laid shall be charged to account 12, "Track laying and surfacing".

NOTE B.—The cost of ties used in the construction of car floats shall be included in the cost of such floating equipment.

9 Rails.

(a) This account shall include the cost of rails used in the construction of tracks for the movement or storage of locomotives and cars (including tracks in shops, fuel stations, supply yards, etc.); the cost of welding two or more lengths of rail into continuous lengths for use in construction of tracks; and the cost of the excess in weight of heavier rails laid in replacement of lighter rails.

(b) To this account shall be credited the cost (estimated if actual is not known) of the excess weight of heavier rails replaced with lighter rails.

NOTE A.—The cost of labor for unloading, distributing and placing the rails in tracks and of train service in connection with the distribution of the rails shall be charged to account 12, "Track laying and surfacing".

NOTE B.—The cost of rails used in the construction of car floats shall be included in the cost of such floating equipment.

10 Other track material.

This account shall include the cost of material used in the construction of tracks for the movement or storage of locomotives and cars (including tracks in shops, fuel stations, supply yards, etc.), except ballast and material chargeable to foregoing accounts; also the excess cost of heavier or improved "other track material" used in repairs of tracks over the cost of replacing in kind such material removed.

ITEMS OF OTHER TRACK MATERIAL

Angle bars.
Anticreepers.
Bumping posts.
Compromise joints.
Connecting rods.
Crossings, including foundations or bases.
Derails.
Frog blocking.
Frogs.
Guard-rail blocking.
Guard-rail clamps.
Guard-rail fasteners.
Guard rails, switch and other.
Main rods.
Nut locks.
Nuts.
Offset bars.
Rail braces.
Rail chairs.
Rail clips.
Rail joints.
Rail rests.
Rail shims.
Rail splices.
Splice bars.
Step chairs.
Switch chairs.
Switch crossings.
Switch lamps.
Switch locks and keys.
Switch points.
Switch stands.
Switch targets.
Switches.
Tie plates.
Tie plugs.
Tie rods.
Track bolts.
Track insulators.
Track spikes.

NOTE A.—The cost of labor and train service for distributing, unloading, and applying "other track material" shall be charged to account 12, "Track laying and surfacing".

NOTE B.—No entry is required in this account with respect to improved "other track material" unless installed under a definite plan of changing standards, such as increasing the weight of rail.

NOTE C.—The cost of "other track material" used in the construction of car floats shall be included in the cost of such floating equipment.

11 Ballast.

This account shall include the cost of gravel, stone, slag, cinders, sand, and like material used in ballasting tracks (including tracks in shops, fuel stations, supply yards, etc.) not previously ballasted, including cost of worktrain service and of unloading; cost of ballast applied in excess of ballast required to restore to its maximum height and width the ballast previously put on the roadbed; and the excess cost of improved ballast used in renewals over the cost to replace in kind to the original height and width the ballast removed. Charges to this account shall not exceed the cost of ballast applied to a depth of 24 inches beneath the tie, unless otherwise authorized by the Commission.

NOTE A.—Earth placed to form a crown in the middle of the track is not to be considered as ballast.

NOTE B.—The cost of ballast material placed on the decking of bridges solely for fire-protected purposes shall be included in account 6, "Bridges, trestles and culverts".

NOTE C.—This account shall be credited for the cost of old ballast left in the roadbed as part of the subgrade, where the quantity of such ballast exceeds the carrier's established standard due to the application of additional ballast. (See paragraph (d) of the text of account 3, "Grading".)

12 Track laying and surfacing.

This account shall include the cost of distributing (including train service), laying, and adjusting ties, rails, and other track material used in the construction of tracks for the movement or storage of locomotives or cars, including repair tracks, but not tracks on car floats.

V 41 153 AUG 6 76 UMI

It shall also include the cost of the labor expended in placing ballast in tracks not previously ballasted.

NOTE A.—The cost of distributing and adjusting ties, rails, ballast, and other track material for repairs shall be charged to operating expenses, both when such materials are replaced in kind and when replaced with improved and heavier material.

NOTE B.—The cost of work-train service in delivering ballast and of unloading such material is provided for in account 11, "Ballast".

13 Fences, snowsheds and signs.

This account shall include:

(a) Fences. The cost of right-of-way fences and snow and sand fences, farm gates, cattle guards, wing fences, aprons, and hedges, on property not previously fenced, excluding those around stockyards, fuel stations, station and shop grounds, and building sites.

(b) Snowsheds. The cost of snowsheds, including initial cost of planting trees for protecting tracks from snow.

(c) Signs. The initial cost of signs other than those for identification of bridges, signals, stations and other structures.

SIGN ITEMS

Boundary signs.
Bridge-caution signs.
Crossing signs.
Curve and elevation markers.
Division-limit signs.
Mileposts.
Monuments.
Safety-first signs at crossings.
Section-limit signs.
Slow or stop signs.
Tunnel-caution signs.
Water-station signs.
Whistle signs.
Yard-limit signs.

NOTE A.—The cost of fences (other than right-of-way boundary fences) around stock yards, fuel and water stations, and other building sites, shall be charged to the accounts appropriate for the cost of the structures.

NOTE B.—The cost of signs for identifying bridges, signals, stations, and other structures shall be included in the account appropriate for the cost of the structures.

NOTE C.—The cost of crossing signals, including crossing gates, shall be included in account 27, "Signals and interlockers".

NOTE D.—This account shall also include the cost of replacing units of such property or substantial parts of fences or snowsheds the original cost of which are charged to this account.

15 General office buildings.

This account shall include the cost of general office structures, their fixtures, appurtenances, and furniture necessary to equip the buildings ready for use.

GENERAL OFFICE STRUCTURES AND DETAILS

Breakwaters for protection of buildings.
Buildings on piers.
Drainage and sewerage systems.
Elevators and machinery.
Fences.
Computers.
Freight handling machinery.
Gas-supply systems.
Heating plants.
Lighting plants.
Pavement within ground limits.
Platforms.
Power distribution systems, interior.
Rooms for train men, dispatchers.
Sidewalks.
Telegraph offices.
Water-supply systems.

NOTE A.—Office buildings used exclusively in connection with maintenance of way shall be included in account 17, "Roadway buildings". Those used exclusively in connection with maintenance of equipment shall be included in accounts 20, "Car shops", and 21, "Locomotive ships and enginehouses", as appropriate.

NOTE B.—The cost of grading and preparing grounds, both before and after the construction of office buildings, and the cost of constructing sidewalks, driveways, and fences thereon, shall be included in the cost of the buildings, as shall also the fees and expenses of architects employed to design or supervise the construction of the buildings, but the cost of restoring the grounds after addition and betterment work shall be included in the appropriate operating expense accounts. The cost of permanent water rights shall also be included in the cost of the buildings.

16 Station buildings.

This account shall include the cost of station structures, their fixtures, appurtenances, and furniture necessary to equip the buildings ready for use.

STATION STRUCTURES AND DETAILS

Breakwaters for protection of buildings.
Buildings and rooms for trainmen.
Buildings on piers.
Coal transferring machinery (not on coal and ore wharves).
Coal trestles (not at fuel stations).
Computers.
Drainage and sewerage systems.
Elevators and machinery.
Fences.
Freight cranes and derricks.
Freight handling machinery.
Gas-supply systems.
Grain elevators and warehouses.
Heating plants.
Hoisting engines, for handling freight.
Lighting plants.
Ore-transferring machinery.
Pavement within ground limits.
Platforms, passenger, including planking between tracks.
Power distribution systems, interior.
Sidewalks.
Station footbridges (not highway crossings).
Station intertrack fences.
Telegraph offices.
Track scales.
Water-supply systems.
Yard offices.

NOTE.—The cost of grading and preparing grounds, both before and after the construction of station buildings, and the cost of constructing sidewalks, driveways, and fences thereon, shall be included in the cost of the buildings, as shall also the fees and expenses of architects employed to design or supervise the construction of the buildings, but the cost of restoring the grounds after addition and betterment work shall be included in the appropriate operating expense accounts. The cost of permanent water rights shall also be included in the cost of the buildings.

17 Roadway buildings.

This account shall include the cost of roadway shops and other roadway buildings, including drainage, water, gas, and sewer pipes and connections; and all machinery, fixtures, and furniture to equip the building ready for use.

LIST OF ROADWAY BUILDINGS

Blacksmith shops.
Breakwaters for protection of buildings.
Carpenter shops.
Fire-engine houses.
Frog shops for repair of track material.
Hand-car houses.
Lighting plants.
Lumber sheds.
Planning mills.
Rail reclamation plant.
Rail shops for repair of track material.
Rail welding plant.
Repair shops.
Scrap bins.
Section dwelling houses.
Tool houses.

NOTE.—The cost of grading and preparing grounds both before and after the construction of roadway buildings, and the cost of constructing sidewalks, driveways, and fences thereon shall be included in the cost of the buildings, as shall also the fees and expenses of architects, employed to design or supervise the construction of the buildings, but the cost of restoring the grounds after addition and betterment work shall be included in the appropriate operating expense accounts. The cost of permanent water rights shall also be included in the cost of the buildings.

18 Water stations.

This account shall include the cost of structures, facilities, and appliances necessary to equip for service, stations for supplying water. The cost of analyses of water preliminary to the establishment of water stations shall be included in this account.

WATER STATION STRUCTURES AND DETAILS

Boilers.
Breakwaters for protection of buildings.
Buildings on piers.
Cisterns and dams.
Fences.
Pump houses.
Purifying plants.
Reservoirs and wells.
Settling basins.
Stationary engines.
Steam pipes.
Tanks and foundations.
Water pipe lines.
Water-treating plants.

NOTE A.—The cost of water stations used solely for supplying water to shops, power plants, stations, hotels, tenement houses, or section houses shall be charged to the appropriate accounts relating to the property so supplied.

NOTE B.—The cost of a temporary water station established only for use during the construction period shall be included in the primary accounts to which is charged the cost of the work in connection with which the water station is used.

NOTE C.—The cost of grading and preparing grounds both before and after the construction of water station buildings, and the cost of constructing sidewalks, driveways, and fences thereon shall be included in the cost of the buildings, as shall also the fees and expenses of architects employed to design or supervise the construction of the buildings, but the cost of restoring the grounds after addition and betterment work shall be included in the appropriate operating expense accounts. The cost of permanent water rights shall also be included in the cost of the buildings.

19 Fuel stations.

This account shall include the cost of structures, facilities other than tracks, and appliances necessary to equip for service, stations for supplying fuel to locomotives and floating equipment.

FUEL STATION STRUCTURES AND DETAILS

Breakwaters for protection of buildings.
Buildings on piers.
Coal buckets and hoists.
Coal pockets and chutes.
Dumping machinery.
Elevating machinery.
Fences.
Fuel houses or stations.
Fuel-oil plants, pumps and tanks.
Fuel platforms and wharves.
Stationary engines.
Tipple cars.
Weighing apparatus.

NOTE A.—The cost of fuel stations, coal houses, etc., used soleley for supplying fuel to shops, power plants, stations, hotels, tenement houses, or section houses shall be charged to the appropriate accounts relating to the property so supplied.

NOTE B.—The cost of a temporary fuel station established only for use during the construction period shall be included in the primary accounts to which is charged the cost of the work in connection with which the fuel station is used.

NOTE C.—The cost of grading and preparing grounds both before and after the construction of fuel station buildings, and the cost of constructing sidewalks, driveways, and fences thereon, shall be included in the cost of the buildings, as shall also the fees and expenses of architects employed to design or supervise the construction of the buildings, but the cost of restoring the grounds after addition and betterment work shall be included in the appropriate operating expense accounts. The cost of permanent water rights shall also be included in the cost of the buildings.

20 Car shops.

This account shall include the cost of buildings to be used as shops and storehouses for material for maintenance of equipment; foundations, except those special to particular machines and other apparatus; furniture and fixtures other than equipment chargeable to account 44, "Shop machinery"; drainage, sewerage, and water supply systems; and plants for heat and light.

SHOP STRUCTURES AND DETAILS

Air-compressor houses.
Bins for material.
Blacksmith shops.
Breakwaters for protection of buildings.
Buildings on piers.
Car sheds and shops.
Carpenter shops.
Cinder pits and pockets.
Electric-power distribution systems within buildings.
Fire-engine houses.
Footbridges (not public highways).
Foundries and machine shops.
Gas-compressor houses.
Heating and lighting plants.
Laboratories.
Lumber sheds.
Material and supply truck tracks.
Motor-crane tracks.
Offices, shop.
Paint shops.
Pipe lines, air, and heat.
Pipe lines, gas, interior.
Planning mills and repair shops.
Platforms, shop and yard.
Scale houses and scales.
Scrap bins.
Sidewalks.
Steam-distribution systems, interior.
Storehouses.
Tanks, gas, and oil.
Test rooms.
Turntables.
Upholstering shops.
Warehouses.

NOTE A.—The cost of distinct power plant buildings for shop purposes shall be included in account 29, "Power plants". The cost of distribution systems leading from such power plants to shops shall be included in account 31, "Power-transmission systems".

NOTE B.—The cost of grading and preparing grounds both before and after the construction of shop buildings, and the cost of constructing sidewalks, driveways, and fences thereon, shall be included in the cost of the buildings, as shall also the fees and expenses of architects employed to design or supervise the construction of the buildings, but the cost of restoring the grounds after addition and betterment work shall be included in the appropriate operating expense accounts. The cost of permanent water rights shall also be included in the cost of the buildings.

NOTE C.—The cost of shop buildings devoted solely to the maintenance of way and structures shall be included in account 17, "Roadway buildings".

21 Locomotive shops and enginehouses.

This account shall include the cost of buildings to be used as shops, enginehouses, and storehouses for material for maintenance of locomotives; foundations, except those special to particular machines and other apparatus; furniture and fixtures other than equipment chargeable to account 44, "Shop machinery", drainage, sewerage and water supply systems; and plants for heat and light.

SHOP AND ENGINEHOUSE STRUCTURE AND DETAILS

Air-compressor houses.
Bins for material.
Blacksmith shops.
Breakwaters for protection of buildings.
Buildings on piers.
Carpenter shops.
Cinder pits and pockets.
Electric-power distribution systems within buildings.
Enginehouses.
Fire-engine houses.
Footbridges (not public highways).
Foundries and machine shops.
Gas-compressor houses.
Heating and lighting plants.
Laboratories.
Lumber sheds.
Material and supply truck tracks.
Motor-crane tracks.
Offices, shop.
Paint shops.
Pipe lines, air, and heat.
Pipe lines, gas, interior.
Planning mills and repair shops.
Platforms, shop and yards.
Scale houses and scales.
Scrap bins.
Sidewalks.
Steam-distribution systems, interior.
Storehouses.
Tanks, gas, and oil.
Test rooms.
Turntables.
Upholstering shops.
Warehouses.

NOTE A.—The cost of distinct power plant buildings for shop purposes shall be included in account 29, "Power plants". The cost of distribution systems leading from such power plants to shops and enginehouses shall be included in account 31, "Power-transmission systems".

NOTE B.—The cost of grading and preparing grounds both before and after the construction of shop and enginehouse buildings, and the cost of constructing sidewalks, driveways, and fences thereon, shall be included in the cost of the buildings, as shall also the fees and expenses of architects employed to design or supervise the construction of the buildings, but the cost of restoring the grounds after addition and betterment work shall be included in the appropriate operating expense accounts. The cost of permanent water rights shall also be included in the cost of the buildings.

NOTE C.—The cost of shop buildings devoted solely to the maintenance of way and structures shall be included in account 17, "Roadway buildings".

22 Storage warehouses.

This account shall include the cost of storage warehouses, including machinery and fixtures therein. The buildings herein referred to are not the ordinary freight warehouses or stations where freight is received for shipment, etc., but warehouses in which merchandise is stored and which the railway companies operate as storage warehouses.

NOTE A.—The cost of grading and preparing grounds both before and after the construction of storage warehouse buildings, and the cost of constructing sidewalks, driveways, and fences thereon, shall be included in the cost of the buildings, as shall also the fees and expenses of architects employed to design or supervise the construction of the buildings, but the cost of restoring the grounds after addition and betterment work shall be included in the appropriate operating expense accounts. The cost of permanent water rights shall also be included in the cost of the buildings.

NOTE B.—The cost of warehouses leased to noncarriers shall be charged to account 768, "Property used in other than carrier operations."

23 Wharves and docks.

This account shall include the cost of wharves, docks, dry docks, slips, float bridges, and other landings for vessels, including the cost of necessary dredging and the cost of float-bridge machinery; also the cost of piling, pile protection, cribs, coffer-dams, walls, and other necessary devices and apparatus for the operation or protection of wharves and docks.

DETAILS OF WHARVES AND DOCKS

Bridge pontoons.
Bulkheads.
Caissons and cribwork.
Dry docks.
Ferry-bridge machinery.
Ferry bridges.
Ferry slips.
Jetties and inclines.
Transfer-bridge machinery.
Transfer bridges.

NOTE A.—The cost of coal and ore wharves and docks shall be included in account 24, "Coal and ore wharves".

NOTE B.—The cost of the land on which wharves are built and cost of riparian or water rights for wharves and docks shall be charged to account 2, "Land for transportation purposes".

V 41 153 AUG 6 76 UMI

NOTE C.—The cost of buildings located on wharves shall be included in the accounts appropriate for the class of buildings.

NOTE D.—The cost of grading and preparing grounds both before and after the construction of wharves (other than coal and ore wharves) and the cost of constructing sidewalks, driveways, and fences thereon, shall be included in the cost of the wharves, but the cost of restoring the grounds after addition and betterment work shall be included in the appropriate operating expense accounts. The cost of permanent water rights shall also be included in the cost of the wharves.

24 Coal and ore wharves.

This account shall include the cost of wharves and docks for the transfer, treatment, blending, or storage of coal or ore, including the cost of necessary dredging and of conveyors, machinery, and fixtures.

NOTE A.—The structures referred to in the account do not include small transfer or storage trestles or wharves at stations where coal is stored or delivered, such trestles being classed as station buildings.

NOTE B.—the cost of grading and preparing grounds both before and after the construction of coal and ore wharves, and the cost of constructing sidewalks, driveways, and fences thereon, shall be included in the cost of the wharves, as shall also the fees and expenses of architects employed to design or supervise the construction of wharves, but the cost of restoring the grounds after addition and betterment work shall be included in the appropriate operating expense accounts. The cost of permanent water rights shall also be included in the cost of the wharves.

25 TOFC/COFC terminals.

This account shall include the cost of structures, fixtures, machinery and appurtenances comprising terminals used for loading and unloading trailers and containers on and from flat cars.

TOFC/COFC TERMINAL STRUCTURES AND DETAILS

Cranes and hoists, including related machinery and appurtenances.
Drainage and sewerage.
Fences.
Grading and preparing grounds for TOFC/COFC terminals.
Offices, TOFC/COFC terminal.
Lighting system.
Platforms, ramps and appurtenances.
Power distribution systems.
Sidewalks, pavements and driveways on terminal grounds.
Terminal trucks and tractors.

NOTE A.—"Trailer", as used in the text and elsewhere in this system of accounts unless otherwise indicated in the context, means trailer bodies used in TOFC/COFC service which are permanently mounted on running gear. "Containers" means trailer bodies used in TOFC/COFC service which are not permanently mounted on wheels or chassis, but are separated from such running gear before being loaded on flat cars.

NOTE B.—The cost of grading and preparing grounds both before and after the construction of TOFC/COFC terminals, and the cost of constructing sidewalks, driveways, and fences thereon, shall be included in the cost of the buildings, as shall also the fees and expenses of architects employed to design or supervise the construction of the buildings, but the cost of restoring the grounds after addition and betterment work shall be included in the appropriate operating expense accounts. The cost of permanent water rights shall also be included in the cost of the buildings.

26 Communication systems.

This account shall include the cost of telegraph, telephone, radio, radar, inductive train communication, and other *communication systems, including terminal* equipment.

DETAILS OF TELEGRAPH AND TELEPHONE TERMINAL EQUIPMENT

Batteries.
Cables and wires, interior.
Carrier terminating equipment.
Conduits, interior.
Connecting wires.
Current-controlling instruments.
Electric generators and motors.
Electric meters.
Engines, stationary.
Fuses and mechanical protectors.
Rectifiers.
Rheostats.
Sending and receiving instruments.
Switchboards.
Telegraph repeaters.
Telephone repeaters.
Teletypewriters.
Testing outfits.
Transformers.

DETAILS OF TELEGRAPH AND TELEPHONE OUTSIDE PLANT

Aerial attachments.
Braces.
Brackets.
Cable boxes and appurtenances.
Cable and wires, aerial.
Conduits and appurtenances.
Cross arms.
Gas and associated facilities for cables.
Guy stubs.
Guy wires.
Insulators.
Load coils.
Submarine cables and connections.
Telephone pole boxes.
Towers.
Underground cables and connections.

DETAILS OF RADIO, RADAR, AND INDUCTIVE TRAIN COMMUNICATION EQUIPMENT

Aerials or antenna, and attachments.
Buildings or towers used exclusively for wireless.
Control units.
Power generating, converting, or supply equipment.
Radar console and associated equipment.
Roadside or office equipment for all wireless systems operated on special channels between train and train, train and tower or office, or between ship and shore.
Specialized testing and repair equipment.
Transmitters and receivers, including mobile units.

NOTE A.—Radio, radar or trainphone equipment (except portable apparatus) which is permanently attached to locomotives, cars, work equipment, or other rolling stock or floating equipment shall be included in the same accounts as the equipment on which installed. Wireless sets for instruction, advertising, or entertainment shall be included in the same accounts as the building in which located.

NOTE B.—Communication systems of limited extent, not connected with other systems used for special purposes and usually installed within a single building, group of buildings, or within the limits of a station or shop layout or yard, shall be included in the same account as the building in which located or in the account appropriate for the service with which associated.

ITEMS

Buzzers, bells, dictaphone or other interoffice communication systems in an office or group of buildings.
Loud speakers, bells, or whistles in shop and other yards.
Loud speakers, public address devices, press button control lights, telautograph or other systems in stations or on platforms.
Whistles, klaxons, or horns operated from signals towers.

NOTE C.—Test sets shall be classified as tools and included in the account appropriate for their use.

27 Signals and interlockers.

This account shall include the cost of interlocking and other signals apparatus for governing the movements of locomotives, cars, and trains, and for the protection of traffic at crossings, including towers and other buildings, furniture, fixtures, and machinery in connection therewith; roadway installations for train control and remote control including the cost of the initial tests of such installation; also the cost of buildings and machinery of power plants used primarily for the production of power for the operation of signals and interlockers.

ITEMS

Automatic-train control devices other than on equipment.
Call-bell systems along track to call in flagmen.
Call boxes, electric.
Car-retarder systems.
Centralized traffic control.
Crossing flasher-light signals.
Crossing gates, highway and railway.
Crossing signals bells.
Crossing warning signals.
Interlocker buildings and machinery.
Power apparatus primarily for the operation of signals and interlockers.
Power-distribution lines primarily for the operation of signals and interlockers.
Signal buildings.
Signal machinery, poles and foundations.
Train-order signals.

NOTE A.—When signal or interlocking apparatus is located in a station building, only the cost of the signal or interlocking apparatus shall be charged to this account. The entire cost of the building shall be included in account 16, "Station buildings".

NOTE B.—The cost of track material, such as switches, special rail braces, special roads, special track fastenings, split rails, derails, derail stands, and frogs, used in connection with interlockers, shall be included in account 10, "Other track material".

NOTE C.—When derails are arranged so as to be thrown from switch stands, the cost of labor expended in the installation of the connections between the switch stand and derail and the devices for throwing the derail shall be included in account 12, "Track laying and surfacing". The cost of the material shall be included in account 10, "Other track material".

NOTE D.—The cost of grading and preparing grounds both before and after the construction of signal and interlocker buildings, and the cost of constructing sidewalks, driveways, and fences thereon, shall be included in the cost of the buildings, as shall also the fees and expenses of architects employed to design or supervise the construction of the buildings, but the cost of restoring the grounds after addition and betterment work shall be included in the appropriate operat-

ing expense accounts. The cost of permanant water rights shall also be included in the cost of the buildings.

29 Power plants.

This account shall include the cost of power-plant and substation buildings (housing machinery provided for in account 45, "Power-plant machinery"); all foundations other than those special to particular machines and apparatus; and also dams, canals, pipe lines, and accessories devoted to the utilization of water for power. Gas and sewer pipes and their connections, fixtures (including wiring) for lighting and heating, and furniture and miscellaneous fixtures shall be considered as a part of the power-plant buildings.

POWER-PLANT STRUCTURE ITEMS

Buildings.
Coal bunkers, pockets and trestles.
Fences (other than right-of-way boundary fences).
Fixtures for lighting (including wiring) and heating power-plant buildings.
Foundations (except special foundations for machines and other apparatus).
Fuel-oil tanks.
Furniture.
Hose and appliances for protecting buildings against fire.
Pavement within ground limits.
Permanent rights in water supply.
Platforms.
Smoke stacks and chimneys and their foundations when distinct from and not resting on boilers.
Water, sewer, gas, and drainage, pipes and connections.
Wells (but not pumps).

DAM, CANAL, AND PIPE-LINE ITEMS

Aqueducts.
Bridges.
Fences (other than right-of-way boundary fences).
Footbridges.
Reservoirs.
Roadways.
Sluices.
Valves.
Water rights.

NOTE A.—The cost of power-plant machinery, including stacks resting on boilers, and special foundations for machines, shall be included in account 45, "Power-plant machinery".

NOTE B.—The cost of the buildings and of the power machinery and other apparatus of plants used primarily for operating signals and interlockers shall be included in account 27, "Signals and interlockers".

NOTE C.—Investment in buildings and machinery of detached plants for furnishing power both for operating purposes and for sale shall be included in this account and in account 45, "Power-plant machinery" respectively. When plants are intended and used primarily for generating power for sale to other than common carriers, the investment shall be included in account 768, "Property used in other than carrier operations".

31 Power-transmission systems.

This account shall include the cost of systems for conveying electricity, steam, and compressed air from producing plants to place or building where used; also the cost of conduits and of poles, cross arms, insulator pins, brackets, and other pole fixtures, and of other structures for power-transmission and distribution systems, including those for electric railway operation, and lighting systems for general lighting purposes.

POWER-TRANSMISSION SYSTEM ITEMS

Air pipe-line in car yards.
Compressed air pipe-lines.
Compressed air storage tanks (not at power houses or shops).
Cut-outs (not at power houses and substations).
Overhead trolley wires.
Rail-insulating devices.
Steam-heating pipe-lines in car yards.
Switchboards (not at power houses and substations).
Third-rail insulation and protection.
Transformers (not at power houses and substations).
Underground power tubes.

POLE-LINE AND CONDUIT ITEMS

Braces and other support for holding poles in position.
Brackets, cross arms, and other pole fixtures.
Conduits for wires and cables.
Cutting and trimming trees.
Guy stubs and wires.
Manholes.
Poles and towers.
Sewer traps.
Stenciling or painting letters or numbers on poles.

NOTE A.—The cost of wire and pipe-distribution systems located within shop buildings and in stations and office buildings shall be included in the cost of the buildings, except that lateral service lines to equipment-shop machines shall be included in account 44, "Shop machinery." The cost of distribution systems used primarily for operating signals and interlockers shall be included in account 27, "Signals and interlockers."

NOTE B.—The cost of conduits and of poles and fixtures for telegraph and telephone, or signal lines shall be included in account 26, "Communication systems", or account 27, "Signals and interlockers", as appropriate. The cost of poles and conduits used for telegraph and telephone or signal lines and for power-distribution lines shall be included in the account appropriate according to their predominant use.

35 Miscellaneous structures.

This account shall include the cost of all permanent structures not provided for elsewhere, including all fixtures and furniture to equip them for use.

MISCELLANEOUS STRUCTURES ITEMS

Floodlight tower installations in yards.
Grain elevators-where grain is stored for owners.
Storehouses of general purpose materials and supplies.

NOTE A.—Small storage elevators at way stations where grain is received for shipment are classed as station buildings.

NOTE B.—The cost of grading and preparing grounds both before and after the construction of miscellaneous structures and the cost of constructing sidewalks, driveways, and fences thereon, shall be include in the cost of the structures as shall the fees and expenses of architects employed to design or supervise the construction of the buildings, but the cost of restoring the grounds after additional and beterment work shall be included in the appropriate operating expense accounts.

37 Roadway machines.

This account shall include the cost of the initial outfit of roadway machines provided for the maintenance of roadway and structures at the time the road is opened for commercial traffic, and the cost of additional roadway machines acquired subsequently. This account shall also include the cost of on and/or off-track automotive vehicles, permanently equipped with special-purpose machinery such as hydraulic cranes, derricks, ditching apparatus, pile-driving equipment, and similar machines listed below, and used exclusively in maintenance of way and structures.

LIST OF ROADWAY MACHINES

Boilers, portable.
Cars, hand.
Cars, lever.
Cars, motor inspection.
Cars, push.
Cars, (small), crane, for supply yards and general use.
Concrete mixers.
Ditching machines.
Dredging machines.
Engines, portable.
Grading outfits.
Hydraulic outfits.
Jacks, hydraulic.
Log loaders.
Pile drivers.
Plows, unloading.
Rail unloaders.
Rock crushers.
Steam rollers.
Timber trucks.

NOTE A.—When an important addition and betterment project or the construction of a new line necessitates the purchase of roadway machines to be used exclusively thereon, the cost shall be included in the accounts to which the cost of the work is charged. The amount realized from any subsequent sale, or the appraised value of the machines retained after the completion of the special work for which they were purchased, shall be credited to the accounts charged with the cost thereof. The appraised value of such machines retained shall be debited to this account and thereafter considered as the cost of such property.

NOTE B.—The cost of machines for the equipment of roadway shops will be included in the account 17, "Roadway buildings", as provided for therein.

NOTE C.—The cost of roadway machines, such as pile drivers, log loaders, hoist engines, and concrete mixers, when permanently mounted for movement on the carrier's tracks, shall be included in account 57, "Work equipment".

39 Public improvements; construction.

This account shall include amounts assessed on carrier property by governmental authority (by mutual agreement or otherwise) to cover the cost of constructing public improvements, when such assessments are made against property within defined areas of taxing districts. The account shall include carrier's portion of the cost of public improvements constructed under governmental requirements. See Instruction 2-17. The entire amount of each assessment and other liabilities for public improvements shall be included in this account as soon as the amounts are determined.

V 41 1153 AUG 6 76 UMI

ITEMS

Cost of land outside carrier's right-of-way to provide for the relocation of streets or highways or providing slopes therefor.
Cost of removal and relocation of buildings and other structures in connection with the construction of streets and highways.
Curbing streets and highways.
Damage to property of others when incidental to highway construction.
Drainage systems.
Engineering—When such costs apply to items chargeable to this account.
Flood protection.
Grading streets and highways.
Guttering streets and highways.
Irrigation systems.
Levees.
Overhead highway bridges, including approaches.
Paving streets and highways, including such pavings at crossings.
Planking, highway crossings.
Sewer systems.
Sidewalks.
Street-lighting systems.
Water works.

NOTE A.—The cost of railway facilities installed in connection with joint public improvement projects if not in excess of total costs borne by the carrier shall be included in accounts other than account 39, "Public improvements; construction", appropriate for the class of property installed. Any costs borne by the carrier in excess of the cost of railway facilities shall be charged to this account. The lessor shall charge the ocst of assessments for public improvements which is borne by joint owner tenants to the appropriate property accounts other than account 39, "Public improvements; construction", assessments from tenant owners shall be credited to account 913, "Other capital in excess of par or stated value". The owner tenants shall charge their proportionate share of the assessment to account 751, "Investments and advances; affiliated companies". The carrier shall charge the appropriate property accounts other than the public improvement account for the cost of public improvement assessments borne by nonowner tenants with contra credit to account 091300, "Purchased services; Joint facility-Credit", and the tenants shall charge their proportionate share of the assessments to account 091200, "Purchased services; Joint facility-debit".

NOTE B.—The cost to the carrier of maintaining public improvements shall be included in operating expenses.

NOTE C.—Any portion of the cost of public improvements which is included in the general tax levy for a regular taxing district shall be included in the account appropriate for the taxes.

NOTE D.—The amount of the deferred payments of assessments for public improvements, if payments are to be made within one year, shall be included in account 835, "Other current liabilities". If the payments are spread over a longer period they shall be credited to account 852, "Other liabilities". The interest paid on such assessments shall be included in account 547, "Interest on unfunded debt".

NOTE E.—Interest and penalties imposed, on basis of monthly or annual percentage rates, for failure to pay assessments within the allotted time, shall be charged to account 547, "Interest on unfunded debt".

NOTE F.—Assessments on noncarrier property for the cost of constructing public improvements shall be charged to account 768, "Property used in other than carrier operations".

44 Shop machinery.

This account shall include the cost of machinery and other apparatus in shops and engine houses, including the cost of special foundations and installation and cost of small hand tools necessary first to equip a shop.

LIST OF SHOP MACHINERY

Ash conveyors.
Air compressors.
Belting.
Blowers.
Boilers for furnishing power.
Boring machines.
Cars, motor.
Cars, push.
Cranes.
Drilling machines.
Drop tables.
Forges.
Framing machines.
Furnaces.
Grinding and polishing machines.
Hoists.
Hydraulic jacks.
Lathes.
Lifting magnets.
Metal chimneys.
Milling machines.
Motors.
Pipe cutting and threading machines.
Planers.
Pneumatic hammers.
Power equipment.
Punches.
Riveters.
Saws.
Shafting.
Shapers.
Slotters.
Stationary engines.
Steam hammers.
Vices.
Welding machines.
Woodworking machines.

NOTE A.—The cost of powerplant machinery and other apparatus for shop purposes, when located in distinct buildings, shall be included in account 45, "Power-plant machinery".

NOTE B.—The cost of foundations other than those special to particular machines and other apparatus shall be included in the cost of the building and not in this account.

45 Power-plant machinery.

This account shall include the cost of machinery and other apparatus in power plants and substations for generating and transforming power used for the operation of trains and cars or to furnish power, heat, and light for stations, shops, and general purposes, and also the cost of foundations special to particular machines or other apparatus including the cost of installation.

ITEMS

Air compressors.
Ash-conveying machinery.
Battery-charging apparatus.
Boiler-room appliances and tools.
Boilers and fittings.
Circuit breakers.
Furnaces.
Ice-manufacturing machinery and apparatus.
Lubricating devices.
Mechanical stokers.
Metal stacks on boilers.
Refrigerating machinery and apparatus.
Rotary converters.
Sewer connection for machinery.
Coal-conveying machinery.
Condensers.
Cranes.
Draft machinery.
Dynamos.
Engine-room appliances and tools.
Feed water heaters.
Special foundations for machines.
Steam-distribution systems within the plant.
Switchboards.
Tanks.
Tractors, trailers, and trucks, permanently assigned to power plants.
Transformers.
Turbines.
Water meters.
Well pumps.

NOTE A.—The cost of power machinery and other apparatus installed in a shop as part of the shop equipment shall be included in account 44, "Shop machinery".

NOTE B.—The cost of power machinery and other apparatus installed in station and office buildings shall be included in accounts 15, "General office buildings", and 16, "Station buildings", as appropriate.

NOTE C.—The cost of buildings and the power machinery and other apparatus of plants used primarily for operating signals and interlockers shall be included in account 27, "Signals and interlockers".

NOTE D.—The cost of foundations other than those special to particular machines and other apparatus shall be included in the cost of the building and not in this account.

NOTE E.—The cost of machinery and buildings of detached plants for producing power both for operating purposes and for sale shall be included in this account and in account 29, "Power plants", respectively. When plants are intended and used primarily for generating power for sale to non carriers the investment shall be included in account 768, "Property used in other than carrier operations".

Equipment

50 Equipment.

The several primary accounts included in this general account are designed to show the cost of several classes of equipment vehicles and shop and power-plant equipment owned by the carrier, or held under equipment trust agreements or other contractual obligation for purchase of the property.

52 Locomotives.

(a) This account shall include the cost of locomotives and tenders purchased or built by the carrier, and of appurtenances, furniturg, and fixtures necessary to equip them for service, including the cost of inspection, setting up, and trying out after receipt from builders, and transportation charges to the carrier's line.

(b) Records shall be maintained to reflect separately the investment cost of locomotives on the basis of their initial identification for depreciation purposes; i.e., road passenger, road freight, road switching and yard switching.

LIST OF APPURTENANCES TO LOCOMOTIVES

Air brake equipment and hose.
Arm rests.
Brake fixtures.

Cab cushions.
Clocks.
Fire-extinguishing apparatus.
Arm rests.
Gongs.
Headlamps.
Metallic packing.
Pneumatic sanding equipment.
Radio equipment, permanently attached.
Seat boxes.
Signal lamps.
Speed recorders.
Steam-gauge lamps.
Steam-heat equipment and hose.
Storm doors.
Tool boxes.
Train-signal equipment and hose.

NOTE.—Cars with motor equipment are not to be classed as locomotives.

53 Freight-train cars.

This account shall include the cost of freight-train cars of all classes, including motor-driven cars, purchased or built by the carrier, including all appurtenances, furniture, and fixtures necessary to equip them for service, and the cost of inspection and transportation charges to the carrier's line.

LIST OF FREIGHT-TRAIN CARS

Automobile.
Ballast (commercial).
Beer.
Box.
Cabin.
Caboose.
Charcoal.
Coal.
Coke.
Dump (commercial).
Express.
Flat.
Fruit.
Furniture.
Gondola.
Gondola (hopper).
Gondola (long).
Gun truck.
Hay.
Lime.
Mail.
Oil Tank.
Ore.
Logging.
Platform.
Poling.
Poultry.
Produce.
Rack.
Refrigerator.
Stock.
Tank and water (when used as commercial cars).

LIST OF APPURTENANCE TO FREIGHT-TRAIN CARS

Air-brake equipment, including hose.
Cooking equipment and utensils.
Heating units.
Lamps and fixtures.
Loading devices.
Refrigeration units.
Seats.
Speed recorders.
Train-signal equipment, including hose.
Water tanks.

54 Passenger-train cars.

This account shall include the cost of passenger-train cars of all classes, including motor-driven cars, purchased or built by the carrier, including all appurtenances, furniture, and fixtures necessary to equip them for service, and cost of inspection and transportation charges to the carrier's line.

LIST OF PASSENGER-TRAIN CARS

Automobile.
Baggage.
Baggage-express.
Baggage-mail.
Baggage-mail-express.
Buffet.
Cafe, chair, and club.
Dining.
Library.
Milk.
Observation.
Parlor.
Parlor-baggage.
Passenger.
Passenger-baggage.
Passenger-baggage-mail.
Postal.
Refrigerator-express.
Sleeping.
Smoking.
Tourists.

LIST OF APPURTENANCES TO PASSENGER-TRAIN CARS

Air-brake equipment including hose.
Bedding.
Chairs.
Coat hooks.
Curtain and fixtures.
Cushions.
Electric bells.
Floor coverings.
Heating equipment.
Ice boxes.
Ice tanks.
Kitchen equipment and utensils.
Lighting equipment.
Mail catchers.
Parcel racks.
Rangers and boilers.
Seats.
Speed recorders.
Steam-heat hose.
Table china.
Table glassware.
Table linen.
Table silver.
Toilet equipment.
Train-signal equipment, including hose.
Water tanks.

55 Highway revenue equipment.

(a) This account shall include the cost of highway vehicles used in revenue transportation service, including pickup and delivery service, substitute line-haul service, and TOFC/COFC service; also the cost of appurtenances (such as radio communication equipment) necessary to equip them for service, and the inspection and transportation costs and charges required for delivery of the vehicles into the carrier's revenue service.

(b) Records shall be maintained to identify the carrier's investment in the following equipment, including appurtenances:

LIST OF HIGHWAY REVENUE EQUIPMENT

Bogies.
Buses.
Chassis.
Containers.
Semi-trailers.
Tractors.
Trailers.
Trucks.

LIST OF APPURTENANCES TO HIGHWAY REVENUE EQUIPMENT

Fire extinguishers.
Heating units.
Radio communication equipment.
Refrigeration units.
Rigging equipment.
Road dollies.
Tarpaulins.

NOTE.—The cost of trucks and tractors, which are used exclusively at TOFC/COFC terminals for loading and unloading trailers and containers on and from flat cars shall be charged to account 25, "TOFC/COFC terminals".

56 Floating equipment.

This account shall include the cost of marine or floating equipment of all kinds except work equipment, purchased or built by the carrier, including all appurtenances, furniture, and fixtures necessary to equip it for service, and cost of inspection and transportation charges to the carrier's line.

LIST OF FLOATING EQUIPMENT

Barges.
Canal boats.
Car and other floats.
Ferryboats.
Lighters.
Power launches.
Power lighters.
Scows.
Steam boats.
Steamships.
Transfer boats.
Tugboats.

LIST OF APPURTENANCES TO FLOATING EQUIPMENT

Anchors.
Barometers.
Beds and bedding.
Binnacle lamps.
Blocks and tackle.
China, crockery, and glassware.
Chronometers.
Compasses.
Desks and furniture.
Engines and foundations.
Fire buckets and extinguishers.
Floor coverings.
Gangplants.
Heating equipment.
Hoisting equipment.
Kitchen equipment.
Life preservers.
Lighting equipment.
Linen.
Logs.
Machinery and foundations.
Masts.
Boilers and foundations.
Cables.
Capstan bars.
Charts.
Pianos and other musical instruments.
Pumps.
Railings.
Rigging.
Sails.
Scales.
Seats, chairs, and cushions.
Spyglasses and telescopes.
Steam distribution systems.
Steering equipment.
Ticket cases.
Tool boxes and tools.
Tracks on car floats.
Ventilating equipment.

57 Work equipment.

This account shall include the cost of work equipment, including motor-driven equipment, purchased or built by the carrier; cost of appurtenances, furniture, and fixtures necessary to equip it for service, and cost of inspection and transportation charges to the carrier's line.

V 41 153 AUG 6 76 UMI

LIST OF RAIL WORK EQUIPMENT

Air-brake instruction cars.
Ballast cars.
Ballast unloader cars.
Boarding cars.
Bridge cars.
Business cars.
Camp cars.
Cinder cars.
Concrete mixers (mounted).
Derrick cars.
Dirt spreaders (mounted).
Ditching cars.
Dump cars.
Dynamometer cars.
Gas tank cars.
Grading cars.
Gravel cars.
Indicator cars.
Locomotive tanks used permanently as water cars.
Locomotives.
Officers' cars.
Outfit cars.
Painters' cars.
Pay cars.
Pile drivers (mounted).
Rail cars.
Rail saws (mounted).
Salt cars.
Sanding cars.
Scale test cars.
Scraper cars.
Snow dozers.
Snow drags.
Snow plows (moved by but not attached to locomotives).
Sprinkling cars.
Steam shovels.
Steam wrecking derricks.
Supply cars.
Sweeper cars.
Tool cars.
Tool and block cars.
Water cars.
Weed burners (mounted).
Wrecking cars.

LIST OF FLOATING WORK EQUIPMENT

Derricks.
Dredges.
Pile drivers.

58 Miscellaneous equipment.

(a) This account shall include the cost of automobiles, trucks and other highway equipment not used in revenue transportation service and not provided for elsewhere; the cost of airplanes; the cost of appurtenances (such as radio communication equipment) necessary to equip them for service; and the inspection and transportation costs and charges required for delivery of the vehicles to the carrier.

(b) The cost of on and/or off-track automotive vehicles, which are permanently equipped with special-purpose machinery and used exclusively in maintenance of way and structures, shall be charged to account 37, "Roadway machines".

LIST OF MISCELLANEOUS EQUIPMENT

Airplanes.
Automobiles.
Buses.
Emergency repair vehicles.
Road dollies.
Semi-trailers.
Tractors.
Trailers.
Trucks.
Wreckers.

LIST OF APPURTENANCES TO MISCELLANEOUS EQUIPMENT

Fire extinguisher.
Radio communication equipment.
Rigging Equipment.
Tarpaulins.

General Expenditures

70 General expenditures.

The primary accounts of this general account are designed to include expenditures made in connection with the acquisition and construction of original road and equipment, and with extension, additions, and betterments to road and equipment property, when such expenditures cannot properly be included in any of the foregoing accounts as a part of the cost of any specific work. When assignable, such expenditures shall be included in the cost of the property in connection with which the expenditures occur.

76 Interest during construction.

(a) When any bonds, notes, or other evidences of indebtedness are sold, or any interest-bearing debt is incurred for acquisition and construction of original road and equipment, extensions, additions, and betterments, the interest accruing on the part of the debt representing the cost of property chargeable to road and equipment accounts (less interest, if any, allowed by depositaries on unexpended balances) after such funds become available for use and before the receipt or the completion or coming into service of the property so acquired shall be charged to this account.

(b) When such securities are sold at a premium the proportion of such premium asisgnable to the time between the date of the actual issuance of the securities and the time when the property acquired or the improvement made becomes available for service shall be credited to this account.

(c) This account shall also include such proportion of the discount and expense on funded debt issued for the acquisition of original road, original equipment, road extensions, additions, and betterments, as is equitably assignable to the period between the date of the actual issuance of securities and the time when the property acquired or the improvement made become available for the service for which it is intended. The proportion of discount and expense thus chargeable shall be determined by the ratio between the period prior to the completion or coming into service of the facilities or improvements acquired and the period of the entire life of the securities issued.

NOTE A.—Interest on bonds, notes, or other evidence of indebtedness accruing before the proceeds from the sale of the securities become available for use shall not be included in this account, nor shall there be included any interest accruing after the property with respect to which the proceeds are expended is received or becomes available for use in connection with commercial service.

NOTE B.—If any securities which have been issued or assumed by the carrier are sold or exchanged by or for the carrier for a consideration the actual money value of which at the time of such sale or exchange is less than the value of the securities at par and the accrued interest thereon, if any, the difference between the money value of the consideration received and the par value of the securities plus the accrued interest shall be deemed a discount. In no case (except as provided in the third paragraph of this account) shall discounts be included as part of the cost of anything charged to any account prescribed in this classification.

NOTE C.—Whenever interest, premium, or discount assignable to the construction period is incurred in connection with an expenditure covered by some specific road and equipment account or accounts, such interest, premium, or discount shall be charged directly to the specific accounts to which it is related.

NOTE D.—This account shall not include interest during the construction period on the carrier's own funds expended in connection with the acquisition or construction or original road and equipment, extensions, additions, and betterments.

77 Other expenditures; general.

(a) This account shall include expenditures of a general nature which are attributable to original construction or important expansion of road but which cannot be assigned directly as part of the cost of specific units or segments of property, and are not provided for in other primary accounts of this classification, such as pay and expenses of executive and general officers and their assistants engaged exclusively in connection with such construction, law expenses (other than organization expenses), stationery and printing, and taxes before property is used in transportation operations.

(b) An equitable portion of the amounts in this account applicable to retired property shall be cleared concurrently with the retirement accounting in accordance with Instruction 2-7(c); or the entire amount in this account may be charged off immediately when authorized by the Commission.

NOTE.—Expeditures of the character described in account 771, "Organization expenses", which were incurred directly in organizing the corporation and can be identified as such in the corporation records of the company, are includible in that account.

Other Property Accounts

80 Other elements of investment.

(a) This account shall include amounts resulting from adjustment of the primary property accounts to conform with cost of property in valuation records. The amount in this account shall be cleared on a consistent basis as property is retired from service or otherwise in accordance with the rules in paragraphs (b), (c), and (d) of this account. Any material amount in this account assignable to property previously retired from service shall be cleared immediately.

(b) When property is retired from service, an equitable portion of the balance in this account assignable to such property shall be cleared when the retirement entry is made. The amount so cleared, when a debit, shall be charged to account 551, "Miscellaneous income charges", or, when a credit, shall be recorded in account 519, "Miscellaneous income". The exception to this general rule with respect to a credit balance assignable to property retired is that when property classified as depreciable is retired from service and the balance in the depreciation reserve for such property is materially deficient, because of sudden retirement or other unusual cause, the portion of a credit balance cleared for the retirement, equal to the deficiency in the reserve, shall be applied to reduce the amount of loss otherwise chargeable to the depreciation reserve.

(c) A carrier may apply to the Commission for authority to clear the entire balance from this account immediately or amortize the balance over a short period of time by appropriate inclusion in account 616, "Other debits to retained earnings", or account 606, "Other credits to retained earnings". Any amount so authorized or directed by the Commission to be cleared and written off to retained income shall be in lieu of amounts includible in accounts indicated in paragraph (b).

(d) Other plans for clearance, disposition, or classification of a balance in this accounting in conformity with sound accounting principles may be submitted to the Commission with suitable details for consideration. This includes application for disposition of a balance in this account attributable to reduction of capitalization in a reorganization. An accounting procedure so applied for shall become effective only after Commission approval. Each carrier shall maintain a record of items initially included in and cleared later from this account and the basis used in computing such items.

NOTE.—The amounts attributable to past mergers, consolidations and purchases of property included in this account shall be merged with the adjustment made pursuant to paragraph (a) of this text.

90 Construction in progress.

This account shall include expenditures incurred by the carrier in the process of constructing road and equipment with its own forces or under contract during the period prior to time property is placed in transportation operations, including cost of materials and supplies located at point of use and of necessary land acquired for such projects. When a project is completed or when a segment of a large project is completed and placed in service, the cost of the completed project or the completed segment thereof shall be transferred to the appropriate road and equipment primary accounts. Separate subaccounts may be maintained for road and for equipment or for other classes of expenditures. Expenditures for relatively unimportant projects may be included directly in primary accounts.

RAILWAY OPERATING REVENUE ACCOUNTS

Transportation Revenue Accounts

100 Transportation; rail line.

The primary accounts included in this general account are designed to show amounts of money which the carrier becomes entitled to receive or which accrue to its benefit from service rendered in transporting property or persons by rail line.

101 Freight.

(a) This account shall include revenue from the transportation of freight and from transit, stop, and reconsigning privileges, upon the basis of lawful tariff rates.

(b) This account shall include collections in excess of tariff charges, except where such amounts are segregated and held subject to refund.

(c) Proceeds derived from the sale of unclaimed and refused freight which has been transported in accordance with the contract of shipment shall be credited to this account in cases where such items can be readily identified. Uncollected tariff charges on such shipments shall be charged to this account.

(d) Amounts determined to be uncollectible shall be accounted for in accordance with the text of account 130000—Uncollectible Accounts.

ITEMS TO BE CREDITED

(a) Revenue upon the basis of local freight tariff rates, regardless of class of train in which the freight is transported.

(b) The carrier's proportion of revenue upon the basis of through freight tariff rates, regardless of class of train on which the freight is transported.

(c) Revenue from transportation of mail matter, and empty mail pouches, at freight rates.

(d) Revenue from transportation of freight on special trains at rates based on weights of shipments.

(e) Revenue on basis of classifications and freight tariffs from transportation of caretakers of freight shipments.

(f) Revenue from reconsigning privileges.

(g) Revenue from stop privileges.

(h) Revenue from transit privileges.

(i) Revenue upon the basis of arbitraries out of freight, rates for water transfers (ferriage, lighterage, and floatage).

(j) Revenue from transportation of trailers and containers on flat cars in TOFC/COFC service upon the basis of all-rail line-haul freight tariff rates and under arrangements for motor carrier-railroad joint haul, and from the loading and unloading of trailers and containers on and from flat cars upon the basis of tariff rates and under arrangements for motor carrier-railroad joint haul.

ITEMS TO BE CHARGED

(a) Amounts paid as bridge and ferry arbitraries on freight.

(b) Amounts paid for completing a haul.

(c) Amounts paid for elevation of freight.

(d) Amounts paid for switching services, in connection with the transportation of freight, on the basis of switching tariffs, and allowances out of through rates, including amounts paid for switching empty cars in connection with a freight revenue movement.

(e) Amounts paid for transferring freight between stations.

(f) Arbitraries and allowances to others for lighterage and wharfage.

(g) The carrier's proportion of overcharges resulting from the use of erroneous rates, weights, classifications or computations.

(h) The carrier's proportion of refunds on account of errors in routing and billing.

(i) The carrier's proportion of uncollected revenue on freight lost or destroyed in transit.

(j) The carrier's proportion of uncollected tariff charges on damaged shipments for which charges neither shipper nor consignee is liable.

(k) Amounts paid on basis of tariff rates for loading and unloading livestock.

(l) Amounts paid to motor truck companies for hauling trailers and containers to and from TOFC/COFC terminals, and allowances to shippers who perform such service on the basis of tariff rates.

NOTE A.—Amounts paid for switching empty cars otherwise than in connection with loaded movements shall be charged to operating expense account 110733, "Miscellaneous Operating Expenses—Transportation—Train," except that amounts paid for switching equipment for repairs shall be included in the appropriate equipment repair accounts.

NOTE B.—Other carriers' proportion of revenue and of uncollectible undercharges paid by the carrier on account of its errors in routing and billing shall be charged to operating expense account 110733, "Miscellaneous Operating Expenses—Transportation—Train."

NOTE C.—When a lessee company transports freight over the tracks of another carrier on the basis of a proportion of revenues under a joint arrangement, it shall include the entire compensation in its revenues and statistics, charging the appropriate joint facility expense and rental accounts with the amounts paid the lessor company, and the lessor company shall credit the corresponding accounts.

NOTE D.—Revenue from the transportation of caretakers of freight shipments, when not included as a part of the freight charges on the waybill covering the freight shipments, shall be credited to account 102, "Passenger."

NOTE E.—This account shall be maintained so as to show separately payments and allowances for (a) terminal collection and delivery services when performed in connection with line-haul transportation of freight on the basis of freight tariff rates, further separated between (1) TOFC/COFC service, and (2) all other freight service; also (b) payments for switching services when performed in connection with line-haul transportation of freight on the basis of switching tariffs and allowances out of freight rates, including the switching of empty cars in connection with a revenue movement, and (c) payments on basis of tariff rates for loading and unloading livestock.

102 Passenger.

This account shall include the revenue from transportation of passengers at passenger tariff fares, from the transportation of passengers at special fares as provided by law, and from incidental charges in connection therewith.

ITEMS TO BE CREDITED

(a) Revenue from local passenger fares.

(b) The carriers' proportion of revenue from interline passenger fares.

(c) Revenue from extra fares.

(d) Revenue from additional fares or charges for exclusive use of a passenger car, drawing room, compartment, bedroom, etc.

(e) Revenue from mileage and scrip coupons honored for all services covered by this account.

(f) Revenue from transportation of passengers in special cars or on special trains when charge is based on passenger fare per capita, regardless of the number of passengers actually transported.

(g) Revenue from a guaranteed minimum amount not based on per capita fare, for transportation of passengers on special or chartered trains.

(h) Cash fare penalty collections.

V 41 153 AUG 6 76 UMI

(i) Unclaimed collections and deposits for transportation of passengers.

(j) Passenger fare overcharges.

(k) Revenue from transportation of corpses, based on passenger fares.

(l) Revenue from water transfers (ferriage), bridge tolls, and transfers between railway stations or between railway stations and docks, received as arbitraries in divisions of passenger fares.

ITEMS TO BE CHARGED

(a) Amounts paid as bridge tolls, and also for ferry, depot to depot and depot to dock passenger transfer service.

(b) Amounts paid for switching in completing a passenger transportation movement.

(c) Amounts paid for switching empty passenger-train cars in connection with transportation of passengers. (See Note C.)

(d) Redemptions of unused and partially unused local tickets and redemptions of carrier's proportions of unused and partially unused interline tickets.

(e) Refund of extra fares, cash fare penalty collections, and overcharges in excess of tariff fares.

(f) Uncollectible undercharges.

NOTE A.—Gross receipts from the sale of mileage tickets, and scrip books shall be credited to a suspense account. The suspense account shall be charged and this account credited with the value of coupons as honored, in connection with any of the services provided for in "Items To Be Credited."

NOTE B.—When a lessee company transports passengers over the tracks of another company under a joint arrangement upon the basis of a proportion of the passenger revenue, it shall include the entire compensation in its passenger revenue and statistics, charging the appropriate joint facility expense and rental accounts with the amounts paid the lessor company and the lessor company shall credit the corresponding joint facility accounts.

NOTE C.—Amounts paid for switching empty passenger-train cars otherwise than in connection with loaded movements, shall be charged to account 110733, "Miscellaneous Operating Expenses—Transportation—Train," except that when switched for repairs, the amounts paid shall be included in account 090923, "Repairs billed by Others—Maintenance of Equipment."

103 Passenger—related.

This account shall include the revenue from the transportation of baggage, packages, etc. on passenger trains at *other than freight or express tariff rates.* This account shall also include the revenue from berth and seat accommodations furnished in sleeping, parlor observation, chair, and other special passenger cars, also the revenue derived from the operation of passenger trains not provided for elsewhere, and dining and buffet service.

The amounts recorded in this account shall not include aid in the form of abatment or forgiveness of taxes, assumption by local governments of station maintenance costs, and other similar special indirect benefits, contributed by governmental agencies.

104 Switching.

(a) This account shall include the revenue from switching service upon the basis of lawful tariff rates. To this account shall be credited the carrier's revenue upon the basis of tariff rates, or the carrier's allowance out of through rates, from the switching of cars of all kinds, loaded or empty, either locally at a station or within a switching district, between connecting lines, between local industries, or between connecting lines and local industries; revenue upon the basis of distinct tariff rates for "trapcar" and "ferry-car" service and for spotting cars; also the revenue from interwork switching at industrial plants, and the revenue from "penalty switching" incident to the improper delivery of cars by other carriers.

(b) To this account shall be charged amounts paid others for switching when such switching service is provided for in the switching rate charged by the carrier.

NOTE.—"Penalty switching" charges paid by the carrier shall be included in expense account 110733, "Miscellaneous Operating Expenses—Transportation—Train."

105 Water transfers.

(a) This account shall include the revenue, from the transfer by water (ferriage, lighterage, and floatage) of passenger, freight, vehicles and livestock, upon the basis of lawful local tariff rates.

(b) This account also shall include revenue from water transfers of other traffic, such as the revenue from towing beyond lighterage limits and all other towing for which an extra charge is made; insurance of freight afloat when billed out at other than cost; storage of freight afloat; grain overage in boats; pumping performed for outside parties; and from other similar sources.

(c) To this account shall be charged amounts payable to other companies or individuals for extra lighterage, extra towing, and for all other service when such payments represent revenue collected and credited to this account and not a direct expense.

NOTE.—No revenue shall be included in this account for water transfers of passengers or shipments upon the basis of arbitraries out of rates for transportation involving rail line haul.

106 Demurrage.

This account shall include the revenue from the detention of cars incident to loading, unloading, reconsigning, and stops in transit upon the basis of lawful tariffs for demurrage. This account shall also include the revenue from the detention of trailers and containers used in TOFC/COFC service, incident to loading and unloading, upon the basis of tariff rates.

NOTE.—This account shall be maintained so as to reflect separately (1) revenue from detention of cars, and (2) revenue from detention of trailers and containers used in TOFC/COFC service.

110 Incidental.

This account is designed to show the amounts which the carrier becomes entitled to receive from services rendered incidentally with rail-line and water-line transportation; for the use of facilities of which the expenses for operation and maintenance are not separable from railway expenses and from incidental sources not provided for elsewhere. Among the items included in this account are revenues derived from (1) hotels and restaurants, (2) operations conducted at stations and on trains by individual or companies other than railway companies, (3) storage, (4) the sale of electric power, (5) renting property operated and maintained in connection with the property used in the carrier's transportation operations and from railway operations not provided for elsewhere.

Joint Facility Revenue Accounts

120 Joint facility.

The primary accounts included in this general account are designed to show the carrier's proportion of revenues collected by others in connection with operation of joint facilities and the amount payable by the carrier to other companies from operation of joint facilities.

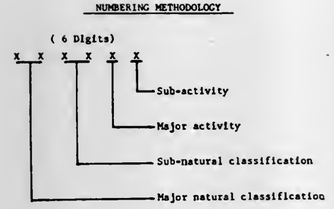
121 Joint facility—credit.

This account shall include the carrier's proportion of revenue collected by others in connection with the operation of joint tracks, yards, terminals, and other facilities, including revenue from hotels, restaurants, grain elevators, sale of power, and other miscellaneous operations.

NOTE A.—The purpose of this account is to show the amounts of revenue from the operation of joint tracks, yards, terminals and other facilities operated by other companies, which under existing contracts or agreements are credited by the operating company to the tenant companies which participate therein. The bill rendered by any creditor company against a debtor company for the latter's proportion of the expense of maintenance and operation of joint facilities, which includes also a credit covering a proportion of the revenue to be paid over, shall show the distribution of the credit for such proportion of the revenue separately from the distribution of the expense of operation.

NOTE B.—No credits shall be made to this account representing amounts creditable by the operating company to primary accounts 101–103, 105 and 110.

122 Joint facility—debit.



This account shall include that proportion of revenue from the operation of joint tracks, yards, terminals, and other facilities, which is creditable to other companies, including revenue from hotels, restaurants, grain elevators, sale of power, and other miscellaneous operations.

NOTE A.—The purpose of this account is to show the amount of revenue from operation of a terminal company or other carrier which, under the terms of existing contracts or agreements covering the joint use of tracks, yards, and other facilities, is credited to other carriers that participate in the benefits from such joint use. The bill rendered by a creditor company against a debtor company for the latter's proportion of expense of maintaining and operating joint facilities, which includes a credit covering the debtor company's proportion of the revenues from operation of such joint facilities, shall indicate separately the proper distribution of both the revenues and the expenses included in the bill, and such distribution shall be adhered to by the debtor.

NOTE B.—No debits shall be made to this account representing amounts creditable by the operating company to primary accounts 101–103, 105 and 110.

040121 Other Fringes—Federal Payroll Taxes—Maintenance of Equipment—Locomotives.

040122 Other Fringes—Federal Payroll Taxes—Maintenance of Equipment—Freight-Train Cars.

040123 Other Fringes—Federal Payroll Taxes—Maintenance of Equipment—Other Equipment.

040131 Other Fringes—Federal Payroll taxes—Transportation—Station.

040132 Other Fringes—Federal Payroll Taxes — Transportation—Yard.

040133 Other Fringes—Federal Payroll Taxes — Transportation—Train.

040134 Other Fringes—Federal Payroll Taxes — Transportation—Other Services—Coal & Ore Wharves.

040135 Other Fringes—Federal Payroll Taxes — Transportation—Other Services—Floating Equipment.

040136 Other Fringes—Federal Payroll Taxes — Transportation—Other Services—TOFC Terminal.

040137 Other Fringes—Federal Payroll Taxes — Transportation—Other Services—Other.

040140 Other Fringes—Federal Payroll Taxes—Traffic.

040150 Other Fringes—Federal Payroll Taxes—General & Administrative.

040200 Other Fringes—State Payroll Taxes.

This account may be used as a control account for all accounts in the 040200 series. This account group shall include all payroll related State taxes. Its components shall be distributed to the following accounts in accordance with instruction 1–15:

040210 Other Fringes—State Payroll Taxes—Maintenance of Way and Structures.

040221 Other Fringes—State Payroll Taxes—Maintenance of Equipment—Locomotives.

400222 Other Fringes—State Payroll Taxes—Maintenance of Equipment—Freight-Train Cars.

040223 Other Fringes—State Payroll Taxes—Maintenance of Equipment—Other Equipment.

040231 Other Fringes—State Payroll Taxes — Transportation — Station.

040232 Other Fringes—State Payroll Taxes — Transportation — Yard.

040233 Other Fringes—State Payroll Taxes — Transportation — Train.

040234 Other Fringes—State Payroll Taxes — Transportation — Coal & Ore Wharves.

040235 Other Fringes—State Payroll Taxes — Transportation — Floating Equipment.

040236 Other Fringes—State Payroll Taxes — Transportation — TOFC Terminal.

040237 Other Fringes—State Payroll Taxes — Transportation — Other.

040240 Other Fringes—State Payroll Taxes—Traffic.

040250 Other Fringes—State Payroll Taxes—General & Administrative.

040300 Other Fringes—Health and Welfare Benefits and Group Insurance.

This account may be used as a control for all accounts in the 040300 series. This account shall include premiums on group and other insurance policies covering annuities and other benefits for employees or their beneficiaries, contributions, directly to employees health and welfare funds, and salaries and other expenses incurred directly in conducting relief, benefit, and medical departments for the benefit of officers and employees. Its components shall be distributed to the following accounts in accordance with instruction 1–15:

040310 Other Fringes—Health and Welfare Benefits and Group Insurance—Maintenance of Way and Structures.

040321 Other Fringes—Health and Welfare Benefits and Group Insurance—Maintenance of Equipment—Locomotives.

040322 Other Fringes—Health and Welfare Benefits and Group Insurance—Maintenance of Equipment—Freight-Train Cars.

040323 Other Fringes—Health and Welfare Benefits and Group Insurance—Maintenance of Equipment—Other Equipment.

040331 Other Fringes—Health and Welfare Benefits and Group Insurance — Transportation—Station.

040332 Other Fringes—Health and Welfare Benefits and Group Insurance — Transportation—Yard.

040333 Other Fringes—Health and Welfare Benefits and Group Insurance — Transportation—Train.

040334 Other Fringes—Health and Welfare Benefits and Group Insurance—Transportation—Coal and Ore Wharves.

040335 Other Fringes—Health and Welfare Benefits and Group Insurance — Transportation—Floating Equipment.

040336 Other Fringes—Health and Welfare Benefits and Group Insurance — Transportation—TOFC Terminal.

040337 Other Fringes—Health and Welfare Benefits and Group Insurance — Transportation—Other.

040340 Other Fringes—Health and Welfare Benefits and Group Insurance—Traffic.

040350 Other Fringes—Health and Welfare Benefits and Group Insurance—General & Administrative.

NOTE.—Premiums on group and other insurance policies and also other costs of employees health and welfare benefits (but not including pensions) are includible in the separate primary accounts under the general accounts for maintenance, traffic, transportation, miscellaneous operations, and general expenses, as may be appropriate, according to distribution of the pay of the employees covered by the contracts. (See instruction 1–10.)

040400 Other Fringes—Pensions and Retirement Plans.

This account may be used as a control account for all accounts in the 040400 series.

(a) This account shall include amounts payable for the current year to trustees under pension plans for pension costs computed on basis of employees services in the year and for pension costs computed on basis of credits for past services. This includes retired employees and former employees covered in such plans, as well as employees now in service. The account shall also include the amount for which the carrier is liable to cover cost of pensions vested in employees who have qualified for pensions in advance of payment to trustees. This account shall include amounts payable for each year directly to retired employees or to their beneficiaries when no trust fund exists. Also, in the case of an unfunded pension plan, when an employee retires and is granted a pension the total present worth of the pension actuarially computed may be charged to this account, provided this method of accounting for such expense is consistently followed.

(b) If the amount payable to the trustees for pensions for the current year is not paid before the accounts are closed, the item (estimated if necessary) shall be charged to this account and concurrently credited to account 814, "Accrued accounts payable"; or account 805, "Audited accounts and wages payable", in the case the amount is covered by audited voucher.

(c) The amounts to be charged to this account each year for costs of pensions, including credits based upon prior services, shall be in agreement, as nearly as practicable, with deductions includible in the Federal income tax return for the year under pension plan adopted by the carrier for making payments to the trustees. When payments attributable to prior services made to trustees at the time the pension plan is adopted or subsequently

V 41 N 153 AUG 6 76 UMI

are materially in excess of deductions includible in the tax return for the year, such excess shall be included in account 782, "Other deferred debits", and cleared thereafter to this account in the years in which deductions are includible in tax returns (See Note B).

(d) Carriers shall maintain a complete record of payments to trustees for pensions and shall be prepared to furnish to the Commission full information of the plan under which it has created a pension fund and a copy of the declaration of trust and resolution under which the pension plan is established.

NOTE A.—Estimated liability heretofore authorized and recorded in the accounts as of the effective date of this system of accounts for pension costs, not funded, may be retained unless otherwise directed by the Commission. Also, payments heretofore made to trustees and charged off against income or retained earnings are not to be reversed, unless otherwise directed or authorized by the Commission.

NOTE B.—In the case of an existing pension plan, if the carrier should desire to conform its accounting to the full accrual basis of accounting, application to do so may be made to the Commission for consideration and such accounting shall not be performed unless approved by the Commission. Full accrual basis as used herein means recording in the accounts now and hereafter costs of employees pensions accrued, including credits for past services, upon the basis of actuarial computations, even though the sum has not been funded by payment to the trustees. Applications for such accounting shall show the method of computation, together with the carrier's proposal for recording in the accounts the related income tax credits to be realized in subsequent years.

Its components shall be distributed to the following accounts in accordance with instruction 1–15:

040410 Other Fringes—Pensions and retirement plans—Maintenance of Way and Structures.

040421 Other Fringes—Pensions and retirement plans—Maintenance of Equipment—Locomotives.

040422 Other Fringes—Pensions and retirement plans—Maintenance of Equipment—Freight-Train cars.

040423 Other Fringes—Pension and retirement plans—Maintenance of Equipment—Other Equipment.

040431 Other Fringes—Pension and retirement plans—Transportation—Station.

040432 Other Fringes—Pension and retirement plans—Transportation—Yard.

040433 Other Fringes—Pension and retirement plans—Transportation—Train.

040434 Other Fringes—Pension and retirement plans—Transportation—Coal and Ore Wharves.

040435 Other Fringes—Pension and retirement plans—Transportation—Floating Equipment.

040436 Other Fringes—Pension and retirement plans—Transportation—TOFC Terminal.

040437 Other Fringes—Pension and retirement plans—Transportation—other.

040440 Other Fringes—Pension and retirement plans—Traffic.

040450 Other Fringes—Pension and retirement plans—General and Administrative.

040500 Other Fringes—Other Fringes.

This account may be used as a control account for all accounts in the 040500 series. It shall include amounts paid for payroll related fringe benefits not included elsewhere. Its components shall be distributed to the following accounts in accordance with instruction 1–15:

040510 Other Fringes — Other Fringes — Maintenance of Way and Structures.

040521 Other Fringes — Other Fringes — Maintenance of Equipment — Locomotives.

040522 Other Fringes — Other Fringes — Maintenance of Equipment — Freight-Train Cars.

040523 Other Fringes — Other Fringes — Maintenance of Equipment — Other Equipment.

040531 Other Fringes — Other Fringes — Transportation—Station.

040532 Other Fringes — Other Fringes — Transportation—Yard.

040533 Other Fringes — Other Fringes — Transportation—Train.

040534 Other Fringes — Other Fringes — Transportation—Coal and Ore Wharves.

040535 Other Fringes — Other Fringes — Transportation—Floating Equipment.

040536 Other Fringes — Other Fringes — Transportation—TOFC Terminal.

040537 Other Fringes — Other Fringes — Transportation—Other.

040540 Other Fringes — Other Fringes—Traffic.

040550 Other Fringes — Other Fringes — General and Administrative.

040600 Other Fringes — Payroll fringes billed to others.

This account may be used as a control account for all accounts in the 040600 series. It shall include amounts received from others for recovery of payroll related fringe benefits. Its components shall be distributed to the following accounts in accordance with instruction 1–15:

040610 Other Fringes — Payroll fringes billed to others—Maintenance of Way and Structures.

040621 Other Fringes — Payroll fringes billed to others—Maintenance of Equipment—Locomotives.

040622 Other Fringes — Payroll fringes billed to others—Maintenance of Equipment—Freight-Train Cars.

040623 Other Fringes — Payroll fringes billed to others—Maintenance of Equipment—Other Equipment.

040631 Other Fringes — Payroll fringes billed to others—Transportation—Station.

040632 Other Fringes — Payroll fringes billed to others—Transportation—Yard.

040633 Other Fringes — Payroll fringes billed to others—Transportation—Train.

040634 Other Fringes — Payroll fringes billed to others—Transportation—Coal and Ore Wharves.

040635 Other Fringes — Payroll fringes billed to others—Transportation — Floating Equipment.

040636 Other Fringes — Payroll fringes billed to others—Transportation — TOFC Terminal.

040637 Other Fringes — Payroll fringes billed to others—Transportation—Other.

040640 Other Fringes — Payroll fringes billed to others—Traffic.

040650 Other Fringes — Payroll fringes billed to others—General & Administrative

040700 Other Fringes—Payroll fringes billed by others.

This account may be used as a control account for all accounts in the 040700 series. It shall include amounts paid to others for their recovery of payroll related fringe benefits. Its components shall be distributed to the following accounts in accordance with instruction 1–15:

040710 Other Fringes — Payroll fringes billed by others—Maintenance of Way and Structures.

040721 Other Fringes — Payroll fringes billed by others—Maintenance of Equipment—Locomotives.

040722 Other Fringes — Payroll fringes billed by others—Maintenance of Equipment—Freight-Train Cars.

040723 Other Fringes — Payroll fringes billed by others—Maintenance of Equipment—Other Equipment.

040731 Other Fringes — Payroll fringes billed by others—Transportation—Station.

040732 Other Fringes — Payroll fringes billed by others—Transportation—Yard.

040733 Other Fringes — Payroll fringes billed by others—Transportation—Train.

040734 Other Fringes — Payroll fringes billed by others—Transportation — Coal and Ore Wharves.

040735 Other Fringes — Payroll fringes billed by others—Transportation — Floating Equipment.

040736 Other Fringes — Payroll fringes billed by others—Transportation — TOFC Terminal.

040737 Other Fringes — Payroll fringes billed by others—Transportation—Other.

040740 Other Fringes — Payroll fringes billed by others—Traffic.

040750 Other Fringes — Payroll fringes billed by others—General & Administrative.

050000 Materials.

This account may be used as a control account for all accounts in the 050000 series.

050100 Materials — Locomotive Materials—New and rebuilt.

This account group includes the cost of purchased or self-manufactured parts and assemblies for use in locomotive repair. The total of such amounts may be included in this control account. Its components shall be charged to the following account(s) in accordance with instruction 1–14:

050121 Materials—Locomotives Materials—New and rebuilt—Maintenance of Equipment—Locomotives.

This account shall include the cost of materials for the maintenance of locomotives used in transportation service. This account shall be subdivided to show repair materials by the following types of locomotives:

(1) Diesel locomotives—Yard.
(2) Diesel locomotives—Road.
(3) Other locomotives—Yard.
(4) Other locomotives—Road.

050123 Materials—Locomotives Materials—New and rebuilt—Maintenance of Equipment—Other Equipment.

This account shall include the cost of locomotive materials for the maintenance of locomotives used in work service.

050200 Materials—Car Materials—New and rebuilt.

This account includes the cost of purchased or self-manufactured parts and assemblies for use in cars. This includes materials used in repairing freight-train cars, passenger train cars, and work equipment cars. The total of such amounts may be included in this control account. Its components shall be distributed to the following accounts in accordance with instruction 1–14:

050222 Materials—Car Materials—New and rebuilt—Maintenance of Equipment—Freight-Train Cars.

This account shall include the cost of materials used in connection with the maintenance of freight-train cars used in transportation service. This account shall be subdivided to show repair of freight train cars by type of equipment (See account 020822—Salaries & Wages—Repair and Maintenance Employees—Maintenance of Equipment—Freight Train Cars for list of car types).

050223 Materials—Car Materials—New and rebuilt—Maintenance of Equipment—Other Equipment.

This account shall include the cost of materials used in the maintenance of other equipment. This account shall be subdivided to show repair of other equipment by type of equipment (See account 020923—Salaries & Wages—Repair & Maintenance Employees—Maintenance of Equipment—Other Equipment for a list of equipment types, also property account 54, "Passenger train cars.")

050300 Materials—Rails.

This account shall include the cost, less salvage, of rails used in the repairs of tracks; also the cost (estimated if actual is not known) of the excess in weight of heavy rails removed and lighter rails applied in repairs of tracks. The total of such amounts may be included in this control account. Its components shall be charged to the following account(s) in accordance with instruction 1–14:

050310 Materials—Rails—Maintenance of Way and Structures.

This account includes the cost of rail used for repairs. This account shall be subdivided to show rails by the following types of tracks:

(1) Yard Switching Tracks.
(2) Running Tracks.

NOTE A.—The cost of the excess weight of heavier rails applied in repairs of tracks in replacement of lighter rails shall be included in account 9, "Rails".

050400 Materials—Ties.

This account shall include the cost of cross, switch, bridge, and other track ties used in repairs of tracks. The total of such amounts may be included in this control account. Its components shall be charged to the following account(s) in accordance with instruction 1–14:

050410—Materials — Ties — Maintenance of Way and Structures.

This account includes the cost of ties used for repairs. This account shall be subdivided to show ties by the following type of tracks:

(1) Yard Switching Tracks.
(2) Running Tracks.

050500 Materials—Ballast.

This account shall include the cost of gravel, stone, slag, cinders, sand, and like ballast material used in the repairs of tracks. The total of such amounts may be included in this control account. Its components shall be charged to the following account(s) in accordance with instruction 1–14:

050510 Materials — Ballast—Maintenance of Way and Structures.

This account includes the cost of ballast used for repairs. This account shall be subdivided to show ballast by the following type of tracks:

(1) Yard Switching Tracks.
(2) Running Tracks.

NOTE A.—The excess cost of improved ballast over the cost of replacing in kind to its maximum height and width the ballast previously put in the roadbed shall be charged to account 11, "Ballast".

050600 Materials—Other Track Material.

This account shall include the cost (less salvage) of all track material used in the repairs of tracks, other than ballast, ties, and rails. The total of such amounts may be included in this control account. Its components shall be charged to the following account(s) in accordance with instruction 1–14:

050610 Materials — Other Track Material — Maintenance of Way and Structure.

This account shall include the cost (less salvage) of all track material used in the repairs of tracks, other than ballast, ties, and rails. This account shall be subdivided to show material on the following types of track:

(1) Yard Switching Tacks.
(2) Running Tracks.

ITEMS (SEE INSTRUCTION 1–13)

ITEMS OF EXPENSE

Angle bars.
Anticreepers.
Connecting rods.
Derails.
Frog and guard-rail blocking.
Frogs.
Guard-rail clamps.
Guard-rail fasteners.
Guard-rails.
Main rods.
Nut locks.
Nuts.
Offset bars.
Rail braces.
Rail chairs.
Rail clips.
Rail joints.
Rail rests.
Rail shims.
Rail splices.
Splice bars.
Step chairs.
Switch chairs.
Switch crossings.
Switch lamps.
Switch locks and keys.
Switch points.
Switch stands.
Switch-stand bolts.
Switch targets.
Switches.
Tie plates.
Tie plugs.
Tie-rods.
Track bolts.
Track insulators.
Track spikes.

NOTE A.—The excess cost of improved or heavier track material applied for repairs of tracks, under a definite plan of changing standards, over the cost, at current prices,

V 41 153 AUG 6 76 UMI

of material of the same weight and quality as that released, shall be charged account 10, "Other Track Material".

050700 Materials—Other Material.

This account includes the cost of material, not classified elsewhere, used for repairs. The total of such amounts may be included in this control account. Its components shall be distributed to the following accounts in accordance with instruction 1–14:

050710 Materials—Other Material—Maintenance of Way and Structure.

This account includes the cost of materials, not classified elsewhere, used for repairs of the following structures. Where applicable this account shall be subdivided to show Other Materials by the following types of track.

(1) Yard Switching Tracks.
(2) Running Tracks.

LIST OF STRUCTURES (SEE INSTRUCTION 1–13)

(1) Tunnels & Subways.
(2) Bridges, Trestles and Culverts.
(3) Elevated Structures and foundations of elevated railway systems.
(4) Fences, Snowsheds, and Signs.
(5) Station Buildings.
(6) General Office Buildings.
(7) Roadway Buildings.
(8) Water Station.
(9) Fuel Station.
(10) Shops.
(11) Enginehouses.
(12) Storage Warehouses.
(13) Wharves and Docks.
(14) Coal & Ore Wharves.
(15) TOFC/COFC Terminals.
(16) Communication Systems.
(17) Signals & Interlocker.
(18) Power Plants.
(19) Power-Transmission Systems.
(20) Miscellaneous Structures.
(21) Roadway Machines.
(22) Public Improvements.
(23) Shop Machinery.
(24) Power Plant Machinery.

050723 Materials—Other Material—Maintenance of Equipment—Other Equipment.

This account includes the cost of materials, not classified elsewhere, used for repairs. This account shall include the cost of materials used for repairing:

(1) floating equipment,
(2) miscellanous equipment.

060000 Tools and operating supplies.

This account may be used as a control account for all accounts in the 060000 series.

060100 Tools and Operating Supplies—Train and Locomotive Supplies.

This account shall include the cost of supplies furnished for use on cars and locomotives in transportation train service. Among the items included in this account are cleaning and polishing compounds, brooms, brushes, cups, fuses, lanterns, medical boxes, oil for lanterns, shovels, signal boxes, torpedoes, towels, and uniforms. The total of such amounts may be included in this control account. Its components shall be charged to the following account(s) in accordance with instruction 1–14:

060132 Tools and Operating Supplies—Train and Locomotive Supplies—Transportation—Yard.

060133 Tools and Operating Supplies—Train and Locomotive Supplies—Transportation—Train.

060200 Tool and Operating Supplies—Operating and Service Tools.

This account may be used as a control account for all accounts in the 060200 series. This account includes the cost of all tools requisitioned from stores or obtained directly. The total of such amounts may be included in this control account. Its components shall be charged to the following account(s) in accordance with instruction 1–14:

060210 Tools and Operating Supplies—Operating and Service Tools—Maintenance of Way and Structures.

060221 Tools and Operating Supplies—Operating and Service Tools—Maintenance of Equipment—Locomotives.

060222 Tools and Operating Supplies—Operating and Service Tools—Maintenance of Equipment— Freight-Train Cars.

060223 Tools and Operating Supplies—Operating and Service Tools—Maintenance of Equipment—Other Equipment.

060231 Tools and Operating Supplies—Operating and Service Tools — Transportation—Station.

060232 Tools and Operating Supplies—Operating and Service Tools — Transportation—Yard.

060233 Tools and Operating Supplies—Operating and Service Tools — Transportation—Train.

060234 Tools and Operating Supplies—Operating and Service Tools — Transportation—Other Services—Coal & Ore Wharves.

060235 Tools and Operating Supplies—Operating and Service Tools — Transportation — Other Services — Floating Equipment.

060236 Tools and Operating Supplies—Operating and Service Tools — Transportation — Other Services — TOFC Terminal.

060237 Tools and Operating Supplies—Operating and Service Tools — Transportation — Other Services — Other.

060300 Tools and Operating Supplies—Other Supplies.

This account may be used as a control account for all accounts in the 060300 series. The total of such amounts may be included in this control account. This account shall include the cost of all supplies not classified elsewhere.

ITEMS (SEE INSTRUCTION 1–13)

Foods & Beverages.
Dining, Buffet & Bar Supplies.
Cutting & Welding Supplies.
Electrical Supplies.
Cleaning & Other Housekeeping Supplies.
Laundry.
Ice.
Miscellaneous Supplies.

Its components shall be charged to the following account(s) in accordance with instruction 1–14.

060310 Tools and Operating Supplies—Other Supplies—Maintenance of Way and Structures.

060321 Tools and Operating Supplies—Other Supplies—Maintenance of Equipment—Locomotives.

060322 Tools and Operating Supplies—Other Supplies—Maintenance of Equipment—Freight-Train Cars.

060323 Tools and Operating Supplies—Other Supplies—Maintenance of Equipment—Other Equipment.

060331 Tools and Operating Supplies—Other Supplies—Transportation—Station.

060332 Tools and Operating Supplies—Other Supplies—Transportation—Yard.

060333 Tools and Operating Supplies—Other Supplies—Transportation—Train.

060334 Tools and Operating Supplies—Other Supplies—Transportation — Coal & Ore Wharves.

060335 Tools and Operating Supplies—Other Supplies—Transportation — Floating Equipment.

060336 Tools and Operating Supplies—Other Supplies—Transportation — TOFC Terminal.

060337 Tools and Operating Supplies—Other Supplies—Transportation—Other.

060340 Tools and Operating Supplies—Other Supplies—Traffic.

060350 Tools and Operating Supplies—Other Supplies—General & Administrative.

070000 Fuels and lubricants.

This account may be used as a control account for all accounts in the 070000 series.

070100 Fuels and Lubricants—Diesel Fuel—Switching.

This account may be used as a control account for all accounts in the 070100 series.

070132 Fuels and Lubricants—Diesel Fuel — Switching — Transportation—Yard.

This account shall include the cost of diesel fuel consumed in switching service in yards where regular switching service is mantained and in terminal switching and transfer service.

070133 Fuels and Lubricants—Diesel Fuel — Switching — Transportation—Train.

This account shall include the cost of diesel fuel consumed by train locomotives in train-switching service.

070200 Fuels and Lubricants—Diesel Fuel—Running.

This account may be used as a control account for all amounts in the 070200 series.

070233 Fuels and Lubricants—Diesel Fuel — Running — Transportation—Train.

This account includes the cost of all diesel fuel for propulsion of trains in transportation service.

070300 Other Motive Power Fuels—Switching.

This account may be used as a control accounts in the 070300 series. This account includes the cost of all locomotive fuels other than diesel fuels used in switching service. This account shall also include the cost of electric power purchased for the propulsion of engines and cars in switching service.

070332 Other Motive Power Fuels—Switching — Transportation — Yard.

This account includes the cost of all locomotive fuels other than diesel fuels used in yard switching service. This includes coal, coke, oil and wood.

070333 Other Motive Power Fuels—Transportation—Train.

This account includes the cost of all locomotive fuels other than diesel fuels consumed by locomotives engaged in train switching service.

070400 Fuels and Lubricants—Other Motive Power Fuels—Running.

This account may be used as a control account for all amounts in the 070400 series.

070433 Fuels and Lubricants—Other Motive Power Fuels—Running—Transportation—Train.

This account includes the cost of all locomotive fuels other than diesel fuels consumed by locomotives engaged in Transportation train service.

070500 Fuels and Lubricants—Gasoline.

This account includes the cost of gasoline used for fuel in various vehicles. This account may be used as a control account for all accounts in the 070500 series. Its components shall be distributed to the following accounts in accordance with instruction 1–14:

070510 Fuels and Lubricants—Gasoline—Maintenance of Way and Structures.

070521 Fuels and Lubricants—Gasoline—Maintenance of Equipment—Locomotives.

070522 Fuels and Lubricants—Gasoline—Maintenance of Equipment—Freight-Train Cars.

070523 Fuels and Lubricants—Gasoline—Maintenance of Equipment—Other Equipment.

070531 Fuels and Lubricants—Gasoline — Transportation — Station.

070532 Fuels and Lubricants—Gasoline — Transportation — Yard.

070533 Fuels and Lubricants—Gasoline — Transportation — Train.

070534 Fuels and Lubricants—Gasoline — Transportation — Other Services—Coal & Ore Wharves.

070535 Fuels and Lubricants—Gasoline — Transportation — Other Services — Floating Equipment.

070536 Fuels and Lubricants Gasoline — Transportation — Other Services — TOFC Terminal.

070537 Fuels and Lubricants—Gasoline — Transportation — Other Services—Other.

070540 Fuels and Lubricants—Gasoline—Traffic.

070550 Fuels and Lubricants—Gasoline—General & Administrative.

070600 Fuels and Lubricants—Fuel for Heating.

This account includes the cost of fuel used for heating (such as that used for heating cars and buildings). This account may be used as a control account for all accounts in the 070600 series. Its components shall be distributed to the following accounts in accordance with instruction 1–14.

070610 Fuels and Lubricants—Fuel for Heating—Maintenance of Way and Structures.

070621 Fuels and Lubricants—Fuel for Heating—Maintenance of Equipment — Locomotives.

070622 Fuels and Lubricants—Fuel for Heating—Maintenance of Equipment — Freight-Train Cars.

070623 Fuels and Lubricants—Fuel for Heating—Maintenance of Equipment — Other Equipment.

070631 Fuels and Lubricants—Fuel for Heating — Transportation—Station.

070632 Fuels and Lubricants—Fuel for Heating — Transportation—Yard.

070633 Fuels and Lubricants—Fuel for Heating — Transportation—Train.

070634 Fuels and Lubricants—Fuel for Heating — Transportation—Other Services—Coal & Ore Wharves.

070635 Fuels and Lubricants — Fuel for Heating — Transportation — Other Services—Floating Equipment.

070636 Fuels and Lubricants — Fuel for Heating — Transportation — Other Services — TOFC Terminal.

070637 Fuels and Lubricants — Fuel for Heating — Transportation — Other Services — Other.

070640 Fuels and Lubricants — Fuel for Heating—Traffic.

070650 Fuels and Lubricants — Fuel for Heating — General & Administrative.

070700 Fuels and Lubricants—Lubricants.

This account includes the cost of lubricants used in locomotives, railroad cars, work equipment, shop machinery, small tools and supplies, etc. This account may be used as a control account for all accounts in the 070700 series. Its components shall be distributed to the following accounts in accordance with instruction 1–14:

070710 Fuels and Lubricants—Lubricants—Maintenance of Way and Structures.

070721 Fuels and Lubricants—Lubricants — Maintenance of Equipment—Locomotives.

070722—Fuels and Lubricants—Lubricants — Maintenance of Equipment—Freight-Train Cars.

070723 Fuels and Lubricants—Lubricants — Maintenance of Equipment—Other Equipment.

070732 Fuels and Lubricants—Lubricants — Transportation — Yard.

070733 Fuels and Lubricants—Lubricants — Transportation — Train.

070734 Fuels and Lubricants—Lubricants — Transportation — Other Services—Coal & Ore Wharves.

070735 Fuels and Lubricants—Lubricants — Transportation — Other Services—Floating Equipment.

070736 Fuels and Lubricants—Lubricants — Transportation — Other Services — TOFC Terminal.

070737 Fuels and Lubricants—Lubricants — Transportation — Other Services—Other.

080000 Utilities.

This account may be used as a control account for all accounts in the 080000 series. This account includes the cost of electricity, steam, water, and other utilities purchased or produced and used for power, heat, lighting, sanitation, etc. This does not include the cost of utilities used as power for locomotives.

V 41 153 AUG 6 76 UMI

The total of such amounts may be included in this control account. Its components shall be distributed to the following accounts in accordance with instruction 1-14:

080010 Utilities — Maintenance of Way and Structures.

This account shall be charged and accounts 721, 722 and 724 credited, as appropriate, with receivables for carrier operating revenues, including interline proportions of revenue due from other carriers, which have proved uncollectible. If accounts which have been so written off are afterwards collected, the amount received shall be credited to this account. Debits to this account may be made monthly on the basis of the estimated average loss of revenue due to uncollectible accounts in which case the concurrent credit shall be to Account 729—"Allowance for Uncollectible Accounts (Credit)." To the allowance thus established shall be charged such amounts as are determined to be uncollectible and amounts written off and subsequently collected shall be credited to the allowance. When charges to this account are made by estimate, the estimate shall be adjusted at the end of each calendar year to conform to the experience of the accounting carrier as determined by analysis of its accounts receivable.

130050 Uncollectible Accounts—General & Administrative.

140000 Depreciation.

This account may be used as a control account for all accounts in the 140000 series. This account shall include the amount of depreciation charges applicable to the accounting period for all classes of depreciable road property and equipment. (Refer to depreciation instructions 4-1 through 4-5.)

Depreciation shall be kept by the following primary accounts:

ROAD ACCOUNTS

1. Engineering
3. Grading
4. Other Right-Of-Way Expenditures
5. Tunnels & Subways
   Yard Switching Tracks
   Running
6. Bridges, Trestles and Culverts
   Yard Switching Tracks
   Running Tracks

58. Miscellaneous Equipment

The total of such amounts shall be distributed to the following activities in accordance with instruction 1-14:

140010 Depreciation—Maintenance of Way and Structures.
140021 Depreciation—Maintenance of Equipment—Locomotives.
14023 Depreciation—Maintenance of Equipment — Freight-Train Cars.
14023—Depreciation—Maintenance of Equipment—Other Equipment.

150000 Amortization.

This account shall be used as a control account for all accounts in the 150000 series. This account shall include the amounts of amortization when authorized by the Commission.

The total of such amounts shall be distributed to the following accounts in accordance with instruction 1-14:

150010 Amortization — Maintenance of Way and Structures.
150021 Amortization — Maintenance of Equipment—Locomotives.
150022 Amortization — Maintenance of Equipment—Freight-Train Cars.
150023 Amortization — Maintenance of Equipment — Other Equipment.

160000 Retirements.

This account may be used as a control account for all accounts in the 160010 series.

160010 Retirements—Maintenance of Way and Structures.

(a) This account shall include charges for the service value (ledger value less value of salvage) of nondepreciable road property retired, excluding rail, ties, and other track material, and ballast used in repairs, as defined in this classification. When rails, ties, and other track material are removed and replaced in the process of repairing tracks such work shall be classified as maintenance and the items of material so replaced are not to be recorded as nondepreciable road property retired.

(b) When road property previously subject to amortization accounting (pursuant to rules in effect during the period 1941–1951 consistent with section 124, "Amortization deductions", of the Internal Revenue Code) is retired the difference between (1) the service value (ledger value less salvage value and insurance recovered) thereof, and (2) the balance in account 764, "Accumulated Amortization; Road and Equipment Property—Defense Projects", and account 767 "Accumulated Amortization; Improvements on leased property—Defense Projects", after appropriate adjustment for any depreciation accrued thereon, shall be included in this account.

(c) This account shall also be charged with such amounts as are concurrently credited to accounts 76 and 77 in accounting for the retirement of road property.

160020 Retirements—Maintenance of Equipment.

This account group may be used as a control group for all accounts in the 160020 series.

(a) When equipment previously subject to amortization accounting (pursuant to rules in effect during the period 1941–1951 consistent with section 124, "Amortization deductions", of the Internal Revenue Code) is retired the difference between (1) the service value (ledger value less value of salvage and insurance recovered), thereof, and (2) the balance in account 764, "Accumulated Amortization; Road and Equipment Property—Defense Projects", and account 767, "Accumulated Amortization—Improvements on leased property—Defense projects", after appropriate adjustment for any depreciation accrued thereon, shall be included in this account.

(b) This account shall also be charged with such amounts as are concurrently credited to accounts 76 and 77 in accounting for the retirement of equipment.

V 41 153 AUG 6 76 UMI

The total of such amounts shall be distributed to the following accounts in accordance with instruction 1-14:

160021 *Retirements—Maintenance of Equipment—Locomotives.*
160022 *Retirements—Maintenance of Equipment—Freight-Train Cars.*
160023 *Retirements—Maintenance of Equipment—Other Equipment.*

INCOME ACCOUNTS

Ordinary Items

501 Railway operating revenues.

This account shall include the total revenues derived from operations as shown in the primary revenue accounts provided elsewhere in these regulations.

502 Revenues from property used in other than carrier operations.

This account shall include the total revenues derived from property used in other than carrier operations, the cost of which is includible in balance-sheet account 768, "Property used in other than carrier operations."

508 Joint facility rent income.

(a) This account shall include amounts receivable accrued for rent of equipment, tracks, yards, terminals, and other facilities owned or controlled by the accounting company and used jointly with other companies or individuals.

(b) Amounts receivable from other companies in reimbursement for taxes on property jointly used shall be credited to this account.

NOTE.—The portion of the cost of maintenance, operation, or administration of joint facilities recoverable from others shall be credited to the various joint facility accounts provided for operating expenses. When the compensation for the use of joint facilities is a fixed amount or is based upon a charge per passenger, ton, car, or other unit, it shall be fairly apportioned by the creditor between this account and the appropriate joint facility operating expense accounts.

509 Income from lease of road and equipment.

(a) This account shall include the amount earned from leasing on an exclusive basis, road, tracks, or bridges (including equipment or other railway property covered by the contract), the rented property being owned or controlled by the accounting company, whether payable to the accounting company in cash or disbursed by the lessee on behalf of the accounting company as interest on funded debt, guaranteed dividends on stock, or otherwise.

(b) When the lessor company maintains the road and equipment leased, the cost of maintaining the property rented shall be charged to this account, except that when the rent thus receivable for the use of property other than equipment is relatively small and the expense of maintenance is not separable, the entire amount received may be credited to revenue account 110, "Incidental Revenue."

(c) If, under the terms of a lease, the deficit, or any portion of it, resulting from the lessee company's operations of the property leased is payable by the lessor company, the amount thus payable shall be charged to this account by the lessor.

NOTE A.—When taxes on leased property are assumed by the lessor, the accruals of such taxes shall be included in the lessor's account 120150, "Operating taxes—property."

NOTE B.—If property the rent of which is chargeable to account 542, "Rent for leased roads and equipment," is sublet by the accounting company, the rent receivable therefor shall be credited to this account.

NOTE C.—When specific charges against the lessee are made by the lessor for repairs of equipment which is actually maintained by it the amount of such charges shall be appropriately credited by the lessor to its equipment repair accounts and charged by the lessee to the corresponding accounts.

510 Miscellaneous rent income.

(a) This account shall include such rents of property owned and controlled by the accounting carrier as are not provided for in the foregoing accounts.

(b) This account shall be charged with the cost of maintenance of the property rented, also specific incidental expenses in connection with such property, such as the cost of negotiating contracts, advertising for tenants, fees paid conveyances, collectors' commissions, and analogous items.

NOTE A.—If property the rent of which is chargeable to account 543—"Miscellaneous rents," is sublet by the accounting company, the rent receivable therefor shall be credited to this account.

NOTE B.—Taxes on property the rent of which is creditable to this account shall be charged to account 535—"Taxes on property used in other than carrier operations."

NOTE C.—The rent from property carried in balance-sheet account 768 "Property used in other than carrier operations," shall not be included in this account, but in account 502—"Revenues from property used in other than carrier operations."

NOTE D.—Rent and other income from real estate acquired for new lines or for additions and betterments shall be credited to the appropriate road and equipment accounts until the completion or coming into service of the property.

512 Separately operated properties; profit.

(a) This account shall include amounts earned under the terms of agreements or contracts whereby the surplus resulting from the operation by others of properties of other companies having a separate corporate existence is to be paid, in whole or in part, to the accounting company.

(b) In determining the amount earned by the accounting company, consideration shall be given not only to the operating revenues and operating expenses but also to other items of income or deduction which affect that amount.

NOTE A.—The amount payable by the operating company shall be charged by it to account 550, "Income transferred to other companies."

NOTE B.—Dividends or other returns upon securities issued by separately operated companies, and held or controlled by the accounting company, shall be included in accounts 513, "Dividend income," 514, "Interest income," or 516, "Income from sinking and other funds," as may be appropriate.

513 Dividend income.

(a) This account shall include dividends declared on railway and other stocks, the income from which is the property of the accounting company, whether such stocks are owned by the accounting company and held in its treasury or deposited in trust, or are controlled through lease or otherwise.

(b) Dividends declared shall not be credited prior to actual collection unless their payment is reasonably assured by past experience, guaranty, anticipated provision, or otherwise. (See Note C to account 725, "Interest and dividends receivable.")

(c) Accruals of guaranteed dividends may be included in this account if their payment is reasonably assured.

NOTE A.—This account shall not include credits for dividends on stocks issued or assumed by the accounting company and owned by it, whether pledged as collateral or held in its treasury, in special deposits, or in sinking or other funds.

NOTE B.—Dividends on stocks of other companies held in sinking or other funds shall be credited to account 516, "Income from sinking and other funds."

514 Interest income.

(a) This account shall include the interest on securities and debenture stock of other companies, the income from which is the property of the accounting company whether such securities are owned by the accounting company and held in its treasury or deposited in trust, or are controlled through lease or otherwise.

(b) The account shall also include interest on notes and other evidences of indebtedness and interest on bank balances, open accounts, and other analogous items, including discount on short-term notes. Interest shall not be accrued unless its payment is reasonably assured by past experience, guaranty, anticipated provision, or otherwise. (See Note C to account 725, "Interest and dividends receivable.")

(c) At the option of the accounting company there may be included each year in this account the portion, applicable to the fiscal period, of the amount requisite to extinguish, during the interval between the date of acquisition and the date of maturity, the discount or premium on securities of other companies owned (other than short-term notes). Amounts thus credited or charged shall be concurrently charged or credited to the account in which the cost of the securities is carried. The discount on short-term notes shall be distributed through equal monthly credits, over the terms of the notes.

NOTE A.—This account shall not include interest on securities issued on assumed by the accounting company and owned by it, whether pledged as collateral or held in its

treasury, in special deposits, or in sinking or other funds.

NOTE B.—Interest on securities other than those of the accounting company, and on other assets held in sinking or other funds shall be included in account 516, "Income from sinking and other funds."

NOTE C.—Discount on bills for material purchased shall be credited to the accounts to which is charged the cost of the material with respect to which the discount is allowed.

516 Income from sinking and other funds.

(a) This account shall include the income on cash, securities, and other assets (not including securities issued or assumed by the accounting company) held in sinking and other funds. (See Note C to account 725, "Interest and dividends receivable.")

(b) At the option of the accounting company there may be included each year in this account the portion, applicable to the fiscal period, of the amount requisite to extinguish, during the interval between the date of acquisition and the date of maturity, the discount or premium on funded securities held in sinking or other funds. Amounts thus credited or charged shall be concurrently charged or credited to the account in which the cost of the securities is carried.

517 Release of premiums on funded debt.

This account shall include, during each fiscal year, such proportion of the premiums on outstanding funded debt as may be applicable to the period. (See Instruction 5-3.)

518 Contributions from other companies.

(a) This account shall include amounts received or receivable from other companies or individuals, representing the whole or a part of the net deficit of the accounting company when, under the terms of agreements or contract, no obligation for subsequent reimbursement is incurred.

(b) In determining the amount receivable by the accounting company, consideration shall be given not only to the operating revenues and operating expenses, but also to other items of income or deduction which affect that amount.

NOTE.—The amount payable shall be charged by the contributing company to account 545, "Separately operated properties—Loss."

519 Miscellaneous income.

(a) This account shall include all items, not provided for elsewhere, properly creditable to income accounts during the current year. Among the items which shall be included in this account are:

(1) Cancellation of balance sheet accounts representing unclaimed wages and vouchered accounts written off because of carrier's inability to locate the creditor.

(2) Profit from sale of securities carried as temporary cash investments.

(3) Profit from sale of land use for transportation purposes, of noncarrier property and of securities acquired for investment purposes.

(4) Profit from company bonds reacquired.

(b) Gains from extinguishment of debt shall be aggregated and, if material, credited to account 570, "Extraordinary Items," upon approval by the Commission.

531 Railway operating expenses.

This account shall include total expenses caused by operations, as shown in the primary expense accounts provided in these regulations.

534 Expenses of property used in other than carrier operations.

This account shall include the depreciation and expenses incurred on property used in other than carrier operations. The cost of this property is includible in balance-sheet account 768, "Property used in other than carrier operations".

535 Taxes on property used in other than carrier operations.

This account shall include accruals of taxes paid or payable upon property used in other than carrier operations. The cost of this property is included in account 768, "Property used in other than carrier operations".

541 Joint facility rents.

(a) This account shall include amounts payable accrued as rent for equipment, tracks, yards, terminals, and other facilities owned or controlled by other carriers, companies, or individuals, and in the joint use of which the accounting company participates.

(b) Amounts paid or payable by the accounting company in reimbursement for taxes on property jointly used shall be charged to this account.

NOTE.—The cost of maintenance, operation, or administration of joint facilities, chargeable to the accounting company, shall be charged to the various joint facility accounts provided for operating expenses. When the compensation for the use of joint facilities is a fixed amount or is based upon a charge per passenger, ton, car, or other unit, it shall be fairly apportioned between this account and the appropriate joint facility operating expense accounts. This apportionment shall be made by the operating company, and shall be followed by the accounting company.

542 Rent for leased roads and equipment.

This account shall include amounts payable accrued as rent for roads, tracks, or bridges (including equipment or other railway property covered by the contract) the property being owned by other companies and held under lease or other agreement by the terms of which exclusive use and control for operating purposes are secured. The entire amount of rent payable by the lessee in accordance with the agreement shall be included in this account, whether paid to the lessor in cash or disbursed by the lessee on behalf of the lessor, as interest on funded debt, guaranteed dividends on stock, or otherwise.

NOTE A.—When taxes on leased property are assumed by the lessee the accruals of such taxes shall be included in the lessee's account 120150, "Operating Taxes—Property Taxes—General and Administrative".

NOTE B.—If, under the terms of a lease, the deficit or any portion of it resulting from the lessee's operation of the property leased is payable by the lessor company, the amount shall be charged to account 509, "Income from lease of road and equipment," by the lessor and credited to this account by the lessee.

NOTE C.—If property, the rent of which is chargeable to this account, is sublet by the accounting company to others, the rent from the sublease shall be credited to account 509, "Income from lease of road and equipment."

NOTE D.—Payments for the exclusive use of road and equipment maintained by the lessor and used in the accounting company's operations (when considerable in amount and when not provided for in the classifications of operating expenses) shall be divided into two portions: One, representing the cost of maintenance shall be charged to the appropriate maintenance accounts and the other, representing rent (amount applicable to the investment in the property), shall be charged to this account.

NOTE E.—When specific charges against the lessee are made by the lessor for repairs of equipment which is actually mantained by it, the amount of such charges shall be appropriately credited by the lessor to its equipment repair accounts and charged by the lessee to the corresponding accounts.

543 Miscellaneous rent expenses.

This account shall include rents payable accrued on property held by the accounting company under lease or other agreement and not properly chargeable to any of the foregoing accounts.

NOTE A.—This account shall not include rents provided for in the operating expense accounts.

NOTE B.—If property, the rent of which is chargeable to this account is sublet to others, the rent from the sublease shall be credited to account 502, "Revenue from property used in other than carrier operations."

NOTE C.—Payments for the exclusive use of miscellaneous property maintained by the lessor and used by the accounting company shall be divided into two portions: One, representing the cost of maintenance, shall be charged to the appropriate operating accounts, and the other, representing rent (amount applicable to the investment in the property), shall be charged to this account. The bill rendered by the creditor shall show the distribution of the payments as between maintenance and rent, and such distribution shall be adhered to by the debtor.

544 Miscellaneous taxes.

This account shall include all accruals for taxes not provided for elsewhere, such as taxes on securities owned, and taxes on income from securities owned.

545 Separately operated properties; loss.

(a) This account shall include amounts payable under the terms of agreements or contracts whereby the deficit resulting from the operation by others of properties of other companies having a separate corporate existence is to be paid, in whole or in part, by the accounting company.

(b) In determining the amount payable by the accounting company, consideration shall be given not only to the

V 41 153 AUG 6 76 UMI

operating revenues and operating expenses, but also to other items of income or deductions which affect that amount.

NOTE A.—The amount receivable by the operating company shall be credited by it to account 518, "Contributions from other companies."

NOTE B.—Dividends or other returns upon securities issued by separately operated companies and held or controlled by the accounting company shall not be included in this account to offset a deficit payable, but in accounts 513, "Dividend income"; or 514, "Interest income," as may be appropriate.

546 Interest on funded debt.

This account shall include the current accruals of interest on all classes of long-term debt, the principal of which is includible in accounts 842, "Funded debt unmatured"; 843, "Equipment obligations"; 847, "Receivers and trustees' securities"; 846, "Debt in default"; and 848, "Accounts payable; affiliated companies." This account shall be kept in such form that the interest on receivers' and trustees' securities, and on other classes of funded debt may be shown separately in the animal report to the Commission.

NOTE A.—This account shall not include charges for interest on funded debt obligations issued or assumed by the accounting company and owned by it, whether pledged as collateral or held in its treasury, in special deposits, or in sinking or other funds.

NOTE B.—When funded debt is incurred for new lines or extensions, or for addition and betterment purposes, the accruals of interest on such funded debt (less interest received on unexpended balances), to the date of completion or coming into service of the property so acquired shall be includible in the road and equipment accounts.

NOTE C.—This account shall be maintained so as to show separately: (a) fixed interest which will be paid, or for which provision for payment will be made, when the interest matures; (b) interest in default; and (c) contingent interest determined to be payable.

547 Interest on unfunded debt.

This account shall include interest accrued on unfunded debt, such as short-term notes payable on demand or having dates of maturity one year or less from dates of issue, and open accounts including discount and expense on demand and short-term loans, interest on receipts outstanding for installments paid on capital stock, interest on deferred payments for public improvements, and other analogous items. The discount on short-term notes, if of a considerable amount shall be distributed through equal monthly charges, over the term of the notes.

NOTE.—When short-term notes or other evidences of unfunded indebtedness are issued for new lines or extensions or for addition and betterment purposes the accrual of interest to the date of completion or coming into service of the property shall be included in the road and equipment accounts.

548 Amortization of discount on funded debt.

(a) This account shall be charged during each fiscal period with the proportion of the discount on funded debt obligations applicable to that period. This proportion shall be determined according to a rule the uniform application of which through the interval between the date of sale and the date of maturity will extinguish the discount on funded debt.

(b) The charge to this account for any period must not be either greater or less than the proportion of the balance remaining unamortized applicable to that period so long as any portion of the discount remains unextinguished, except that if the total discount applicable to any particular issue of securities does not exceed $25,000, the entire amount may be charged to this account at time of issue.

549 Maintenance of investment organization.

This account shall include the directly assignable administration expenses of the accounting company which are incident to its investments in leased or non-operating physical property, and in stocks, bonds, or other securities.

ITEMS OF EXPENSE

Advertising annual reports (lessor companies only).
Calls for bonds in accordance with sinking fund provisions of mortgages.
Directors' fees.
Printing and mailing dividend checks.
Publishing and mailing annual reports and other corporate statements to shareholders.
Publishing notices of declaration of dividends.
Law expenses.
Office expenses.
Salaries of officers, clerks, and attendant.
Stationery and printing.

NOTE.—Administration expenses incident to railway operation are includible in the primary accounts provided for in operating expense general account series 110000.

550 Income transferred to other companies.

(a) This account shall include the whole or any portion of the income of the accounting company payable to another company under the terms of agreements or contracts without obligation for reimbursement.

(b) In determining the amount payable by the accounting company, consideration shall be given not only to operating revenues and operating expenses, but also to other items of income or deduction which affect that amount.

NOTE A.—The amount receivable by the other company shall be credited by it to account 512, "Separately operated properties—Profit."

NOTE B.—Dividends or other payments upon securities issued or assumed by the accounting company shall not be included in this account.

551 Miscellaneous income charges.

(a) This account shall include items, not provided for elsewhere, properly chargeable to income account during the current year. Among the items which shall be included in this account are:

Amortization of debt expense.
Interest on tax deficiencies, on overcharge claims, and on court awards.
Income tax upon the interest on the accounting company's funded debt when these taxes are assumed by the company.
Payments of old accounts previously written off.
Penalties and fines for violation of the Interstate Commerce Act or other Federal and State laws when not specifically provided for elsewhere.
Loss on sale of securities carried as temporary cash investments.
Loss on sale of land used for transportation purposes, and of noncarrier property.
Loss on sale of securities acquired for investment purposes, and charges to write down the ledger value of such securities because of impairment in their value.
Loss from company bonds reacquired.

(b) Losses from extinguishment of debt shall be aggregated and, if material, charged to account 570, "Extraordinary Items," upon approval by the Commission.

553 Uncollectible accounts.

This account shall include losses on receivables, notes, or claims that are not includible in account 130050, "Uncollectible Accounts; General and Administrative."

555 Unusual or infrequent items (debit) credit.

This account shall include material items unusual in nature or infrequent in occurrence, but not both, accounted for in the current year in accordance with the text of instruction 1–2(d), upon approval by the Commission.

556 Income taxes on ordinary income.

This account shall include accruals for Federal, State and other income taxes applicable to ordinary income. See the text of account 590, for recording other income tax consequences.

557 Provision for deferred taxes.

(a) This account shall include the net tax effect of all material timing differences (see definition 20(e)) originating and reversing in the current accounting period, and the future tax benefits of loss carryforwards recognized in accordance with instruction 1–12.

(b) This account shall include credits for the amortization of the investment tax credit if the carrier elected to use the deferred method of accounting for the investment tax creidt. (See instruction 1–12)

560 Income or loss from operations of discontinued segments.

This account shall include the results of operations of a segment of a business (see definition 23(a)), after giving effect to income tax consequences, that has been or will be discontinued in accordance with the text of instruction 1–2(d), upon approval by the Commission.

562 Gain or loss on disposal of discontinued segments.

This account shall include the gain or loss from the disposal of a segment of a business, after giving effect to income tax consequences, in accordance with the text of instruction 1–2(d), upon approval by the Commission.

570 Extraordinary items (net).

(a) This account shall include extraordinary items accounted for during the current accounting year in accordance with the text of instruction 1–2(d), upon submission of a letter from the carrier's independent accountants, approving or otherwise commenting on the item and upon approval by the Commission.

(b) This account shall be maintained in a manner sufficient to identify the nature and gross amount of each debit and credit.

(c) Income tax consequences of charges and credits to this account shall be recorded in account 590, "Income Taxes on Extraordinary Items," or account 591, "Provision for Deferred Taxes—Extraordinary Items."

590 Income taxes on extraordinary items.

This account shall include the estimated income tax consequences (debit or credit) assignable to the aggregate of items of both taxable income and deductions from taxable income which for accounting purposes are classified as unusual and infrequent, and are recorded in account 570, "Extraordinary Items (Net)." The tax effect of any timing differences caused by recognizing an item in the account provided for extraordinary items in different periods in determining accounting income and taxable income shall be included in account 591, "Provision for Deferred Taxes—Extraordinary Items."

591 Provision for deferred taxes—extraordinary items.

This account shall include debits or credits for the current accounting period for income taxes deferred currently, or for amortization of income taxes deferred in prior accounting periods applicable to items of revenue or expense included in account 570, "Extraordinary Items (Net)." (See Instruction 1–11.)

592 Cumulative effect of changes in accounting principles.

This account shall include the cumulative effect of changing to a new accounting principle, after giving effect to income tax consequences, in accordance with instruction 1–2(d), upon approval by the Commission.

V 41 153 AUG 6 76 UMI

RETAINED EARNINGS ACCOUNTS

Credit

601 Credit balance (at beginning of calendar year).

This account shall include the net credit balance in the retained earnings account at the beginning of the Calendar year.

602 Prior period adjustments to beginning retained earnings account.

This account shall include adjustments net of assigned income taxes, in accordance with the text of instruction 1-2(d), to the balance in the retained earnings account at the beginning of the calendar year, upon approval by the Commission.

603 Credit balance transferred from income.

This account shall show the net credit balance brought forward from the income account for the calendar year.

606 Other credits to retained earnings.

This account shall include other credit adjustments, net of assigned income taxes, not provided for elsewhere in this system but only after such inclusion has been authorized by the Commission.

Debit

611 Debit balance (at beginning of calendar year).

This account shall include the net debit balance in the retained earnings account at the beginning of the calendar year.

612 Debit balance transferred from income.

This account shall show the net debit balance brought forward from the income account for the calendar year.

616 Other debits to retained earnings.

(a) This account shall include losses from resale of reacquired capital stock, and charges which reduce or writeoff discount on capital stock issued by the company, but only to the extent that such charges exceed credit balances in account 913, "Other capital," applicable to net gains from reacquisition and resale or retirement of such subclass of capital stock. See instruction 5-4.

(b) This account shall also include other debit adjustments net of assigned income taxes, not provided for elsewhere in this system but only after such inclusion has been authorized by the Commission.

620 Appropriations for sinking and other funds.

This account shall be charged and account 921 "Retained earnings; Appropriated," shall be credited with amounts appropriated pursuant to provisions of reorganization plans, mortgages, deeds of trust, or other contracts requiring payments into sinking funds, capital funds, and other funds.

621 Appropriations for other purposes.

This account shall be charged and account 921, "Retained earnings; Appropriated," shall be credited with the amount of appropriations for general contingencies, indefinite possible future losses and other corporate purposes not provided for elsewhere. The appropriations shall be released when their respective purposes have been served.

622 Appropriations released.

This account is provided to return to unappropriated retained earnings the amount of appropriations no longer required. The account shall be subdivided to show the nature of the appropriations being released and the circumstances of the release shall be fully described.

623 Dividends.

This account shall be charged with the amount of dividends declared on actually outstanding capital stock issued or assumed by the company. If the dividend is not payable in cash, the securities or other property to be distributed shall be described with sufficient particularity to identify the distribution. This account shall be subdivided to show separately the dividends declared on the various subclasses of capital stock.

NOTE.—This account shall not include charges for dividends on capital stock issued or assumed by the company and owned by it, whether pledged as collateral or held in its treasury, in special deposits, or sinking or other funds.

GENERAL BALANCE SHEET ACCOUNTS EXPLANATIONS

Assets

CURRENT ASSETS

701 Cash.

(a) This account shall include money, checks, sight drafts, and sight bills of exchange in the hands of the accounting company's financial officers and agents, or in transit from its agents and conductors for which such agents and conductors have received credit. It shall include, also, deposits with banks and trust companies available for use on demand, and savings accounts subject to the usual clause reserving the right to defer payment for a specified number of days.

(b) The amount of checks and drafts, which have been transmitted to payees and which remain unpaid at the close of the accounting period, shall be credited to this account. When the amount of such checks and drafts cannot be determined with absolute accuracy, an estimate of the amount shall be used. Amounts not transmitted to payees shall be included in the appropriate liability accounts.

NOTE.—Compensating balances under an agreement which legally restricts the use of such funds shall not be included in this account. Such balances shall be included in account 712, "Special Deposits," or 743, "Insurance and Other Funds."

702 Working funds.

This account shall include amounts advanced to general and special agents, and to other officers and employees, as working funds from which certain expenditures are to be made and accounted for. It also includes advances to fast freight lines and to demurrage and other bureaus.

NOTE.—Advances to jointly owned or used terminal companies and other companies for permanent working funds or capital purposes shall be included in accounts 751, "Investments and advances; Affiliated companies," or 755, "Other investment and advances," as appropriate.

711 Temporary cash investments.

This account shall include the cost of securities and other obligations acquired for the purpose of temporarily investing cash, such as United States Treasury certificates, marketable securities, time drafts receivable, demand loans, time loans, time deposits with banks and trust companies, and other similar investments of a temporary character, which are readily convertible into cash at substantially their recorded cost.

712 Special deposits.

This account shall include cash deposits, either placed in the hand of trustees or under the direct control of the reporting company, which are restricted for specific purposes. Examples are those deposits made for the payment of dividends and interest due within one year, the liquidation of other current liabilities, to guarantee fulfillment of current contract obligations, to meet specific operating requirements, or compensating balances (See Definition 24) under an agreement which legally restricts the use of such funds, and which constitute support for short-term borrowing arrangements. Subaccounts may be set up, if necessary, to account for special deposits for specific purposes.

NOTE.—Deposits available for general company purposes shall be included in account 701, "Cash."

721 Loans and notes receivable.

This account shall include the book value of all collectible obligations in the form of demand or time loans and notes receivable, or other similar evidences (except interest coupons) of money receivable within a time not exceeding one year from date of issue.

NOTE A.—Current loans and notes receivable from affiliated companies shall be included in account 726, "Receivables from affiliated companies."

NOTE B.—Obligations held as investments which mature more than one year after date of issue shall be included in accounts 751, "Investments and advances: Affiliated companies," or 755, "Other investments and advances," as appropriate.

NOTE C.—Loans and notes receivable acquired for the purpose of temporarily investing cash shall be included in account 711, "Temporary cash investments."

722 Accounts receivable; interline and other balances.

(a) This account shall include the net debit balances receivable from other companies representing items such as interline freight, passenger, switching, and baggage revenues, charges for equipment interchanged on a per diem or mileage basis, and charges for car repairs, loss and damage freight claims, and overcharge claims.

(b) For convenience in accounting the carrier may maintain separate subaccounts to reflect the balance applicable to the respective items. See Instruction 1-3(e).

NOTE.—The amount to be entered in this account is not the net balance between this account and account 803, "Accounts payable; Interline and other balances." Net credit balances payable to other companies shall be included in account 803.

723 Accounts receivable; agents and conductors.

This account shall include the net balance due in current accounts from agents, from train, sleeping car, and dining car conductors, and from train collectors, train auditors, porters and other employees and representatives charged with the collection or custody of current revenues.

NOTE.—Amounts advanced to general and special agents as working funds shall not be included in this account, but in account 702, "Working funds."

724 Accounts receivable; other.

This account shall include amounts due in audited accounts considered good, such as those due from the United States or other Governments for the transportation of mails and Government property, and from express companies for express facilities furnished under contract; miscellaneous bills against other railway companies, corporations, firms, and individuals; and other similar items.

NOTE A.—The amount to be entered in this account is not the net balance between this account and account 807, "Accounts payable; Other."

NOTE B.—Amounts due from affiliated companies for miscellaneous bills and other items subject to current settlement shall be included in account 726, "Receivables from affiliated companies."

725 Interest and dividends receivable.

This account shall include the amount of interest accrued to the date of the balance sheet on bonds, mortgages, notes, and other commercial paper owned, on loans made, open accounts, bank deposits, and the amount of dividends declared on stocks owned, and dividends accrued on such stocks when contracts require that the dividends be paid at stated times.

NOTE A.—No amount representing interest or dividends receivable shall be included in this account unless its payment is reasonably assured by past experience, anticipated provision, or otherwise.

NOTE B.—No dividends or other returns on securities issued or assumed by the accounting company shall be included in this account.

NOTE C.—If settlement of amounts included in this account is not made when due such amounts that are not subject to current settlement shall be transferred to account 781, "Other assets," at their estimated realizable value. Items of current character but of doubtful value, as well as noncurrent items, shall be written off to the extent of any estimated uncollectible portion by charge to account 130000, "Uncollectible accounts," or account 553, "Uncollectible accounts," as appropriate. If notes are taken in settlement of amounts included in this account, the amounts shall be transferred to account 721, "Loans and notes receivable," or account 781, "Other assets," as appropriate. (See Instruction 5-1.)

NOTE D.—Current interest and dividends receivable from affiliated companies shall be included in account 726, "Receivables from affiliated companies," and noncurrent amounts receivable shall be included in account 751, "Investments and advances; Affiliated companies."

726. Receivables from affiliated companies.

This account shall include amounts due from affiliated companies which are subject to current settlement such as deposits, demand or time loans, notes receivable, interest, dividends, miscellaneous bills and similar items.

NOTE.—Receivables from affiliated companies, representing net debit balances for items such as operating revenues, charges for equipment interchanged, car repairs and claims, shall not be included in this account but in account 722, "Accounts receivable; Interline and other balances."

727 Accrued accounts receivable.

This account shall include estimates of all unaudited current items receivable by the carrier to the date of the balance sheet, including those which are creditable to revenue, expense, or income accounts in accordance with the instruction relating to unaudited items. Among the items which shall be included in this account are:

Amounts receivable from others for unreported interline traffic.
Amounts receivable from others for use of facilities, including equipment, for which bills have not been rendered.
Amounts receivable from others for services for which bills have not been rendered.
Rents receivable for which bills have not been rendered.

729 Allowance for uncollectible accounts.

This account shall be credited with amounts provided for receivables which may become uncollectible, and shall be maintained to show the amount of each separate allowance set out below and the amounts of debits and credits thereto:

(a) Allowance for receivables applicable to transportation operations. Credits to this subdivision shall be concurrently charged to Account 130000, "Uncollectible Accounts."

(b) Allowances for receivables not applicable to transportation operations. Credits to this subdivision shall be concurrently charged to Account 551, "Miscellaneous income charges."

731 Prepayments.

This account shall include the balances in the accounts representing short-term prepaid rents chargeable to the appropriate rent accounts as the term is consumed for which the rents are paid; also short-term inteerst, and insurance premiums, taxes and licenses, and similar items paid in advance of their accrual, which are to be apportioned and charged, as they accrue, to the appropriate accounts.

NOTE: Expenditures by a carrier for improvements to office buildings and other facilities rented for more than one year, title to which will pass to the lessor at the end of the rental period, shall be charged to account 782, "Other deferred debits," and amortized over the rental period as additional rent.

733 Material and supplies.

(a) This account shall include the balances representing the cost of all unapplied material, such as road and shop material, articles in process of manufacture by the accounting company, fuel, stationery, and dining car and other supplies. In determining the cost of material and supplies suitable allowance shall be made for any discounts allowed in the purchase thereof. The cost shall include all specifically assignable transportation charges incurred in obtaining the delivery of such materials and supplies upon the premises of the carrier including loading and unloading, and a suitable proportion of purchasing and store expenses. The cost shall also include sales and excise taxes on material purchases. Taxes on gasoline, other motor fuel, and motor oil are also includible in this account.

(b) Materials recovered in connection with construction, maintenance, or the retirement of property shall be charged to this account as follows:

(1) Reusable materials shall be included in this account at cost, estimated if not known, less accumulated depreciation, if any, or current market value, whichever is lower. (See Definition 17, "Salvage value.")

(2) Scrap and other nonusable materials, including obsolete parts, may be carried at the estimated salvage value when the sale of the salvage is imminent and there is a relatively firm market price.

(c) Material and supplies shall be credited to this account and charged to the appropriate operating expense or other account on the basis of recorded cost, average cost, or other recognized pricing system, provided that such system is consistently applied and is based on the cost of such material and supplies.

(d) An inventory of material and supplies shall be taken during each calendar year and the necessary adjustments to bring this account into harmony with the actual inventory balances shall be made in the accounts of the year in which the inventories are taken. In effecting this adjustment determined differences in accounting for important classes of material shall be equitably assigned among the accounts to which the classes of material are ordinarily chargeable. Other differences shall be equitably apportioned among the primary accounts to which material has been charged since the last inventory.

NOTE.—Balances representing the cost of unapplied construction material and supplies located at the point of use, which have been purchased for projected new roads and extensions, or for new railroad equipment, shall be included in account 90, "Construction in progress."

V 41 153 AUG 6 76 UMI

735 Other current assets.

This account shall include amounts for other current assets which are not includible in the foregoing current asset accounts.

739 Deferred income tax debits.

(a) This account shall include the portion of deferred income tax debits and credits relating to current assets and liabilities, when the balance is a net debit.

(b) A net credit balance shall be included in account 825, "Deferred income tax credits."

SPECIAL FUNDS

741 Sinking funds.

(a) This account shall include the amount of cash, the ledger value of live securities of other companies, and other assets which are held by trustees of sinking and other funds for the purpose of redeeming outstanding obligations, including such assets so held in the hands of the accounting company's treasurer when the assets are segregated in a distinct fund.

(b) This account shall include amounts deposited with trustees on account of mortgaged property sold, the proceeds of which are to be held for the redemption of securities; and also the par value (or the amount recorded for no par stock) of live securities issued or assumed by the accounting company and held in such funds.

(c) A separate subaccount shall be kept for each fund. The title of each account shall designate the obligation in support of which the fund is created.

NOTE.—In stating the balance sheet in the annual reports to the Commission the total amount of the funds and the par value (or the amount recorded for no par stock) of securities issued or assumed by the accounting company and held in the funds shall be shown in the short columns, and the net amount of the funds (total amount less securities issued or assumed) shall be shown in the long column.

742 Capital funds.

(a) This account shall include cash and the ledger value of other assets held by trustees or by the accounting company's treasurer when segregated in distinct funds that have been (1) realized from the sale of equipment obligations or other long-term obligations and not yet applied toward the specific purposes for which the obligations were incurred, and (2) set aside in accordance with governmental, mortgage, or contractual requirements in connection with reorganizations or otherwise. This account shall also include funds deposited with trustees to be held until mortgaged property sold is replaced.

(b) An appropriate record shall be maintained for securities issued or assumed by the accounting company and held in the funds, identifying those that are nominally issued or nominally outstanding.

NOTE A.—Funds specifically set aside for sinking fund purposes shall be included in account 741, "Sinking funds." If one purpose of a capital fund is to provide contributions to a sinking fund under specified conditions, the entire amount of the fund shall be included in this account until the contributions to the sinking fund are made, at which time the amounts thereof shall be transferred to account 741.

NOTE B.—The ledger value of assets of the character indicated in paragraph (a)(2) of this section, shall be transferred to the appropriate current assets account when the assets are definitely assigned in advance of expenditure to the payment of interest or other current liabilities payable within one year.

743 Insurance and other funds.

This account shall include the amount of cash and the ledger value of securities of other companies and other assets which are in the hands of trustees or managers of insurance, employees' pension, savings, relief, hospital, and other funds which have been raised and specifically set aside or invested for specific purposes not provided for elsewhere; also the par value (or the amount recorded for no par stock) of securities issued or assumed by the accounting company and held in such funds. A separate subaccount shall be kept for each fund.

NOTE A.—Sinking funds and capital funds are provided for in accounts 741, "Sinking funds," and 742, "Capital funds," respectively.

NOTE B.—In stating the balance sheet in the annual reports to the Commission, the total amount of the funds and the par value (or the amount recorded for no par stock) of securities issued or assumed by the accounting company and held in the funds shall be shown in the short columns, and the net amount of the funds (total amount less securities issued or assumed) shall be shown in the long column.

NOTE C.—This account shall not include funds held by the accounting company solely as trustee and in which it has no beneficial interest.

NOTE D.—This account shall include compensating balances (see Definition 24) under an agreement which legally restricts the use of such funds and which constitute support for long-term borrowing arrangements.

INVESTMENTS

751 Investments and advances; affiliated companies.

(a) This account shall include the ledger value of the accounting company's investment in securities issued or assumed by affiliated companies other than securities held in special deposits or special funds; and also investment advances made to affiliated companies not subject to current settlement; notes receivable from affiliated companies which mature later than 1 year from date of the balance sheet; and similar noncurrent items of affiliated companies.

(b) This account shall be maintained in such manner as to show each of the following classes of investment in each affiliated company:

(i) Stocks.
(ii) Bonds.
(iii) Other secured obligations.
(iv) Unsecured notes.
(v) Investment advances.

(c) A complete record of securities pledged shall be maintained so that the ledger value of securities pledged and unpledged may be shown separately in the annual report to the Commission.

NOTE A.—Accounts with affiliated companies which are subject to current settlement, if their collection is reasonably assured, shall be classed as current assets, and if settlement is deferred beyond one year such items shall be transferred to this account.

NOTE B.—The term affiliated companies (also see Definition 4) includes:

1. Controlled companies, including companies solely controlled by the accounting company, and also companies jointly controlled by the accounting company and others under a joint arrangement.
2. Controlling companies, including both companies solely controlling the accounting company, and companies which jointly control the accounting company under a joint arrangement.
3. Companies controlled by controlled companies.
4. Companies controlled by controlling companies.

By "control" (also see Definition 4) is meant the ability to determine the action of a corporation. For the purposes of this account, the following are to be considered forms of control:

(a) Right through title to securities issued or assumed to exercise the major part of the voting power in the controlled corporation

(b) Right through agreement of some character or through some source other than title to securities, to name the majority of the board of directors, managers, or trustees of the controlled corporation.

(c) Right to foreclose a first lien upon all or a major part in value of the tangible property of the controlled corporation.

(d) Right to secure control in consequence of advances made for construction of the operating property of the controlled corporation.

(e) Right to control only in a specific respect the action of the controlled corporation.

A leasehold interest in the property of a corporation is not to be classed as a form of control over the lessor corporation.

"Sole control" is that which rests in one corporation.

"Joint control" is that which rests in two or more corporations and which is held under a joint arrangement.

NOTE C.—The value of securities borrowed by the accounting company and pledged shall not be included in this account. A memorandum record shall be kept.

NOTE D.—The value of securities pledged for purposes other than that of security for funded debt or short-term loans shall be included in accounts 741, "Sinking funds," 742, "Capital funds," or 743, "Insurance and other funds," as appropriate.

753 Adjustments; investments and advances—affiliated companies.

(a) This account shall be credited with amounts charged to account 551, "Miscellaneous income charges," to provide for impairment in the value of investment securities and other assets included in Account 751, "Investments and advances; affiliated companies."

(b) If provision is made for anticipated losses in specific assets, when the assets are written down or written off, or are sold or otherwise disposed of at a loss, the reduction in the book value or the losses sustained shall be charged to this account to the extent of the credit balance in the account applicable to the particular items involved, and the remainder, if any, shall be charged to account 551, "Miscellaneous income charges." In case a general provision for losses in unspecified asset values is maintained, all such losses resulting from write-downs, write-offs, etc., shall be charged to this account to the extent of the total credit balance in the account, and the remainder, if any, shall be charged to account 551, "Miscellaneous income charges."

755 Other investments and advances.

(a) This account shall include the ledger value of the accounting company's investment in securities issued or assumed by nonaffiliated companies other than securities held in special deposits or special funds; and also investment advances made to nonaffiliated companies not subject to current settlement; notes receivable from nonaffiliated companies which mature later than 1 year from date of the balance sheet; and similar noncurrent items of nonaffiliated companies.

(iii) Other secured obligations.

(b) This account shall be maintained in such manner as to show each of the following classes of investment in each nonaffiliated company:

(i) Stocks.
(ii) Bonds.
(iii) Other secured obligations.
(iv) Unsecured notes.
(v) Investment advances.

(c) A complete record of securities pledged shall be maintained so that the ledger value of securities pledged and unpledged may be shown separately in the annual report to the Commission.

NOTE A.—Accounts with nonaffiliated companies which are subject to current settlement, if their collection is reasonably assured, shall be classed as current assets, and if settlement is deferred beyond one year such items shall be transferred to account 781, "Other assets."

NOTE B.—The term "nonaffiliated companies" includes all companies other than those defined as affiliated in Note B of account 751, "Investments and advances: Affiliated Companies."

NOTE C.—The value of securities borrowed by the accounting company and pledged shall not be included in this account. A memorandum record shall be kept.

NOTE D.—The value of securities pledged for purposes other than that of security for funded debt or short-term loans shall be included in accounts 741, "Sinking funds," 742, "Capital funds," or 743, "Insurance and other funds," as appropriate.

757 Adjustments; other investments and advances.

(a) This account shall be credited with amounts charged to account 551, "Miscellaneous income charges," to provide for impairment in the value of investment securities and other assets included in account 755, "Other investments and advances."

(b) If provision is made for anticipated losses in specific assets, when the assets are written down or written off, or are sold or otherwise disposed of at a loss, the reduction in the book value or the losses sustained shall be charged to this account to the extent of the credit balance in the account applicable to the particular items involved, and the remainder, if any, shall be charged to account 551, "Miscellaneous income charges." In case a general provision for losses in unspecified asset values is maintained, all such losses resulting from write-downs, write-offs, etc., shall be charged to this account to the extent of the total credit balance in the account, and the remainder, if any, shall be charged to account 551, "Miscellaneous income charges."

TANGIBLE PROPERTY

761 Road and equipment property.

This account shall include the accounting company's investment in road and equipment (including that held under contract for purchase), used or held for use as transportation property in existence at the date of the balance sheet. When property is retired from service, this account shall be credited with the ledger value of the property retired.

NOTE A.—This account shall not include any items representing titles to securities.

NOTE B.—When equipment or other property is acquired under an agreement which provides that the cost shall be paid in installments, the cost (its money value at time of purchase) shall be charged to the appropriate road and equipment accounts at the time the equipment is delivered to the carrier, and included in this account in the same manner as the cost of equipment purchased outright. When the par value of notes or other securities issued in payment, or in part payment, for such equipment is more (or less) than the actual cash value of the equipment at the time of the purchase, or of the proportion to which the securities are applicable, the difference between the par value of the securities and the actual cash value of the equipment, or of the proportion paid for by the securities, shall be charged (or credited) to the proper discount and premium accounts.

NOTE C.—Held for use, as referred to above, implies the ability of the carrier to substantiate within a reasonable period of time, by plan or policy, the probable future use which is to be made of the property.

763 Accumulated depreciation; road and equipment property.

(a) This account shall be credited with amounts concurrently charged to operating expenses or other authorized accounts to cover the loss in service value of depreciable road and equipment property. It shall also include adjustments which the Commission may authorize the accounting company to make such as adjustments for past accruals of depreciation, and provision for material abandonment or other losses applicable to nondepreciable property.

(b) The service value of each unit of depreciable property retired (and also of each minor item, less than a unit, retired and not replaced) shall be charged to this account. This account shall also be charged for amounts for losses applicable to nondepreciable property retired for which provision was previously made by approval of the Commission, and any resultant adjustment of such provision shall be referred to the Commission for consideration and decision.

(c) Comprehensive instructions to depreciation accounts, rates of depreciation, and records to be maintained, are contained in instruction 4.

764 Accumulated amortization; road and equipment property—defense projects.

This account shall include the amounts of accumulated past provisions for amortization of road and equipment defense projects, the cost of which is included in account 761, "Road and equipment property." This account shall be charged with the credit balance herein applicable to specific property at the time the property is retired. The accounting company shall maintain subaccounts separately for amortization of (1) road property and (2) equipment.

765 Improvements on leased property.

(a) This account shall include the cost of improvements made by the lessee to property which is held under lease from others or through control of the company owning the property, where such improvements are used by the lessee in transportation service, and the lessee is not to be reimbursed by the lessor for such improvements. (See instruction 2–18.)

(b) The carrier's records shall be kept in such manner as to show the debits and credits to this account in accordance with the provisions for road and equipment.

NOTE A.—This account shall not include any items representing titles to securities.

NOTE B.—When the lessor company includes in account 761, "Road and equipment property," the cost of improvements made by the lessee to property leased by it from the lessor and settlement is not made at the time for the cost thereof, the lessee, pending settlement with the lessor, shall include the cost thereof in account 751, "Investments and advances; Affiliated companies," or 755, "Other investments and advances," as appropriate.

766 Accumulated depreciation; improvements on leased property.

(a) This account shall be credited with amounts concurrently charged to operating expenses or other authorized accounts for depreciation accrued on improvements to leased property, the cost of which is included in account 765, "Improvements on leased property."

(b) The service value of each unit of property retired (and also of each minor item, less than a unit, retired and not replaced) for which this accumulated depreciation account has been established shall be charged to this account.

(c) Instructions for depreciation accounts, rates of depreciation, and records to be maintained, as contained in instruction 4 for owned property, shall also apply to improvements on leased property.

767 Accumulated amortization; improvements on leased property—defense projects.

This account shall include the amounts of accumulated past provisions for amortization of improvements to leased property applicable to defense projects, the cost of which is included in account 765,

V 41 153 AUG 6 76 UMI

"Improvements on leased property." This account shall be charged with the credit balance herein applicable to specific property at the time the property is retired. The accounting company shall maintain subaccounts separately for amortization of (1) road property and (2) equipment.

768 Property used in other than carrier operations.

This account shall include the accounting company's investment in physical property other than property assignable to accounts 761, "Road and equipment property," and 765, "Improvements on leased property," such as hotels, restaurants, powerplants, which are not operated by the accounting company or another carrier in connection with its transportation service.

ITEMS OF INVESTMENT

Coal and other mines.
Commercial power plants.
Hotels and restaurants.
Lands and buildings not used in transportation operations.
Lands and other property acquired and held in anticipation of future use.
Mineral and timber lands.
Rails and other track material leased to others.
Saw mills and other manufacturing plants not operated in connection with transportation service.

769 Accumulated depreciation; property used in other than carrier operations.

This account shall be credited with amounts charged to income or other authorized accounts for depreciation accrued on property, the cost of which is included in account 768, "Property used in other than carrier operations." When such property is destroyed, sold, or otherwise retired from service, the amount included in this account with respect to the property retired shall be charged hereto.

INTANGIBLE PROPERTY

771 Organization expenses.

This account shall include all fees paid to governments for the privilege of incorporation, and office and other expenditures incident to organizing the corporation and putting it in readiness to do business; cost of preparing and distributing prospectuses; special counsel fees; cost of preparing and issuing certificates of stock; cost of procuring the necessary certificates from State authorities; and other like costs necessary and proper in organizing the enterprise.

NOTE.—Cost of soliciting for loans or for sale of bonds or other evidences of indebtedness shall be charged to balance sheet account 782, "Other deferred debits." (See Instruction 5–3.)

Other Assets and Deferred Debits

781 Other assets.

This account shall include the estimated value of salvage recoverable from property retired when the recovery of the salvage is deferred for any reason. (See instruction 2–5.) This account shall also include other assets of doubtful value, collection of which within one year is not assured; also other deferred assets and miscellaneous assets not otherwise provided for in general balance sheet accounts. (See instruction 5–1.)

782 Other deferred debits.

(a) This account shall include the amount of debit balances in suspense accounts that cannot be cleared and disposed of until additional information is received, such as freight claims paid when found to be correct, but in advance of investigation with other carriers; unextinguished discount on short-term notes; unadjusted debit items not otherwise provided for and similar items the proper disposiiton of which is uncertain.

(b) This account shall also include the aggregate amount of the expenses incurred in connection with the issuance of each class of the carrier's outstanding long-term or equipment obligations, such as fees for listing long-obligations on stock exchanges, legal and other fees, cost of tax stamps and similar items. (See Definition 9.) Separate subdivisions shall be maintained for each issue of such obligations. (See Instruction 5–3.)

784 Accumulated deferred income tax debits.

This account shall include the amount of deferred taxes (see Definition 20(h)) determined in accordance with instruction 1–12 and the text of account 873, "Accumulated deferred income tax credits," when the balance is a net debit.

LIABILITIES AND SHAREHOLDERS' EQUITY

CURRENT LIABILITIES

801 Loans and notes payable.

(a) This account shall include the balances representing obligations outstanding in the form of loans and notes payable or other similar evidence (except interest coupons) of indebtedness payable on demand or within a time not exceeding one year from date of issue.

(b) This account shall be kept in such form so as to show separately the amounts of notes payable within one year from date of issue that are secured by collateral.

NOTE A.—Loans and notes payable to affiliated companies which are subject to current settlement shall be included in account 814, "Payables to affiliated companies," and noncurrent obligations in account 848, "Accounts payable; Affiliated companies."

NOTE B.—This account shall not include obligations due within one year which are intended to be refinanced on a long-term basis. Long-term refinancing of short-term obligations means: (1) replacement with long-term obligations or equity securities, or (2) renewal, extension, or replacement with short-term obligations for an uninterrupted period extending beyond one year from the balance sheet date.

The intention to refinance on a long-term basis shall be supported by the ability to refinance. Evidence of this ability includes either; (1) the actual issuance of a long-term obligation or equity securities for the purpose of refinancing the short-term obligation, after the balance sheet date but before the balance sheet is issued, or (2) before the balance sheet is issued, the existence of a financing agreement which is long-term and based on terms readily determinable with no existing violations of its provisions, and with a lender which is financially capable of honoring the agreement.

803 Accounts payable; interline and other balances.

(a) This account shall include the net credit balances payable to other companies representing items such as interline freight, passenger, switching and baggage revenues, charges for equipment interchanged on a per diem or mileage basis, and charges for car repairs, loss and damage freight claims, and overcharge claims.

(b) For convenience in accounting the carrier may maintain separate subaccounts to reflect the balances applicable to the respective items. See instruction 1–3(e).

NOTE.—The amount to be entered in this account is not the net balance between this account and account 722, "Accounts receivable; Interline and other balances." Net debit balances receivable from other companies shall be included in account 722.

805 Audited accounts and wages payable.

This account shall include the amount of audited vouchers or accounts and audited payrolls unpaid on the date of the balance sheet. It shall include balances representing unclaimed wages and outstanding pay and time or discharge checks issued in payment of wages and all other unpaid vouchered items.

NOTE.—The amount of checks and drafts, which have been transmitted to payees and which remain unpaid at the close of the accounting period, shall be credited to account 701, "Cash."

807 Accounts payable; other.

This account shall include outstanding drafts drawn by station agents, conductors refund and extra-fare checks not presented for redemption, taxes collected from employees and others for the account of taxing agencies, and other items of the nature of demand liabilities not covered by accounts 801, 803, 805, 809, and 811.

NOTE A.—The amount to be reported under this account is not the net balance between this account and account 724, "Accounts receivable; Other."

NOTE B.—The amount of checks and drafts, which have been transmitted to payees and which remain unpaid at the close of the accounting period, shall be credited to account 701, "Cash." When the amount of such checks and drafts cannot be determined with absolute accuracy an estimate of the amount shall be used.

NOTE C.—Deposits and other items of affiliated companies subject to current settlement shall be included in account 814, "Payables to affiliated companies."

809 Interest matured.

This account shall include the amount of matured and unpaid interest on funded debt, and other obligations of the accounting company for which provision has been made for current settlement. Interest which matures on the first day following that for which the balance sheet is made shall be included in this account.

NOTE.—Interest matured unpaid on debt to affiliated companies, if subject to current settlement, shall be included in account 814, "Payables to affiliated companies." Noncurrent interest shall be included in account 848, "Accounts payable; Affiliated companies." Interest payable to others which is not paid when it matures shall be included in account 851, "Interest in default," unless provision has been made for current settlement. Where interest is in default, subsequent accruals shall be credited direct to account 851.

811 Dividends matured.

This account shall include the amount of dividends payable on capital stock but unpaid, uncalled for, or unclaimed at the date of the balance sheet. Dividends which become payable on the first day following that for which the balance sheet is made shall be included in this account.

NOTE.—Dividends payable to affiliated companies shall be included in account 814, "Payables to affiliated companies."

812 Unmatured interest accrued.

This account shall include the amount of interest subject to current settlement accrued to the date as of which the balance sheet is made, but not payable until after the first day following that date, on funded securities or obligations, debt in default, receivers' and trustees' securities, notes payable and other indebtedness issued or assumed by the accounting company.

NOTE A.—Interest accrued which is not paid when it matures shall be included in account 851, "Interest in default," unless provision has been made for current settlement. Where interest is in default, subsequent accruals shall be credited direct to account 851.

NOTE B.—Current interest accrued on debt to affiliated companies shall be included in account 814, "Payables to affiliated companies." If the accrued interest is not paid when it matures and is not subject to current settlement, the amount of such interest shall be transferred to account 848, "Accounts payable; Affiliated companies."

813 Unmatured dividends declared.

This account shall include dividends declared on capital stock, but not payable until after the first day following the date of the balance sheet.

NOTE.—Unmatured dividends payable to affiliated companies shall be included in account 814, "Payables to affiliated companies".

814 Payables to affiliated companies.

This account shall include accounts payable to affiliated companies which are subject to current settlement such as deposits, demand or time loans, notes payable, interest, dividends, miscellaneous bills, and similar items.

NOTE.—Payables to affiliated companies, representing net credit balances for items such as revenues, charges for equipment interchanged, car repairs and claims, shall not be included in this account but in account 803, "Account payable; Interline and other balances."

815 Accrued accounts payable.

This account shall include estimates of unaudited items payable by the carrier to the date of the balance sheet, including those which are chargeable to revenue, expense, or income accounts in accordance with the instruction relating to unaudited items. Among the items which should be included in this account are:

Rents payable.
Amounts payable to others for unreported interline traffic.
Amounts payable to others for use of facilities, including equipment, for which bills have not been rendered.
Amounts payable to others for services for which bills have not been rendered.
Estimated amounts payable within one year covering liability for claims for injuries to persons, loss and damage, and similar items.
Amounts payable (estimated if necessary) within one year pursuant to agreements with labor organizations or otherwise for employees vacations now earned.

821 Federal income taxes accrued.

This account shall be credited with the amount accrued for Federal income taxes which has been concurrently charged to the appropriate income or other authorized accounts. Credits to this account that are based upon estimates shall be adjusted during the year so that this account may show, as nearly as practicable the approximate amount of the carrier's unpaid liability for such taxes. Payments of taxes for which accruals have been made shall be debited to this account.

822 State and other income taxes accrued.

This account shall be credited with the amounts accrued for state and other income taxes which have been concurrently charged to the appropriate income or other authorized accounts. Credits to this account that are based upon estimates shall be adjusted during the year so that this account may show, as nearly as practicable, the approximate amount of the carrier's unpaid liability for such taxes. Payments of taxes for which accruals have been made shall be debited to this account.

823 Other taxes accrued.

(a) This account shall be credited with the accruals of all taxes, other than income taxes, which have been concurrently charged to the appropriate income of other accounts for taxes. Such accruals may be based upon estimates, provided such estimates shall be adjusted during the year so that this account may show, as nearly as practicable, the approximate amount of the carrier's unpaid liability for such taxes. Payments of taxes for which accruals have been made shall be debited to this account.

(b) The records supporting the entries in this account shall be kept to show separately by classes of taxes the amount of the tax accruals for the current year and adjustments of accruals for prior years.

NOTE.—Amounts for prepayments of taxes shall be included in account 731, "Prepayments."

825 Deferred income tax credits.

(a) This account shall include the portion of deferred income tax charges and credits relating to current assets and liabilities, when the balance is a net credit.

(b) A net debit balance shall be included in account 739, "Deferred income tax debits."

831 Equipment obligations and other long-term debt due within one year.

This account shall include the total amount of bonds, equipment obligations, and other long-term debt, including obligations maturing serially or payable in installments which are due and payable within one year, and for which arrangements for long-term refinancing have not been made (See NOTE B to Account 801, "Loans and notes payable") or for which no sinking funds have been provided. This account shall be subdivided according to the different classes of debt so maturing.

835 Other current liabilities.

There shall be included in this account the principal amount of unpresented bonds drawn for redemption through the operation of sinking and redemption fund agreements, also the principal amount of unpresented funded debt obligations, and receivers' and trustees' securities which have matured (for which provision has been made for current settlement), and other current liabilities not includible in the foregoing current liability accounts.

LONG-TERM DEBT DUE AFTER ONE YEAR

842 Funded debt unmatured.

(a) This account shall include the total par value of unmatured debt (other than equipment obligations), maturing more than one year from the close of the accounting period, including obligations due within one year which are expected to be refinanced on a long-term basis (See NOTE C to account 801, "Loans and notes payable"), whether the securities were issued by the accounting company or the payment was assumed by the accounting company after being issued as the debt of other companies. (See account 831, "Equipment obligations and other long-term debt due within one year.")

(b) The amounts included in this account shall be divided to show the par value of (1) certificates or other evidences of funded debt (pledged and unpledged) held in the company's treasury, by its agents or trustees, or otherwise subject to its control, including both those reacquired after actual issue and those nominally but never actually issued; and (2) certificates or other evidences of funded debt issued and actually outstanding, being those not held by the company, its agents or trustees, or subject to its control.

(c) The amounts included herein shall be further divided so as to show the amount of each class of funded debt, as follows:

(1) *Mortgage bonds.* Bonds secured by lien on physical property and not includible in the other subdivisions of this account.

(2) *Collateral trust bonds.* Bonds and notes secured by a lien on securities or

V 41 153 AUG 6 76 UMI

other negotiable paper; and stock trust certificates that are similar in character to collateral trust bonds.

(3) *Income bonds.* Bonds which are a lien on a carrier's revenue alone, or bonds which, while being a lien on its property and franchises, can claim payment of interest only in case interest is earned.

(4) *Miscellaneous obligations.* All funded obligations not provided for by the other subdivisions of this account, also notes, unsecured certificates of indebtedness, debenture bonds, plain bonds, real estate mortgages executed or assumed and other similar obligations maturing more than one year from date of issue, but excluding liabilities for assessments for public improvements and those evidenced by conditional or deferred equipment purchase contracts for which provision is made in accounts 852, "Other liabilities," and 843, "Equipment obligations," respectively.

(5) *Receipts outstanding for funded debt.* Receipts for payments on account of funded debt. When certificates are issued for such payments, the par value shall be included in the account covering the class of funded debt for which the certificates are issued.

(d) Each of the above classes shall also be divided into subclasses according to differences in mortgage or other lien or security therefor, rate of interest, interest dates, or date of maturity. Parts of any issue agreeing in other characteristics but maturing serially may be treated as of the same subclass.

(e) Records shall be maintained in such manner as to show (1) securities the issuance or assumption of which has been authorized by the Commission under provisions of the Interstate Commerce Act, and similar securities issued or assumed prior to the effective date of such provisions of the Act, and (2) other obligations of a kind which may legally be issued or assumed without such authorization.

NOTE A.—Securities (other than equipment obligations) maturing one year or less from date of issue shall be included in accounts 814, "Payables to affiliated companies," 848, "Accounts payable; Affiliated companies," or 801, "Loans and notes payable," as appropriate, except that where an issue of securities maturing serially over a period of years contains short-term obligations such obligations may be included as funded debt. Matured funded debt shall be included in account 835, "Other current liabilities," if provision has been made for current settlement. If no provision has been made for current settlement, matured funded debt shall be included in account 846, "Debt in default," except that when the collection of matured funded debt of affiliated companies is not enforced by controlling companies, the principal amount (to the extent held by a controlling company) shall be included in account 848, "Accounts payable; Affiliated companies."

NOTE B.—See Definitions 2, actually issued; 3, actually outstanding; 13, nominally issued; and 14, nominally outstanding.

NOTE C.—Nonnegotiable notes having a maturity of more than one year after date of issue, held by affiliated companies, shall be included in account 848, "Accounts payable; Affiliated companies."

NOTE D.—Securities nominally issued or reacquired and held in the company's treasury, except securities held by trustees in sinking or other funds, shall be included in a subdivision of this account. In the general balance sheet statement the total unmatured funded debt included in this account shall be shown in the first short column. The amount nominally but not actually issued and the amount nominally outstanding shall be shown in the second short column, and in the long column shall be shown the amount actually outstanding.

843 Equipment obligations.

(a) This account shall include the par value of equipment securities and the principal amount of contractual obligations for the purchase of equipment, excluding principal or obligations maturing serially or payable in installments within one year from the close of the accounting period, and including obligations due within one year which are expected to be refinanced on a long-term basis (see account 831, "Equipment obligations and other long-term debt due within one year"); for explanation of long-term refinancing, see NOTE C to account 801, "Loans and notes payable."

(b) The amounts included herein shall be divided as follows:

(1) Principal amount of equipment securities including those maturing serially, issued or assumed by the accounting company or by receivers and trustees, which have been authorized by the Commission under provisions of the Interstate Commerce Act and similar securities issued or assumed prior to the effective date of such provisions of the Act.

(2) Principal sums of obligations for equipment purchased under conditional or deferred payment contracts, which may be legally entered into or assumed by the accounting company or by receivers and trustees, without authorization by the Commission.

844 Unamortized debt discount.

This account shall include the total of the net debit balances representing the excess of the discount over the premium in connection with the issuance of each class of the carrier's outstanding long-term or equipment obligations. Separate subdivisions shall be maintained for each issue of such obligations. (See instruction 5-3.)

NOTE A.—When long-term obligations are refinanced the balance of debt discount and expense pertaining to the old obligations shall be transferred to Account 551, "Miscelleaneous income charges."

845 Unamortized premium on debt.

This account shall include the total of all credit balances representing the excess of the premium over the discount and expense in connection with the issuance of each class of the carrier's outstanding long-term or equipment obligations. Separate subdivisions shall be maintained for each issue of obligations.

846 Debt in default.

This account shall include amounts transferred from other accounts representing matured funded securities or obligations, receivers' and trustees' securities, equipment obligations and short-term notes, when maturity dates of such obligations have not been extended.

NOTE A.—The principal amount of matured funded debt of affiliated companies the collection of which is not enforced by the controlling company shall (to the extent of the principal amount held by the controlling company) be included in account 848, "Accounts payable; Affiliated companies."

NOTE B.—The principal amount of unpresented funded debt obligations which have matured, and for which provision has been made for payment shall be included in account 835, "Other current liabilities."

847 Receivers' and trustees' securities.

When receivers or trustees acting under the orders of a court are in possession of the property of the company, and under the order of such court issue or assume evidences of indebtedness (other than equipment securities or obligations) the par value of such evidences shall be credited to this account.

NOTE.—The par value of equipment securities or the principal amount of obligations incurred for the purchase of equipment under conditional or deferred payment contracts shall be included in account 843, "Equipment obligations."

848 Accounts payable; affiliated companies.

This account shall include the par value of nonnegotiable notes issued to affiliated companies; also matured funded debt of affiliated companies held by controlling companies where there is no agreement for an extension as to time of payment and collection of the principal is not enforced; credit balances in open accounts with such companies other than credit balances in current accounts classable as current liabilities, and interest accrued on notes, matured funded debt of affiliated companies and open accounts included in this account, when such interest is not subject to current settlements. The amounts included herein shall be divided as follows:

(a) Notes, including herein not only nonnegotiable notes that run longer than a term of one year, but also such notes payable on demand or within one year from the date of issue when it is mutually agreed that the notes shall not be enforced as current assets by the holder.

(b) Par value of matured funded debt of affiliated companies held by controlling companies where there is no agreement for an extension of time and collection is not enforced.

(c) Open accounts not subject to current settlement.

(d) Interest accrued on amounts included in this account when not subject to current settlement.

NOTE A.—Accounts with affiliated companies which are subject to current settlement shall be classed as current assets or current liabilities, as appropriate.

NOTE B.—No item shall be included in this account which is not known to be the property of an affiliated company.

NOTE C.—The term "affiliated companies" includes:

1. Controlled companies, including companies solely controlled by the accounting company, and also companies jointly controlled by the accounting company and others under a joint arrangement. (See definition 4.)

2. Controlling companies, including both companies solely controlling the accounting company, and companies which jointly control the accouting company under a joint arrangement.

3. Companies controlled by controlled companies.

4. Companies controlled by controlling companies.

by "control" (See Definition 8) is meant the ability to determine the action of a corporation. For the purposes of this account, the following are to be considered forms of control:

(a) Right through title to securities issued or assumed to exercise the major part of the voting power in the controlled corporation.

(b) Right through agreement of some character or through some source other than title to securities, to name the majority of the board of directors, managers, or trustees of the controlled corporation.

(c) Right to foreclose a first lien upon all or a major part in value of the tangible property of the controlled corporation.

(d) Right to secure control in consequence of advances made for construction of the operating property of the controlled corporation.

(e) Right to control only in a specific respect the action of the controlled corporation.

A leasehold interest in the property of a corporation is not to be classed as a form of control over the lessor corporation.

"Sole control" is that which rests in one corporation.

"Joint control" is that which rests in two or more corporations and which is held under a joint arrangement.

OTHER LONG-TERM LIABILITIES

851 Interest in default.

This account shall include the amount of matured and unpaid interest (for which no provision has been made for current settlement) on all indebtedness issued or assumed by the accounting company except interest which is added to the principal of the debt on which incurred. Where interest is a default, subsequent accruals shall be credited direct to this account.

NOTE.—Interest matured and unpaid on debt to affiliated companies, if not subject to current settlement, shall be included in account 848, "Accounts payable; Affiliated companies."

852 Other liabilities.

This account shall include assessments for public improvements; retained amounts due governmental agencies for construction work; percentages due contractors to be paid upon completion of contracts; deposits for construction of side tracks to be refunded on basis of an agreed portion of the earnings from the traffic handled over the tracks and similar liabilities not payable within one year. This account shall also include other deferred and noncurrent liabilities not otherwise provided for in general balance sheet accounts. Assessments for public improvements and amounts due governmental agencies and others for payments to be made within one year, shall be included in account 835, "Other current liabilities," or other appropriate current liability account.

861 Estimated liability; leased property.

(a) This account shall be credited with amounts concurrently charged to operating expenses or other accounts to cover the estimated accrued liability on leased road and equipment when settlement between the accounting carrier and the lessor is not made currently. Amounts recorded herein shall include unsettled rent, based on depreciation or other factors, and liability for property retired.

(b) This account shall be divided to show the liability to (1) affiliated companies (See Definition 4), and (2) others.

862 Estimated liability; pension and welfare.

(a) This account shall include the credit balances representing the estimated liability of the carrier for amounts provided by charges to operating expenses, including amounts contributed by employees, irrespective of whether carried in special funds or in general funds of the carrier, for pensions, accident and death benefits, savings, relief, hospital, or other provident purposes.

(b) The carrier may use the "full accrual basis" to account for pension costs upon prior approval of the Commission. (See NOTE C to account 040400, "Other fringes — Pensions and retirement plans.")

(c) This account shall be charged when payments are made to retired employees, or disbursements are made for the purposes for which liability was provided.

(d) Separate subaccounts shall be maintained to show the amount provided for each liability estimate and the nature of and amounts of debits and credits to the subaccounts.

863 Estimated liability; casualty and other claims.

(a) This account shall be credited with the amounts charged to operating expense to provide for estimated liabilities for claims for deaths of or injuries to employees and others, and for damages to property not owned or held under lease by the carrier; for claims for loss, destruction, damage, or delays to property entrusted to the carrier for transportation or storage; for revenue overcharges, such as those covered by reparation claims; and for similar items. No credits shall be made to this account for amounts recoverable from insurance companies or others.

(b) Separate subaccounts shall be maintained to show the amount provided for each liability estimate and the nature of and amounts of debits and credits to the subaccounts.

(c) If settlements for claims when audited are charged to this account, the balances for each year shall be kept separately until all items have been adjusted and cleared. If the settements when audited are charged to the appropriate expense accounts, the balance in this account shall be adjusted through the expense accounts so as to reflect the probable liability at the close of each year.

(d) Estimates of amounts payable within one year covering liability for claims shall be transferred from this account to account 815, "Accrued accounts payable."

864 Other estimated liabilities.

(a) This account shall be credited with the amounts accrued for estimated liabilities or losses provided by charges to operating expense or income accounts which are not provided for in any of the preceding estimated liability accounts.

(b) Separate subaccounts shall be maintained to show the amount provided for each liability estimate and the nature of and amounts of debits and credits to the subaccounts.

(c) Upon accomplishment of the purpose for which each estimated liability was provided in this account, any remaining balance in the applicable subaccount shall be cleared to the appropriate operating expense or other account. Prior Commission approval shall be required for clearance of balances in estimated liability subaccounts which were originally established by authority of the Commission.

(d) Estimates of amounts payable within one year covering any liability included in this account shall be transferred to account 815, "Accrued accounts payable."

DEFERRED CREDITS

872 Other deferred credits.

(a) This account shall include the amount of credit balances in suspense accounts that cannot be disposed of until services are performed or additional information is received, such as amounts received from sale of mileage tickets, to be disposed of as mileage is honored; amounts received from sales of excess baggage script, to be disposed of as coupons are honored; interchangeable mileage credential ticket redemption funds, amounts collected from the sale of damaged, unclaimed, and over freight held pending final disposition; unadjusted credit items not otherwise provided for; and similar items, the proper disposition of which is uncertain.

NOTE.—Estimated liability for claims and other accounts payable currently are includible in account 815, "Accrued accounts payable."

873 Accumulated deferred income tax credits.

(a) This account shall be credited (charged) with amounts concurrently charged (credited) to account 557, "Provision for deferred taxes," and account 591, "Provision for deferred taxes—extraordinary items," representing the net tax effect of material timing differences (see Definitions 20(g) and (e)) originating and reversing in the current accounting period.

(b) This account shall be credited with the amount of investment tax credit utilized in the current year for income tax purposes but deferred for accounting purposes (see instruction 1-12).

(c) This account shall be concurrently debited with amounts credited to account

V 41 153 AUG 6 76 UMI

557, "Provision for deferred taxes," representing amortization of amounts for investment tax credits deferred in prior accounting periods.

(d) This account shall be maintained in such a manner as to show separately: (1) the unamortized balance of deferred income taxes and deferred investment tax credit separately as of the beginning and as of the end of each year entries are made affecting the account balance. (2) the current year's net credit or charges applicable to timing differences and deferred investment tax credits.

NOTE A.—The portion of deferred charges and credits relating to current assets and liabilities should likewise be classified as current and included in accounts 739, "Deferred Income Tax Debits," or 825, "Deferred Income Tax Credits," as appropriate.

NOTE B.—This account shall include a net credit balance only. A net debit balance shall be recorded in account 784, "Accumulated Deferred Income Tax Debits."

Shareholders' Equity

901 Capital stock.

(a) This account shall include the par value of stocks with par value; the stated value of no par stock having a stated value; and the cash value of the consideration received or the amount approved by the Commission for no par stocks without stated value, for all shares of capital stock or other form of proprietary interest in the accounting company which have been issued to bona fide purchasers and have not been reacquired and canceled, also shares of stock nominally issued.

(b) This account also shall include amounts transferred from retained earnings for no par stock without stated value when approved by the Commission.

(c) The amount of the consideration received from the sale of par value stock and no par stock having a stated value in excess of the amount credited to this account shall be credited to account 912, "Premiums and assessments on capital stock."

(d) When capital stock is retired or canceled, this account shall be charged with the amount at which such stock is carried in this account. In the case of no par stock without stated value, the amount to be charged shall be the proportion, applicable to the reacquired shares immediately prior to reacquisition, of the total book liability included herein of actually outstanding shares of the particular class and series of stock of which the reacquired shares are a part.

(e) The amounts included in this account shall be recorded so as to show (1) par value of shares of par value stock; the stated value of shares of no par stock, and the amount paid in or approved by the Commission for no part stock without stated value, (pledged or unpledged) held in the company's treasury, by its agents or trustees, or otherwise subject to its control, including shares nominally but never actually issued and (2) par value of shares of par value stock, the stated value of shares of no par stock, and the amount paid in or approved by the Commission for shares of no par stock without stated value, issued and actually outstanding, being the shares not held by the company, its agents, or trustees, or subject to its control.

(f) The amounts included herein shall be further divided so as to show the amount of each class of stock issued, separated as between par value and no par value stock, as follows:

(1) *Common stock.* Stocks which have no preference over other issues of stock in distribution of dividends or of assets.

(2) *Preferred stock.* Stocks having preference over other issues of stock in distribution of dividends or of assets.

(3) *Debenture stock.* Stocks issued under a contract to pay a specified return at specified intervals.

(4) *Receipts outstanding for installments paid.* Receipts for payments on account of subscriptions to capital stock.

(g) When the subscriber has paid his subscription in full and is entitled to receive certificates representing the shares for which he has subscribed, the part value of stocks having par value, the stated value of no par stock, or the agreed purchase price or the price authorized by the Commission for no par stock without stated value, as appropriate, shall be included in the division for the class for which the certificates are issued.

(h) Each of the above classes shall also be divided into subclasses according to differences in dividend or interest rights, voting rights, or conditions under which the securities may be retired.

NOTE A.—When a general levy or assessment is made against the holders of capital stock requiring the payment of any sum in addition to the consideration agreed upon at the time of sale, the amount collected shall be credited to account 912, "Premiums and assessments on capital stock."

NOTE B.—When no par stock without stated value is issued in exchange for par stock, or no par stock with stated value, amounts included in Account 912, "Premiums and assessments on capital stock," for the retired stock, shall be transferred to this account, and any amounts included in the discount account for the retired stock shall be charged to account 913, "Other capital"; *Provided,* however, That any excess over the amount of accumulated net gains applicable to the subclass exchanged included in account 913 shall be charged to account 616, "Other debits to retained earnings."

NOTE C.—An appropriate record shall be maintained with respect to shares of capital stock showing the number of shares nominally issued, nominally outstanding, actually issued and actually outstanding.

NOTE D.—See Definitions 2, actually issued; 3, actually outstanding; 13, nominally issued; and 14, nominally outstanding.

903 Liability for conversion of capital stock.

This account shall include the company's liability under agreements to exchange its capital stock for the outstanding securities of companies whose physical property has been acquired under such agreements, but whose securities have not yet been surrendered for exchange.

911 Discount on capital stock.

This account shall include the excess of the par or stated value recorded in account 901, "Capital stock," (at the time of original sale of par value stock and no par stock with a stated value) plus accrued dividends, if any, over the cash value of the consideration received.

912 Premiums and assessments on capital stock.

(a) This account shall include the excess of the actual cash value of the consideration received (at the time of original sale of par value stock and no par stock with a stated value) over the par or stated value of the stock issued, plus accrued dividends, if any, and subsequent assessments against stockholders representing payments required in excess of par or stated value.

(b) Separate subdivisions shall be maintained for premiums and for assessments on each class and series of stock.

(c) When capital stock is retired and canceled, this account shall be charged with the amount of assessments and premiums originally recorded for the shares of stock retired and canceled.

913 Other capital.

(a) This account shall include all other capital not classified as retained earnings. It shall include such items as the amount of consent dividends on the accounting company's capital stock; capital arising from donations by stockholders of capital stock of the company or other contribution to capital; amounts representing reduction of the par or recorded value of the accounting company's capital stock, including reductions arising in merger of a railroad and pooling of interest (see instruction 2-15(d)); capital from reorganization of the company (see instruction 2-16); and amounts of forfeited subscriptions to the accounting company's capital stock. This account shall also include gains from the acquisition, retirement, or resale of reacquired shares of the accounting company's capital stock; and forgiveness by stockholders as a contribution to capital of long-term debt owed to them.

(b) This account shall be charged with amounts included herein when capitalized by stock dividends or otherwise with the approval of the Commission, and losses from retirement or resale of reacquired shares up to an amount not in excess of credits included herein applicable to the reacquired shares; and may be charged with the amortization of discount on capital stock to the extent of credits herein for such stock.

(c) This account shall be subdivided to show each source of other capital.

921 Retained earnings; appropriated.

This account shall include the accumulated amount of retained earnings which has been appropriated and set aside according to provisions of mortgages, deeds of trust, reorganization plans, or other agreements requiring payments into capital funds, sinking funds, or other funds; and also appropriations

for general contingencies, possible future losses (not in the category of liabilities actually incurred), and other corporate purposes. This account shall be subdivided by classes of appropriations showing the purpose for which each appropriation is made.

922 Retained earnings; unappropriated.

(a) This account shall include the net balance (debit or credit) of the amounts included in accounts 601 to 623, inclusive. It shall not include transfers either to or from account 913, "Other capital," unless so authorized upon application to the Commission.

(b) Any balance representing retained earnings not segregated at the date of the balance sheet shall be included in a subdivision of this account.

(c) The balance of accounts 601 to 623, inclusive, shall be closed into this account at the end of each calendar year.

931 Treasury stock.

(a) This account shall include in subdivisions for each class the reacquisition cost of capital stock which has been actually issued or assumed by the carrier, then reacquired, and is neither retired nor canceled, nor properly includible in sinking or other funds.

(b) This account shall be maintained to reflect separately securities pledged and unpledged.

(c) This account shall be shown on the balance sheet as a deduction in arriving at stockholders' equity.

NOTE.—The accounting for the reacquisition of capital stock and resale thereof shall be in accordance with instruction 5-4, paragraphs (e) through (g).

FORM OF GENERAL BALANCE SHEET STATEMENT

The classified form of general balance sheet statement is designed to show the financial condition of the accounting company at any specified date.

ASSETS

Current assets:
- 701. Cash.
- 702. Working funds.
- 711. Temporary cash investments.
- 712. Special deposits.
- 721. Loans and notes receivable.
- 722. Accounts receivable; Interline and other balances.
- 723. Accounts receivable; Agents and conductors.
- 724. Accounts receivable; Other.
- 725. Interest and dividends receivable.
- 726. Receivables from affiliated companies.
- 727. Accrued accounts receivable.
- 729. Allowance for uncollectible accounts.
  Net receivables.
- 731. Prepayments.
- 733. Material and supplies.
- 735. Other current assets.
- 739. Deferred income tax debits.
  Total current assets.

Special funds:
- 741. Sinking funds.
- 742. Capital funds.
- 743. Insurance and other funds.
  Total special funds.

Investments:
- 751. Investments and advances; Affiliated companies.
  Undistributed earnings from certain investments in account 751.
- 753. Adjustments; Investments and advances—Affiliated companies.
  Net—investments and advances—affiliated companies.
- 755. Other investments and advances.
- 757. Adjustments; Other investments and advances.
  Net—other investments and advances.
  Total investments.

Tangible property:
- 761. Road and equipment property.
- 763. Accumulated depreciation; Road and equipment property.
- 764. Accumulated amortization; Road and equipment property—Defense projects.
  Net road and equipment property.
- 765. Improvements on leased property.
- 766. Accumulated depreciation; Improvements on leased property.
- 767. Accumulated amortization; Improvements on leased property—Defense projects.
  Net improvements on leased property.
  Total carrier property.
- 768. Property used in other than carrier operations.
- 769. Accumulated depreciation; Property used in other than carrier operations.
  Net—property used in other than carrier operations.
  Total tangible property.

Intangible property:
- 771. Organization expenses.

Other assets and deferred debits:
- 781. Other assets.
- 782. Other deferred debits.
- 784. Accumulated deferred income tax debits.
  Total other assets and deferred debits.
  Total assets.

LIABILITIES AND SHAREHOLDERS' EQUITY

Current liabilities:
- 801. Loans and notes payable.
- 803. Accounts payable; Interline and other balances.
- 805. Audited accounts and wages payable.
- 807. Accounts payable; Other.
- 809. Interest matured.
- 811. Dividends matured.
- 812. Unmatured interest accrued.
- 813. Unmatured dividends declared.
- 814. Payables to affiliated companies.
- 815. Accrued accounts payable.
- 821. Federal income taxes accrued.
- 822. State and other income taxes accrued.
- 823. Other taxes accrued.
- 825. Deferred income tax credits.
- 831. Equipment obligations and other long-term debt due within one year.
- 835. Other current liabilities.
  Total current liabilities.

Long-term debt due after one year: [1]
- 842. Funded debt unmatured.
- 843. Equipment obligations.
- 844. Unamortized debt discount.
- 845. Unamortized premium on debt.
  Net funded debt and equipment obligations.
- 846. Debt in default.
- 847. Receivers' and trustees' securities.
- 848. Accounts payable; Affiliated companies.
  Total long-term debt due after one year.

Other long-term liabilities:
- 851. Interest in default.
- 852. Other liabilities.
- 861. Estimated liability; Leased property.
- 862. Estimated liability; Pension and welfare.
- 863. Estimated liability; Casualty and other claims.
- 864. Other estimated liabilities.
  Total other long-term liabilities.

Deferred credits:
- 872. Other deferred credits.
- 873. Accumulated deferred income tax credits.
  Total deferred credits.

Shareholders' equity:
Capital stock:
- 901. Capital stock.
- 903. Liability for conversion of capital stock.
- 911. Discount on capital stock.
  Total capital stock.

Additional capital:
- 912. Premiums and assessments on capital stock.
- 913. Other capital.
  Total additional capital.

Retained earnings:
- 921. Retained earnings; Appropriated.
- 922. Retained earnings; Unappropriated.
  Total retained earnings.
- 931. Treasury stock.
  Total shareholders' equity.
  Total liabilities and shareholders' equity.

[1] To be divided as to "Total issued" and "Held by or for company."

REPORTS AND SCHEDULES APPENDIX B

200. COMPARATIVE GENERAL BALANCE SHEET-EXPLANATORY NOTES

The notes listed below are provided for the purpose of disclosing supplementary information concerning matters which have an important effect on the financial condition of the carrier. The carrier shall give the particulars called for herein and where there is nothing to report, insert the word "none"; and in addition thereto shall enter in separate notes with suitable particulars other matters involving material amounts of the character commonly disclosed in financial statements under generally accepted accounting and reporting principles, except as shown in other schedules. This includes explanatory statements explaining (1) service interruption insurance policies and indicate the amount of indemnity to which respondent will be entitled for work stoppage losses and the maximum amount of additional premium respondent may be obligated to pay in the event such losses are sustained by other railroads; (2) particulars concerning obligations for stock purchase options granted to officers and employes; and (3) what entries have been made for net income or retained income restricted under provisions of mortgages and other arrangements. (Dollars in thousands)

1. Show hereunder the estimated accumulated tax reductions realized during current and prior years under Section 168 (formerly Section 124-A) and under Section 167 of the Internal Revenue Code because of accelerated amortization of emergency facilities and accelerated depreciation of other facilities and also depreciation deductions resulting from the use of the new guideline lives, since December 31, 1961, pursuant to Revenue Procedure 62-21 in excess of recorded depreciation. The amount to be shown in each case is the net accumulated reductions in taxes realized less subsequent increases in taxes due to expired or lower allowances for amortization or depreciation as a consequence of accelerated allowances in earlier years. Also, show the estimated accumulated net income tax reduction realized since December 31, 1961, because of the investment tax credit authorized in the Revenue Act of 1962. In the event provision has been made in the accounts through appropriations of surplus or otherwise for the contingency of increase in future tax payments, the amount thereof and the accounting performed should be shown.

(a) Estimated accumulated net reduction in Federal income taxes since December 31, 1949, because of accelerated amortization of emergency facilities in excess of recorded depreciation under Section 168 (formerly Section 124-A) of the Internal Revenue Code $ _____

(b) Estimated accumulated savings in Federal income taxes resulting from computing book depreciation under Commission rules and computing tax depreciation using the items listed below $ _____

_____Accelerated depreciation since December 31, 1953, under Section 167 of the Internal Revenue Code.

_____Guideline lives since December 31, 1961, pursuant to Revenue Procedure 62-21.

_____Guideline lives under Class Life System (Asset Depreciation Range) since December 31, 1970, as provided in the Revenue Act of 1971.

(c)(i) Estimated accumulated net income tax reduction utilized since December 31, 1961, because of the investment tax credit authorized in the Revenue Act of 1962, as amended $ _____

(ii) If carrier elected, as provided in the Revenue Act of 1971, to account for the investment tax credit under the deferral method, indicate the total deferred investment tax credit in account 872, other deferred credits, at beginning of year $ _____

Add investment tax credits applied to reduction of current year's tax liability but deferred for accounting purposes $ _____

Deduct deferred portion of prior year's investment tax credit used to reduce current year's tax accrual $ (_____)

Other adjustments (indicate nature such as recapture on early disposition) $ _____

(d) Estimated accumulated net reduction in Federal income taxes because of accelerated amortization of certain rolling stock since December 31, 1969, under provisions of Section 184 of the Internal Revenue Code $ _____

(e) Estimated accumulated net reduction in Federal income taxes because of amortization of certain rights-of way investments since December 31, 1969, under the provisions of Section 185 of the Internal Revenue Code $ _____

2. Amount of accrued contingent interest on funded debt recorded in the balance sheet:

Description of obligation	Year accrued	Account No.	Amount
			$

3. As a result of dispute concerning the recent increase in per diem rates for use of freight cars interchanged, settlement of disputed amounts has been deferred awaiting final disposition of the matter. The amounts in dispute for which settlement has been deferred are as follows:

Item	Amount in dispute	As recorded on books: Account Nos. Debit	As recorded on books: Account Nos. Credit	Amount not recorded
Per diem receivable	$			$
Per diem payable				
Net amount	$	XXXXXXXX	XXXXXXXX	$

4. Amount (estimated, if necessary) of net income or retained income which has to be provided for capital expenditures, and for sinking and other funds pursuant to provisions of reorganization plans, mortages, deeds of trust, or other contracts $ _____

5. Estimated amount of fugure earnings which can be realized before paying Federal income taxes because of unused and available net operating loss caryover on January 1 of the year following that for which the report is made $ _____

6. (a) Explain the procedure in accounting for pension funds and recording in the accounts the current and past service pension costs, indicating whether or not consistent with the prior year:

(b) State amount, if any, representing the excess of the actuarially computed valuc of vested benefits over the total of the pension fund. $ _____

(c) Is any part of pension plan funded? Specify, Yes_____ No_____

(i) If funding is by insurance, give name of insuring company

(ii) If funding is by trust agreement, list trustee(s)

Date of trust agreement or latest amendment

If respondent is affiliated in any way with the trustee(s), explain affiliation:

(d) List affiliated companies which are included in the pension plan funding agreement and describe basis for allocating charges under the agreement

(e)(i) Is any part of the pension plan fund invested in stock or other securities of the respondent or any of its affiliates? Specify. Yes_____ No_____

If yes, give number of the shares for each class of stock or other security:

(ii) Are voting rights attached to any securities held by the pension plan? Specify. Yes____ No____ If yes, who determines how stock is votes?

APPENDIX B-2

200. COMPARATIVE GENERAL BALANCE SHEET—ASSETS

For instructions covering this schedule, see the text pertaining to General Balance Sheet Accounts in the Uniform System of Accounts for Railroad Companies. The entries in this balance sheet should be consistent with those in the supporting schedules on the pages indicated. The entries in column (c) should be restated to conform with the accounting requirements followed in column (b). The entries in the short column (a2) should be deducted from those in column (a1) in order to obtain corresponding entries for column (b). All contra entries hereunder should be indicated in parenthesis.

Line No.	Account or item (Dollars in thousands) (a)			Balance at close of year (b)	Balance at beginning of year (c)

APPENDIX B-6

INSTRUCTIONS CONCERNING ENTRIES TO BE MADE IN SCHEDULE 211-1 AND 211-2 ON PAGES_____

1. Give particulars of balances at the beginning and close of the year and of all changes during the year in account No. 761, "Road and Equipment Property," and account No. 765, "Improvements on Leased Property," classified by primary accounts in accordance with the Uniform System of Accounts for Railroad Companies. The balances, by primary accounts, should, insofar as known, be stated in column (b) and all changes made during the year should be analyzed in columns (c) to (h), inclusive. Column (j) is the aggregate of columns (b) to (h), inclusive. Grand totals of columns (b) and (j) should equal the sum of accounts 761 and 765 for the respective periods; if not, full explanation should be made in a footnote.

2. In column (c) are to be shown disbursements made for the specific purpose of purchasing, constructing, and equipping new lines, and for the extension of old lines, as provided for in Instruction 2—1, "Items to be Charged," of the Uniform System of Accounts for Railroad Companies, for such items.

3. In column (d) is to be shown the cost of a railway or portion thereof, acquired as an operating entity or system by purchase, merger, consolidation, reorganization, receivership sale or transfer, or otherwise.

4. In columns (c) and (f), should be included all entries covering expenditures for additions and betterments, as defined, whether replacing other property or not.

5. In column (f) show particulars for improvements made on property held under lease or other form of long-term contract and not charged to the owning company.

6. In columns (g) and (h) should be entered all credits representing property sold, abandoned, or otherwise retired.

7. Both the debit and credit involved in each transfer, adjustment, or clearance, between road and equipment accounts, should be included in the column in which the item was initially included; also the transfer of prior years' debits or credits from investment in road and equipment to operating expenses or other accounts, or vice versa, should be included in the column applicable to current items of like nature. Each such transfer, adjustment, or clearance should be fully explained when in excess of $100,000.

8. If during the year an individual charge of $100,000 or more was made to account No. 2, "Land for transportation purposes," state in a footnote the cost, location, area, and other details which will identify the property.

9. Report on line 34 amounts not includible in the primary road accounts. The items reported should be briefly identified and explained under "Notes and Remarks," below. Amounts should be reported on this line only under special circumstances, usually after permission is obtained from the Commission for exceptions to prescribed accounting. Reference to such authority should be made when explaining the amounts reported. Respondents must not make arbitrary changes to the printed stub or column headings without specific authority from the Commission.

10. If during the year a segment of transportation property was acquired, state in a footnote the name of the vendor, the mileage acquired, and the date of acquisition, giving termini and the cost of the property to the respondent. Also furnish a statement of the amount included in each primary account representing such property acquired, referring to the column or columns in which the entries appear.

11. If an amount of less than $1,500 is used as the minimum debit or credit for additions and betterments to property investment accounts as provided for in Instruction 2—2, of the Uniform System of Accounts for Railroad Companies, state in a footnote the amount used.

12. Show dollars in thousands.

211G-1. AMORTIZATION OF DEFENSE PROJECTS—ROAD AND EQUIPMENT OWNED

APPENDIX B-11

1. Show in columns (b) to (e) the amount of base of road and equipment property for which amortization is provided in account No. 764, "Accumulated amortization-Road and equipment property-Defense projects" of the respondent. If the amortization base is other than the ledger value stated in the investment account, a full explanation should be given.

2. Show in columns (f) to (i) the balance at the close of the year and all credits and debits during the year in account No. 764, "Accumulated amortization-Raod and equipment property-Defense projects."

3. The information requested for "Road" by columns (b) through (i) may be shown by projects amounting to $100,000 or more, or by single entries as "Total road" in line 21. If reported by projects, each project should be briefly described, stating kind, location, and authorization date and number. Projects amounting to less than $100,000 should be combined in a single entry designated "Minor items, each less than $100,000."

4. Any amounts included in columns (b) and (f), and in column (h) affecting operating expenses, should be fully explained. (Dollars in thousands)

INSTRUCTIONS 300. RESULTS OF OPERATIONS

1. In column (d) show, against the appropriate account, the amount of income that is offset by deductions in other income accounts of respondents so far as they relate to companies the operations of which are covered by this operating report, the amount of such deductions or disposition to be also shown against appropriate accounts.

2. Report the total railway operating revenues from schedule 310, line 12, column (b) on line 1, column (b).

3. Report the total railway operating expenses from schedule 320, line 88, column (b) on line 2, column (b).

4. Line 10 includes only dividends from investments accounted for under the cost method. Line 17 includes only dividends accounted for under the equity method. Line 18 includes the undistributed earnings from investments accounted for under the equity method.

5. All contra entries hereunder should be indicated in parenthesis.

6. Report dollars in thousands.

APPENDIX R-15

1. State the railway operating revenues of the respondent for the year classifying them in accordance with the Uniform System of Accounts for Railroad Companies and distribute the amounts among the classes of service as indicated in the absence of records separating revenues between freight and passenger trains, the distribution should be estimated on the basis of the best data available.

2. Assign rail-line revenues, including revenues from water transfers and highway motor vehicle operations, to "Freight service" or to Passenger and allied services" according to the type of train (or other equipment) by which the traffic moved.

3. Incidental revenues should be assigned as provided for in the schedule.

4. Any unusual accruals involving substantial amounts included in column (b) should be fully explained in a footnote.
(Dollars in thousands)

Line No.	Class of railway operating revenues (a)	Amount of revenue for the year (b)	RAIL-LINE REVENUES, INCLUDING WATER TRANSFERS: Assignable to freight service (c)	RAIL-LINE REVENUES, INCLUDING WATER TRANSFERS: Assignable to passenger and allied services (d)	Remarks
	Transportation—Rail-Line	$	$	$	$

2	(102)Passenger*				
3	(103)Passenger-Related				
4	(104)Switching				
5	(105)Water transfers				
6	Total rail-line transportation revenue				
7	(106)Demurrage				
8	(110)Incidental				
	Joint Facility				
9	(121)Joint Facility-Cr.				
10	(122)Joint Facility-Dr.				
11	Total joint facility operating revenue				
12	Total railway operating revenues				

*Report hereunder the charges to these accounts representing payments made to others for—

Terminal collection and delivery services when performed in connection with line-haul transportation of freight on the basis of freight tariff rates: $

(a) Of the amount reported for item A.1, _____% (to nearest whole number) represents payments for collection and delivery of LCL freight either in TOFC trailers or otherwise. The percentage reported is (Check one):

Actual ( ). Estimated ( ).

Switching services when performed in connection with line-haul transportation of freight on the basis of switching tariffs and allowances out of freight rates, including the switching of empty cars in connection with a revenue movement $

Substitute highway motor service in lieu of line-haul rail service performed under tariffs published by rail carriers (does not include traffic moved on joint rail-motor rates):

(a) Payments for transportation of persons $

(b) Payments for transportation of freight shipments $

†Governmental aid for providing passenger commuter or other passenger-train service included in account 108, as provided in item (d) of that account $

NOTE.—Gross charges for protective services to perishable freight, without deduction for any proportion thereof credited to account No. 101, "Freight" (not required from switching and terminal companies):

Charges for service for the protection against heat $

Charges for service for the protection against cold $

Annual Report Form R-1

APPENDIX R-17

INSTRUCTION SCHEDULE 320. RAILWAY OPERATING EXPENSES

State the railway operating expenses on respondent's road for the year, classifying them in accordance with the proposed Uniform System of Accounts for Railroad Companies, and analyzing them in accordance with the Commission's rules governing the separation of operating expenses between freight and passenger service.

Annual Report Form R-1

[Form RE&I]

INSTRUCTIONS

1. Under order of the Commission, Class I railroads, excluding switching and terminal companies, are required to file quarterly reports of revenues, expenses and income items, Form RE&I, in duplicate, in the Bureau of Accounts, Interstate Commerce Commission, Washington, D.C. 20423, within 30 days after the close of each quarter. Reports should be prepared on a calendar quarter basis beginning with the first day of January, April, July and October.

2. The items reported in Form RE&I should be taken from and agree with the accounts kept in conformity with the Uniform System of Accounts for Railroad Companies prescribed by the Interstate Commerce Commission. The account numbers refer to the accounts in the Uniform System of Accounts. Reverse items should be shown in parentheses. Dollar amounts should be rounded to the nearest whole number and adjusted to totals; *omit cents*. Ratios in Items 56 through 58 should be calculated to one decimal place. Entries in columns (c) and (e) should be restated to conform with the accounting requirements followed in columns (b) and (d). Unusual transactions or items which reflect an important change in the financial condition of the carrier should be identified and explained in a footnote under "Remarks". Amounts reported in column (b), Item 48, Account 570, must be identified in a footnote showing date of Commission approval, and brief description of items included. Any dividends paid other than in cash must be fully explained in a footnote.

3. Item 40 represents the accrual of income taxes on ordinary income. Income taxes which are refundable or reduced as result of carry-back or carry-forward of operating loss shall be included in the year in which the loss occurs, or, if a carry-forward, in the year in which applied to reduce taxes, unless the amount constitutes an extraordinary item excludable from ordinary income for the year (See Instruction 1-2(d), Uniform System of Accounts). Income taxes on extraordinary items (Account 590) are reported in Item 49.

4. Item 25 includes dividend income from investments to which the cost method of accounting applies. Item 26 includes only dividends accounted for under the equity method. Item 27 includes the undistributed earnings (losses) from investments accounted for under the equity method.

5. The certification must be completed by an officer of the carrier.

APPENDIX B-23

SPECIAL INSTRUCTIONS

Form OS-A

This report form is designed for processing on Optical Character Recognition (OCR) equipment. Please observe the following directions carefully when filling in the form:

1. Use any standard typewriter.
2. Align the form vertically by typing "H'e" over the preprinted "H'e" at the top of the form.
3. Do not adjust vertical alignment once you have started typing.
4. Set tab stops to insure proper horizontal alignment when typing columns of information.
5. Type each field beginning as close to the blue area as possible, but not touching it, justified right.
6. Do not use dollar signs, decimal points, or commas.
7. Report whole dollars only.
8. Do not smudge, staple or multilate the form.
9. File the original typed copy of the form.

INSTRUCTIONS

Under the Commission's order of October 21, 1963, effective January 1, 1964, Class I railroads are required to make quarterly reports of operating statistics. In accordance with the order, FORM OS-A, TRAIN AND YARD SERVICE, is required to be filed, in duplicate, in the Bureau of Accounts, Interstate Commerce Commission, Washington, D. C. 20423, within 25 days after the end of the quarter for which made.

Follow in general the Classification of Mileage Accounts. Include suburban service.

(A) Miles of road operated at close of quarter, excluding industrial tracks, yard tracks and sidings. Compute data for columns (d) and (e) by averaging mileage reported for each quarter.

(B) Include all miles made by all locomotive units. In spaces marked "type" indicate type of motive power (electric, etc.), accumulating unit-miles reported. Types making less than 2 percent of total miles for service need not be segregated. Exclude miles made by motorcars.

(C) Include miles of all self-propelled motorcars and trailing units.

(D) Report miles made by work service equipment in transportation trains, and miles made by tank cars loaded with water returning from phosphorus service as loaded car-miles; miles made by flatcars carrying loaded highway trailers or empty highway trailers moving under revenue billing as loaded freight car-miles; miles made by flatcars carrying other empty highway trailers as empty freight car-miles; and miles made by business cars of other than reporting carrier as sleeping car-miles. Exclude miles made by motorcars. Item 6-05 includes mail, express, baggage cars and combination cars other than 6-02 combination.

*Show the number of loaded and empty miles by type of car (included in item No. 5) relating to Coal & Ore wharve operations and floating services.

(E) Compute from conductors' or dispatchers' train reports weight in tons (2000 pounds). Item 7-01 includes weight of all locomotive units moved 1 mile in transportation trains. Ton-miles of motorcars should be excluded. Items 7-02 and 7-03 represent tons behind locomotive units (cars and contents, company-service equipment and cabooses) moved 1 mile in transportation trains. Include ton-miles of exclusive work service equipment and motorcars. Use 150 lbs. as the average weight per passenger, and 4 tons as the average weight of contents of each headend car.

(F) Compute from conductors' train reports. Represents the number of tons of revenue and nonrevenue freight moved 1 mile in transportation trains. Include a reasonable proportion of the weight of exclusive work equipment moved 1 mile. Include net ton-miles in motorcar trains. Exclude l.c.l. shipments of freight handled in mixed baggage-express cars.

(G) Represents elapsed time of transportation trains (both ordinary and light) between time of leaving initial terminals and time of arrival at final terminals including train switching at way stations and delays on road as shown by conductors' or dispatchers' train reports. Include time of motorcar propelled trains.

(H) Train switching hours are defined as hours expended in switching service performed by train locomotives at terminals and way stations. A locomotive may consist of one or more units operated under a single control.

(I) Yard switching hours are hours expended in switching service performed by yard locomotives in yards where regular switching service is maintained, including terminal switching and transfer service in connection with the transportation of revenue and incidentally of company freight. A locomotive may consist of one or more units operated under a single control.

Report figures cumulative from January 1st in columns (d) and (e).

Any unusual entries or adjustments involving substantial amounts should be fully explained in footnotes.

CERTIFICATION

I, THE UNDERSIGNED _____ of the
(Full name & title of officer in charge of the accounts)
_____, state that this
(Full name of reporting company)
report was prepared by me or under my supervision; that I have carefully examined it; and, on the basis of my knowledge, belief, and verification (where necessary) I declare it to be a full, true and correct statement of the operating statistics named, and that the various items here reported were determined in accordance with effective rules promulgated by the Interstate Commerce Commission.

APPENDIX B-24

MILEAGE CHANGES: If the miles of road operated changed during the quarter for which this report is made, show the date and amount of the change, and a brief explanation of the difference, such as, newly constructed line from _____ to _____, line abandoned from _____ to _____, acquisition of line (with name of former operating company), resurvey, etc. If no change occurred, enter the word "None"

DATE	CAUSE OF CHANGE	RESULT OF CHANGE		DATE	CAUSE OF CHANGE	RESULT OF CHANGE	
		INCREASE (Miles)	DECREASE (Miles)			INCREASE (Miles)	DECREASE (Miles)

INSTRUCTIONS

1. Under order of the Commission, Class I railroads, excluding switching and terminal companies, are required to file quarterly reports of balance-sheet items, Form CBS, in duplicate, in the Bureau of Accounts, Interstate Commerce Commission, Washington, D. C. 20423, within 30 days after the close of each quarter. Reports should be prepared on a calendar quarter basis beginning with the first day of January, April, July, and October.
2. The items reported in Form CBS should be taken from and agree with the accounts kept in conformity with current Uniform System of Accounts for Railroad Companies prescribed by the Interstate Commerce Commission. Report undistributed earnings from certain investments in account 751, in accordance with Docket No. 35949. The Equity Method of Accounting for Certain Long-Term Investments in Common Stocks. The account numbers refer to the accounts in the Uniform System of Accounts. Reverse items should be shown in parentheses. Dollar amounts should be rounded to the nearest whole number and adjusted to the totals; omit cents.
3. The section regarding changes in miles of road operated must be completed in the detail indicated. The resulting mileage changes should be given to the nearest tenth.
4. Unusual transations or items which reflect an important change in the financial condition of the carrier should be identified and explained in a footnote under "Remarks".
5. The certification must be completed by an officer of the carrier

APPENDIX B-26

701-1. ROAD AND EQUIPMENT PROPERTY OWNED

1. Give particulars of changes during the year in accounts 761, "Road and equipment property," classified in accordance with the Uniform System of Accounts for Railroad Companies.

2. Gross charges during the year should include disbursements made for the specific purpose of purchasing, constructing and equipping new lines, extensions of old lines, and for additions and betterments. Both the debit and credit involved in each transfer, adjustment, or clearance, between road and equipment accounts, should be included in columns (c) and (d), as may be appropriate, depending on the nature of the item. Adjustments in excess of $100,000 should be explained. All changes made during the year should be analyzed by primary accounts.

3. Report on line 34 amounts not includable in the primary road accounts. The items reported should be briefly identified and explained in a footnote on page . Amounts should be reported on this line only under special circumstances, usually after permission is obtained from the Commission for exceptions to prescribed accounting. Reference to such authority should be made when explaining the amounts reported. Respondents must not make arbitrary changes to the printed stub or column headings without specific authority from the Commission.

APPENDIX C

EXCERPT FROM DEPARTMENT OF TRANSPORTATION—PROPOSAL

VI. *COST CENTER ACCOUNTING—A SUBSTITUTE PROPOSAL*

A. *Introduction.*

As discussed in Section III of this document, our informal response to the Bureau's September draft, contained an alternate USOA which was location oriented, used nine natural expense categories and ten functions or activities in a matrix format and contained essentially the same sub-accounts as those prepared by the Bureau. The definition of location was left to the individual firm within broad guidelines to be set by the Commission. A coding methodology was proposed which would have identified the type of account, the account number, the function to which the account applies and the location or cost center with which each account should be associated. Finally, we recommended the Commission not require location-oriented data to be reported on a routine basis, but indicated that it should be available to use in appropriate regulatory proceedings. We indicated our alternative system was the result of "our present thinking on the subject for discussion purposes. Further research may identify methods, functions or account titles which are more appropriate." (p. 16)

Subsequent to enactment of the bill, and especially its overriding requirement that the new accounting system shall be "compatible with present and desired managerial and responsibility requirements of the carriers,"[1] we have reconsidered the alternative proposal which we made last October. Additionally, we have discussed our proposal with several railroads, asking them in particular about their existing managerial and responsibility accounting systems. Finally, we have considered the Bureau's proposal from a computerization viewpoint—especially in the areas of the number of required accounts and the numbering or coding scheme. As a result of this effort, DOT has modified its earlier proposal. Our present thinking now leads us to recommend that the new accounting system reflect the following characteristics:

1. The system should be cost center oriented;

2. Cost center should be defined by the individual railroad within guidelines promulgated by the Commission;

3. A matrix format should be used which contains natural expense categories and functions or activities;

4. The system should correspond to the responsibility accounting system of any railroad with respect to how information is collected, categorized and maintained; and

5. Cost center data should not be routinely reported to the Commission, and the circumstances in which it would be required to be submitted should be enumerated.

Each of these five characteristics is explained more fully below.

B. *Cost center oriented accounting.*

DOT believes that only through the use of cost center accounting can all of the requirements of the Act be achieved. Many railroads use this type of accounting for their own internal cost control. Under such accounting procedures cost centers are charged with only those expenses which are controllable at the level of the particular center. Apportionments which require arbitrary formulas become unnecessary when the focus is upon the direct costs of the cost centers. In addition, costs center accounting necessarily requires variable costs to be directly collected by cost center. In order to determine most accurately the costs associated with a particular movement or service—as required by the Act—one need only collect the appropriate costs at each cost center involved. In the collection of cost center accounting information, appropriate output factors (statistics) must be collected. These statistics should be usable in connection with my costing methodology, and should not impose one as the Bureau's proposal does.

With a direct cost approach for cost centers, the contribution of relevant centers or groups of centers to the overhead and profit of the firm is ascertainable if revenues are allocated to those centers on some appropriate basis. In an industry with joint or common costs, the contribution approach is the most relevant and is clearly contemplated by § 307 of the Act which requires such costs to be specifically determinable and by Section 202 which relies on ascertaining a contribution to overhead in determining whether a rate contributes to a firm's going concern value. Additionally, the system is easily adaptable to computing full costs if desired by the firm or by the Commission. If the rail industry moves, in the future, to a system of standard costs, or any other costing methodology, direct costs by cost centers would still be required.

C. *Definition of cost center.*

Most railroads which already use responsibility accounting have divided their firm into segments to reflect the geographical area of activity controlled. The minimum required level of detail to be collected would be at the cost center, *e.g.*, crew districts, yards, stations, shops, etc. Each of these cost centers should be accounted for separately. The railroads would be required to keep cost center information at the same level of detail as they presently maintain in their own internal system. If desired, of course, the railroads could keep more information than is requested.

Within guidelines, the definition of cost center should coincide with the way the firm already uses the term, if it does. Obviously, for smaller railroads the term could include a combination of crew districts, yards, stations, etc.

D. *Operating expense matrix.*

The operating expense matrix which we propose relies on control accounts. Major expenses are shown for the firm by functions. Table I, on the next two pages, contains our proposed matrix, but does not show the detail required to be provided under each of its headings. That information is contained in Appendix E. The following comments are intended to explain the use and rationale of the matrix.

1. The matrix is composed of twenty natural expense accounts. Each account should be considered a control account. The natural expense account total represents the total expenses for the particular item throughout the firm. This total is the summation of all costs charged to the enumerated activities.

[1] Section 307(c).

17. Communications								
18. General and Administrative								
19. Joint Facilities								
20. Other								

C-6

2. The column entitled "Expenses Not Identified With a Single Cost Center" may be required because, under the direct or controllable cost approach, an expense may be allocated to a particular cost center only if it is incurred directly for that center. An expense may not be identified with a single cost center if it is incurred for more than one center.

DOT cannot, of course, be certain that every railroad will be able, in its internal accounting system, to attribute every expense to a particular cost center. We believe, however, that if an expense can be so attributed, it must be, and that if it cannot be so attributed, it might then be considered as a separate cost center in and of itself. Only if neither of these alternatives is possible would an expense be placed in the "not identified with a single cost center" category. DOT recommends that the Bureau request every railroad which will be required to adopt the new USOA to indicate whether any of its expenses would need to be placed in this category. If it appears that there would be no need for the category it should be eliminated.

The remaining columns divide all activities of the firm into three major categories: "Transportation", "Maintenance," and "General and Administrative." The category "Transportation" is created as a result of a specific instruction in § 307 of the Act, which also requires the category to be divided into subcategories of train, yard, station and others. In the DOT proposal, these subcategories are broken into cost centers. However, since the actual moving of a train between cost centers must be accounted for separately, the "Transportation" activity is divided into two subcategories: "Terminal" and "Train." "Train" includes all cost centers associated with moving a train between two locations. "Terminal" is used in a broad sense, and includes the locations between which a train moves, whether such location be yards, stations, terminals, etc. Since each segment of track, yard, shop, or station would be a "Terminal" under DOT's approach, the several "Terminals" would accumulate the data which the Bureau's proposal desires (according to the accounts set out in the matrix) but in a manner which is consistent with the Act.

Similarly, the category entitled "Maintenance" is divided into four sub-activities to permit the accumulation of data for those items enumerated in the Act at Section 307 (b)(ii) and (iii).

3. Most of the natural expense accounts are self-explanatory. They are intended to be used in the same way as the Bureau uses them in its proposal. For purposes of reviewing the accounts, explanatory comments are provided below.

(a) Items 1–4 refer to all salaries and wages. Salaries are divided into four major groups: "Officers and Superintendents" (the word supervisor could be substituted for superintendents), "Direct Labor" (intended to encompass repair and maintenance employees, trainmen, dispatchers, etc.) "Clerical" and "Other." The actual breakdown of labor costs into finite accounts would be made at the specific cost center level. Arbitraries (as defined in employment contracts) and overtime would also be shown at the specific cost center level.

(b) Items 5–8 refer to all fringe benefits—payroll taxes, vacation pay, pensions, etc.

(c) "Materials" (item 9), "Tools and Supplies" (item 10), "Fuels and Lubricants" (item 11) and "Casualty and Damages" (item 13), are used in the same way as these terms are used by the Bureau in its proposal.

(d) Item 12 refers to all "Purchased Services," i.e., utilities except telephone and telegraph, professional services, etc. Rentals of locomotives, freight cars, etc. are contained in item 14.

(e) Item 14 includes all "Rentals and Lease Payments," including hire of freight or passenger cars. At the cost center level, accounts would show, among other things, rent paid for buildings, automotive equipment, locomotives, data processing equipment, etc.

(f) Item 15 contains all taxes with the exception of pay-toll taxes, which are accounted for in items 5–8, and income taxes which are not considered as operating expenses.

(g) "Depreciation and Retirement," item 16, are used in the same sense as the terms are used in the Bureau's proposal.

(h) Item 17, "Communications," refers to telephone and telegraph expenses and to the expenses associated with the firm's internal communications network.

(i) Item 18 includes all expenses associated with general and administrative office expenses, such as: insurance; stationery and printing; travel; computer centers; etc.

(j) Item 19 contains "Joint Facility" accounts. Under the cost center approach, each joint facility would be a cost center and the detail, therefore, maintained on that level.

(k) Item 20, "Other," refers mainly to miscellaneous or extraordinary operating expenses which cannot be anticipated and, therefore, cannot be included in the other categories of expense.

4. We believe the required expense accounts, those shown in Table I, should be numbered with three digits only. Since the present accounting system relies entirely on three digit accounts, less difficulty will be encountered by rail firms in changing from the present USOA to the revised one, thus reducing the cost of implementing the new system.

E. *Cost center definitions*

The definition of "cost center" shall be left to the individual railroad, but must be consistent with and at the same management level as it is in the currently used internal responsibility accounting system. Additionally, any definition must conform to broad guidelines established by the Commission; however, we assume the term would delineate expenses at the level of station, terminal, yard, segment of track as represented by crew districts or joint facility, etc. The flexibility thus afforded will permit the firm to use the cost center concept in the same manner that it is used within the firm's existing responsibility accounting system, as required by the Act.

F. *Suggested list of detail (cost center) accounts*

If the proposed accounting system is to develop data at the cost center level, yet be cost effective and nonduplicative as required by the Act, DOT believes detail accounts should not be specified within the USOA. The suggested listing of detail accounts, shown in Appendix E, reflects our current thinking as to the type of expenses which should be kept at that level. After subsequent research, we may wish to recommend revisions, extensive or otherwise, to the list and to the matrix itself. Appendix E is included for discussion purposes and to add some specificity to our proposed alternate system.

The function of the Suggested List of Detail Accounts is twofold. First, the list is an indication of the detail which is to be kept at the cost center or responsibility level. Obviously, not all accounts will be utilized at every cost center, but for those accounts which do pertain to a specific center, the detail accounts are an indication of the data which is to be collected. Second, for those roads which do not have a responsibility accounting system, the Commission's guidelines as to what constitutes a cost center, *and* the Suggested List of Detail Accounts could be used as the foundation of a responsibility accounting system if the road desires to initiate one. We reiterate our concern that only the redefined Class I railroads should be required to maintain the detail recommended in the Suggested List.

G. *Reporting*

DOT believes the cost center data which would be maintained under a firm's existing responsibility accounting system, using either the firm's own accounts or the suggested detail accounts, should *not* be routinely reported to the Commission. Cost center data is, we recognize, proprietary information. A railroad should release such data only when it is needed for a particular regulatory function of the Commission which affects that railroad, *e.g.*, certain rate increase, abandonment or subsidy requests. The only operating expense information which would be reported to the Commission on a routine basis is that specified in Table I above.

H. *Rationale*

Since the proposed alternative USOA requires the railroads to keep their accounts in much less detail than would the Bureau's proposal, two obvious questions may be asked: 1) Does the system conform to the Act? and 2) With such flexibility, will comparability of data between roads be destroyed thus making fulfillment of the Commission's regulatory functions more difficult?

The proposal does conform to the Act. It uses the firm's responsibility accounting system if such a system exists. It is nonduplicative and does not require costs beyond those necessarily incurred in adopting any new USOA. It contains detail sufficient to allow the specific costs of the several rail services to be developed. Unallocated (fixed) costs are reported to the Commission, as are direct or variable costs for the activities specified. Proprietary data is retained by the firm except where needed for a specific regulatory proceeding. When such data is needed, it is available.

Comparability between firms is not destroyed by the flexibility proposed herein, since DOT's proposal requires all railroads to maintain the identical information gathered at the identical level of activity to which the information applies. If systemwide data is ever needed, the information gathered under the DOT proposal could be aggregated to show it.

Appendix D

Excerpt From Association of American Railroads—Proposal

Comments on New Schedule 320 Railway Operating Expenses

As an alternative to the proposed Matrix of Operating Expenses, we have developed a proposal for additional information to be furnished within the framework of the present Uniform System of Accounts (USOA). In both the present System and the proposed Matrix, considerable allocation of expenses is required. The principle, followed in our alternative proposal, is to minimize expense allocation in financial reporting. A second principle followed is that nonhomogeneous costs will be maintained in separate accounts. For example, we propose that the current Account 402 be separated into five new accounts. We also propose that certain expenses be clearly set out so that they can be more easily identified and properly assigned in the development of cost data without reliance on nonuniform accounting allocations now applied by the individual roads. The Cost Analysis Organization (CAO) will devise recommended methodologies for allocating such expenses for cost determination.

Our proposal for a new Schedule 320-Railway Operating Expense, provides for labor, material and other, and also passenger-related expenses to be reported for each applicable account. For those carriers with no passenger or commuter operations Schedule 320 as presented herein should be used leaving column (f) blank. Carriers reporting passenger or commuter service will be required to complete column (f) and submit a supporting schedule for the breakdown of labor, material and other or such data as the Commission shall require. The entries in each column of the revised schedule (appendix I) would be governed by the following:

Labor

This column will include the carriers' expenses for salaries and wages paid to employees and chargeable to operating expenses. Labor expenses which will be recovered through bills will be shown in the "Other" column. The labor included on contractors' invoices is to be shown in the "Other" column. Labor expenses will not be recorded as such in any of the Joint Facility accounts.

Maintenance of way

4. Account 201, Superintendence, should be expanded as follows: Superintendence, Track; Superintendence, B&B; Superintendence, Signal; Superintendence, Communications; Superintendence, Other M of W.

5. For accounts 202, 206, 208, 210, 212, 214, 216, 218, 220 and 221, additional accounts should be added in order to separate each of these expenses between running tracks and yard switching tracks.

6. Depreciation and retirements for road accounts should continue to be reported on sub-schedule for the annual report.

7. Account 227, Station and Office Buildings, should be split into two accounts, one for Station Buildings and one for General Office Buildings. This will tie in with the property accounts change proposed by the Commission.

8. Account 235, Shops and Enginehouses, should be split into three accounts, one for car shops, one for locomotive shops and enginehouses and one for common shops.

9. Account 237, Grain Elevators, should be deleted in connection with recommendation number 128.

Maintenance of equipment

10. Account 301, Superintendence, should be expanded as follows: Superintendence, Car; Superintendence, Locomotive; Superintendence, Other; Superintendence, Common.

11. Account 302, Shop Machinery, should be expanded to cover the same categories as item 10.

12. Account 314, Freight Train Car Repairs, should be split into the following accounts: Freight train car repairs, AAR car repairs payable, AAR car repairs receivable, Destroyed foreign line cars.

The cost of car inspection should be taken out of this account and reflected under Transportation expense because it is train-related.

13. The cost of locomotive inspection should be taken out of account 311 and reflected under Transportation expense because it is train-related. In addition, present accounts 388 and 400, Servicing Yard Locomotives, and Servicing Train Locomotives, should be combined into one account since most locomotives are multi-purpose.

A separate account should be established for repairs to other than diesel locomotives.

14. The following accounts should be established under Maintenance of Equipment for shop expense, instead of allocating such cost to repair accounts. Shop expense, Car; Shop expense, Locomotive; Shop expense, Other; Shop expense, Common.

15. Expand account 316, Highway Revenue Equipment Repairs, by adding the following accounts: Destroyed foreign line trailers, AAR trailer repairs, payable; AAR trailer repairs, receivable.

16. Expand account 373, Station Employees, as follows: Station employees, Platform employees, Loading and unloading automobiles.

17. Change title of current account 375, Coal and Ore Wharves, to Bulk Commodity Facilities and change account number.

18. Expand account 402, Train Supplies and Expenses, as follows: Cleaning and disinfecting cars, Protective service, heating and refrigeration, Car inspection and lubricating cars, Car supplies, Meals and lodging for crews, Train supplies and expenses.

19. Establish a new account for Train Yard Inspection. This would cover the cost of inspecting cars in train yards including such tasks as coupling air bases, testing air or bleeding train line, etc.

20. Combine accounts 382, Yard Switching Fuel, and 394, Train Fuel, into one account, 394, Transportation Fuel. Since allocation is generally necessary, it can be done in cost studies.

21. Combine accounts 383, 384, 395, and 396 which pertain to power produced and purchased into one account.

22. Combine accounts 390 and 391, Operating Joint Yards, and accounts 412 and 413, Operating Joint Tracks and Facilities, into accounts 412 and 413, Operating Joint Yards, Tracks and Facilities, to be consistent with Maintenance of Way Accounts 278 and 279.

23. Delete account 419, Loss and Damage—Baggage, and include any charges in account 418, Loss and Damage. Sub-account may be used if necessary to capture the expense of Loss and Damage—Baggage.

24. Accounts now under Miscellaneous Operations (441 through 448) should be renumbered and included under Transportation.

25. Account 443, Grain Elevators, should be deleted and charges included with Bulk Commodity Facilities, new account 383. Sub-account may be used by carriers who wish details of the Bulk Commodity Facilities.

26. Account 451, Salaries and Expenses of General Offices, should be expanded into three accounts: Superintendence, general unassigned; Superintendence, property protection; Superintendence, computer services; "Superintendence, general unassigned" would include, in addition to most general office personnel previously includible in account 451, those individuals who have jurisdiction over more than one department.

27. Rental accounts 503 through 507 and 536 through 540 should be renumbered and included under Transportation.

Traffic

28. Account 355, Fast Freight Lines, is not needed and should be deleted and the account number used for payroll taxes.

General

29. Account 454, Law Expenses, should be revised to include only such legal expenses as retainers' cost of suits and special law fees. Salaries and supplies should be included in the normal general expense accounts.

The revised Schedule 320 of Form R-1, reflecting the above recommendations, is attached and marked Appendix I. In that exhibit, certain existing accounts not referred to above have been renumbered in order to accommodate the additional account.

Recommended Changes To Schedule 310

Railway Operating Revenues

We also recommend certain changes in revenue accounts in addition to those proposed by the I.C.C., at page 51 of the March 5, 1976 Notice.

30. Account 101, Freight Revenue, as now proposed by I.C.C., would be more properly stated if debits representing expense were excluded. We recommend the establishment of separate accounts for items representing expense.

These should be: 1. Switching services: 2. Payment for hauling trailers and containers to and from TOFC/COFC terminals. 3. Other (items b, c, e, and k in items to be charged to account 101 as shown on pages 51 and 52 of the March 5 Notice.

Amounts which represent revenue adjustments, such as overcharges and refunds (item a, f, g, h, and i), should continue to be charged against account 101. The new account mentioned above would be deductions from the Transportation Revenue Accounts to determine a net total for your account 100, Transportation Rail Line.

31. We also recommend the establishment of an account entitled Bulk Commodity Loading and Unloading Facilities. This is consistent with the segregation of costs for such facilities.

32. Dining and Buffet should be included in Account 103, Passenger-Related, instead of Account 110, Incidental.

V 41 153 AUG 6 76 UMI

220. RAILWAY OPERATING EXPENSES

State the railway operating expenses on respondent's road for the year, classifying them in accordance with the Uniform System of Accounts for Railroad Companies, and analyzing them in accordance with the Commission's rules governing the separation of operating expenses between freight and passenger service; railroads. The returns to accounts 202-221 should be classified as provided for by instructions pertaining to those accounts in the effective rules. The designations shown in column (a) for these accounts are defined as follows:

Line No.	Name of railway operating expense account (a)	Amount of operating expenses for the year (b)	Freight			Passenger related expense (f)
			Labor (c)	Material & supplies (d)	Other (e)

DEPARTMENT OF LABOR

Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions and Index

V 41 153 AUG 6 76 UMI

DEPARTMENT OF LABOR

Employment Standards Administration

MINIMUM WAGES FOR FEDERAL AND FEDERALLY ASSISTED CONSTRUCTION

General Wage Determination Decisions

General Wage Determination Decisions of the Secretary of Labor specify, in accordance with applicable law and on the basis of information available to the Department of Labor from its study of local wage conditions and from other sources, the basic hourly wage rates and fringe benefit payments which are determined to be prevailing for the described classes of laborers and mechanics employed in construction activity of the character and in the localities specified therein.

The determinations in these decisions of such prevailing rates and fringe benefits have been made by authority of the Secertary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates, (37 FR 21138) and of Secretary of Labor's Orders, 12–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in these decisions shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged on contract work of the character and in the localities described therein.

Good cause is hereby found for not utilizing notice and public procedure thereon prior to the issuance of these determinations as prescribed in 5 U.S.C. 553 and not providing for delay in effective date as prescribed in that section, because the necessity to issue construction industry wage determination frequently and in large volume causes procedures to be impractical and contrary to the public interest.

General Wage Determination Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5. Accordingly, the applicable decision together with any modifications issued subsequent to its publication date shall be made a part of every contract for performance of the described work within the geographic area indicated as required by an applicable Federal prevailing wage law and 29 CFR, Part 5. The wage rates contained therein shall be the minimum paid under such contract by contractors and subcontractors on the work.

MODIFICATIONS AND SUPERSEDEAS DECISIONS TO GENERAL WAGE DETERMINATION DECISIONS

Modifications and Supersedeas Decisions to General Wage Determination Decisions are based upon information obtained concerning changes in prevailing hourly wage rates and fringe benefit payments since the decisions were issued.

The determinations of prevailing rates and fringe benefits made in the Modifications and Supersedeas Decisions have been made by authority of the Secretary of Labor pursuant to the provisions of the Davis-Bacon Act of March 3, 1931, as amended (46 Stat. 1494, as amended, 40 U.S.C. 276a) and of other Federal statutes referred to in 29 CFR 1.1 (including the statutes listed at 36 FR 306 following Secretary of Labor's Order No. 24–70) containing provisions for the payment of wages which are dependent upon determination by the Secretary of Labor under the Davis-Bacon Act; and pursuant to the provisions of Part 1 of Subtitle A of Title 29 of Code of Federal Regulations, Procedure for Predetermination of Wage Rates, (37 FR 21138) and of Secretary of Labor's Orders 13–71 and 15–71 (36 FR 8755, 8756). The prevailing rates and fringe benefits determined in foregoing General Wage Determination Decisions, as hereby modified, and/or superseded shall, in accordance with the provisions of the foregoing statutes, constitute the minimum wages payable on Federal and federally assisted construction projects to laborers and mechanics of the specified classes engaged in contract work of the character and in the localities described therein.

Modifications and Supersedeas Decisions are effective from their date of publication in the FEDERAL REGISTER without limitation as to time and are to be used in accordance with the provisions of 29 CFR Parts 1 and 5.

Any person, organization, or governmental agency having an interest in the wages determined as prevailing is encouraged to submit wage rate information for consideration by the Department. Further information and self-explanatory forms for the purpose of submitting this data may be obtained by writing to the U.S. Department of Labor, Employment Standards Administration, Office of Special Wage Standards, Division of Wage Determinations, Washington, D.C. 20210. The cause for not utilizing the rule-making procedures prescribed in 5 U.S.C. 553 has been set forth in the original General Wage Determination Decision.

MODIFICATIONS TO GENERAL WAGE DETERMINATION DECISIONS

The numbers of the decisions being modified and their dates of publication in the FEDERAL REGISTER are listed with each State.

Alabama:	
AL76–1027	Feb. 20, 1976.
Connecticut:

DECISION NO. MT76-5071

LABORERS

Beaverhead, Deer Lodge, Jefferson, Madison, Powell (excluding SE portion) and Silver Bow Counties

Group 1: General Laborer; Axeman; Carpenter Tender; Car and Truck Loaders, Scissorman; Chuck Tender and Nipper (above ground); Cosmolene, applying and removing; Fence Erector and Installer including the installation and erection of fences, guard rails, median rails, reference posts, guide posts and right-of-way markers); Form Stripper; Form Setter; Landscape Laborer; Nozzleman - air and water, gunnite and place machine; Pilot Car; Riprap Helper; Scale-man; Sod Cutter (hand operated) (General Laborer); Stake Jumper for equip-ment; Tool Checker, Toolhouseman

Group 2: Riprapper; Sandblaster; Sandblaster Tailhouseman; Pot Tender

Group 3: Hand Faller

Group 4: Post Hole Digger (power Auger)

Group 5: Concrete or asphalt saws; Tar Pot Operator

Group 6: Powderman Helper

Group 7: Caisson Workers (free air); Choker Setter; Spike Driver, single or dual or hand

Group 8: Drills, Air-tract, self-propelled car or truck mount air operated drills; Jackhammer, Pavement Breaker, Wagon Driller, Mechanical Tamper, Vibrating Roller hand steered and other power tools; Pipe Wrapper, Power Saw (bucking)

Group 9: Asphalt Raker; Dumpman (grademan)

Group 10: High Pressure Machine Nozzleman

Group 11: Pipelayer (all types); Cutting Torch Operator

Group 12: Powderman

Group 13: Grade Setter

Group 14: High Scaler

Group 15: Dumpman (spotter)

Group 16: Power Saw (falling)

Group 17: Rigger

Group 18: Core Drill Operator

DECISION NO. MT76-5071

LABORERS (Cont'd)

Beaverhead, Deer Lodge, Jefferson, Madison, Powell (excluding SE portion) and Silver Bow Counties

Group 19: Concrete Worker, wet or dry; Tending Masons when pouring and finishing concrete

Group 20: Vibrator Operator; Tending Stonesetters, Marble Setters, Tile Setters, Skagiola and Terrazzo Workers; Tending brick masons or brick or stone-work; Tending Plasterers or stuccoing or plastering; (This does not include rubbing down of foundation or concrete walls), Surekete, Stonehard and Rubberslate; Concrete Conveyor Swinger Operator

Group 21: Power Driven Concrete Buggies

LABORERS

Broadwater (Northern area), Lewis & Clark, Meagher, Powell (that portion lying east of a N-S line at the west edge of the Town of Elliston) Counties

Group 1: General laborer; Car and truck loader; Concrete handler; Form stripper; Fence erector and installer

Group 2: Concrete buggy; Vibrator; Jackhammer; Wagon driller; Barco tamper; Pavement breaker; Powderman helper

Group 3: All power tools; Rodder and spreader; Non-metallic pipe layers; Pipe wrappers; Sandblasters; Pot tenders; Curb form setter; Concrete tenders

Group 4: Mortar mixer; Powderman

Broadwater (Southern portion incl. the City of Toston), Gallatin, Park, Sweetgrass and Wheatland Counties

Group 1: Common laborers

Group 2: Semi-skilled; Hod carriers; Jackhammer operator; Vibrator; Mixer operator; Concrete pump tender; Nozzleman; Concrete machiner; Curb form setter

Flathead, Glacier National Park, Lincoln, and that area of Lake and Sanders Counties lying 5 miles north of the 5th Parallel

Group 1: General laborers; scaleman; form strippers; car and truck loaders

Group 2: Concrete handlers, conveying and handling concrete, Nozzlemen (air or water); Sand blast tail hose man; Powderman helper; Power driven wheelbarrow; Rodder and Spreader; Form setters (paving); Bucketman; Small air tool operators, including blow pipes and small power tool operators; Chuck tenders; Asphalt rakers, Dumpman; Rip rapping; Pipe wrapper; Pot tender; Concrete pumper hoseman; Jackhammer; Pavement breaker; Vibrator; mechanical tamper and other air tools; Cement handlers (sack or bulk); Burning bar

Group 3: Pipe layers (non-metallic); Metal culvert pipe layers; Mason and Plaster tenders; Cement finisher tender; Small concrete mixer operator; Shoring and legging open ditches; Powderman; Drills, Air-Trac, wagon drill, cat or truck mounted air operated drills, Sand Blaster (wet or dry); gunite nozzleman; barco tamper

LABORERS (Cont'd)

Carter, Custer, Dawson, Fallon, Powder River, Prairie and Wibaux Counties

Group 1: General laborers

Group 2: Jackhammer operator; Mechanical tampers; Pipelayers (all types); Pavement breakers; Pneumatic and electric tools operator; Pipewrappers

Group 3: Mason and plasterer's tenders

Big Horn, Carbon, Golden Valley, Musselshell, Rosebud, Stillwater, Treasure and Yellowstone Counties

Group 1: General laborers; Concrete laborers; Chuck tenders and nippers

Group 2: Cement handler (sack or bulk); Jackhammer operator; Morterman; Pipelayer (all types); Pipewrapper; Primerbouseman

Group 3: Mason and plasterer's tenders

Granite, Lake (Southern area), Mineral, Missoula, Ravalli and Sanders (Southern area) Counties

Group 1: Laborers

Group 2: All power tools, creosote workers; Jackhammer; Marble and tile setters' tenders; Pipelayers; Pipewrappers; Pot tenders; Small concrete mixers; Vibrators

Group 3: Cement masons and plasterer's tenders; Mason tenders; Pumpcrete, gunnite and plasterer pump

LABORERS

Cascade, Chouteau, Fergus, Glacier (excluding Glacier National Park), Judith Basin, Pondera, Teton and Toole Counties

Group 1: General and Building Laborers' and Scale Men; Concrete Laborers (wet or dry breaking of concrete requiring sledge hammer); Dumpman (spotter) and Flagman; Fence Erectors and Installers, including the installation and erection of fences, guardrails, median rails, reference posts, guide posts and right-of-way markers; Vibrators, under 1-1/2" in diameter; Small Air Tools such as Chippers, Clay Spades, etc.; Stake Setters; Stake Jumper, Rodder and Spreader, Form Stripper; Caisson Workers (Free Air); Vibrator 1-1/2" to 2-1/2" in diameter

Group 2: Concrete or Asphalt Saws, Creosote Material Handler; Curb Machine Form Setter (Slab Steel Forms); Diamond Drills up through 3 inches in diameter; Jackhammer, Pavement Breaker, Wagon Driller, Cat or Truck Mounted Air Operated Drills, and other Air Tools; Diesel Tamper, Wacker, Jay, Turtle, Pogo Sticks, etc., Mechanical Tampers; Nozzlemen, Air and Water, Gunite and Placo, Machine (Grout); Pipe Layer (all types); Power Saw (bucking and falling); Power Driven Wheelbarrow; Chuck Tenders, Huckers and Nippers, Primeman

Group 3: Sand Blaster

Group 4: Vibrators, 2-1/2" to 4" in diameter; Brick Tenders; Dumpmen (Grade); Small Concrete Mixers

Group 5: Diamond Drills up through 6 inches in diameter; Hod Carriers and Plaster Tenders (1 - one mixerman per crew); Asphalt Raker and Tamper; High Scaler; Powderman Helper; Concrete Nozzleman; Miners; Barco Tamper; Air-Trac

Group 6: Diamond Drill, over 6 inches in diameter; Self-Propelled Drills, with the exception of size differential, such as Mustang Drills or Twin Stack Drills; Core Drill Operator; Laser Equipment and Tools, excluding Transit; Powderman

Group 7: Concrete Vibrator, 4" and over

LABORERS

Blaine, Daniels, Garfield, Hill, Liberty, McCone, Petroleum, Phillips, Richland, Roosevelt, Sheridan, and Valley Counties

Group 1: General and Building Laborers' and Scale Men; Form Stripper and Carpenter Tender; Car and Truck Loaders; Concrete Laborers (wet or dry breaking of concrete requiring sledge hammer); Dumpmen (Spotter and Flagman); Small Power Tools, Chippers, Clay Spaders, Pogo Stick, etc.; Fence Erectors and Installers, installation and erection of fences, guard rails, median rails, reference posts, guide posts, and right-of-way markers

Group 2: Dumpmen (Grade)

Group 3: Power Driven Concrete Buggies or Power Driven Wheelbarrows; Pipe Layers (non-metallic); Sandblaster, Concrete Nozzleman, Place Operator, Jackhammer, Pavement Breaker, Vibrator (2½ inches and over) Barco Tamper, Vibrator Turtle; Small Concrete Mixers, Concrete Saw; Nozzleman (air and water); Sandblaster, Tailhoseman, Pot Tender, Tar Pot Tender; Gunite Nozzleman; Caisson Workers (Free Air); Tunnels and Shafts (Free Air); Bull Gang, Pot Tender; Chuck Tender, Huckers and Nippers, Primerhouseman

Group 4: Brick Tenders (handling bricks and blocks only)

Group 5: Hod Carriers and Plaster Tenders (men carrying motor either by hod, pail or barrow); High Scaler, Wagon Driller, Cat or Truck mounted Air Operated Drills; Asphalt Rakers and Tampers, Gunite, Form-Setter (slab steel forms); Stake Setter, Stake Jumper, Rodder and Spreader, Grademan; Concrete Nozzleman; Miners

Group 6: Powdermen; Lazer Tools and Equipment

REMAINING COUNTIES

POWER EQUIPMENT OPERATORS

Group 1: A-Frame Truck Crane; Winch Truck and similar

Group 2: Air Compressor Operator, 2 or more; Belt Finishing Machine Operator; Conveyor Loader Operator up to and over 42 inch belt; Mechanic (Dec. 1 to April 1); Roller (on other than hot mix oil paving)

Group 3: Air Doctor; Asphalt Paving Machine Operator; Asphalt Paving Machine Screed Operator; Bit Grinder; Bituminous Mixer Paving; Travel Plant; Boring Machine Operator (large); Concrete Batch Plant Operator (1 and 2 mixers); Concrete Bucket Dispatcher; Concrete Curing Machine; Concrete Finish Machine Paving; Concrete Float Operator and Spreader; Concrete Power Saw (self-propelled); Concrete Travel Batcher; Crusher Operator; Distributor Operator; Elevating Grader; Gradall Operator; Heavy DutyDrills (all types); Hoist Operator (2 or more drums); Hot Plant Fireman (when operation); Industrial Locomotives (all types); Mountain Logger or similar type; Mucking Machine Operator; Pavement Breaker (Emsco and similar); Power Auger large Truck or Tractor, mounted and pumps; Power Mixer, Single or double drum; Power Saw, self-propelled,(multiple cut); Pumpcrete or Grout Machine Operator; Push Tractor; Refrigerator Plant Operator; Roller on Blade or Hot Mix Oil Paving Roller (25 ton or over); Ross and similar type Carriers on construction site; Rubber-tired Dozer; Rubber-tired Front End Loader (over 1 cu. yd. to and including 3 cu. yds.); Scraper, DW 15, 20, 21 and similar type if power unit is not used; Self-propelled Sheeps Foot and similar type shovels including all attachments under 1 cu. yd.; Track type Tractor with or without attachments

Group 4: Automatic Finegrader; Gurries and other similar types; Motor Patrol Operator; Paving and Mixing Machine Operator; Scraper, single engine; Slip Form Paver Operator

Group 5: Boring Machine Operator; Jeep; Pickup or Farm Tractor mounted; Concrete Mixer Operator (3 bags and under); Fireman; Heavy Duty Drills Retort Operator

Group 6: Boom Operator (self-propelled)

Group 7: Cableway Highline Operator

Group 8: Cement Silo Operator

Group 9: Central Mixing Plants; Concrete Dams and Stationary

DECISION NO. MT76-5071

POWER EQUIPMENT OPERATORS (Cont'd)

Group 43: Scraper, single or twin engine; pulling Belly Dump Trailer

Group 44: Scraper (twin engine); Track-type Front-end Loaders, over 5 cu. yds. to and including 10 cu. yds.

Group 45: Stiff-leg Derrick and Guy Derrick Operator; Shovels, including all attachments, over 3 uo. yds. to and including 5 cu. yds.

Group 46: Track-type Front-end Loaders, over 15 cu. yds.

Group 47: Scraper, Tandem or 3 engined

Group 48: Yo-Yo Cat, both ends

DECISION NO. MT76-5071

POWER EQUIPMENT OPERATORS (Cont'd)

Group 10: Chain Bucket Loader; Chip Gravel Spreader (self-propelled); DW-10, 15, 20 Tractor pulling Roller

Group 11: Concrete Batch Plant Operator (3 and 4 mixers)

Group 12: Concrete Batch Plant Operator (5 mixers and over)

Group 13: Concrete Batch Plant Oiler, Assistant to Engineer (up to and including 2 mixers)

Group 14: Concrete Batch Plant Oiler, Assistant to Engineer (3 mixers and over)

Group 15: Concrete Conveyor, under 40 ft.; Conveyor Loader Operator Operator up to and including 42 inch Belt

Group 16: Concrete Conveyor, over 40 ft.; Concrete Pump; Track-type Front-end Loaders, over 10 cu. yds. to and including 15 cu. yds.

Group 17: Concrete Mixer Operator, 4 bags and over

Group 18: Crane Operator, to and including 80 ft. boom

Group 19: Crane Operator, 81 ft. to 130 ft. boom

Group 20: Crane Operator, 131 ft. to 150 ft. boom

Group 21: Crane Operator, 151 ft. boom and over

Group 22: Crane Oiler, Assistant to Engineer; Cranes with jibs additional $.15 per hour

Group 23: Crusher Oiler and Helper; Assistant to Engineer; Feld Equipment Service Serviceman Helper; Hot Plant Oiler, assistant to engineer (100 ton per hour or over); Mechanic and/or Welder Helper on job; Oilers (other than Shovels and

DECISION NO. MT76-5071

POWER EQUIPMENT OPERATORS (Cont'd)

Group 24: Hydrolift and similar types, Oiler, Hoist House, Dams, Assistant to engineer; Shovel Oiler, assistant to engineers over 3 cu. yds.; Whirley Crane Oiler, assistant to engineer

Group 25: Crusher Conveyor Operator, when required; Farm type Tractor, up to and including 50 H.P. engine; Grade Setter

Group 26: Electric Overhead Cranes; Shovels, including all attachments 1 cu. yd. to and including 5 cu. yds.; Track-type Tractor, on Euclid Loader

Group 27: Farm type Tractor, up to and including over 50 H.P. engine; Harman Nelson Heater and similar types

Group 28: Field Equipment Serviceman

Group 29: Forklift, on construction site

Group 30: Form Grader Operator; Hoist Operator (single drum)

Group 31: Helicopter Hoist Operator

Group 32: Mechanic and/or Welder on job

Group 33: Mechanic Helper, Shop (Dec. 1 to April 1); Radiator Repairman

Group 34: Mixermobile

Group 35: Paving and Mixing Machine Operator

Group 36: Quad Cat

Group 37: Quad Loader and similar type; Raygo Gaint; Shovels, including all attachments over 5 cu. yds.

Group 38: Rubber-tired Front End Loader, 1 cu. yd and under

Group 39: Rubber-tired Front End Loader, 3 cu. yds. to and including 5 cu. yds.

Group 40: Rubber-tired Front End Loadar, 5 cu. yds. to and including 10 cu. yds.

Group 41: Rubber-tired Front End Loader, 10 cu. yds. to and including 15 cu. yds.

Group 42: Rubber-tired Front End Loader, over 15 cu. yds. (factory rating, not to include sideboards)

POWER EQUIPMENT OPERATORS

Group 1: A-Frame Truck Crane; Winch Truck and similar

Group 2: Air Compressor Operator, 2 or more; Belt Finishing Machine Operator; Conveyor Loader Operator up to and over 42 inch belt; Mechanic (Dec. 1 to April 1); Roller (on other than hot mix oil paving)

Group 3: Air Doctor; Asphalt Paving Machine Operator; Asphalt Paving Machine Screed Operator; Bit Grinder; Bituminous Mixer Paving; Travel Plant; Boring Machine Operator (large); Concrete Batch Plant Operator (1 and 2 mixers); Concrete Bucket Dispatcher; Concrete Curing Machine; Concrete Finish Machine Paving; Concrete Float Operator and Spreader; Concrete Power Saw (self-propelled); Concrete Travel Batcher; Crusher Operator; Distributor Operator; Elevating Grader; Gradall Operator; Heavy DutyDrills (all types); Hoist Operator (2 or more drums); Hot Plant Fireman (when operation); Industrial Locomotives (all types); Mountain Logger or similar type; Mucking Machine Operator; Pavement Breaker (Emsco and similar); Power Auger large Truck or Tractor, mounted and punch; Power Mixer, Single or double drum; Power Saw, self-propelled,(multiple cut); Pumpcrete or Grout Machine Operator; Push Tractor; Refrigerator Plant Operator; Roller on Blade or Hot Mix Oil Paving Roller (25 ton or over); Ross and similar type Carriers on construction site; Rubber-tired Dozer; Rubber-tired Front End Loader (over 1 cu. yd. to and including 3 cu. yds.); Scraper, DW 15, 20, 21 and similar type if power unit is not used; Self-propelled Sheeps Foot and similar type shovels including all attachments under 1 cu. yd.; Track type Tractor with or without attachments

Group 4: Automatic Finegrader; Curries and other similar types; Motor Patrol Operator; Paving and Mixing Machine Operator; Scraper, single engine; Slip Form Paver Operator

Group 5: Boring Machine Operator; Jeep; Pickup or Farm Tractor mounted; Concrete Mixer Operator (3 bags and under); Fireman; Heavy Duty Drills Retort Operator

Group 6: Boom Operator (self-propelled)

Group 7: Cableway Highline Operator

Group 8: Cement Silo Operator

Group 9: Central Mixing Plants; Concrete Dams and Stationary

DECISION NO. MT76-5072

POWER EQUIPMENT OPERATORS (Cont'd)

Group 10: Chain Bucket Loader; Chip Gravel Spreader (self-propelled); DW-10, 15, 20 Tractor pulling Roller

Group 11: Concrete Batch Plant Operator (3 and 4 mixers)

Group 12: Concrete Batch Plant Operator (5 mixers and over)

Group 13: Concrete Batch Plant Oiler, Assistant to Engineer (up to and including 2 mixers)

Group 14: Concrete Batch Plant Oiler, Assistant to Engineer (3 mixers and over)

Group 15: Concrete Conveyor, under 40 ft.; Conveyor Loader Operator Operator up to and including 42 inch Belt

Group 16: Concrete Conveyor, over 40 ft.; Concrete Pump; Track-type Front-end Loaders, over 10 cu. yds. to and including 15 cu. yds.

Group 17: Concrete Mixer Operator, 4 bags and over

Group 18: Crane Operator, to and including 80 ft. boom

Group 19: Crane Operator, 81 ft. to 130 ft. boom

Group 20: Crane Operator, 131 ft. to 150 ft. boom

Group 21: Crane Operator, 151 ft. boom and over

Group 22: Crane Oiler, Assistant to Engineer; Cranes with jibs additional $.15 per hour

Group 23: Crusher Oiler and Helper; Assistant to Engineer; Field Equipment Service Serviceman Helper; Hot Plant Oiler, assistant to engineer (100 ton per hour or over); Mechanic and/or Welder Helper on job; Oilers (other than Shovels and

DECISION NO. MT76-5072

POWER EQUIPMENT OPERATORS (Cont'd)

Group 24: Hydrolift and similar types, Oiler, Hoist House, Dams, Assistant to engineer; Shovel Oiler, assistant to engineers over 3 cu. yds.; Whirley Crane Oiler, assistant to engineer

Group 25: Crusher Conveyor Operator, when required; Farm type Tractor, up to and including 50 H.P. engine; Grade Setter

Group 26: Electric Overhead Cranes; Shovels, including all attachments 1 cu. yd. to and including 5 cu. yds.; Track-type Tractor, on Euclid Loader

Group 27: Farm type Tractor, up to and including over 50 H.P. engine; Harman Nelson Heater and similer types

Group 28: Field Equipment Serviceman

Group 29: Forklift, on construction site

Group 30: Form Grader Operator; Hoist Operator (single drum)

Group 31: Helicopter Hoist Operator

Group 32: Machanic and/or Welder on job

Group 33: Machanic Helper, Shop (Dec. 1 to April 1); Radiator Repairman

Group 34: Mixermobile

Group 35: Paving and Mixing Machine Operator

Group 36: Quad Cat

Group 37: Quad Loader and similar type; Raygo Gaint; Shovels, including all attachments over 5 cu. yds.

Group 38: Rubber-tired Front End Loader, 1 cu. yd and under

Group 39: Rubber-tired Front End Loader, 3 cu. yds. to and including 5 cu. yds.

Group 40: Rubber-tired Front End Loader, 5 cu. yds. to and including 10 cu. yds.

Group 41: Rubber-tired Front End Loader, 10 cu. yds. to and including 15 cu. yds.

Group 42: Rubber-tired Front End Loader, over 15 cu. yds. (factory rating, not to include sideboards)

DECISION NO. MT76-5072

POWER EQUIPMENT OPERATORS (Cont'd)

Group 43: Scraper, single or twin engine; pulling Belly Dump Trailer

Group 44: Scraper (twin engine); Track-type Front-end Loaders, over 5 cu. yds. to and including 10 cu. yds.

Group 45: Stiff-leg Derrick and Guy Derrick Operator; Shovels, including all attachments, over 3 uc. yds. to and including 5 cu. yds.

Group 46: Track-type Front-end Loaders, over 15 cu. yds.

Group 47: Scraper, Tandem or 3 engined

Group 48: Yo-Yo Cat, both ends

DECISION NO. NV76-5073

LABORERS

Group 1: Laborers - General or Construction; Demolition (cleaning of brick, lumber, etc.); Dry packing of concrete and filling of formbolt holes; Gas and Oil Pipeline; Laborer - temporary water lines (portable type); Window Cleaner

Group 2: Cutting Torch Operator (demolition); Tarman and Mortar Man; Kettleman; Potman and man applying asphalt, Lay-kold Creosote, Lime, and similar type materials

Group 3: Guinea Chaser

Group 4: Fine Grader, highway and street paving, airport, runways and similar type heavy construction; Landscape Gardener and Nursery-man

Group 5: Laborers - packing rod steel and pans

Group 6: Underground Laborer including Caisson Bellowers

Group 7: Chucktender (except tunnels); Scaler; Tank Scaler and Cleaner

Group 8: Cesspool Digger and Installer

Group 9: Concrete Curer-impervious Membrane and Oiler of all materials; Riprap Stonepaver; Sandblaster (pot tender); Making and Caulking of all non-metallic Pipe Joints

Group 10: Operators and Tenders of Pneumatic and Electric Tools, Vibrating Machines, hand-propelled Trenching Machines, Impact Wrench Multi-plate and similar mechanical tools not separately classified herein; Asphalt Raker, Ironer, Spreader, Luteman; Buggymobile Man; Cement Dumper (on one yard or larger mixers and handling bulk cement); Concrete Saw Man excluding Tractor type, cutting, scoring old or new concrete; Concrete Core Cutter; Gas and Oil Pipeline Wrapper-pot Tender and Form Man; Operator of Cement Grinding Machine; Roto-scraper; Tree Climber, Faller, Chain Saw Operator, Pittsburgh Chipper and similar type brush shredders

Group 11: Rock Slinger; Scaler (using Bos'n Chair or Safety Belt or Power Tools)

Group 12: Driller and/or Pavement Breaker

Group 13: Oversize Concrete Vibrator Operator, 70 lbs. and over; Laying of all non-metallic pipe, including sewer pipe, drain pipe and underground tile

Group 14: Gas and Oil Pipeline Wrapper - 6 inch pipe and over

DECISION NO. NV76-5073

LABORERS (Cont'd)

Group 15: Cribber or Shorer, Lagging, Sheeting, Trench Bracing, hand guided Lagging Hammer; Powerman-blaster - all work of loading holes, placing and blasting of all powder and explosives of whatever type regardless of method used for such loading and placing

Group 16: Steel Headboardman

Group 17: Sandblaster (Nozzleman); Driller (Core, Diamond, or Wagon, Joy Driller Model TW-M-2A, Gardner-Denver Model DH 163 and similar type drills)

Group 18: Head Rock Slinger

POWER EQUIPMENT OPERATORS
(Except Piledriving and Steel Erection)

Group 1: Air Compressor, Pump or Generator; Engineer Oiler and Signal Man; Heavy Duty Repairman's Helper; Switchman or Brakeman

Group 2: Concrete Mixer, Skip type; Conveyor and Beltman; Fireman; Generator, Pump or Compressor (2-5 units inclusive, over 5 units, $0.10 per hour for each additional unit up to 10 units, portable units); Generator, Pump or Compressor Plant; Rotary Drill Helper (oilfield type); Skiploader, Wheeltype, Ford, Ferguson, Jeep or similar type, 3/4 yard or less (w/o dragtype attachments); Temporary Heating Plant; Truck Crane Oiler; Hydrostatic Pump

Group 3: A-Frame or Winch Truck; Dinky Locomotive or Tunnel Motor; Elevator Hoist; Equipment Greaser; Ford, Ferguson or similar type (with drag-type attachments); Hydra-hammer or similar type equipment; Power Concrete Curing Machine; Power Concrete Saw; Power Driven Jumbo Form Setter; Rodman and Chainman; Ross Carrier; Self-propelled Tar Pipelining Machine; Stationary Pipe Wrapping and Cleaning Machine; Towblade Operator

Group 4: Asphalt Plant Fireman; Boring Machine; Boxman or Mixer Box (concrete or asphalt plant); Derrickman (oilfield type); Drilling Machine (including water wells); Highline Cableway Signalman; Instrumentman; Locomotive Engineer; Power Sweeper; Roller, compacting; Screed; Trenching Machine (up to 6 feet depth)

Group 5: Asphalt or Concrete Spreading, Mechanical Tamping or Finishing Machine - Roller (all types and sizes), Soil, Cement, Asphalt - Finish; Asphalt Plant Engineer; Deck Engine; Grade Checker; Heavy Duty Welder; Machine Tool; Pavement Breaker; Pneumatic Heading Shield - Tunnel; Road Oil Mixing Machine; Forklift, under five tons; Rubber-tired heavy duty equipment (Oshkosh, DW, Euclid, LeTourneau, LaPlant-Choate, or similar type equipment with any type attachments); Skiploader, Wheeltype, over 3/4 yards, up to and including 1½ yds.; Slip Form Pump (power driven hydraulic lifting device for concrete forms); Tractor drag type shovel, Bulldozer, Tamper, Scraper and Push Tractor

DECISION NO. NV76-5073

POWER EQUIPMENT OPERATORS (Cont'd)
(Except Piledriving and Steel Erection)

Group 6: Combination Heavy Duty Repairman and Welder; Concrete Mixer - Paving; Concrete Mobile Mixer; Concrete Pump or Pumpcrete Gun; Crushing Plant Engineer; Elevating Grader; Heavy Duty Repairman; Highline Cableway; Hoist (Chicago Boom and Mine); Kolman Belt Loader and similar type; Lift Slab Machine; Loader-Athey, Euclid, Hancock, Sierra or similar type; Motor Patrol (any type or size); Multiple Engine-earth moving machinery; Party Chief; Pneumatic Concrete Placing Machine - Hackley-Presswell or similar type; Rotary Drill, excluding Caisson type; Skiploader, Wheeltype, over 1½ yards; Surface Heater and Planer; Tractor Loader - crawler type - all types and sizes; Tractor, with boom attachments; Traveling Pipe Wrapping, Cleaning and Bending Machine; Trenching Machine (over 6 feet depth); Universal equipment (Shovel, Backhoe, Dragline, Clamshell, Derrick, Derrick Barge, Crane, Piledriver and Mucking Machine); Forklift, over 5 tons

Group 7: Driller Operator; Fishing Tool Engineer

Group 7-A: Derrickman

Group 7-B: Motorman

Group 7-C: Drillers Helpers

TRUCK DRIVERS

Group 1: Light Duty Driver; Warehouseman

Group 2: Bootman; Truck Greaser; Light Vehicle Dispatcher

Group 3: Tireman; Warehouse Clerk

Group 4: Heavy Duty Driver; Forklift Driver; Equipment Parts; Stockroom Clerk

Group 5: Extra Heavy Duty Driver

SUPERSEDEAS DECISION

STATE: Nevada
DECISION NUMBER: NV75-5074

COUNTY: Clark (excluding the Nevada Test Site)
DATE: Date of Publication

Supersedes Decision Number NV76-5003 dated January 16, 1976, in 41 FR 2591.
DESCRIPTION OF WORK: Residential construction consisting of single family homes and garden type apartments up to and including 4 stories.

	Basic Hourly Rates	Fringe Benefits Payments

LABORERS

Group 1: Debris Handler; Dry Packing of Concrete and Filling of Form-bolt Holes; Dumpman; Gas and Oil Pipeline Laborers; Demolition Laborers; General or Construction Laborers; Spotter; Window Cleaner

Group 2: Cutting Torch Operator (Demolition); Tarman and Motorman

Group 3: Guinea Chaser

Group 4: Fine Grader, highway and street paving, airport, runways and similar type heavy construction; Landscape Gardener and Nursery-man

Group 5: Laborers - packing rod steel and pans

Group 6: Underground Laborers including Caisson Bellowers

Group 7: Chucktender (except tunnels); Scaler; Septic Tank Digger and Installer (leadman); Tank Scaler and Cleaner

Group 8: Cesspool Digger and Installer

Group 9: Concrete Curer-impervious Membrane and Oiler of all Materials; Making and Caulking of all non-metallic pipe joints; Riprap Stonepaver; Sandblaster (pot tender)

Group 10: Asphalt Ironer, Raker, Spreader, Buggymobile; Cement Dumper (on 1 yd. or larger mixers and handling bulk concrete); Cement Grinding Machine Operator; Concrete Core Cutter; Concrete Saw Man, excluding tractor type; Gas and Oil Pipeline Wrapper Pot Tender and Form Man; Tree Climber, faller, Chain Saw Operator; Pittsburgh Chipper and similar type; Vibrators and all pneumatic gas, electric, and similar mechanical tools not separately classified herein; Roto Scraper

Group 11: Rock Slinger; Scaler, using bosun chair, safety belt or power tools

Group 12: Driller and/or Pavement Breaker

Group 13: Laying of all Non-metallic Pipe (including sewer pipe, drain pipe and underground tile)

Group 14: Gas and Oil Pipeline Wrapper - 6 inch pipe and over

Group 15: Cribber or Shorer; Powderman

Group 16: Steel Headerboard Man

Group 17: Driller (Core, Diamond or Wagon) Joy Driller Model T.W.-M-2A Gardner-Denver Model DH-163 and similar drills; Sandblaster - Nozzleman

Group 18: Head Rock Slinger

POWER EQUIPMENT OPERATORS
(Except Piledriving and Steel Erection)

GROUP 1: Brakeman; Compressor Op.; Engineer Oiler; Generator Op.; Heavy Duty Repairman Helper; Pump Op.; Signalman; Switchman

GROUP 2: Concrete Mixer Op., Skip Type; Conveyor Op.; Fireman; Generator, Pump or Compressor (2-5 inclusive) Portable units, over 5 units, 10c per hour for each additional unit up to nine units; Hydrostatic Pump Op.; Oiler Crusher (Asphalt or Concrete Plant); Plant Operator, Generator, Pump or Compressor; Rotary Drill Helper (oilfield); Skiploader - Wheel type up to 3/4 yd. without attachment; Soils Field Technician; Tar Pot Fireman; Temporary Heating Plant Operator; Trenching Machine Oiler; Truck Crane Oiler

GROUP 3: A-Frame or Winch Truck Operator; Chainman; Elevator Op. (inside); Equipment Greaser (rack); Ford Ferguson (with dragtype attachments); Helicopter Radioman (ground); Power Concrete Saw Op.; Power-driven Jumbo Form Setter Op.; Power Concrete Curing Machine Op.; Ross Carrier Op. (jobsite); Stationary Pipe Wrapping and Cleaning Machine Op.

GROUP 4: Asphalt Plant Fireman; Boring Machine Op.; Boxman or Mixerman (Asphalt or Concrete); Chip Spreading Machine Op.; Concrete Pump Op. (small portable); Bridge Type Unloader and Turntable Op.; Dinkey Locomotive or Motorman (up to and including 10 ton); Equipment Greaser (Grease Truck); Helicopter Hoist Op.; Highline Cableway Signalman; Hydra-Hammer - Aero Stomper; Power Sweeper Op.; Roller Op. (compacting); Screed Op. (Asphalt or Concrete); Rodman; Trenching Machine Op. (up to 6 ft.);

GROUP 5: Asphalt Plant Engineer; Concrete Batch Plant Op.; Backhoe Op. (up to and including 3/4 yd.); Bit Sharpener; Concrete Joint Machine Op. (Canal and similar type); Concrete Planer Op.; Derrickman (oilfield type); Deck Engine Op.; Drilling Machine Op. (including water wells); Forklift Op. (under 5 ton capacity); Hydrographic Seeder Machine Op.; (straw, pulp, or seed); Instrumentman; Machine Tool Op.; Maginnis Internal Full Slab Vibrator; Mechanical Berm, curb or gutter (concrete or asphalt); Mechanical Finisher Op. (concrete - Clary-Johnson-Bidwell or similar); Pavement Breaker Op.; Road Oil Mixing Machine Op.; Roller Op. (asphalt or finish); Rubber-tired Earth Moving Equipment (single engine, up to and including 25 yd. struck); Self-propeller Tar Pipelining Machine Op.; Slip Form Pump Op. (power-driven hydraulic lifting device for concrete forms); Tugger Hoist (1 drum); Tunnel Locomotive Op. (over 10 and up to and including 30 tons); Stinger Crane (Austin-Western or similar type); Skiploader Operator (Crawler and Wheel type over 3/4 yds. and up to and including 1 1/2 yds.); Tractor Op. - Bulldozer, Tamper, Scraper (single engine, up to 100 h.p., flywheel and similar types, up to and including D-5 and similar types); Welder - General

GROUP 6: Asphalt or Concrete Spreading Operator (tamping or finishing); Asphalt Paving Machine Op. (Barber-Greene or similar type); BHL Lime Road Pactor, Wagner Pactor or similar, Op., Bridge Crane Op.; Cast in Place Pipe Laying Machine Op.; Combination Mixer and Compressor Op. (Gunite work); Concrete Pump Op. (truck mounted); Concrete Mixer Op. - Paving;

POWER EQUIPMENT OPERATORS (Cont'd)
(Except Piledriving and Steel Erection)

Crane Op. (up to and including 25 ton capacity); Crushing Plant Op.; Drill Doctor; Elevating Grader Op.; Forklift Op. (over 5 tons); Grade Checker; Grade-All Op.; Grouting Machine Op.; Heading Shield Op.; Heavy Duty Repairman; Hoist Op. (Chicago Boom and similar type); Kolman Belt Loader and similar type; LeTourneau Biob Compactor or similar type; Lift Slab Machine Op. (Vagtborg and similar type); Lift Mobile Op.; Loader Op. (Athey, Euclid, Sierra and similar type); Material Hoist Op.; Mucking Machine Op. (1/4 yd. rubber-tired, rail or track type); Pneumatic Concrete Placing Machine Op. (Hackley-Presswell or similar type); Pneumatic Heading Shield (tunnel); Pumpcrete Gun Op.; Rotary Drill Op. (excluding Caisson Type); Rubber-tired Earth Moving Equipment Op. (single engine Caterpillar, Euclid, Athey Wagon and similar types with any and all attachments over 25 yds. and up to and including 50 cu. yds. struck); Rubber-tired Scraper Op. (self-loading - Paddel wheel type, John Deere, 1040 and similar single unit); Rubber-tired Earth Moving Equipment Op., multiple engine (up to and including 25 yds. struck); Skiploader Op. (Crawler and Wheel type - over 1 1/2 yds. up to and including 6 1/2 yds.); Surface Heaters and Planer Op.; Trenching Machine Op. (over 6 ft. depth capacity, manufacturers rating); Tower Crane Op.; Tractor Compressor Drill Combination Op.; Tractor Op. (any type larger than D-5 - 100 Flywheel h.p. and over, or similar); (Bull Dozer, Tamper, Scraper and Push Tractor, single engine); Tractor Op. (Boom Attachments); Traveling Pipe Wrapping, Cleaning and Bending Machine Op.; Tunnel Locomotive Op. (over 30 tons); Shovel, Backhoe, Dragline, Clamshell Op. (over 3/4 yds. and up to 5 cu. yd. M. R. C.)

GROUP 7: Crane Op. - over 25 ton up to and including 100 tons M. R. C.); Derrick Barge Op.; Dual Drum Mixer; Hoist Op., Stiff Legs, Guy Derrick, or similar type, up to and including 100 tons; Monorail Locomotive Op. (Diesel, gas or electric); Motor Patrol - Blade Op. (single engine); Multiple Engine Tractor Operator (Euclid and similar type, except Quad 9 Cat); Party Chief; Rubber-tired Earth Moving Equipment Op. (single engine over fifty (50) yds. struck); Rubber-tired Earth Moving Equipment Operator (multiple engine, Euclid, Caterpillar and similar) over 25 yds. and up to 50 cu. yds. struck); Tractor Loader Op. (Crawler and wheel type over 6 1/2 yds.); Tower Crane Repairman; Shovel, Backhoe, Dragline, Clamshell Op. (over 5 cu. yds., M. R. C.); Welder - Certified; Woods Mixer Op. and similar Pugmill equipment; Heavy Duty Repairman - Welder combination

GROUP 8: Auto Grader Op.; Automatic Slip Form Op.; Crane Op. - over 100 tons; Hoist Op., Stiff Legs, Guy Derricks or similar types (capable of hoisting 100 tons or more); Mass Excavator Op.; Mechanical Finishing Machine Op.; Mobile Form Traveler Op.; Motor Patrol Op. (multi-engine); Pipe Mobile Machine Op.; Rubber-tired Earth Moving Equipment Op. (multiple engine, Euclid, Caterpillar and similar type over 50 cu. yds. struck); Rubber-tired Self-Loading Scraper Op. (Paddle Wheel - Auger type self-loading - 2 or more units); Rubber-tired Scraper Op. - pushing one another without Push Cat, Push-Pull (.50c per hour additional to base rate); Tandem Equipment Op. (2 units only), Tandem Tractor Op. (Quad 9 or similar type); Tunnel Mole Boring Machine

POWER EQUIPMENT OPERATORS (Cont'd)
(Except Piledriving and Steel Erection)

GROUP 9: Canal Liner; Canal Trimmer; Helicopter Pilot; Highline Cableway; Remote Controlled Earth Moving Equipment; Wheel Excavator (over 750 cu. yds.)

TRUCK DRIVERS

GROUP 1: Busses, Job Site, Up to 25 Passengers; Dump (less than 12 yds.); Pickups; Service Truck Driver, Teamster Equipment (Highest Rate For Dual Craft Operation); Truck Repairman Helper; Trucks (less than 15 tons); Warehouseman; Water and Fuel (under 2,500 gals.)

GROUP 2: Bootman; Busses, Job Site More Than 25 Passengers; Dump (12 yds. but less than 16 yds.); Road Oil Spreader; Trucks (15 and 20 tons); Trucks Working On Gas and Oil Pipeline, Including Winch Truck and All Size Trucks; Truck Greaser; Water and Fuel (2,500 gals. to 4,000 gals.)

GROUP 3: Dumpcrete (less than 6½ yds.); Tireman; Transit-mix (under 3 yds.)

GROUP 4: Dump (16 yds. up to and including 22 yds.); Dumpcrete (6½ yds. and over); Dumpster; Euclid Type Spreader; Fork Lift; Ross Carrier-Highway; Transit-mix (3 yds. but less than 6 yds.); Trucks (20 tons but less than 30 tons); Water and Fuel (4,000 gals. but less than 6,000 gals.)

GROUP 5: Dump (over 22 yds.); Transit-mix (6 yds. or more); Truck Repairman; Truck (30 tons and over); Water and Fuel (6,000 gals and over)

GROUP 6: DW 10 and DW 20 Euclid Type Equipment; LeTorneau Pulls; Terra Cobra and Similar; PB and Similar, When performing Work Within Teamster jurisdiction, Regardless Of Attachments Including Power Units Pulling Off Highway Belly Dumps In Tandem

SUPERSEDEAS DECISION

STATE: New Mexico
COUNTY: Statewide
DECISION NO.: NM76-4142
DATE: Date of Publication
Supersedes Decision No. NM76-4094 dated May 28, 1976 in 41 FR 22001.
DESCRIPTION OF WORK: Commercial Building and Heavy Engineering Construction (including Residential in Santa Fe, McKinley, San Juan and Bernalillo Counties but not on the Navajo Indian Reservation)

GENERAL BUILDING AND HEAVY ENGINEERING CONSTRUCTION	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.
ASBESTOS WORKERS (Statewide, except Union, Harding, Lea, Curry, Roosevelt and Quay Counties)	$9.86	.50	.97a		.03
ASBESTOS WORKERS (Union, Harding, Lea, Roosevelt, Curry and Quay Counties)	9.50	.35	.30		.02
BOILERMAKERS	10.85	.65	1.00		.02
BRICKLAYERS-Stonemasons:					
Zone I-A	8.36	.48	.40		.02
Zone I-B	8.86	.48	.40		.02
Zone I-C	9.36	.48	.40		.02
Zone II	8.66	.48			
Zone III	9.16	.48			
Zone IV	7.34	.48			
Zone V	7.345	.48			
Zone VI	7.89	.48			
Zone VII	8.015	.48			

BRICKLAYERS' ZONE DEFINITIONS

ZONE I - Union, Harding, Santa Fe, Valencia, Torrence, Taos, Scorro, Mora, McKinley, Colfax, Catron, San Miguel, San Juan, Sandoval, Rio Arriba, Bernalillo and Los Alamos Counties.

From basing point of Albuquerque Main Post Office:
Zone I-A - 0 to 25 road miles
Zone I-B - 25 to 50 road miles
Zone I-C - Over 50 road miles

ZONE II - Chaves, Curry, Roosevelt, DeBaca, Guadalupe, Quay, Lea, Eddy, and Otero Counties

ZONE III - Lincoln County

ZONE IV - Dona Ana County

ZONE V - Luna County

ZONE VI - Grant County Communities of Silver City, Bayard, Central, Hurley and New town site of Tyrone; Hidalgo and Sierra Counties.

ZONE VII - Grant County, except communities listed in Zone VI.

DECISION NO. NM76-4142 Page 2

GENERAL BUILDING AND HEAVY ENGINEERING CONSTRUCTION	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.
CARPENTERS:					
Dwelling houses & apartments not to exceed two stories in height:					
Zone I-A	$7.50	.80	.80	.60	.20
Zone I-B	8.50	.80	.80	.60	.20
Zone I-C	9.25	.80	.80	.60	.20
General Building and Heavy Engineering and Residential Construction (Dwelling Houses and apartments over two stories in height):					
Zone 2-A	8.50	.80	.80	.60	.02
Zone 2-B	9.50	.80	.80	.60	.02
Zone 2-C	10.25	.80	.80	.60	.02

CARPENTERS' ZONE DEFINITIONS

CARPENTERS (STATEWIDE) - From nearest basing points of the following cities of Towns: Alamogordo, Albuquerque, Artesia, Bayard, Belen, Carlsbad, Clovis, Deming, Espanola, Eunice, Farmington, Gallup, Grants, Hobbs, Las Cruces, Las Vegas, Lordsburg, Lovington, Portales, Raton, Roswell, Ruidoso, Santa Fe, Santa Rosa, Silver City, Socorro, Taos, and Tucumcari:
ZONE I - Dwelling houses & apartments not to exceed two stories in height:
Zone I-A - 0 15 road miles from nearest basing point
Zone I-B - 15 to 35 road miles from nearest basing point
Zone I-C - Over 35 road miles from nearest basing point
ZONE II - General Building & Heavy Engineering and Residential Construction (Dwelling Houses and Apartments over two stories in height):
Zone 2-A - 0 to 15 road miles from nearest basing point
Zone 2-B - 15 to 35 road miles from nearest basing point
Zone 2-C - Over 35 road miles from nearest basing point

MILLWRIGHTS & PILEDRIVERMEN:					
Zone 1	9.00	.80	.80	.60	.20
Zone 2	10.00	.80	.80	.60	.20
Zone 3	10.75	.80	.80	.60	.20

MILLWRIGHTS & PILEDRIVERMEN ZONE DEFINITIONS

MILLWRIGHTS & PILEDRIVERMEN (STATEWIDE)
From nearest basing points of the following cities or towns:
Albuquerque City Limits; Santa Fe City Limits; the Main Post Office at Las Cruces and Carlsbad.
Zone 1 - 0 to 15 road miles from nearest basing point
Zone 2 - 15 to 35 road miles from nearest basing point
Zone 3 - Over 35 road miles from nearest basing point

ELECTRICIANS ZONE DEFINITIONS

ELECTRICIANS:
ZONE I
AREA 1 - Bernalillo, Santa Fe, Torrance, DeBaca, Guadalupe, Quay, San Miguel, Mora, Harding, Union, Colfax, Taos, Rio Arriba, Grant, Sandoval, Valencia, Socorro, Catron, Sierra and all of San Juan County excluding the Navajo Indian Reservation.
AREA 2 - Chaves, Curry, Lincoln and Roosevelt Counties

AREAS 1-A & 2-A
From nearest basing point cities, towns and mileage from main post office in the following towns:
Albuquerque - 15 miles from main post office
Santa Fe - 15 miles from main post office
Las Vegas - 8 miles from main post office
Farmington - 8 miles from main post office
Raton - 6 miles from main post office
Tucumari - 6 miles from main post office
Aztec - 6 miles from main post office
Roswell - 12 miles from main post office
Ruidoso - 12 miles from main post office
Portales - 12 miles from main post office
Carrizozo - 12 miles from main post office
Clovis - 12 miles from main post office

AREAS 1-B & 2-B
Area 1-B & 2-B extending up to 20 miles beyond Area 1-A & 2-A
AREAS 1-C & 2-C
Area 1-C & 2-C extending up to 30 miles beyond Area 1-A & 2-A
AREAS 1-D & 2-D
Area 1-D & 2-D - anything beyond 30 miles from Area 1-A & 2-A
ZONE II - Los Alamos County
ZONE III - Single or multiple, family dwelling or apartments up to and including 26 units under one roof not exceeding two stories - Bernalillo, Santa Fe Counties and all of San Juan County excluding the Navajo Indian Reservation
ZONE IV - Dona Ana, Otero, Luna, Hidalgo Counties
Zone 4-A - Within 5 mile radius from the post office in Las Cruces and Alamogordo
Zone 4-B - Dona Ana, Otero, Luna, and Hidalgo Counties (except that area specified in Zone 4-A)
ZONE V - McKinley County
Zone 5-A - Includes that City of Gallup and extending 10 road miles from main post office
Zone 5-B - Extending up to 20 road miles beyond Zone 5-A
Zone 5-C - Extending up to 30 road miles beyond Zone 5-A
Zone 5-D - Anything extending 30 road miles beyond Zone 5-A
ZONE VI - Eddy and Lea Counties - the following zones shall be designated from the main post office of Artesia, Carlsbad, Hobbs and Lovington:
Zone 6-A - 0 to 12 miles from main post office
Zone 6-B - 12 to 22 mi[illegible] from main post office
Zone 6-C - 22 to 40 m[illegible] beyond main post office
Zone 6-D - 40 miles a[illegible] beyond main post office

Zone 5-C	7.15	.35			

PAINTERS
ZONE I - San Juan, McKinley, Bernalillo, Torrance, Guadalupe, Quay, Catron, Socorro, Lincoln, DeBaca, Roosevelt, Chaves, Valencia, Sierra, Grant, Hidalgo and Curry Counties:
Zone 1-A - Painters, roller and hand textures
Zone 1-B - Painters, spray, sandblasting, painter on steel beidges, tanks towers, pipe and structural
Zone 1-C - Paperhanger
Zone 1-D - Drywall finisher; Ames tool operator
Zone 1-E - Hand finisher machine texture

ZONE II - Colfax, Harding, Los Alamos, Mora, Sandoval, San Miguel, Rio, Arriba, Taos, Union, and Santa Fe Counties.
Zone 2-A - Painters and roller
Zone 2-B - Paperhangers
Zone 2-C - Spray, Sandblast, pressure roller and gunnite operator
Zone 2-D - Steel painter; bridges, structural steel, machinery tank, towers, pipe boiler rooms and power plant brush and spray
Zone 2-E - Drywall finisher tool and machine texture
Zone 2-F - High pay - 30 to 75 feet
Zone 2-G - High pay - 75 to 100 feet
Zone 2-H - High pay - 100 feet and over

ZONE III- Luna, Otero and Dona Ana Counties
Zone 3-A - Brush, tapers and rollers
Zone 3-B - Spray, sandblasting
Zone 3-C - Ames tool and steel brush after erection
Zone 3-D - Stripping machine
Zone 3-E - Radio towers, water tanks, smoke stacks
Zone 3-F - Radio towers, water tanks, smoke stacks 50 to 75 feet
Zone 3-G - Radio towers, water tanks, smoke stacks 75 feet to 100 feet
Zone 3-H - Radio towers, water tanks, smoke stacks 100 feet to 200 feet
Zone 3-I - Radio towers, water tanks, smoke stacks 200 feet to 300 feet
Zone 3-J - Radio towers, water tanks, smoke stacks 300 feet to 400 feet

ZONE IV - Lea and Eddy Counties shall encompass Carlsbad, New Mexico and an area within a radius of 40 miles from the courthouse in Carlsbad, New Mexico
Zone 4-A - Brush and roller
Zone 4-B - Paperhangers and sandblaster
Zone 4-C - Spray and dry wall finisher

ZONE V - Lea and Eddy Counties shall include the rest of the area in Eddy and Lea Counties
Zone 5-A - Brush, roller and drywall finisher
Zone 5-B - Spray
Zone 5-C - Paperhanger and sandblaster

Group 8	7.70	.35	.40		.10
Group 9	8.50	.35	.40		.10

RESIDENTIAL AND GENERAL BUILDING CONSTRUCTION
POWER EQUIPMENT OPERATORS:

Group 1: Firemen, Oiler, Helper - Mechanics Welders, Greaser Truck Screedman Scale Operator such a (Bin-A-Batch), Rubber-tired Farm-type Tractor, Tractors under 50 HP w/o attachments, Breakman, Concrete Paving Curing Machine (bridge type)

Group 2: Rollers, Sheepsfoot or Pneumatic Self-propelled w/o Dozer, Concrete Conveyor, Service Truck Operator (head oiler), Air Compressor (300 CFM and over), Pumps (6" and over), Screening Plant, Concrete Mixers (under 1 c.y.), Concrete Saw of Grinder-span type, Hoists, 1 drum, Air Tugger, Elevating Belt Type Loaders, Forklift Lumber Stacker, Tractor-farm type (under 50 HP w/attachments) Motor Man and Industrial Locomotive Operator, Winch Trucks, Front End Loader (under 2 c.y.), Power Plants which generate over 15 KW, Welding Machines

Group 3: Bituminous Distributors Boilers, Retort and Hot Oil Heaters, Concrete Paver-single drum, Drilling Equipment, Motor Graders (Rough), Shaft and Tunnel Equipment-Refrigeration, Slusher, jumbo form, Trenching Machines (all types), Pump Crete and Gunite Machines, Slipform Paver, Mechanical Bullfloats, Concrete Slab, Spreading Machine, Concrete Slab Finishing Machine, Asphalt Plants, Bituminous Finishing Machines, Crushing Plants

Group 4: Fornt End Loader (2 thru 10 c.y.), Rollers, Steel Wheeled-all types, Bulldozers, Scrapers, (Motor or Towed), Elevating Graders, Concrete Batching Plants, Self-propelled Rollers-equiped with Dozer, Twin-bowl Scrapers and Quad 8 or 9 Pushers (35c over basic rate) Three Bowl Scrapers (60c over basic rate)

Group 5: Hydraulic Cranes - with less than 50 ft. of boom (20 tons and under), Concrete Paver-double drum, Cat Cranes, Hysters, Side and Swingboom Cats, Hoist-2 drum, Auto Fine Grader

Group 6: Mucking Machines - all types, Motor Grader-Finish, Mechanic-Welder

Group 7: Steam Engineers, Loader (Front End over 10 c.y.)

Group 8: All Shovel type Equipment:
Cranes, Draglines, Backhoes, Derricks, Guy and Stiff Leg, Pipemoble, (No.20p) Pile Driver, Hydraulic Cranes (20 tons and over), Mine Hoist (Belt Loader "CMI" type), Cranes, Draglines - with Booms and Jib over 150 ft. 25c per hour additional

Group 9: Shovel (wheel type), Boring Machine (Tunnel or Shaft Mole), Pipe Mobile

Group 10: Shaft and Tunnel Work

HEAVY ENGINEERING CONSTRUCTION
POWER EQUIPMENT OPERATORS

Group 1: Firemen, Oiler, Helper - Mechanics Welders, Greaser Truck, Screedman Scale Operator such a (Bin-A-Batch), Rubber-tired Farm-type Tractor, Tractors under 50 HP w/o attachments, Breakman, Concrete Paving Curing Machine (bridge type)

Group 2: Rollers, Sheepsfoot or Pneumatic Self-propelled w/o Dozer, Concrete Conveyor, Service Truck Operator (head oiler), Air Compressor (300 CFM and over), Pumps (6" and over), Screening Plants, Concrete Mixers (under 1 c.y.), Concrete Saw of Grinder-span type, Hoists, 1 drum, Air Tugger, Elevating Belt Type Loaders, Forklift Lumber Stacker, Tractor-farm type (under 50 Hp w/attachments) Motor Man and Industrial Locomotive Operator, Winch Trucks, Front End Loader (under 2 c.y.), Power Plants which generate over 15 KW, Welding Machines

Group 3: Bituminous Distributors Boilers, Retort and Hot Oil Heaters, Concrete Paver - single drum, Drilling Equipment, Motor Graders (Rough), Shaft and Tunnel Equipment - Refrigeration, Slusher, jumbo form, Trenching Machines (all types), Pump Crete and Gunite Machines, slipform Paver, Mechanical Bullfloats, Concrete Slab, Spreading Machine, Concrete Slab Finishing Machine, Asphalt Plants, Bituminous Finishing Machines, Crushing Plants

Group 4: Front End Loader (2 thru 10 c.y.), Rollers, Steel Wheeled-all types, Bulldozers, Scrapers, (Motor or Towed), Elevating Graders, Concrete Batching Plants, Self-propelled Rollers - equiped with Dozer, Twin-bowl Scrapers and Quad 8 or 9 Pushers (35c over basic rate) Three Bowl Scrapers (60c over basic rate)

Group 5: Hydraulic Cranes - with less than 50 ft. of Boom (20 tons and under), Concrete Paver - double drum, Cat Cranes, Hysters, Side and Swingboom Cats, Hoist - 2 drum, Auto Fine Grader

Group 6: Mucking Machines - all types, Motor Grader - Finisher, Mechanic - Welder

Group 7: Steam Engineers, Loader (Front End over 10 c.y.)

Group 8: All Shovel Type Equipment:
Cranes, Draglines, Backhoes, Derricks, Guy and Stiff Leg, Pipemoble (No. 20p) Pile Driver, Hydraulic Cranes (20 tons and over), Mine Hoist (Belt Loader "CMI" type), Cranes, Draglines - with Booms and Jib over 150 ft. 25c per hour additional

Group 9: Shovel (wheel type), Boring Machine (Tunnel or Shaft Mole), Pipe Mobile

CLASSIFICATION DEFINITIONS

TRUCK DRIVERS:

Group 1: Pickup 3/4 ton and under; Light Tire Repair or Washer; Swamper or Riding Helper; Teamster 2 or 4 up

Group 2: Bus or Taxi Driver; Dump or Batch Truck under 8 C.Y.W.L.A.; Flatbed (bobtail) 2 ton and under; Warehouse including Material Checker; Mechanic and Welder Helper; Forklift, under 5 ton MRC

Group 3: Dump Truck (including all highway and off-highway) 8 up to 16 C.Y.W.L.C.; Water, Fuel or Oil Trucks less than 3,000 gallons; Flatbed (bobtail) over 2 tons

Group 4: Distributors Driver; Heavy Tire Repair; Lumber Carrier Driver; Yound Buggy or similar equipment transit mix or agitator 2 or 3 axle bobtail equipment; Scissor Truck; Bulk Cement Bobtail 2 or 3 axles; Semi-ttailer Driver (flatbed or van single axle); Forklift 5 ton and over M.R.C.; Field Equipment Serviceman

Group 5: Dumpsters and Dumpcrete Driver; Water, Fuel or Oil Truck, 3;000 to 6,000 gallon capacity; Lowboy, light equipment driver; Euclid type tank wagon under 6,000 gallons

Group 6: Vacuum Truck; Dump Truck (including all highway and off-highway 16 up to 22 C.Y.W.L.C.

Group 7: Transit Mix or Agitator semi or 4 axle equipment driver; Flaherty Truck type Spreader Box Driver; Slurry Trucks 4 axle Bobtail; Winch Truck and "A" Frame Dump Trucks (including all highway and off-highway) 22 C.Y. up to 35 C.Y.W.L.C, Head Field Equipment Serviceman

Group 8: Euclid Diesal powered Turnarocker; Terra Cobra; DW 10; DW 20; LeTourneau Pulls and similar diesal powered equipment when used to haul materials and assigned to a Teamster; Lowboy Heavy Equipment Driver; Water, Fuel or Oil Trucks 6,000 gal. and over (including tank wagon drivers); Semi-trailer Driver (flatbed or van tandems); Light equipment mechanic; Dump Trucks (including all highway and off-highway) 35 C.Y.W.L.C. and over; Truck and Trailer or Semi-trailer (flatbed eject all)

Group 9: Lowboy (heavy equipment, double gooseneck); Heavy equipment mechanics; Welder (body and fender man)

TEAMSTERS CLASSIFICATION not listed, shall be paid a rate comparable to classification listed.

WELDERS - Receive rate prescribed for craft performing operation to which welding is incidental.

FOOTNOTES:
a. Includes $0.07 contribution to the Occupational Health Fund.
b. 1st 6 months - none; 6 months to years, 2%; over 5 years, 4% of basic hourly rate.
c. Paid Holidays: A through F.

PAID HOLIDAYS:
A-New Year's Day; B-Memorial Day; C-Independence Day; D-Labor Day; E-Thanksgiving Day; F-Christmas Day.

BUILDING CONSTRUCTION LABORERS:	Basic Hourly Rates	Fringe Benefits Payments			
		H & W	Pensions	Vacation	Education and/or Appr. Tr.
GROUP A	5.75	.20	.20		.05
GROUP B	5.85	.20	.20		.05
GROUP C	5.90	.20	.20		.05
GROUP D	6.10	.20	.20		.05
GROUP E	6.30	.20	.20		.05

GROUP A: General and common laborers, concrete laborers, track laborer walkers, cement finisher helper, plumber helpers, carpenter tenders, asphalt rakers-tampers, form strippers, roofing helpers.

GROUP B: Well driller helpers, storm and sanitary pipe layers, mat weavers, motor buggie operators.

GROUP C: Chain saw operator, jackhammer, vibrator and electric hammers and all air tool and pneumatic tools.

GROUP D: Deep hole men

GROUP E: Powdermen, toolroom attendant, torchman on demolition and salvage, sand hog (free air).

LABORERS (Building Construction)

Group 1: Axeman and hand faller; Concrete worker(wet or dry)(curing and drying); Car and truck loader; Dumpman; Erector and installer (includes the installation and erection of all fences, right-of-way, median fence, snow fence, etc., guard rails, section rails, reference posts, guide posts, signs and right-of-way markers); Form stripper; Form setter helper (paving); General Laborer; Gunite helper; Landscaper helper; Material handler (lumber, rods, cement, concrete); Nozzleman (air and water); Pipe setter helpers, non-metallic; Pipe setters helpers, corrugated; All work pertaining to pre-watering, pre-irrigation, and pre-wetting; Rodman; Riprap man; Sandblaster pot tender; Signalman, grade, concrete, etc.; Sisserman or hopper man; Stake jumper for equipment; Tar and asphalt pot tender; Wrecking and demolition crews; Unloading and packing of steel rods and mesh (reinforcing); Heater tender and pilot car operator

Group 2: Asphalt raker and tamper; Bin wall installer; Bituminous curb builder; Carpenter tender; Cement mason tender; Chuck tender; Form setter (paving); Hand operator vibrator roller; Landscaper; Mechanical form cleaner; Mortar man on stone riprap; Operator of pneumatic, electric, gas tamper and similar mechanical tools; Powderman helper; Pipe setter, corrugated; culvert pipe, multi-plate, sectional plate and similar type; Pipe wrapper; Power-type concrete buggy (push); Power saw operator (clearing); Vibrator (concrete); Creosote material handler (corrosive enamel or its equal); Burner (cutting torch)

Group 3: Concrete saw; Gunite nozzleman; High scaler (using air tools from bos'n chair, swing stage life belt, or block and tackle, shall receive $.20 per hour more than the classified rate); Jackhammer and pavement breaker; Sandblaster nozzleman; Sewer pipe installer, non-metallic; Caulker; Collarman; Jointer; Mortarman; Rigger; Jacker; Power-type concrete buggy (ride); Shoring and lagging of open ditch

Group 4: Powderman and blaster; Wagon drill, air track, diamond and other drills for blasting powder or grouting

Group 5: Hod carriers; Mason tender; Plasterers tenders; Terrazzo tenders; Tile setter tenders, and Scaffold builders

Group 6: Tunnel and underground work: Miners (drills) Machine man; Timberman; Steelman; Drill doctor; Form setter and movers; Spaders; Tuggers; Spilling and/or caisson workers; Jackhammer men; Finishers; Re-bar man; Powderman

Group 7: Nipper; Chuck tender; Top man or toplander

Group 8: Brakeman and vibrator man

Group 9: Mucker and bull gang laborer

LABORERS (Heavy Construction)

Group 1: Axeman and hand faller; Bin wall installer helpers; Concrete worker (wet or dry); Concrete workers (curing and drying); Dumpman; Erector and installer(including the installation and erection of fences, snow fence, guard rails, median rails, median posts, signs and right-of-way marker); Form stripper; Form setter helper (paving); General labor; Gunite helper; Heater tender; Landscaper helper; Material handler (lumber, rods, cement, concrete); Nozzleman, air and water; Pipe setters helpers (non-metallic); Pipe setters helpers (corrugated); Pre-watering, pre-wetting and pre-irrigation (all work); Rip rap man; Sandblaster pot tender; Signal men, grade concrete, etc.; Scissor man or hopper man; Stake jumper for equipment; Tar and asphalt pot tender; Wrecking and demolition crews

Group 2: Asphalt raker and tamper; Bin wall installer; Bituminous curb builder; Cement mason or finisher, helper and tender; Chuck tender; Form setter (paving); Hand operated vibratory roller; Landscaper; Mortar man on stone rip rap; Operator of pneumatic, electric, gas tamper and similar mechanical tools; Pipe setter (corrugated, culvert pipe sectional, multiplate and similar type); Pipe setter, pipelayer (non-metallic); Pipewrapper; Powderman helper; Power type concrete buggy (push or ride); Power saw operator (clearing); Vibrator, concrete

Group 3: Concrete saw; Gunite nozzleman; High scaler (using air tools from bos'n chair, swing stage life belt, or block and tackle shall receive $.20 per hour more than the classified rate); Jackhammer and pavement breaker; Sandblaster nozzleman; Sewer pipe installer (non-metallic), clay, concrete, etc. (Caulker, collarman, jointer, mortarman, rigger, jacker

Group 4: Powderman and blaster; Wagon drill, air-trac, diamond, and other drills for blasting powder or grouting

Group 5: Tunnel and Underground Work: Brakeman; Swamper; Vibrator man

Group 5A: Bull gang; Dumpman; Mucker; Trackman

Group 5B: Miners (drillers) machine men; Timbermen; Steelmen; Drill doctor; Form setter and mover; Spader; Tuggers spilling and/or caisson workers; Powdermen; Jackhammermen; Finishers

Group 5C: Chucktender; Topman; Toplander

Index to General Wage Determination Decisions and Modifications as of July 2, 1976

There is set forth below an index to general wage determination decisions and modifications as published in the FEDERAL REGISTER pursuant to the Davis-Bacon and related Acts. The index lists general wage determination decisions and modifications by State and County. An updated index is published on the first Friday of each month.

The index is published for the convenience of the public and the Department of Labor will endeavor to keep it accurate and up to date. In the event the data in the index and published general decisions do not coincide, the published general decisions shall control.

Abbreviations:
- (B) Building Construction
- (D) Dredging
- (F) Flood Control Construction
- (H) Heavy Construction
- (Hw) Highway Construction
- (R) Residential Construction
- Mod. Modification
- (HE) Heavy Engineering
- (LE) Light Engineering
- (U) Utility
- (W&S) Water and Sewer

Signed at Washington, D.C., this 30th day of July 1976.

RAY J. DOLAN,
Assistant Administrator,
Wage and Hour Division.

reminders

(The items in this list were editorially compiled as an aid to FEDERAL REGISTER users. Inclusion or exclusion from this list has no legal significance. Since this list is intended as a reminder, it does not include effective dates that occur within 14 days of publication.)

Rules Going Into Effect Today

FCC—Experimental, auxiliary, and special broadcasting, and other program distributional services; power limitations on TV Translator stations..... 28266; 7–9–76

Interior/BIA—Operation and maintenance charges; Flathead irrigation project, 28266; 7–9–76

List of Public Laws

This is a continuing numerical listing of public bills which have become law, together with the law number, the title, the date of approval, and the U.S. Statutes citation. The list is kept current in the FEDERAL REGISTER and copies of the laws may be obtained from the U.S. Government Printing Office.

S. 3295..... Pub. Law 94–375
Housing Authorization Act of 1976
(Aug. 3, 1976; 90 Stat. 1067)

AGENCY PUBLICATION ON ASSIGNED DAYS OF THE WEEK

The six-month trial period ended August 6. The program is being continued on a voluntary basis (see CFR notice, 41 FR 32914, August 6, 1976). The following agencies have agreed to remain in the program:

Monday	Tuesday	Wednesday	Thursday	Friday
NRC	USDA/ASCS		NRC	USDA/ASCS
DOT/COAST GUARD	USDA/APHIS		DOT/COAST GUARD	USDA/APHIS
DOT/NHTSA	USDA/FNS		DOT/NHTSA	USDA/FNS
DOT/FAA	USDA/REA		DOT/FAA	USDA/REA
DOT/OHMO	CSC		DOT/OHMO	CSC
DOT/OPSO	LABOR		DOT/OPSO	LABOR

Documents normally scheduled on a day that will be a Federal holiday will be published the next work day following the holiday.

Comments on this program are still invited. Comments should be submitted to the Day-of-the-Week Program Coordinator, National Archives and Records Service, General Services Administration, Washington, D.C. 20408.

ATTENTION: Questions, corrections, or requests for information regarding the contents of this issue only may be made by dialing 202–523–5286. For information on obtaining extra copies, please call 202–523–5240.

To obtain advance information from recorded highlights of selected documents to appear in the next issue, dial 202–523–5022.

federal register

Area Code 202 Phone 523–5240

Published daily, Monday through Friday (no publication on Saturdays, Sundays, or on official Federal holidays), by the Office of the Federal Register, National Archives and Records Service, General Services Administration, Washington, D.C. 20408, under the Federal Register Act (49 Stat. 500, as amended; 44 U.S.C., Ch. 15) and the regulations of the Administrative Committee of the Federal Register (1 CFR Ch. I). Distribution is made only by the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

The FEDERAL REGISTER provides a uniform system for making available to the public regulations and legal notices issued by Federal agencies. These include Presidential proclamations and Executive orders and Federal agency documents having general applicability and legal effect, documents required to be published by Act of Congress and other Federal agency documents of public interest. Documents are on file for public inspection in the Office of the Federal Register the day before they are published, unless earlier filing is requested by the issuing agency.

The FEDERAL REGISTER will be furnished by mail to subscribers, free of postage, for $5.00 per month or $50 per year, payable in advance. The charge for individual copies is 75 cents for each issue, or 75 cents for each group of pages as actually bound. Remit check or money order, made payable to the Superintendent of Documents, U.S. Government Printing Office, Washington, D.C. 20402.

There are no restrictions on the republication of material appearing in the FEDERAL REGISTER.

PRIVACY ACT OF 1974
FPC publishes new or intended routine uses of information in existing systems of records..... 33332
Commerce announces solicitation of public comment by 9–8–76 33315

rules and regulations

This section of the FEDERAL REGISTER contains regulatory documents having general applicability and legal effect most of which are keyed to and codified in the Code of Federal Regulations, which is published under 50 titles pursuant to 44 U.S.C. 1510.

The Code of Federal Regulations is sold by the Superintendent of Documents. Prices of new books are listed in the first FEDERAL REGISTER issue of each month.

Title 13—Business Credit and Assistance

CHAPTER I—SMALL BUSINESS ADMINISTRATION

[Rev. 6, Amdt. 8]

PART 120—BUSINESS LOAN POLICY

A proposal was issued on May 27, 1976, (41 FR 21653) to amend the Business Loan Policy Regulations to simplify the matter of documentation required prior to the sale of the guaranteed portion of a loan.

This amendment provides that only those loan documents required to be furnished to or requested by, SBA must be submitted to the Agency by the lender prior to the execution of a secondary participation agreement. The superseded regulation required that "all documents" be submitted to SBA.

Interested persons were given 30 days in which to submit written comments thereon, and no adverse comment was received.

Accordingly, pursuant to the authority of Section 5 of the Small Business Act, 72 Stat. 385, 15 U.S.C. 634, and Section 7 of such Act, as amended, 72 Stat. 387, 15 U.S.C. 636, Part 120 of Chapter I, Title 13 of the Code of Federal Regulations is hereby amended by revising subdivision (i) of subparagraph 120.5(a)(3) to read as follows:

§ 120.5 Operations of eligible participants.

(a) • • •

(3) • • •

(i) The duly executed note and settlement sheet(s) underlying the transaction, and such other documents as SBA may expressly require have been submitted by the lender to SBA.

Effective date: This amendment shall become effective on August 9, 1976.

(Catalog of Federal Domestic Assistance Programs No. 59.012, Small Business Loans)

Dated: July 30, 1976.

MITCHELL P. KOBELINSKI,
Administrator.

[FR Doc.76-23028 Filed 8-6-76;8:45 am]

Title 14—Aeronautics and Space

CHAPTER I—FEDERAL AVIATION ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

[Docket No. 76-CE-7-AD; Amdt. 39-2686]

PART 39—AIRWORTHINESS DIRECTIVES

Cessna 210 Series Airplanes

Amendment 39-2517 (41 FR 7936), as revised by Amendment 39-2556 (41 FR 11811), AD 76-04-01, is an Airworthiness Directive (AD), applicable to certain Cessna 210 series airplanes having Electrol manufactured Cessna P/N 1280102 -1 and -2 or 1280501 -1 and -2 main landing gear rotary actuator assemblies. AD 76-04-01 requires the installation of Cessna Service Kit 1209005-1 R/L (improved spindle shafts in the aircraft's main landing gear actuators) in accordance with Cessna Service Letter SE75-21. The compliance time for AD 76-04-01 is within 100 hours' time in service after February 26, 1976.

Subsequent to the issuance of AD 76-04-01 as amended, the manufacturer has advised that parts required to comply with the AD will not be available until approximately October 31, 1976. As a result, unless some relief is offered owners/operators of Cessna 210 series aircraft who have not yet complied with AD 76-04-01, these aircraft will be grounded because of the unavailability of parts. Aircraft having unmodified landing gear actuators can be operated with no possibility of the landing gear actuator spindle shaft failing if the aircraft are operated in accordance with a restriction requiring the landing gear to remain down and locked during all phases of flight. However, under this type of operation the published performance and fuel range data and allowable air speeds for the aircraft are not applicable. Flight without reference to approved data could result in additional hazards. Because of the unavailability of parts the FAA is thus faced with the alternative of grounding unmodified airplanes or of extending AD compliance either with or without the aforementioned operating restriction. In order to afford relief without unduly compromising safety the agency believes it is in the public interest to amend AD 76-04-01 to extend its compliance time to October 31, 1976, and permit affected aircraft to be operated in the normal manner until the actuators have been modified. This amendment will also revise the compliance statement to emphasize that Cessna 210D aircraft modified in accordance with AD 71-24-7 already comply with AD 76-04-01 and exempt those aircraft already modified by previous maintenance.

Since this amendment is relieving in nature, notice and public procedure hereon are not necessary and the amendment may become effective in less than thirty (30) days.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator 14 CFR 11.89 (31 FR 13697), § 39.13 of Part 39 of the Federal Aviation Regulations, AD 76-04-01 (Amendments 39-2517 and 39-2556) is revised so that it now reads as follows:

CESSNA. Applies to Models 210 through 210D (Serial Numbers 57001 thru 57575 and 21057576 thru 21058510) airplanes on which are installed Electrol manufactured main gear rotary actuator assemblies, Cessna P/Ns 1280102 -1 and -2 (Electrol P/Ns EA 1471 -1 and -2) or Cessna P/Ns 1280501 -1 and -2 (Electrol P/Ns EA 1614 -1 and -2). This AD does not apply to those airplanes on which Cessna P/Ns 1280511-3/4 and 1298100-1/2 actuator assemblies are installed.

Compliance: Required as indicated, unless already accomplished in accordance with this AD, previous maintenance or AD 71-24-7.

To decrease the possibility of main gear extension failure, accomplish the following:

On or before October 31, 1976, or within 100 hours' time in service after February 26, 1976, whichever occurs later, install Cessna Kits 1209005-1 R/L in accordance with Cessna Service Letter SE75-21 dated October 3, 1975, or later approved revisions, or an equivalent method approved by the Chief, Engineering and Manufacturing Branch, FAA, Central Region.

NOTE 1.—The landing gear actuator assemblies having Cessna P/Ns and manufactured by Electrol can be identified by using an inspection mirror through the inspection plate located forward of the strut doors to read the actuator nameplate.

NOTE 2.—A significant savings of manhours will result if compliance with this AD and the modifications and/or inspections required by AD 76-14-07 (Amendment 39-2670—landing gear saddle fittings) are accomplished at the same time.

NOTE 3.—It is imperative that Cessna P/N 1209005-1 R/L Kits be ordered from the manufacturer immediately to assure that a sufficient supply of kits will be available to allow modification of all affected aircraft on or before October 31, 1976.

This amendment, 39-2686, becomes effective August 12, 1976, and replaces Amendments 39-2517 and 39-2556.

This amendment is made under the authority of Sections 313(a), 601 and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421 and 1423), and of Section 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in Kansas City, Missouri, on July 28, 1976.

C. R. MELUGIN, Jr.,
Director, Central Region.

[FR Doc.76-22858 Filed 8-6-76;8:45 am]

[Docket No. 75-CE-26-AD; Amdt. 39-2687]

PART 39—AIRWORTHINESS DIRECTIVES

Cessna T310, 320, 340, 401, 402, 411, 414 and 421 Series Airplanes

Amendment 39-2419, AD 75-23-08, published in the FEDERAL REGISTER on No-

V 41 154 AUG 9 76 UMI

vember 12, 1975 (40 FR 52717–52720), and corrected on December 1, 1975 (40 FR 55637), is an Airworthiness Directive (AD) which is applicable to Cessna T310, 320, 340, 401, 402, 411, 414 and 421 series airplanes. AD 75–23–08 requires in part repetitive inspections of the exhaust systems on the aforementioned airplanes for deterioration and/or indications of incipient failures.

Subsequent to the issuance of AD 75–23–08 the FAA has determined that a small adjustment in the inspection intervals will not significantly affect safety and would reduce the burden that compliance with the AD may impose on owners/operators. Accordingly, a new paragraph is being added to AD 75–23–08 which will authorize adjustment of the intervals between the repetitive inspections up to 10 per cent of the specified interval to facilitate accomplishing these inspections concurrent with other scheduled maintenance on the airplanes in question.

Since this amendment is relieving in nature and will impose no additional burden on any person, notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than thirty (30) days.

In consideration of the foregoing and pursuant to the authority delegated to me by the Administrator 14 CFR 11.89 (31 FR 13697), § 39.13 of Part 39 of the Federal Aviation Regulations, Amendment 39–2419, AD 75–23–08, is revised by adding a new paragraph which reads as follows:

VI. The time in service between the repetitive inspections required herein may be adjusted up to plus 10 percent of any specified inspection interval required by this AD to facilitate accomplishing these inspections concurrent with other scheduled maintenance on the airplane.

This amendment becomes effective August 12, 1976.

This amendment is made under the authority of Secs. 313(a), 601 and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421 and 1423), and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655 (c)).

Issued in Kansas City, Missouri, on July 29, 1976.

C. R. MELUGIN, JR.,
Director, Central Region.

[FR Doc.76–22859 Filed 8–6–76;8:45 am]

[Docket No. 75–SO–21; Amdt. 39–2684]

PART 39—AIRWORTHINESS DIRECTIVE

Lockheed Model 1329

Amendment 39–2123, 40 FR 10951, AD 75–06–05, requires a one-time inspection of the fuselage main frames on Lockheed Model 1329 airplanes. After issuing Amendment 39–2123, the FAA determined that repetitive inspection of the main frames on an annual basis is required. Therefore, the airworthiness directive is being amended to require annual inspection of main frames of Lockheed Model 1329 airplanes.

Since a situation exists that requires immediate adoption of this regulation, it is found that notice and public procedure hereon are impracticable and good cause exists for making this amendment effective in less than 30 days.

In consideration of the foregoing, and pursuant to the authority delegated to me by the Administrator (31 FR 13697) § 39.13 of Part 39 of the Federal Aviation Regulations, Amendment 39–2123, 40 FR 10951, AD 75–06–05 is amended as follows:

Revise compliance paragraph to read: Compliance within the next 50 hours' time in service after the effective date of this amendment to AD 75–06–05, unless a second inspection has already been accomplished in accordance with Lockheed Service Bulletin 329–269 and Supplemental Service Bulletin 329–269A during the period since the effective date of AD 75–06–05, March 14, 1975, and the effective date of this amendment, August 10, 1976.

Add paragraph (c) which states: Reinspect the main frames at intervals not to exceed 12 months after accomplishing paragraph (a).

This amendment becomes effective August 10, 1976.

This amendment is made under the authority of Secs. 313(a), 601, and 603 of the Federal Aviation Act of 1958 (49 U.S.C. 1354(a), 1421, and 1423) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in East Point, Georgia, on July 27, 1976.

PHILLIP M. SWATEK,
Director, Southern Region.

[FR Doc.76–22857 Filed 8–6–76;8:45 am]

[Airspace Docket No. 76–EA–35]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

Baltimore, Md.; Designation and Alteration of Control Zones and Transition Area

On page 22843 of the FEDERAL REGISTER for June 7, 1976, the Federal Aviation Administration published a proposed rule which would alter the Baltimore, Md., Control Zone and Transition Area and designate a Baltimore, Md., Control Zone.

Interested parties were given 30 days after publication in which to submit written data or views. No objections to the proposed regulations have been received.

In view of the foregoing, the proposed regulation is hereby adopted, effective 0901 GMT November 4, 1976.

(Sec. 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348), and sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Jamaica, N.Y., on July 19, 1976.

WILLIAM E. MORGAN,
Director, Eastern Region.

§ 71.171 [Amended]

1. Amend § 71.171 of Part 71 of the Federal Aviation Regulations so as to change the caption of the Baltimore, Md. Control Zone to read:

(BALTIMORE, MD. (BALTIMORE-WASHINGTON) INTERNATIONAL AIRPORT)

2. Amend § 71.171 of Part 71 of the Federal Aviation Regulations so as to designate a Baltimore, Md. (Glenn L. Martin State Airport) Control Zone as follows:

BALTIMORE, MD. (GLENN L. MARTIN STATE AIRPORT)

Within a 5-mile radius of the center, 39°19'45" N., 76°25'00" W. of Glenn L. Martin State Airport, Baltimore, Md.; within 3 miles each side of a 132° bearing from the Martin, Md. RBN, extending from the 5-mile radius zone to 8.5 miles southeast of the RBN; within 3 miles each side of a 129° bearing from the Martin, Md. RBN, extending from the 5-mile radius zone to 8.5 miles southeast of the RBN; within 5 miles each side of a 17-mile radius arc of the Baltimore, Md. VORTAC, extending clockwise from the Baltimore, Md. VORTAC 030° radial to the Baltimore, Md. VORTAC 046° radial. This control zone is effective from 0700 to 2300 hours, local time, daily.

§ 71.181 [Amended]

3. Amend § 71.181 of Part 71 of the Federal Aviation Regulations so as to amend the Baltimore, Md. Transition Area as follows:

In the description of the Baltimore, Md. Transition Area, delete from "within an 8.5-mile radius of the center 39°19'45" N., 76°25'00" W." to and including "11.5 miles southeast of the RBN" and insert the following in lieu thereof:

"within an 8.5-mile radius of the center 39°19'45" N., 76°25'00" W. of Glenn L. Martin State Airport, Baltimore, Md.; within a 9-mile radius of the center of the airport, extending clockwise from a 239° bearing to a 256° bearing from the airport; within a 10-mile radius of the center of the airport, extending clockwise from a 256° bearing to a 270° bearing from the airport; within an 11.5-mile radius of the center of the airport, extending clockwise from a 270° bearing to a 320° bearing from the airport; within a 13-mile radius of the center of the airport, extending clockwise from a 320° bearing to a 348° bearing from the airport; within an 11.5-mile radius of the center of the airport, extending clockwise from a 348° bearing to a 007° bearing from the airport; within a 10.5-mile radius of the center of the airport, extending clockwise from a 007° bearing to a 027° bearing from the airport; within a 9-mile radius of the center of the airport, extending clockwise from a 027° bearing to a 054° bearing from the airport; within 3.5 miles each side of a 132° bearing from the Martin, Md. RBN, extending from the Glenn L. Martin State Airport 8.5-mile radius area to 11.5 miles southeast of the RBN; within 3.5 miles each side of a 129° bearing from the Martin, Md. RBN, extending from the Glenn L. Martin State Airport 8.5-mile radius area to 11.5 miles southeast of the RBN; within 5 miles each side of the Martin, Md. TACAN 317° radial, extending from the Glenn L. Martin State Airport 8.5-mile radius area to 17.5 miles northwest of the TACAN.

[FR Doc.76–22860 Filed 8–6–76;8:45 am]

[Airspace Docket No. 76–EA–52]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

Grove City, Pa.; Alteration of Transition Area

The Federal Aviation Administration is amending § 71.181 of Part 71 of the Federal Aviation Regulations so as to alter the Grove City, Pa., Transition Area (41 FR 21183).

Subsequent to publication of the rule, designating the transition area, it was determined that the final approach course of the VOR–A original instrument approach procedure developed for Grove City Airport, Grove City, Pa., was changed one degree.

This will require a minor change in the description of the transition area.

Since this amendment is minor in nature and creates no substantial burden on any person, notice and public procedure hereon are unnecessary and the rule may be made effective in less than 30 days.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective August 9, 1976 as follows:

1. Amend § 71.181 of Part 71, Federal Aviation Regulations by amending the description of the Grove City, Pa. Transition Area as follows:

Delete "004°" and insert "005°" in lieu thereof.

(Sec. 307(a) of the Federal Aviation Act of 1958 (72 Stat. 749; 49 U.S.C. 1348) and sec. 6(c) of the DOT Act (49 U.S.C. 1655(c)).)

Issued in Jamaica, N.Y., on July 22, 1976.

R. J. VAN VUREN,
Acting Director,
Eastern Region.

[FR Doc.76–22861 Filed 8–6–76;8:45 am]

[Airspace Docket No. 76–SW–15]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

Henderson, Tex.; Designation of Transition Area

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to designate a transition area at Henderson, Tex.

On April 15, 1976, a notice of proposed rule making was published in the FEDERAL REGISTER (41 FR 15869) stating the Federal Aviation Administration (FAA) proposed to designate a transition area at Henderson, Tex.

Interested persons were afforded an opportunity to participate in the rule making through submission of comments. The Air Transport Association of America (ATA) objected to the proposal on the basis that changing the airport status from VFR to IFR operations and publication of an approved instrument approach procedure to Rusk County Airport, Henderson, Tex., would significantly impact IFR operations at Gregg County Airport, Longview, Tex. The ATA also pointed out that there are published instrument approach procedures to other airports in close proximity which can impact instrument operations at Gregg County Airport.

The FAA determined that certain instrument approach procedures at Gregg County Airport and other surrounding airports could be modified to minimize or eliminate the impact of a Rusk County instrument approach procedure on Gregg County IFR operations. Action to modify these procedures is in progress; therefore, the FAA has determined that a transition area and instrument approach procedure can be approved at Rusk County Airport, Henderson, Tex., without unduly impacting IFR operations at Gregg County Airport, Longview, Tex.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 GMT, November 4, 1976, as hereinafter set forth.

In § 71.181 (41 FR 440), the following transition area is added:

HENDERSON, TEX.

That airspace extending upward from 700 feet above the surface within an 8.5-mile radius of Rusk County Airport, Henderson, Tex. (latitude 32°08'30" N., longitude 94°51'15" W.), and within 5 miles each side of the Gregg County, Tex., VORTAC 197° radial extending from the 8.5-mile-radius area to a point 11.5 miles south of the Gregg County, Tex., VORTAC.

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348); sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Fort Worth, Tex., on July 29, 1976.

ALBERT H. THURBURN,
Acting Director,
Southwest Region.

[FR Doc.76–22862 Filed 8–6–76;8:45 am]

[Airspace Docket No. 76–SO–69]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

Lancaster, S.C.; Alteration of Transition Area

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to alter the Lancaster, S.C., transition area.

The transition area is described in § 71.181 (41 FR 440). The majority of the airspace required for protection of aircraft executing instrument approaches to Lancaster County Airport is presently contained in the description of the Monroe, N.C., transition area. Effective November 4, 1976, the size of the Monroe transition area is being reduced, and it is necessary to amend the Lancaster transition area to insure that adequate controlled airspace is retained in the vicinity of Lancaster County Airport. The alteration of the two transition areas will not increase the amount of controlled airspace in the Monroe-Lancaster area but rather will release approximately 264 square miles of presently designated airspace. Since this amendment is less restrictive in nature, notice and public procedure hereon are unnecessary.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 GMT, November 4, 1976, as hereinafter set forth.

In § 71.181 (41 FR 440), the Lancaster, S.C., transition area is amended to read:

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of Lancaster County Airport (Lat. 34°43'22" N., Long. 80°51'18" W.); within 3 miles each side of the 063° bearing from the Lancaster RBN (Lat. 34°43'10" N., Long 80°-51'24" W.), extending from the 6.5-mile radius areas to 8.5 miles northeast of the RBN.

This amendment is made under the authority of Sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348(a)) and of Sec. 6(c) of the Department of Transportation Act (49 U.S.C. 1655(c)).

Issued in East Point, Ga., on July 26, 1976.

PHILLIP M. SWATEK,
Director, Southern Region.

[FR Doc.76–22864 Filed 8–6–76;8:45 am]

[Airspace Docket No. 76–SW–43]

PART 71—DESIGNATION OF FEDERAL AIRWAYS, AREA LOW ROUTES, CONTROLLED AIRSPACE AND REPORTING POINTS

Walnut Ridge, Ark.; Alteration of Transition Area

The purpose of this amendment to Part 71 of the Federal Aviation Regulations is to alter the transition area at Walnut Ridge, Ark.

Amendment 10 to the Walnut Ridge VOR–A instrument approach procedure revised the final approach radial from the Walnut Ridge VORTAC 239° radial to the 235° radial. Revision of the Walnut Ridge transition area is required to afford adequate controlled airspace for aircraft flying this instrument approach procedure.

Since this revision is minor and will not adversely affect airspace utilization, public notice and public procedures are not considered necessary.

In consideration of the foregoing, Part 71 of the Federal Aviation Regulations is amended, effective 0901 GMT, November 4, 1976, as hereinafter set forth.

In § 71.181 (41 F.R. 440), the Walnut Ridge, Ark., transition area is amended to read:

WALNUT RIDGE, ARK.

That airspace extending upward from 700 feet above the surface within a 6.5-mile radius of the Walnut Ridge Regional Airport (latitude 36°07'30" N., longitude 90°55'25" W.); within three miles each side of the Walnut Ridge VORTAC 240° radial, extending from the 6.5-mile-radius area to 8.5 miles southwest of the VORTAC; within 3.5 miles each side of the 005° bearing from the proposed RBN (latitude 36°07'36" N., longitude 90°55'36" W.), extending from the 6.5-mile-radius area to 12 miles north of the RBN; and within a 5-mile radius of the Pocahontas Municipal Airport (latitude 36°14'40" N., longitude 90°56'45" W.).

V 41 154 AUG 9 76 UMI

(Sec. 307(a), Federal Aviation Act of 1958 (49 U.S.C. 1348); Sec. 6(c), Department of Transportation Act (49 U.S.C. 1655(c)).)

Issued in Fort Worth, Tex., on July 29, 1976.

ALBERT H. THURBURN,
Acting Director, Southwest Region.

Title 19—Customs Duties

CHAPTER I—UNITED STATES CUSTOMS SERVICE

[T.D. 76-220]

PART 142—SPECIAL PERMITS FOR IMMEDIATE DELIVERY PRIOR TO ENTRY

PART 158—RELIEF FROM DUTIES ON MERCHANDISE LOST, DAMAGED, ABANDONED, OR EXPORTED

Special Permits for Immediate Delivery Prior to Entry—Customs Regulations amended. Sections 142.2 and 158.11 of the Customs Regulations relating to special permits for immediate delivery, and allowance in duties for perishable merchandise, amended.

On December 15, 1975, a notice of proposed rulemaking was published in the FEDERAL REGISTER (40 FR 58150), which proposed to amend sections 142.2 and 158.11 of the Customs Regulations (19 CFR 142.2, 158.11). The proposed amendments would allow the issuance of special permits for immediate delivery for fresh fruits and vegetables arriving from a contiguous foreign country even though some of the imported produce might subsequently be entered for immediate transportation without appraisement to another port of entry, or for transportation and exportation to a foreign country.

The present provisions of Part 142 of the Customs Regulations (19 CFR Part 142), relating to special permits for immediate delivery prior to entry, have been interpreted to require that merchandise released under a special permit for immediate delivery must subsequently be entered either for consumption, warehouse, or appraisement.

The amendment to section 142.2(b) of the Customs Regulations (19 CFR 142.2 (b)), as set forth below, would permit fresh fruits and vegetables arriving from a contiguous foreign country (1) to be released under a special permit for immediate delivery for examination at the importer's premises, (2) to be examined and sorted at those premises, with the portion without commercial value being segregated in accordance with the provisions of section 158.11(b) of the Customs Regulations (19 CFR 158.11(b)), and (3) to be thereafter entered either for consumption, for immediate transportation without appraisement to another port of entry, or for transportation and exportation to a foreign country.

Interested persons were given until January 14, 1976, to submit written comments, suggestions, or objections. The comments received in opposition to the proposal primarily expressed a concern that the proposed amendments might increase the risk of pest infestation. The proposed amendments are not intended to change the present agricultural inspection procedures in any way, nor are they intended to allow imported produce to be commingled with other produce or to extend the limits of any port.

Concern also was expressed that the proposed amendment to § 142.2(b) of the Customs Regulations (19 CFR 142.2(b)) does not set a time limit for filing the entries for consumption, immediate transportation, or transportation and exportation, or provide for explicit Customs supervision. Section 142.11 of the Customs Regulations (19 CFR 142.11) presently sets time limits which are considered adequate. Section 142.2 (b) provides that merchandise for which a special permit has been issued shall be considered to remain in Customs custody. As such it will be subject to supervision by Customs officers.

Another issue raised by the comments concerned the nature of the bond stipulation. The proposal requires an appropriate stipulation to be added to the bond which is provided for in § 142.4 of the Customs Regulations (19 CFR 142.4). The proposed amendment does not define the terms of the stipulation because such terms are dependent on the situation at the time of release. A suggestion to delete any reference to stipulations was not adopted because not all releases will be under term bonds.

Other comments received in response to the proposed amendments were also considered. However, it has been determined to adopt the proposed amendments without change.

Accordingly, §§ 142.2(b) and 158.11(b)(1) of the Customs Regulations (19 CFR 142.2(b), 158.11(b)(1)) are amended to read as set forth below.

Effective date: These amendments shall become effective September 8, 1976.

VERNON D. ACREE,
Commissioner of Customs.

Approved: August 3, 1976.

DAVID R. MACDONALD,
Assistant Secretary of the Treasury.

1. Section 142.2(b) is amended to read as follows:

§ 142.2 Application for special permit for immediate delivery.

* * * * *

(b) *Merchandise from Canada or Mexico.* (1) *When the customhouse is closed.* In the case of merchandise arriving from Canada or Mexico when the customhouse is closed and destined to places other than the port of arrival, the application and the evidence of the right to make a entry may be submitted to the chief Customs officer on duty and a special permit may be issued for immediate release, provided the applicant has on file in the customhouse a term bond in accordance with § 142.4(b) or (c).

(2) *Fresh fruits and vegetables.* Applications for special permits for immediate delivery may be made for the transportation of fresh fruits and vegetables for human consumption arriving from Canada or Mexico to the importer's premises within the port of importation, but removed from the area immediately contiguous to the border, under an appropriate stipulation to the bond provided for in § 142.4. The fresh fruits and vegetables shall be transported in the vehicles in which the merchandise crossed the border, or, if transshipment is necessary, in vehicles provided by the importer, to the importer's premises. The produce may be examined at the importer's premises, those portions without commercial value segregated in accordance with the provisions of § 158.11(b) of this chapter, and the balance entered for consumption or transported in bond under an entry for immediate transportation without appraisement or an entry for transportation and exportation. Merchandise for which a special permit has been issued under the provisions of this paragraph shall be considered to remain in Customs custody.

(R.S. 251, as amended, secs. 448, 484, 552, 553, 623, and 624, 46 Stat. 714, as amended, 722, as amended, 742, as amended, 759 as amended (19 U.S.C. 66, 1448, 1484, 1552, 1553, 1623, 1624).)

2. Section 158.11(b)(1) is amended to read as follows:

§ 158.11 Merchandise completely worthless at time of importation.

* * * * *

(b) * * *

(1) An application for such allowance shall be filed with the district director on Customs Form 4315 in duplicate, within 96 hours after the unlading of the merchandise and before any of the shipment involved has been removed from the pier (or other area permitted under § 142.2(b)(2) of this chapter) pursuant to the entry permit.

* * * * *

(R.S. 251, as amended, secs. 506, 624, 46 Stat. 732, as amended, 759 (19 U.S.C. 66, 1506, 1624).)

[FR Doc.76-23208 Filed 8-6-76;8:45 am]

Title 21—Food and Drugs

CHAPTER I—FOOD AND DRUG ADMINISTRATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

SUBCHAPTER A—GENERAL

[Docket No. 76N-0252]

PART 5—DELEGATIONS OF AUTHORITY AND ORGANIZATION

Subpart B—Redelegations of Authority From the Commissioner of Food and Drugs

NEW ANIMAL DRUG APPLICATIONS

The Food and Drug Administration (FDA) is amending the regulation setting forth its delegation of authority relating to the approval of new animal drug applications; effective August 9, 1976.

The reorganization of the Bureau of Veterinary Medicine of FDA, which was effective May 26, 1976 and notice of which was published in the FEDERAL REGISTER of that date (41 FR 21507), reassigned the functions relating to medicated feeds to a new Division of Animal Feeds. The revised delegation makes it necessary to revise § 5.28 (21 CFR 5.28), which relates to the approval of applications for animal feeds containing new animal drugs.

Further redelegation of the authority delegated by this amendment is not authorized. Authority redelegated by this amendment to a position by title may be exercised by a person officially designated to serve in such position in an acting capacity or on a temporary basis, unless prohibited by a restriction written into the document designating him as "acting," or unless it is not legally permissible.

Therefore, under the Federal Food, Drug, and Cosmetic Act (sec. 701(a), 52 Stat. 1055 (21 U.S.C. 371(a))) and under authority delegated to the Commissioner of Food and Drugs (21 CFR 5.1) (recodification published in the FEDERAL REGISTER of June 15, 1976 (41 FR 24262)), Part 5 is amended by revising § 5.28 to read as follows:

§ 5.28 Delegations regarding approval of new animal drug applications and supplements thereto for drugs for animal use.

The Director of the Bureau of Veterinary Medicine is authorized to perform all the functions of the Commissioner of Food and Drugs with regard to the approval of new animal drug applications, and supplements thereto, for new animal drugs submitted pursuant to section 512 of the Federal Food, Drug, and Cosmetic Act. The Director of the Division of Animal Feeds of the Bureau of Veterinary Medicine is authorized to perform the functions of the Commissioner with regard to the approval of applications for animal feeds containing new animal drugs.

Effective date: This amendment shall be effective August 9, 1976.

(Sec. 701(a), 52 Stat. 1055 (21 U.S.C. 371(a)).)

Dated: August 3, 1976.

JOSEPH P. HILE,
Acting Commissioner of Food and Drugs.

[FR Doc.76-23008 Filed 8-6-76;8:45 am]

SUBCHAPTER B—FOOD AND FOOD PRODUCTS

[Docket No. 76N-0217]

PART 11—STANDARDS OF QUALITY FOR FOODS FOR WHICH THERE ARE NO STANDARDS OF IDENTITY

Subpart A—General

AMENDMENT AND CONFIRMATION OF EFFECTIVE DATE

The Food and Drug Administration (FDA) is confirming the adoption of regulations that set forth general principles governing establishment of microbiological quality standards for foods for which there are no standards of identity. Because of questions about the legal status of these regulations, additional opportunity for comment is being provided. Interested persons have until October 8, 1976 to submit comments on points not previously addressed or discussed by the agency in this document.

Part 11 (21 CFR Part 11) was proposed in the FEDERAL REGISTER of September 23, 1972 (37 FR 20038); it set forth general principles under § 11.1 (21 CFR 11.1) and definitions under § 11.2 (21 CFR 11.2). The two sections comprised Subpart A of Part 11 and hereafter will be referred to as Subpart A. The proposal also included microbiological quality standards for frozen ready-to-eat banana, coconut, chocolate, or lemon cream-type pies under § 11.5 (21 CFR 11.5) and for food-grade gelatin under § 11.6 (21 CFR 11.6). Sections 11.5 and 11.6 comprised Subpart B of Part 11 and hereafter will be referred to as Subpart B. A final order adopting the proposal, with modifications based on comments received, was published in the FEDERAL REGISTER of August 2, 1973 (38 FR 20726), to become effective on February 4, 1974.

Subpart A specifies general criteria for the issuance of microbiological quality standards. Subpart A was issued pursuant to the authority of section 701(a) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 371(a)). Subpart A explains the bases on which the Commissioner of Food and Drugs establishes quality standards for individual foods pursuant to section 401 of the act (21 U.S.C. 341), and in compliance with the procedures prescribed by section 701(e) of the act (21 U.S.C. 371(e)). Accordingly, although Subpart A is subject to comment in accordance with the Administrative Procedure Act (5 U.S.C. 553)—and indeed comments have been invited on three separate occasions—Subpart A did not require a public hearing for its adoption.

Section 701(a) of the act authorizes the adoption of regulations "for the efficient enforcement of this Act". Although individual quality standards issued pursuant to section 401 of the act must be adopted through the procedures prescribed by section 701(e) of the act, it is entirely appropriate for the agency to explain in regulations adopted under the act's general rule making authority (section 701(a) of the act) how it will formulate quality standards. Specifically, Subpart A was issued pursuant to section 701(a) of the act; Subpart B was issued pursuant to section 701(e) of the act.

The Commissioner acknowledges, however, that certain previous FEDERAL REGISTER publications relating to microbiological quality standards may not have made it explicit that the agency was relying on section 701(a) of the act to promulgate Subpart A.

It is conceivable that some persons did not submit detailed comments on Subpart A because of the mistaken belief that a public hearing on the individual quality standards proposed for ready-to-east banana, coconut, chocolate, or lemon cream-type pies and for food-grade gelatin would afford an opportunity for presenting their views on Subpart A. Therefore, the Commissioner has determined to permit further comments on Subpart A. This opportunity, however, is intended for the submission of comments previously withheld, not for the repetition of views already expressed. The Commissioner will disregard or discount comments that simply repeat points already made and responded to in this preamble or in previous FEDERAL REGISTER documents.

Written objections in response to the regulation published August 2, 1973 were received from five food industry associations and one food manufacturer. Some of the objections addressed the standards for cream pies and gelatin (Subpart B), which were promulgated pursuant to section 701(e) of the act. Several of these objections requested a hearing. These two standards were stayed pending further consideration by the Commissioner.

The Commissioner plans to withdraw the microbiological quality standards for frozen ready-to-eat banana, coconut, chocolate, or lemon cream-type pies (§ 11.5) and food-grade gelatin (§ 11.6) in a future FEDERAL REGISTER publication. The Commissioner will propose adoption of microbiological quality standards for other foods in separate documents to be published in the near future. The proposed standards will conform with Subpart A of Part 11, and the procedures for adoption will be those prescribed by section 701(e) of the act.

Several other objections to the August 2, 1973 regulation pertained to Subpart A. Although the general criteria in Subpart A became effective on February 4, 1974, the Commissioner has reviewed the objections as though they were comments, and his conclusions are set forth as follows:

1. Objections were received regarding the conclusion that microbial levels are indicative of food quality. These objections stated that no data or facts were furnished to support this contention, that it is erroneous, and therefore the final regulation is unreasonable and will not promote honesty and fair dealing in the interest of consumers. These objections also contended that Subpart A is not authorized by section 401 of the act. Other related objections asserted that only perceptible quality factors are authorized by section 401 and that a microbial level is not a perceptible quality factor.

The Commissioner remains convinced that, as stated in paragraph 2 of the preamble to the August 2 regulation, microbial levels are indicative of quality in various foods. As set forth in § 11.1(a), the quality of a food depends on numerous characteristics, including, but of course not limited to, the level of microorganisms. This conclusion warrants further discussion, however, since the basic disagreement is over the issue of whether or not microbial levels of foods are a factor of the quality of food.

Section 401 of the act does not list the factor(s) on which a standard of quality must or may be based. Rather, it permits a reasonable standard to be established when, in the judgment of the Secretary of the Department of Health, Education, and Welfare, such standard will promote honesty and fair dealing in the interest of consumers. The Commissioner

V 41 154 AUG 9 76 UMI

is of the opinion that the establishment of microbiological quality standards on this basis will promote honesty and fair dealing in the interest of consumers. Individual standards will require specific foods to be clearly declared as substandard in quality when they fail to meet minimum prescribe standards of microbiological quality. Each microbiological standard of quality will provide consumers with information on the microbial level of a specific food. The consumer will be informed whether a food exceeds the microbial limits of the standard and will thereby be given the choice of buying a food that either meets or does not meet the standard for such foods. Providing such information to aid consumer choices in the purchase of a food is considered by the Commissioner to be in the interest of the consumer.

The Commissioner advises that although previous standards of quality have been based on perceptible factors such as color, size, peel, and blemishes, this does not in any way limit the authority to establish quality standards to those based upon perceptible factors alone. The Commissioner notes that many food standards of identity embody criteria that reflect differences that may or may not be perceptible to consumers. For example, the standards of identity for orange juice products in 21 CFR Part 27 recognize differences in soluble solids content, although such differences are imperceptible to consumers and have no health significance. Since the same section of the act authorizes the adoption of both standards of identity and standards of quality, based on the same criteria, there is no basis for insisting that imperceptible criteria can be embodied in one type of standard (identity), but not in the other (quality).

Quality standards are being developed for foods in which the microbial level may be one of the factors to be considered in assessing the adequacy of the manufacturing, distributing, and storage conditions to which the food is subjected. The significance of microbial levels established by such standards will vary with the particular food product involved. Subpart A establishes the general principle that microbiological levels may be a quality factor within the meaning of section 401 of the act. Individual standards of quality implementing these general principles will be adopted for specific foods whose microbial content the Commissioner concludes is an important index of quality.

2. Several objections contended that the microbial content of foods is an element of sanitation rather than quality and that consequently microbial levels should be established as advisory guidelines under the current good manufacturing practice regulations. It was stated that although producers have developed and manufactured food products with microbiological specifications, microbial levels in foods have been, and should be, considered only as a facet of good manufacturing practice. Objections were made to the statement in the regulation that the microbial level of a food is indicative of the quality of the raw material used. Examples given as exceptions to this statement included ripe fruit that is of higher quality and usually has a higher microbial level than green fruit, and cheeses whose high microbial level is not indicative of low quality. One objection argued that gelatin made with low quality raw materials can be produced with a low microbial level by virtue of the manufacturing procedures used. It was questioned how the low microbial level of gelatin can be considered indicative of quality when foods like buttermilk have high microbial levels.

The Commissioner's response to these objections was stated in paragraph 4 of the preamble to the August 2 regulation. Microbiological quality standards should be promulgated separately from the good manufacturing practice regulations for several reasons. The good manufacturing practice regulations are promulgated for the efficient enforcement of the adulteration provisions of the act, while the microbiological quality standards are not based on consideration of adulteration. The good manufacturing practice regulations are generally limited to manufacturing procedures and usually do not extend to distribution and retail sale, while the consumer is entitled to be informed of excessive levels of microbial organisms regardless whether they result from manufacturing, distribution, or retailing practices.

The Commissioner also recognizes that, in certain foods, microorganisms are deliberate, desirable ingredients. This position is clearly explained in paragraph 7 of the preamble to the August 2 regulation, which recognizes that certain microorganisms are deliberate, desirable ingredients in some foods and in such instances cannot be considered as inverse factors of quality. The controlled use of microorganisms is useful and desirable to impart a particular flavor, or other desirable characteristic to food such as cheese and other dairy products. Subpart A is not intended to effect any change in current good manufacturing practice in such controlled use of microorganisms, and microbiological quality standards will not be established that would prohibit the use of such desirable microorganisms.

Section 11.1(a) states the general principle that characteristics that affect the quality of a food will vary according to numerous factors, and therefore it will be necessary to establish individual standards of quality for different foods. Thus, a microbial level that may be common or even desired in one type of food may be unusual and an index of low quality in a different type of food. A comparison of the microbial levels in two completely different types of food such as gelatin and buttermilk is therefore meaningless.

The Commissioner recognizes that it is not unusual for the manufacturing process to reduce the level of microorganisms present in the finished food compared to the microbial level present in its raw materials. However, this does not conflict with the statement in § 11.1(a) that microbial levels

> • • • are indicative of the quality of the raw materials and ingredients, the degree of quality control used in manufacture, processing, and packing, and the conditions of distribution and storage.

This statement does not imply that the microbial level is indicative of any one factor independent of the other factors contained in the statement. The microbial level, that is, the microbiological quality, of a food is indicative of the total interrelated effect of the factors listed in § 11.1(a). Individual microbiological standards of quality will apply these general principles to specific foods or classes of food. The Commissioner therefore concludes that objections described, as they relate to Subpart A, are without merit.

3. One objection asserted that the microbial level of a food relates to its "condition" and not to its quality. The support offered for this objection included the regulations for food grades promulgated by the U.S. Department of Agriculture (USDA) and the McNarry-Mapes amendment to the Food and Drugs Act of 1906.

The Commissioner concludes that this objection is without merit. The concept of quality embraced in FDA standards of quality does include some elements of the term "condition" as defined by USDA regulations. However, the Agricultural Marketing Act authorizes the development of standards of quality, condition, quantity, grade, and packaging; the Federal Food, Drug, and Cosmetic Act authorizes only standards of identity, quality, and fill of container. The standards promulgated under the Federal Food, Drug, and Cosmetic Act embrace a broader range of factors than those established by USDA. Section 401 of the Federal Food, Drug, and Cosmetic Act does not define the word "quality" and does not contain the word "condition." The original Food and Drugs Act of June 30, 1906 is not pertinent here since it has been superseded by the present Federal Food, Drug, and Cosmetic Act of 1938.

Essentially the same objection was made to the proposed regulation, and the Commissioner's response was fully set forth in paragraph 8 of the preamble to the August 2 regulation. "The terms 'quality' and 'condition' as used by USDA usually pertain to factors that are noticeable to the consumer. New Part 11 concerns factors of quality which will usually be imperceptible to the consumer. Therefore, the Commissioner concludes that there is no conflict between the proposal and USDA regulations concerning food grades." Consequently, this reiterated objection does not warrant modification of Subpart A.

4. Objections were made to the label statement of substandard quality contained in § 11.1(b)(1)(i): "Contains Excessive Bacteria." The objections asserted that the effect of this statement would be to prohibit the sale of safe, healthful, and high quality foods when such foods exceed the established microbial limits since manufacturers would destroy substandard quality food rather than use the label statement of substandard quality.

Objections were also made that the label statement would mislead consumers to believe a product dangerous when it is not. A further objection stated that the regulation would cause consumers to believe that because a food is in compliance with the regulation it is safe, when actually the regulation does not provide protection against unsafe foods. An additional objection was made to the statements in paragraph 6 of the preamble to the August 2 regulation that "The marketing of food substandard in microbiological quality would be likely to follow the marketing patterns that already exist for substandard quality food," and that "• • • it is not possible to state that excess bacteria cannot create a health hazard."

The Commissioner concludes, as previously stated in paragraph 6 of the preamble to the August 2 regulation, that these objections are without merit. Specific authority to prescribe statements of substandard quality is provided by section 403(h)(1) of the act (21 U.S.C. 343(h)(1)), which states that a food shall be deemed to be misbranded

> If it purports to be or is represented as (1) a food for which a standard of quality has been prescribed by regulations as provided by section 401, and its quality falls below such standard, unless its label bears, in such manner and form as such regulations specify, a statement that it falls below such standard; or.

The objections to the statements contained in paragraph 6 of the preamble to the August 2 regulation that "• • • it is not possible to state that excess bacteria cannot create a health hazard" and that substandard but safe food could be marketed according to "• • • patterns that already exist for substandard quality food" offered no reasons for any change in either statement. The Commissioner reiterates that Subpart A sets forth general criteria, and he points out that Subpart A does not state that foods meeting established microbiological quality standards are necessarily safe for all purposes, nor does the regulation authorize a representation of safety on the label. Consequently, the suggestion that the consumer will be misled about safety is without merit.

The Commissioner recognizes that any information or specific declaration of substandard quality will carry a negative connotation. However, a manufacturer has the choice of either using the prescribed label statement of substandard quality, or not placing the substandard lot on the market. Of greater importance, the prescribed label statement will afford the consumer the choice of purchasing either a product that meets the standard of quality or a product that is clearly identified as being substandard. Any resulting marketing disadvantage is not unreasonable and has been imposed for years on foods falling below prescribed standards of quality. Processed fruits and vegetables are good examples.

However, the Commissioner has again reviewed the comments concerning the need for and composition of required label statements and concludes that the regulation should permit use of the general statement of substandard quality specified in § 10.7(a) (21 CFR 10.7(a)) as an alternative. Accordingly, § 11.1(b) is being amended to permit use of the general statement of substandard quality specified in § 10.7(a) as an alternative graphs (b)(1) and (2) are being revised crobiological quality. Specifically, paragraphs (b)(1) and (2) are being revised and paragraph (b)(3) is being deleted. Because this change merely modifies an existing regulation by providing an alternative, notice and public procedure and delayed effective date are not required for its promulgation.

5. One objection to the label statement of substandard quality stated that it is impractical to interrupt the manufacturing, packaging, or labeling process until microbiological test results are obtained, or when once obtained to open each carton or case in a lot and relabel each package. Objections stated that it is impractical and unreasonable to affix the label statement of substandard quality to foods that are in the distribution chain or in retail stores in accordance with § 11.1(b)(2), which requires that the statement

> • • • shall appear on the principal display panel or panels and shall immediately and conspicuously precede or follow, without intervening written, printed or graphic matter, the name of the food.

The Commissioner's response to the objection was adequately discussed in paragraph 12 of the preamble to the August 2 regulation, which stated that

> Microbiological quality control testing of foods is not new or unique and the Commissioner concludes that such testing by food manufacturers is practicable. Adequate processing controls should make it unnecessary to delay production of a lot pending test results since the use of adequate quality controls would make the production of a substandard quality lot an infrequent occurrence.

The latest objection contained no new information or data not previously considered by the Commissioner. It is recognized that in some instances technical difficulties will arise in complying with § 11.1(b)(2) when the substandard label statement is applied to a product in distribution or retail channels. In some instances compliance may require the complete relabeling and/or repackaging of the product. However, the Commissioner advises that such difficulties are not a sufficient basis for nullifying the consumer's right to have substandard quality food labeled as such when individual quality standards so require, regardless of what point in the manufacturing, distributing, or retailing sequence the food falls below standard in quality. Where relabeling is required under the provisions of Subpart A and when the relabeling is undertaken by a person other than the one whose name appears on the label as the manufacturer, packer, or distributor, it shall be the policy of FDA to permit modifications of the original label only when the original manufacturer, packer, or distributor agrees to such manner of relabeling. Otherwise, completely new labels will be required. The Commissioner therefore concludes that objections based on the application of the regulation to the point of retail sale have not raised sufficient grounds to warrant modification of the regulation.

6. Objections stated that microbial limits should not be applicable to a food after it leaves the direct control of the manufacturer. It was stated that a food in compliance with the appropriate quality standard when it leaves the manufacturer's control may subsequently have an increase in microbial levels beyond that permitted by the standard. It was also stated that criminal liability may be imposed under the Federal Food, Drug, and Cosmetic Act without regard to the fault of the defendant, and that a manufacturer could theoretically be charged with a criminal violation for marketing a product that was in compliance with the regulation when initially distributed, but became contaminated after having left his control. Objections were also submitted suggesting that any person in the chain of distribution who causes the product to develop a microbial level in excess of the limits prescribed by the standard could be criminally prosecuted for misbranding the product. Further objections were made that the regulation would place an unreasonable burden on distributors and retailers to determine whether the microbial level of a food was in excess of prescribed limits, and if so, whether it had been caused by a person previously handling the food. The objections argued that it is not practicable for each lot of food to be sampled by wholesalers, warehousemen, and retailers to determine if it meets the microbial limits. It was argued that the guarantees authorized by section 303(c) of the act (21 U.S.C. 333(c)) as protection against innocent violations cannot apply to the regulation.

The Commissioner concludes that the objections are without merit. His position on the applicability of the standards to the point of retail sale are discussed in paragraph 5 of the preamble to August 2 regulation.

> • • • restricting application of the standards to the limited time the product is under the manufacturer's control would not assure that the product would be in compliance with the standards when it reached the consumer, and therefore, would not be in the interest of the consumer. The consumer rightly expects the quality of food to be adequately and continuously protected through the point of retail sale. Regulatory action can and will be taken against a product that is substandard in quality and which fails to bear the label statement of substandard quality, regardless whether the product deterioration occurred during manufacture or subsequently during distribution or retailing.

The Food and Drug Administration has always had authority to take legal action against a product found to be adulterated or misbranded even when responsibility for the illegal condition of the food cannot be specifically determined. For example, a wholesale warehouse may suffer the loss by seizure of a lot of rodent-contaminated flour in its

V 41 154 AUG 9 76 UMI

possession, though the lot may have been contaminated when received. That FDA may not know who is responsible for a violation does not alter the agency's obligation to take action to prevent marketing of an illegal food.

The possibility of such loss does not cause each lot of food to be analyzed at each step in the distribution chain, and there is no reason to believe that foods for which a microbiological standard has been promulgated would require extensive analysis during distribution.

The objections also fail to establish that Subpart A would somehow preclude the applicability of section 303(c) of the act. The section would still apply to contemplated criminal prosecutions, i.e., FDA could not sustain a criminal prosecution against a firm or individual(s) who received a guarantee unless there was independent evidence supporting the firm or individual's responsibility for violations of the Federal Food, Drug, and Cosmetic Act.

7. Objections were submitted regarding § 11.1(a), which asserts that turbidity, color, flavor, and odor are indicative of the quality of a food. One objection stated that this is not true for all foods.

The Commissioner points out that turbidity, color, flavor, and odor were added as factors in § 11.1(a) as a result of his decision to expand Part 11 to include standards of quality for foods for which there are no standards of identity, regardless of whether the quality factors involve microbiological or other characteristics. This conclusion is expressed in paragraph 20 of the preamble to the August 2 regulation. The list of quality factors in § 11.1(a) is not exhaustive and all quality factors so listed do not necessarily apply to all foods for which standards will be established. Depending on the type of food, such characteristics may be indicative of the quality of raw materials and ingredients; the degree of quality control used in manufacturing, processing, and packing; and the conditions of distribution and storage. The Commissioner emphasizes that Subpart A sets forth general principles. Whether the factors listed in § 11.1(a) are indicative of quality will depend on the particular food involved.

8. One objection to the regulation contended that it did not contain adequate sampling and analytical procedures to avoid variations in determining compliance with the standards. It was stated that the regulation should specify the sampling points in the manufacturing and distributing system, statistical sample collection procedures, methods of sample collection, handling and storage, and adequate analytical procedures.

Sampling during the manufacturing process is exclusively the responsibility of the manufacturer because the final standard will apply only to the finished food. Sampling during processing is an integral part of the manufacturer's quality control system, and it is the responsibility of the manufacturer to design such a system. Products produced under adequate quality control procedures will become substandard only when abused during storage and distribution.

Subpart A does not impose any sampling or testing requirements. However, everyone handling the food before retail sale is responsible for ensuring that the food is handled and held in such a manner that it will stay in compliance while in his possession. Microbiological standards promulgated in the future will set forth in greater detail specific compliance requirements for individual products.

The Commissioner concludes that since a microbiological quality standard will be continuously applicable to the finished food up to the point of retail sale, the designation of specific sampling points in the distribution system ordinarily will be unnecessary.

No information or data were submitted to support the objections to the statistical basis of the sampling and testing procedures in the regulation. However, to clarify the statistical basis, the Commissioner has filed with the office of the Hearing Clerk, Food and Drug Administration, the statistical information and data used in promulgating the regulation. The Commissioner concludes that the sampling and testing procedures contained in the regulation have been evaluated statistically and judged to be satisfactory. Should additional information become available that justifies any change in the sampling or testing procedures, Subpart A will be amended or modifications will be incorporated in individual standards.

9. One objection contended that a higher level of microorganisms, within limits, may prevent a health hazard. The objection cited the following reference as support: Thatcher and Clark, "Microorganisms in Foods," p. 25 (1968).

The Commissioner concludes that this contention is without merit. The Thatcher and Clark study refers to heat-processed food and discusses the usefulness of a microscopic count to detect gross contamination before heat processing. The passage referenced is parenthetical, and reads:

> When pathogens are present, the absence of a normal spoilage flora may sometimes create a hazard. It has been shown that pathogens can often proliferate more easily when few spoilage organisms are present.

The Commissioner advises that the recommendation for large numbers of spoilage organisms to compete with and thereby slow the multiplication of pathogens is not consistent with current good manufacturing practices, basic and generally accepted principles of sanitation, or the desires of consumers. The Commissioner concludes that this objection is not adequate to justify amending Subpart A.

On his own initiative, the Commissioner is making one minor change in the definition of "sample" in § 11.2(b). The change is the substitution of the word "consists" for the phrase "is a composite." Because this change merely clarifies an existing regulation, notice and public procedure and delayed effective date are not required for its promulgation.

The Commissioner advises that he has filed with the office of the Hearing Clerk, Food and Drug Administration (address below), texts, data, and other information upon which the general principles established in Subpart A are based.

Accordingly, Subpart A of Part 11, consisting at this time of §§ 11.1 and 11.2 published in the FEDERAL REGISTER of August 2, 1973 (38 FR 20726) is confirmed as effective on February 4, 1974. Persons who wish to file comments not previously submitted or discussed in the preamble to this regulation may do so; such comments (preferably four copies) shall be submitted by October 8, 1976, to the office of the Hearing Clerk, Food and Drug Administration, Rm. 4–65, 5600 Fishers Lane, Rockville, MD 20852. Comments received will be available for public inspection at the above office during working hours, Monday through Friday. Any changes in this order justified by such comments will be the subject of a further order amending the specific provisions involved.

Therefore, under the Federal Food, Drug, and Cosmetic Act (secs. 401, 403, 701(a), 52 Stat. 1046–1048 as amended, 1055 (21 U.S.C. 341, 343, 371(a))) and under authority delegated to the Commissioner (21 CFR 5.1) (recodification published in the FEDERAL REGISTER of June 15, 1976 (41 FR 24262)): *It is ordered*, That Subpart A of Part 11 be amended as follows:

1. In § 11.1 by revising paragraph (b) to read as follows:

§ 11.1 General principles.

* * * * *

(b) (1) The label of a food that fails to meet the requirements of an applicable standard of quality promulgated pursuant to this Part shall bear the general statement of substandard quality specified in § 10.7(a) of this chapter in the manner and form therein specified; but in lieu of such general statement of substandard quality, the label may bear the alternative statement, "Below Standard in Quality——————", the blank to be filled in with whichever of the following are applicable:

(i) "Contains Excessive Bacteria".
(ii) "Excessively Turbid".
(iii) "Abnormal Color".
(iv) The phrase specified in the applicable standard of quality to describe any other quality deviation.

(2) The statement of substandard quality shall appear on the principal display panel or panels and shall immediately and conspicuously precede or follow, without intervening written, printed or graphic matter, the name of the food.

* * * * *

2. In § 11.2 by revising paragraph (b) to read as follows:

§ 11.2 Definitions.

* * * * *

(b) A "sample" consists of 10 subsamples (consumer units), taken one from each of 10 different randomly chosen shipping cases to be representative of a given lot, unless otherwise specified in a specific quality standard in this part.

* * * * *

(Secs. 401, 403, 701(a), 52 Stat. 1046–1048 as amended; 1055 (21 U.S.C. 341, 343, 371(a)).)

Dated: July 30, 1976.

SHERWIN GARDNER,
Acting Commissioner of Food and Drugs.

Title 23—Highways

CHAPTER I—FEDERAL HIGHWAY ADMINISTRATION, DEPARTMENT OF TRANSPORTATION

PART 630—PRECONSTRUCTION PROCEDURES

Project Agreement; Amendment

• *Purpose.* The purpose of this document is to amend the rules respecting Federal-aid project agreements. •

The Federal Highway Administration is amending Part 630, Subpart C of Title 23, Code of Federal Regulations in order to terminate the power heretofore reserved by the Washington Headquarters Office to execute project agreements for National Cooperative Highway Research Projects (NCHRP) and to delegate the power to the Division Administrator in each State.

The matters affected relate to benefits or contracts within the purview of 5 U.S.C. 553(a)(2), thus general notice of proposed rulemaking is not required.

Effective date: August 10, 1976.

Issued on August 2, 1976.

J. R. COUPAL, Jr.,
Deputy Administrator.

Part 630, Subpart C of Chapter I of Title 23 of the Code of Federal Regulations is amended as follows:

Section 630.304(b) is changed to read as follows:

§ 630.304 Preparation of agreement.

* * * * *

(b) The Division Administrator pursuant to his delegated authority shall on behalf of FHWA execute the project agreement or modification or amendment thereof when he is satisfied that the agreement, or modification or amendment thereof, is properly prepared and not at variance with any statutory or regulatory requirement pursuant to Federal laws.

* * * * *

Title 24—Housing and Urban Development

CHAPTER X—FEDERAL INSURANCE ADMINISTRATION, DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

SUBCHAPTER B—NATIONAL FLOOD INSURANCE PROGRAM

[Docket No. FI-830]

PART 1916—CONSULTATION WITH LOCAL OFFICIALS

Final Flood Elevation Determinations for the City of Key Colony Beach, Florida

On January 7, 1976, at 41 FR 1277, the Federal Insurance Administrator published a notification of modification of the base (100-year) flood elevations in Key Colony Beach, Florida. Since that date, ninety days have elapsed; and the Federal Insurance Administrator has evaluated requests for changes in the base flood elevations, and after consultation with the Chief Executive Officer of the community, has determined no changes are necessary. Therefore, the modified flood elevations are effective as of January 5, 1976 and amend the Flood Insurance Rate Map which was in effect prior to that date.

The modifications are pursuant to section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234) and are in accordance with the National Flood Insurance Act of 1968, as amended, (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448) 42 U.S.C. 4001–4128, and 24 CFR Part 1916.

For rating purposes, the new community number is 125121D and must be used for all new policies and renewals.

Under the above-mentioned Acts of 1968 and 1973, the Administrator must develop criteria for flood plain management. In order for the community to continue participation in the National Flood Insurance Program, the community must use the final flood elevations to carry out the flood plain management measures of the Program. These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The numerous changes made in the base flood elevations on the Key Colony Beach Flood Insurance Rate Map make it administratively infeasible to publish in this notice all of the base flood elevation changes contained on the Key Colony Beach map.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: June 14, 1976.

R. W. KRIMM,
Acting Federal Insurance Administrator.

[Docket No. FI-928]

PART 1916—CONSULTATION WITH LOCAL OFFICIALS

Final Flood Elevation Determinations Manatee County, Florida

On March 26, 1976, at 41 FR 12683, the Federal Insurance Administrator published a notification of modification of the base (100-year) flood elevations in Manatee County, Florida. Since that date, ninety days have elapsed; and the Federal Insurance Administrator has evaluated requests for changes in the base flood elevations, and after consultation with the Chief Executive Officer of the community, has determined no changes are necessary. Therefore, the modified flood elevations are effective as of February 20, 1976 and amend the Flood Insurance Rate Map which was in effect prior to that date.

The modifications are pursuant to section 206 of the Flood Disaster Protection Act of 1973 (Pub. L. 93–234) and are in accordance with the National Flood Insurance Act of 1968, as amended, (Title XIII of the Housing and Urban Development Act of 1968 Pub. L. 90–448) 42 U.S.C. 4001–4128, and 24 CFR Part 1916.

For rating purposes, the new community number is 120153A and must be used for all new policies and renewals.

Under the above-mentioned Acts of 1968 and 1973, the Administrator must develop criteria for flood plain management. In order for the community to continue participation in the National Flood Insurance Program, the community must use the final flood elevations to carry out the flood plain management measures of the Program. These modified elevations will also be used to calculate the appropriate flood insurance premium rates for new buildings and their contents and for the second layer of insurance on existing buildings and contents.

The numerous changes made in the base flood elevations on the Manatee County Flood Insurance Rate Map make it administratively infeasible to publish in this notice all of the base flood elevation changes contained on the Manatee County, Florida map.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: July 13, 1976.

J. ROBERT HUNTER,
Acting Federal Insurance Administrator.

under § 1917.9 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the City must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the communiyt for a period of ninety (90) days has been provided. Pursuant to § 1917.9(a), the Administrator has resolved the appeals presented by the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the Library, Chesapeake, Virginia.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

V 41 154 AUG 9 76 UMI

(Authority: National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: July 29, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI-898]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the City of Newport News, Independent City, Va.

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (Section 1917.10)), hereby gives notice of his final determinations of flood elevations for the City of Newport News, Independent City, Virginia under Section 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the City must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the City Manager's Office, 2400 Washington Avenue, Newport News.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream	
			Left	Right
Stony Run	North corporate limits	51	80	80
	Woodside Lane	39	170	240
	Shields Rd	36	130	40
	Richneck Rd	32	100	190
	Jefferson Ave	31	100	90
	McMorrow Dr	28	100	150
	Interstate 64	23	300	500
	Warwick Blvd	14	180	420
	Beachmont Dr	8.5	250	310
Newmarket Creek	Dresden Dr	19		40
	Main St	18		660
	Todds Lane	17		500
	79th St	12	2,210	60
	Roanoke Ave	9	290	220
Government Ditch	Jefferson Ave	11	5	5
	Warwick Blvd	11	5	5
			Width in feet from shoreline to 100-yr flood boundary	
James River	East Governor Dr	8.5	250	
	Barclay Rd	8.5	150	
	Mercury Blvd	8.5	930	
	Ivy Ave	8.5	210	

(Authority: National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: July 23, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI-911]

PART 1917—APPEALS FROM FLOOD ELEVATION, DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the City of Lytle, Atascosa, Medina, and Bexar Counties, Texas

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90–448), 42 U.S.C. 4001–4128 and 24 CFR Part 1917 (Section 1917.10)), hereby gives notice of his final determinations of flood elevations for the City of Lytle, Atascosa, Medina, and Bexar Counties, Texas under Section 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the City must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to Section 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with Section 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at City Hall, Lytle, Texas.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream	
			Left	Right
Lytle Creek	Pilgrim Lake	742	150	70
	Wisdom Rd	743	80	500
	Live Oak St	720	350	180
	Adams St	717	660	530
	Railroad St	714	660	550
	U.S. Highway 81	713	500	270
	Lytle Somerset Rd	697	70	200
	Confluence with west prong, Atascosa River	683	230	470
West prong, Atascosa River	Laredo St	715	200	270
	Railroad St	698	30	10
	Martin Dam	693	170	200
	Benton City Rd	683	400	380
North prong, Atascosa River	Wisdom Rd	711	200	230
	Railroad St	696	20	230

(Authority: National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: July 27, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI-949]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Borough of Flemington, Clinton County, Pa.

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93–234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1969 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90–448), 42 U.S.C. 4001–4128, and 24 CFR Part 1917 (Section 1917.10)), hereby gives notice of his final determinations of flood elevations for the Borough of Flemington, Clinton County, Pennsylvania under Section 1917.8 of title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the Borough must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to Section 1917.8, no appeals were received from the community or from

V 41 154 AUG 9 76 UMI

individuals within the community. Therefore, publication of this notice is in compliance with § 1917.0.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the Flemington Borough Building, Huston Street, Flemington, Pennsylvania.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream	
			Left	Right
Bald Eagle Creek	Corporate limit (extended)	563	2,380	(1)
	Corporate limit	566	240	(1)
	Corporate limit (High St) (Route 220)	567	380	(1)
	Corporate limit (extended)	567	1,220	(1)

[1] Outside corporate limit.

(Authority: National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended; 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: July 26, 1976.

HOWARD B. CLARK,
Acting Federal Insurance Administrator.

[Docket No. FI-905]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Borough of Northumberland, Northumberland County, Pa.

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (Section 1917.10)), hereby gives notice of his final determinations of flood elevations for the Borough of Northumberland, Northumberland County, Pennsylvania under § 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the Borough must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the Council Room, Municipal Building, 221 Second Street.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width in feet from corporate limits 100-yr flood boundary facing downstream
Susquehanna River	NE. corporate limits	452	790
	Hanover St. (extended)	451	360
	Orange St. (extended)	451	330
	King St. (extended)	451	250
	Queen St. (extended)	451	255
	Southeast of Water St. at southern corporate limits.	451	500

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Township of Monroe, Snyder County, Pa.

The Federal Insurance Administrator, in accordance with Section 110 of the Flood Disaster Protection Act of 1973 (P.L. 93-234), 87 Stat. 980, which added Section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (P.L. 90-448), 42 U.S.C. 4001-4128, and 24 CFR Part 1917 (Section 1917.10)), hereby gives notice of his final determinations of flood elevations for the Township of Monroe, Snyder County, Pennsylvania under Section 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the Township must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to Section 1917.8, no appeals were received from the community or from individuals within the community.

V 41 1 54 AUG 9 76 UMI

Therefore, publication of this notice is in compliance with Section 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the Municipal Building, Clark Road, Hummels Wharf, Pennsylvania.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream	
			Left	Right
Susquehanna River	Northern corporate limits	450	(1)	100
	Township Rd. 519	450	(1)	370

[Docket No. FI-953]

PART 1917—APPEALS FROM FLOOD ELEVATION DETERMINATION AND JUDICIAL REVIEW

Final Flood Elevation for the Borough of Lewisburg, Union County, Pennsylvania

The Federal Insurance Administrator, in accordance with section 110 of the Flood Disaster Protection Act of 1973 (Pub. L. 93-234), 87 Stat. 980, which added section 1363 to the National Flood Insurance Act of 1968 (Title XIII of the Housing and Urban Development Act of 1968 (Pub. L. 90-448), 42 U.S.C 4001-4128, and 24 CFR Part 1917 (§ 1917.10)), hereby gives notice of his final determinations of flood elevations for the Borough of Lewisburg, Union County, Pennsylvania under § 1917.8 of Title 24 of the Code of Federal Regulations.

The Administrator, to whom the Secretary has delegated the statutory authority, has developed criteria for flood plain management in flood-prone areas. In order to continue participation in the National Flood Insurance Program, the Borough must adopt flood plain management measures that are consistent with these criteria and reflect the base flood elevations determined by the Secretary in accordance with 24 CFR Part 1910.

In accordance with Part 1917, an opportunity for the community or individuals to appeal this determination to or through the community for a period of ninety (90) days has been provided. Pursuant to § 1917.8, no appeals were received from the community or from individuals within the community. Therefore, publication of this notice is in compliance with § 1917.10.

Final flood elevations (100-year flood) are listed below for selected locations. Maps and other information showing the detailed outlines of the flood-prone areas and the final elevations are available for review at the Borough Manager's office, 331 Market Street, Lewisburg, Pennsylvania 17837.

Accordingly, the Administrator has determined the 100-year (i.e., flood with one-percent chance of annual occurrence) flood elevations as set forth below:

Source of flooding	Location	Elevation in feet above mean sea level	Width in feet from bank of stream to 100-yr flood boundary facing downstream	
			Left	Right
West Branch Susquehanna River	State Route 45	460.3	(1)	65
	St. Catherine St. (extended)	460.0	(1)	470
	Southern corporate limits	459.1	(1)	200

[Docket No. FI-2248]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for Mobile County, Alabama

On January 8, 1972, in 37 FR 281, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas which included the County of Mobile, Alabama. Map No. H 015008 25 indicates that Lots 1 through 17, 20 through 28, and 33 through 48, Pine Run Unit Two, Part "A" and Lot 2, Pine Run Unit One, as recorded in Map Book 26, Page 54 and Map Book 24, Page 63, respectively in the office of the Judge of Probate Court of Mobile County, Alabama, are in their entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that Lots 33 through 36 are in Zone B and Lots 1 through 17, 20 through 28, and 37 through 48 are in Zone C, and are not within the Special Flood Hazard Area. The map amendment is not based on the placement of fill on the above named property after the effective date of the Flood Insurance Rate Map of the community. Accordingly, Map No. H 015008 25 is hereby corrected to reflect that the above property is not within the Special Flood Hazard Area identified on January 7, 1972.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued: July 27, 1976.

H. B. CLARK,
Acting Federal Insurance Administrator.

[FR Doc.76-22998 Filed 8-6-76;8:45 am]

[Docket No. FI-446]

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the City of Naperville, Illinois

On January 13, 1975, in 40 FR 2426, the Federal Insurance Administrator published a list of communities with special hazard areas which included Naperville, Illinois. Map No. H 170213A 06 indicates that Section 1, River's Edge Subdivision, at the corner of 79th Street and Washington Street, Naperville, DuPage County, Illinois, recorded as Document Number R 75-8290 in the office of the Recorder of Deeds of DuPage County, Illinois, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the structures on the above property are not within the Special Flood Hazard Area. Accordnigly, Map No. H 170213A 06 is hereby corrected to reflect that the structures on the above property are not within the Special Flood Hazard Area identified on January 3, 1975.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24, 1974.)

Issued July 27, 1976.

H. B. CLARK,
Acting Federal Insurance Administrator.

PART 1920—PROCEDURE FOR MAP CORRECTION

Letter of Map Amendment for the Parish of East Baton Rouge, Louisiana

On December 10, 1974, in 39 FR 43081, the Federal Insurance Administrator published a list of communities with Special Flood Hazard Areas which included the Parish of East Baton Rouge, Louisiana. Map No. H 220058 78 indicates that, "The west 5 ½ acres of the Mrs. J. D. Sharp, Sr., 21 acres of the J. D. Sharp, Sr. Estate," shown on the map attached

V 41 154 AUG 9 76 UMI

to Original 1 Bundle 2073 in the office of the Clerk of the Parish of East Baton Rouge, Louisiana, is in its entirety within the Special Flood Hazard Area. It has been determined by the Federal Insurance Administration, after further technical review of the above map in light of additional, recently acquired flood information, that the structure on this property at Municipal Number 9924 Florida Boulevard, Baton Rouge, is not within the Special Flood Hazard Area. Accordingly, Map No. H 220058 78 is hereby corrected to reflect that the above mentioned structure is not within the Special Flood Hazard Area identified on November 22, 1974.

(National Flood Insurance Act of 1968 (Title XIII of Housing and Urban Development Act of 1968), effective January 28, 1969 (33 FR 17804, November 28, 1968), as amended, 42 U.S.C. 4001–4128; and Secretary's delegation of authority to Federal Insurance Administrator, 34 FR 2680, February 27, 1969, as amended by 39 FR 2787, January 24 1974.)

Issued: July 27, 1976.

H. B. CLARK,
Acting Federal Insurance Administrator.

Title 26—Internal Revenue

CHAPTER I—INTERNAL REVENUE SERVICE, DEPARTMENT OF THE TREASURY

SUBCHAPTER A—INCOME TAX

[T.D. 7426]

PART 1—INCOME TAX; TAXABLE YEARS BEGINNING AFTER DECEMBER 31, 1953

Time for Filing Income Tax Returns of Foreign Trusts

This document contains amendments to the Income Tax Regulations (26 CFR Part 1) in order to provide in the regulations that the filing requirements for income tax returns (including unrelated business tax returns) of certain foreign trusts will be the fifteenth day of the sixth month following the close of the trust's taxable year.

The purpose of this amendment is to clarify the regulations and to end an apparent conflict between the regulations and the instructions to Forms 990 T and 1040 NR.

Amendment to the regulations. The Income Tax Regulations (26 CFR Part 1) are amended as follows:

Paragraph 1. Paragraphs (a) and (c) of § 1.6072–1 are amended to read as follows:

§ 1.6072–1 Time for filing returns of individuals, estates, and trusts.

(a) *In general.* Except as provided in paragraphs (b) and (c) of this section, returns of income required under sections 6012, 6013, 6014, and 6017 of individuals, estates, domestic trusts, and foreign trusts having an office or place of business in the United States (including unrelated business tax returns of such trusts referred to in section 511(b)(2)) shall be filed on or before the fifteenth day of the fourth month following the close of the taxable year.

* * * * *

(c) *Nonresident alien individuals and foreign trusts.* The income tax return of a nonresident alien individual and of a foreign trust which does not have an office or place of business in the United States (including unrelated business tax returns of such trusts referred to in section 511(b)(2)) shall be filed on or before the fifteenth day of the sixth month following the close of the taxable year. However, a nonresident alien individual who for the taxable year has wages subject to withholding under chapter 24 of the Code shall file his income tax return on or before the fifteenth day of the fourth month following the close of the taxable year.

* * * * *

Because this Treasury decision amends existing regulations by providing rules relating to administrative practice and procedure, it is found unnecessary to issue it with notice and public procedure thereon under 5 U.S.C. 553(b) or subject to the effective date limitations of 5 U.S.C. 553(d).

(This Treasury decision is issued under the authority contained in section 7805 of the Internal Revenue Code of 1954 (68A Stat. 917; 26 U.S.C. 7805).)

DONALD C. ALEXANDER,
Commissioner of Internal Revenue.

Approved: August 3, 1976.

CHARLES M. WALKER,
Assistant Secretary of the Treasury.

Title 36—Parks, Forests, and Public Property

CHAPTER I—NATIONAL PARK SERVICE, DEPARTMENT OF THE INTERIOR

PART 7—SPECIAL REGULATIONS, AREAS OF THE NATIONAL PARK SERVICE

Crater Lake National Park, Oregon, Snowmobiles

A proposal was published at page 7950 of the FEDERAL REGISTER of February 23, 1976, to add paragraph (c) to § 7.2 of Title 36 of the "Code of Federal Regulations." The effect of this addition is to designate a route for snowmobiling in Crater Lake National Park.

Interested parties were given 30 days within which to submit written comments, suggestions, or objections with respect to the proposed addition. Numerous comments were received, expressing approval of the proposed route, suggesting additional routes, or stating opposition to any snowmobile use in national parks. All comments were carefully considered and it was determined that the proposed addition be adopted, without change, as set forth below. This addition shall take effect on or before September 8, 1976 (5 U.S.C. 553; 16 U.S.C. 3; 16 U.S.C. 122).

Paragraph (c) of § 7.2 is added as follows:

§ 7.2 Crater Lake National Park.

* * * * *

(c) *Snowmobiles.* Snowmobile use is permitted in Crater Lake National Park on the North Entrance Road from its intersection with the Rim Drive to the park boundary, and on intermittent routes detouring from the North Entrance Road as designated by the Superintendent and marked with snow poles and signs. Except for such designated detours marked with snow poles and signs, only that portion of the North Entrance Road intended for wheeled vehicle use may be used by snowmobiles. Such roadway is available for snowmobile use only when the designated roadway is closed to all wheeled vehicles used by the public.

FRANK J. BETTS,
Superintendent, Crater Lake National Park.

[FR Doc.76-23017 Filed 8-6-76;8:45 am]

PART 7—SPECIAL REGULATIONS, AREAS OF THE NATIONAL PARK SERVICE

Mount Rainier National Park, Washington; Snowmobile Routes

A proposal was published at page 8496 of the FEDERAL REGISTER of February 27, 1976, to add paragraph (c) to § 7.5 of the "Code of Federal Regulations." The effect of this addition is to designate snowmobile routes in Mount Rainier National Park.

Interested parties were given 30 days within which to submit written comments, suggestions, or objections with respect to the proposed addition. Several

V 41 1154 AUG 9 76 UMI

comments were received with the majority favoring the proposed addition. All comments were carefully considered and it was determined that the proposed addition be adopted, without change, as set forth below. This addition shall take effect on or before September 8, 1976.

(5 U.S.C. 553; 16 U.S.C. 3; 16 U.S.C. 92)

Paragraph (c) of § 7.5 is added as follows:

§ 7.5 Mount Rainier National Park.

* * * * *

(c) *Snowmobile use*—(1) *Available roadway:* On routes designated for snowmobile use, only that portion of the roadway intended for wheeled vehicle use may be used by snowmobiles. Such roadway is available for snowmobile use only when the designated roadway is closed to all other public motor vehicle use.

(2) *Designated routes:* (i) That portion of the West Side Road south of Round Pass.

(ii) The Mather Memorial Parkway (State Route 410) from its intersection with the White River Road north to the park boundary.

(iii) The White River Road from its intersection with the Mather Memorial Parkway to the White River Campground.

(iv) The Cougar Rock Campground road system.

(v) The Stevens Canyon Road from Stevens Canyon Entrance to the Stevens Canyon Road tunnel at Box Canyon.

DANIEL J. TOBIN, Jr.,
Superintendent,
Mount Rainer National Park.

[FR Doc.76-23018 Filed 8-6-76;8:45 am]

Title 40—Protection of Environment

CHAPTER I—ENVIRONMENTAL PROTECTION AGENCY

[FRL 597-1]

PART 60—STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES

Delegation of Authority to State of California on Behalf of Madera County Air Pollution Control District

Pursuant to the delegation of authority for the standards of performance for new stationary sources (NSPS) to the State of California on behalf of the Madera County Air Pollution Control District, dated May 12, 1976, EPA is today amending 40 CFR 60.4 *Address*, to reflect this delegation. A Notice announcing this delegation is published in the Notices Section of this issue of the FEDERAL REGISTER, Environmental Protection Agency, FRL 596-8. The amended § 60.4 is set forth below. It adds the address of the Madera County Air Pollution Control District, to which must be addressed all reports, requests, applications, submittals, and communications pursuant to this part by sources subject to the NSPS located within this Air Pollution Control District.

The Administrator finds good cause for foregoing prior public notice and for making this rulemaking effective immediately in that it is an administrative change and not one of substantive content. No additional substantive burdens are imposed on the parties affected. The delegation which is reflected by this administrative amendment was effective on May 12, 1976, and it serves no purpose to delay the technical change of this addition of the Air Pollution Control District address to the Code of Federal Regulations.

This rulemaking is effective immediately, and is issued under the authority of Section 111 of the Clean Air Act, as amended [42 U.S.C. 1857c-6].

Dated: July 27, 1976.

PAUL DEFALCO,
Regional Administrator,
Region IX, EPA.

Part 60 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

1. In § 60.4 paragraph (b) is amended by revising subparagraph F to read as follows:

§ 60.4 Address.

* * * * *

(b) * * *

[FRL 597-2]

PART 61—NATIONAL EMISSION STANDARDS FOR HAZARDOUS AIR POLLUTANTS

Delegation of Authority to State of California on Behalf of Madera County Air Pollution Control District

Pursuant to the delegation of authority for national emission standards for hazardous air pollutants (NESHAPS) to the State of California on behalf of the Madera County Air Pollution Control District, dated May 12, 1976, EPA is today amending 40 CFR 61.04, *Address*, to reflect this delegation. A Notice announcing this delegation is published today in the notices section of this issue of the FEDERAL REGISTER, Environmental Protection Agency, FRL 596-8. The amended § 61.04 is set forth below. It adds the address of the Madera County to which must be addressed all reports, requests, applications, submittals, and communications pursuant to this part by sources subject to the NESHAPS located within Air Pollution Control District.

The Administrator finds good cause for foregoing prior public notice and for making this rulemaking effective immediately in that it is an administrative change and not one of substantive content. No additional substantive burdens are imposed on the parties affected. The delegation which is reflected by this administrative amendment was effective on May 12, 1976, and it serves no purpose to delay the technical change of this addition of the Air Pollution Control District address to the Code of Federal Regulations.

This rule making is effective immediately, and is issued under the authority of Section 112 of the Clean Air Act, as amended [42 U.S.C. 1857c-7].

Dated: July 27, 1976.

PAUL DEFALCO,
Regional Administrator,
Region IX, EPA.

Part 61 of Chapter I, Title 40 of the Code of Federal Regulations is amended as follows:

1. In § 61.04 paragraph (b) is amended by revising subparagraph F to read as follows:

[FRL 597-8; PP3F1391/R109]

PART 180—TOLERANCES AND EXEMPTIONS FROM TOLERANCES FOR PESTICIDE CHEMICALS IN OR ON RAW AGRICULTURAL COMMODITIES

S-[2-(Ethylsulfinyl)Ethyl]0,0-Dimethyl Phosphorothioate

On July 20, 1973, notice was given 38 FR 19541 that Chemagro Agricultural Division of Mobay Chemical Corp. (formerly Division of Baychem Corp.), PO Box 4913, Kansas City MO 64120, had filed a petition (PP 3F1391) with the Environmental Protection Agency (EPA). This petition proposed that 40 CFR 180.330 be amended by establishing a tolerance for combined residues of the insecticide S-[2-(ethylsulfinyl)-ethyl] 0,0-dimethyl phosphorothioate and its cholinesterase-inhibiting metabolites in or on the raw agricultural commodities tomatoes at 1 part per million (ppm), onions (bulb) at 0.05 ppm and filberts at 0.01 ppm.

Chemagro subsequently amended the petition by increasing the proposed tolerance level on filberts to 0.05 ppm, revising the commodity "onions (bulb)" to read "onions (dry bulb)" and by withdrawing the proposed tolerance for residues on tomatoes.

The data submitted in the petition and other relevant material have been evaluated. The pesticide is considered useful for the purpose for which the tolerances are sought. There is no reasonable expectation of residues in eggs, meat, milk or poultry from the proposed uses and 40 CFR 180.6(a)(3) applies. It is concluded therefore that 40 CFR 180.330 should be amended as proposed. The tolerances established by such amendment will protect the public health.

Any person adversely affected by this regulation may, on or before September 8, 1976, file written objections with the Hearing Clerk, Environmental Protection Agency, Rm. 1019, East Tower, 401 M St., SW., Washington, D.C. 20460. Such objections should be submitted in quintuplicate and specify the provisions of the regulation deemed to be objectionable and the grounds for the objections. If a hearing is requested, the objections must state the issues for the hearing. A hearing will be granted if the objections are supported by grounds legally sufficient to justify the relief sought.

Effective on August 9, 1976, 40 CFR 180.330 is amended as set forth below.

Dated: August 4, 1976.

EDWIN L. JOHNSON,
Deputy Assistant Administrator
for Pesticide Programs.

(Sec. 408(d)(2) of the Federal Food, Drug, and Cosmetic Act (21 U.S.C. 346a(d)(2)))

Section 180.330 is amended by alphabetically inserting the following commodities and corresponding tolerance levels in the list of raw agricultural commodities of the regulation.

§ 180.330 S-[2-(ethylsulfinyl)ethyl 0,0-dimethyl phosphorothioate; tolerances for residues.

* * * * *

.05 part per million in or on filberts

* * * * *

.05 part per million in or on onions, dry bulb

PART 402—COOLING WATER INTAKE STRUCTURES

Availability

On April 26, 1976 the Agency published a notice of final rulemaking for Cooling Water Intake Structures (Vol. 41, No. 81). Due to difficulties encountered in printing and production the development document entitled "Development Document for Best Technology Available for the Location, Design, Construction and Capacity of Cooling Water Intake Structures for Minimizing Adverse Environmental Impact" has been delayed. However, this document is now available to the public. This document contains information on the analysis undertaken in support of the regulation set forth to implement section 316(b) of the Federal Water Pollution Control Act.

Copies of the document are available from the Government Printing Office at a cost of $3.40 and from the National Technical Information Service at a cost of $9.00 for paper copy and $2.25 for microfiche. Requests for documents should be directed to the:

Government Printing Office,
Superintendent of Documents,
North Capitol Street,
Washington, D.C. 20402,
GPO Stock #15501-01044, or

U.S. Dept. of Commerce,
National Technical Information Service,
Springfield, VA 22161,
NTIS Accession #PB253573

A copy of the final document is also available for inspection and copying at the EPA Public Information Reference Unit (EPA Library), Room 2922, Waterside Mall, 401 M St., S.W., Washington, D.C. 20460 and at the EPA Regional Libraries.

The EPA information regulation, 40 CFR Part 2, provides that a reasonable fee may be charged for copying.

Dated: July 13, 1976.

ANDREW W. BREIDENBACH,
Assistant Administrator

Title 41—Public Contracts and Property Management

CHAPTER 1—FEDERAL PROCUREMENT REGULATIONS

PART 1-7—CONTRACT CLAUSES

PART 1-12—LABOR

PART 1-16—PROCUREMENT FORMS

Temporary Regulation 39

To: Heads of Federal agencies

Subject: Listing of employment openings

1. *Purpose.* This FPR Temporary Regulation implements the provisions of the Vietnam Era Veteran's Readjustment Assistance Act of 1974 and the revised regulations of the Secretary of Labor regarding the employment and advancement of qualified disabled veterans and veterans of the Vietnam era.

2. *Effective date.* This regulation is effective July 26, 1976.

3. *Expiration date.* This regulation will continue in effect until canceled.

4. *Background.* Executive Order 11598, dated June 16, 1971, dealt with the problem of assisting veterans of the Armed Forces to obtain employment. The order required Federal contractors and subcontractors to list job openings with the appropriate offices of the Federal/State employment service system. This requirement was implemented by regulations issued by the Secretary of Labor (41 CFR 50-250; 36 F.R. 18398, September 14, 1971) and by the Federal Procurement Regulations Amendment 102 (37 F.R. 2769, February 5, 1972). Subsequently, the requirements in Executive Order 11598 were incorporated into Public Law 92-540, October 24, 1972 (38 U.S.C. 2012). Implementation of this Act by the Secretary of Labor was authorized by Executive Order 11701, January 24, 1973. The Secretary's regulations were published in 41 CFR 50-250 (38 F.R. 2968, January 31, 1973). Public Law 93-508, December 3, 1974, amended the original Vietnam Era Veteran's Readjustment Assistance Act of 1972 (Public Law 9-2540, October 24, 1972), and the Secretary of Labor issued revised regulations (41 CFR 60-250) to implement the Act on June 18, 1976 (41 F.R. 26386, June 25, 1976). The principal changes effected by the Act are as follows: Agencies are required to "take affirmative action to employ and advance in employment disabled veterans and veterans of the Vietnam era," and the applicability of the Act has been limited to contracts of $10,000 or more. The Secretary's revised regulation modifies the contract clause to reflect those changes.

5. *Agency action.* Pending the issuance of a permanent amendment of the Federal Procurement Regulations, Subpart 1-12.11, Listing of Employment Openings, agencies shall include the following affirmative action clause (physically or by reference) in all contracts or purchase

V 41 154 AUG 9 76 UMI

orders of $10,000 or more as required by the regulations of the Secretary of Labor.

DISABLED VETERANS AND VETERANS OF THE VIETNAM ERA

(a) The contractor will not discriminate against any employee or applicant for employment because he or she is a disabled veteran or veteran of the Vietnam era in regard to any position for which the employee or applicant for employment is qualified. The contractor agrees to take affirmative action to employ, advance in employment, and otherwise treat qualified disabled veterans and veterans of the Vietnam era without discrimination based upon their disability or veterans status in all employment practices such as the following: employment upgrading, demotion or transfer, recruitment, advertising, layoff or termination, rates of pay or other forms of compensation, and selection for training, including apprenticeship.

(b) The contractor agrees that all suitable employment openings of the contractor which exist at the time of the execution of this contract and those which occur during the performance of this contract, including those not generated by this contract and including those occurring at an establishment of the contractor other than the one wherein the contract is being performed but excluding those of independently operated corporate affiliates, shall be listed at an appropriate local office of the State employment service system wherein the opening occurs. The contractor further agrees to provide such reports to such local office regarding employment openings and hires as may be required.

State and local government agencies holding Federal contracts of $10,000 or more shall also list all their suitable openings with the appropriate office of the State employment service, but are not required to provide those reports set forth in paragraphs (d) and (e).

(c) Listing of employment openings with the employment service system pursuant to this clause shall be made at least concurrently with the use of any other recruitment source or effort and shall involve the normal obligations which attach to the placing of a bona fide job order, including the acceptance of referrals of veterans and nonveterans. The listing of employment openings does not require the hiring of any particular job applicant or from any particular group of job applicants, and nothing herein is intended to relieve the contractor from any requirements in Executive orders or regulations regarding nondiscrimination in employment.

(d) The reports required by paragraph (b) of this clause shall include, but not be limited to, periodic reports which shall be filed at least quarterly with the appropriate local office or, where the contractor has more than one hiring location in a State, with the central office of that State employment service. Such reports shall indicate for each hiring location (1) the number of individuals hired during the reporting period, (2) the number of nondisabled veterans of the Vietnam era hired, (3) the number of disabled veterans of the Vietnam era hired, and (4) the total number of disabled veterans hired. The reports should include covered veterans hired for on-the-job training under 38 U.S.C. 1787. The contractor shall submit a report within 30 days after the end of each reporting period wherein any performance is made on this contract identifying data for each hiring location. The contractor shall maintain at each hiring location copies of the reports submitted until the expiration of one year after final payment under the contract, during which time these reports and related documentation shall be made available, upon request, for examination by any authorized representatives of the contracting officer or of the Secretary of Labor. Documentation would include personnel records respecting job openings, recruitment, and placement.

(e) Whenever the contractor becomes contractually bound to the listing provisions of this clause, it shall advise the employment service system in each State where it has establishments of the name and location of each hiring location in the State. As long as the contractor is contractually bound to these provisions and has so advised the State system, there is no need to advise the State system of subsequent contracts. The contractor may advise the State system when it is no longer bound by this contract clause.

(f) This clause does not apply to the listing of employment openings which occur and are filled outside the 50 States, the District of Columbia, Puerto Rico, Guam, and the Virgin Islands.

(g) The provisions of paragraphs (b), (c), (d), and (e) of this clause do not apply to openings which the contractor proposes to fill from within his own organization or to fill pursuant to a customary and traditional employer-union hiring arrangement. This exclusion does not apply to a particular opening once an employer decides to consider applicants outside of his own organization or employer-union arrangement for that opening.

(h) As used in this clause: (1) "All suitable employment openings" includes, but is not limited to, openings which occur in the following job categories: production and non-production; plant and office; laborers and mechanics; supervisory and nonsupervisory; technical; and executive, administrative, and professional openings that are compensated on a salary basis of less than $25,000 per year. This term includes full-time employment, temporary employment of more than 3 days' duration, and part-time employment. It does not include openings which the contractor proposes to fill from within his own organization or to fill pursuant to a customary and traditional employer-union hiring arrangement nor openings in an educational institution which are restricted to students of that institution. Under the most compelling circumstances an employment opening may not be suitable for listing, including such situations where the needs of the Government cannot reasonably be otherwise supplied, where listing would be contrary to national security, or where the requirement of listing would otherwise not be for the best interest of the Government.

(2) "Appropriate office of the State employment service system" means the local office of the Federal/State national system of public employment offices with assigned responsibility for serving the area where the employment opening is to be filled, including the District of Columbia, Guam, Puerto Rico, and the Virgin Islands.

(3) "Openings which the contractor proposes to fill from within his own organization" means employment openings for which no consideration will be given to persons outside the contractor's organization (including any affiliates, subsidiaries, and the parent companies) and includes any openings which the contractor proposes to fill from regularly established "recall" lists.

(4) "Openings which the contractor proposes to fill pursuant to a customary and traditional employer-union hiring arrangement" means employment openings which the contractor proposes to fill from union halls, which is part of the customary and traditional hiring relationship which exists between the contractor and representatives of his employees.

(i) The contractor agrees to comply with the rules, regulations, and relevant orders of the Secretary of Labor issued pursuant to the Act.

(j) In the event of the contractor's noncompliance with the requirements of this clause, actions for noncompliance may be taken in accordance with the rules, regulations, and relevant orders of the Secretary of Labor issued pursuant to the Act.

(k) The contractor agrees to post in conspicuous places available to employees and applicants for employment notices in a form to be prescribed by the Director, provided by or through the contracting officer. Such notice shall state the contractor's obligation under the law to take affirmative action to employ and advance in employment qualified disabled veterans and veterans of the Vietnam era for employment, and the rights of applicants and employees.

(l) The contractor will notify each labor union or representative of workers with which it has a collective bargaining agreement or other contract understanding that the contractor is bound by terms of the Vietnam Era Veteran's Readjustment Assistance Act and is committed to take affirmative action to employ and advance in employment qualified disabled veterans and veterans of the Vietnam era.

(m) The contractor will include the provisions of this clause in every subcontract or purchase order of $10,000 or more unless exempted by rules, regulations, or orders of the Secretary issued pursuant to the Act, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the Director of the Office of Federal Contract Compliance Programs may direct to enforce such provisions, including action for noncompliance.

6. *Effect on other issuances.* The text of Subpart 1–12.11, Listing of Employment Openings, is canceled and the subpart is reserved. References in the following sections of the FPR to the clause formerly presented in § 1–12.1102–2 shall be considered references to the clause in paragraph 5 of this temporary regulation:

a. Section 1–7.103–16;
b. Section 1–7.602–34;
c. Section 1–16.101(c);
d. Section 1–16.401(h);
e. Section 1–16.601(b); and
f. Section 1–16.701(b).

JACK ECKERD,
Administrator of General Services.

JULY 30, 1976.

Title 43—Public Lands: Interior

CHAPTER II—BUREAU OF LAND MANAGEMENT; APPENDIX—PUBLIC LAND ORDERS

[Public Land Order 5595; I–9110]

IDAHO

Withdrawal for Seed Orchard

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 F.R. 4831), it is ordered as follows:

Subject to valid existing rights, the following described national forest land is hereby withdrawn from appropriation under the mining laws, 30 U.S.C., Ch. 2, but not from leasing under the mineral leasing laws in aid of programs of the Department of Agriculture:

PAYETTE NATIONAL FOREST

BOISE MERIDIAN

LOST LAKE SEED ORCHARD

T. 19 N., R. 1 W.,
Sec. 17, NW¼SW¼SW¼SW¼, S½SW¼SW¼SW¼;
Sec. 18, S½SE¼SE¼SE¼, NE¼SE¼SE¼SE¼;
Sec. 19, NE¼NE¼NE¼, NE¼SE¼NE¼NE¼;
Sec. 20, SW¼NE¼NW¼, SW¼NW¼NE¼NW¼, W½SE¼NE¼NW¼, NW¼NW¼NW¼, SE¼NW¼NW¼, N½SW¼NW¼NW¼, SE¼SW¼NW¼NW¼, S½NE¼NW¼NW¼, NW¼NE¼NW¼NW¼, N½NE¼SW¼NW¼, N½NW¼SE¼NW¼.

The area described aggregates 90 acres in Adams County.

The withdrawal made by this order does not alter the applicability of those public land laws governing the use of the national forest land under lease, license, or permit, or governing the disposal of their mineral or vegetative resources other than under the mining laws.

JACK O. HORTON,
Assistant Secretary of the Interior.

AUGUST 2, 1976.

[FR Doc.76–23020 Filed 8–6–76;8:45 am]

[Public Land Order 5596; NM–25707]

NEW MEXICO

Partial Revocation of Executive Order No. 6276

By virtue of the authority vested in the President and pursuant to Executive Order No. 10355 of May 26, 1952 (17 F.R. 4831), it is ordered as follows:

1. Executive Order No. 6276 of September 8, 1933, which withdrew public lands in New Mexico to aid the State in making exchange selections as provided by the Act of June 15, 1926, 44 Stat. 746–748, is hereby revoked so far as it affects the following described lands:

NEW MEXICO PRINCIPAL MERIDIAN

T. 23 S., R. 14 W.,
Sec. 3, lots 3 and 4;
Sec. 4, lots 1, 2, S½NE¼, SE¼NW¼, NE¼SW¼.

The area described aggregates 321.13 acres in Grant County.

The lands are located about 9 miles northeast of Separ. The soils are sandy clay loam that support a mixture of grasses, principally black grama, dropseed, three-awns and tobosa, and lies at an elevation slightly in excess of 5,000 feet.

2. At 10 a.m. on September 7, 1976, the lands shall be open to operation of the public land laws generally, subject to valid existing rights, the provisions of existing withdrawals and the requirements of applicable law. All valid applications received at or prior to 10 a.m. on September 7, 1976, shall be considered as simultaneously filed at that time. Those received thereafter shall be considered in the order of filing.

3. The lands have been and continue to be open to applications and offers under the mineral leasing laws and to location under the United States mining laws for metalliferous minerals. They will be open to location for nonmetalliferous minerals at 10 a.m. on September 7, 1976.

Inquiries concerning the lands should be addressed to Chief, Division of Technical Services, Bureau of Land Management, P.O. Box 1449, Santa Fe, New Mexico 87501.

JACK O. HORTON,
Assistant Secretary of the Interior.

AUGUST 2, 1976.

[FR Doc.76–23021 Filed 8–6–76;8:45 am]

[Public Land Order 5597; NM–13177 and NM–14635]

NEW MEXICO

Addition to National Forest

By virtue of the authority contained in the Act of July 9, 1962, 43 U.S.C. 315 g–1 (1970), it is ordered as follows:

Subject to valid existing rights, the following described lands, acquired in exchanges made pursuant to section 8 of the Taylor Grazing Act of June 28, 1934 (48 Stat. 1272), as amended, 43 U.S.C. 315g (1970), are hereby added to and made a part of the Carson, Santa Fe, and Gila National Forests and hereafter shall be subject to all laws and regulations applicable to said national forests:

NEW MEXICO PRINCIPAL MERIDIAN

CARSON NATIONAL FOREST

T. 24 N., R. 4 E.,
Sec. 8, lot 1 and NE¼;
Sec. 9, lots 1, 2, NW¼NW¼.

SANTA FE NATIONAL FOREST

T. 24 N., R. 2 E.,
HES No. 199.
T. 25 N., R. 2 E.,
Sec. 36, SW¼NW¼NW¼NE¼, SW¼NW¼NE¼, W½SW¼NE¼, SW¼SE¼SW¼NE¼, SE¼NE¼NE¼NW¼, NE¼SE¼NE¼NW¼, W½E½NW¼SE¼, W½NW¼SE¼.
T. 24 N., R. 3 E.,
HES Nos. 45, 194, 195, 196, 197, and 198.
T. 24 N., R. 4 E.,
Sec. 8, lot 2, S½NW¼, N½SW¼, SW¼SW¼;
Sec. 17, lot 1.

GILA NATIONAL FOREST

T. 10 S., R. 12 W.,
Sec. 10, SE¼SW¼;
Sec. 15, NW¼NE¼;
Sec. 29, NW¼.
T. 11 S., R. 12 W.,
Sec. 5, NW¼SW¼;
Sec. 6, lot 50, N½ of lot 51, lot 58 except 10 acres described as W½NE¼, E½NW¼.

The areas described above aggregate 1,942.825 acres more or less in Rio Arriba, Sandoval and Catron Counties.

JACK O. HORTON,
Assistant Secretary of the Interior.

AUGUST 2, 1976.

[FR Doc.76–23022 Filed 8–6–76;8:45 am]

SUBCHAPTER B—LAND RESOURCE MANAGEMENT (2000)

PART 2650—ALASKA NATIVE SELECTIONS

Waiver of Regulations for Cook Inlet Region, Inc.

This order extends until October 1, 1976, for Cook Inlet Region, Inc., the application filing date contained in 43 CFR 2653.4(b) for selections pursuant to section 14(h)(1) of the Alaska Native Claims Settlement Act of December 18, 1971 (85 Stat. 704).

V 41 154 AUG 9 76 UMI

Statement of consideration. Cook Inlet Region, Inc., a corporation formed pursuant to the Alaska Native Claims Settlement Act (ANCSA), has requested a waiver of the regulations to extend the time for making selections under section 14(h)(1) of the ANCSA. Cook Inlet Region, Inc., makes such a request in order that they may have sufficient time to define more precisely the areas which they wish to select under this section.

The Department has studied this request and has concluded that an extension to October 1, 1976, to make more specific identifications with regard to such selections is warranted. At the time such selections are filed or refiled, land must be available for selection under section 14(h)(1) of the ANCSA and 43 CFR 2653. The filing must also be in compliance with the regulations in effect on the date of the filing. Any selection presently on file not meeting the two preceding conditions must be refiled.

It is therefore ordered, as authorized by the terms of 43 CFR 2650.0–8 and in accordance with the aforementioned conditions, that the effective date with respect to the filing deadline in 43 CFR 2653.4(b) for selections under section 14(h)(1) of the ANCSA be extended to October 1, 1976, for Cook Inlet Region, Inc.

Signed at Washington, D.C. on August 2, 1976.

THOMAS S. KLEPPE,
Secretary of the Interior.

[FR Doc.76–23098 Filed 8–6–76;8:45 am]

Title 45—Public Welfare

CHAPTER I—OFFICE OF EDUCATION, DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

PART 177—FEDERAL, STATE AND PRIVATE PROGRAMS OF LOW-INTEREST LOANS TO VOCATIONAL STUDENTS AND STUDENTS IN INSTITUTIONS OF HIGHER EDUCATION

Special Allowances

Subparagraph (3) of § 177.4(c), Special allowances, which deals with the payment to lenders of the allowances authorized by section 2 of the "Emergency Insured Student Loan Act of 1969" (Pub. L. 91–95) is amended to provide for the payment of such an allowance for the period April 1, 1976, through June 30, 1976, inclusive.

In light of the directives in the Emergency Insured Student Loan Act of 1969 with respect to the factors that the Secretary of Health, Education, and Welfare is to consider and the officials with whom he is to consult in setting the rate of the special allowance, and since a comment period would cause delay of at least 30 days, following each quarterly 3-month period, it has been determined pursuant to 5 U.S.C. 553 that the solicitation of comment as to the rate of the special allowance for any particular quarter is both impracticable and contrary to the public interest.

Effective date. Pursuant to section 431(d) of the General Education Provisions Act, as amended (20 U.S.C. 1232(d)), these regulations have been transmitted to the Congress concurrently with the publication in the FEDERAL REGISTER. That section provides that regulations subject thereto shall become effective on the forty-fifth day following the date of such transmission, subject to the provisions therein concerning Congressional action and adjournment.

Section 177.4(c)(3) is amended as follows:

§ 177.4 Payment of interest benefits, administrative cost allowances and special allowance.

* * * * *

(c) Special allowances. * * *

(3) Special allowances are authorized to be paid as follows:

* * * * *

(xxviii) For the period April 1, 1976, through June 30, 1976, inclusive, a special allowance is authorized to be paid in an amount equal to the rate of 1½ percent per annum of the average unpaid balance of disbursed principal of eligible loans.

(Sec. 2, 83 Stat. 141)

(Catalog of Federal Domestic Assistance No. 13.460 Guaranteed Student Loan Program.)

Dated: July 2, 1976.

T. H. BELL,
U.S. Commissioner of Education.

Approved: August 4, 1976.

MARJORIE LYNCH,
Acting Secretary of Health, Education, and Welfare.

[FR Doc.76–23180 Filed 8–6–76;8:45 am]

CHAPTER X—COMMUNITY SERVICES ADMINISTRATION

[CSA Instruction 6910–1a]

PART 1069—COMMUNITY ACTION PROGRAM GRANTEE PERSONNEL MANAGEMENT

Travel Regulations for CSA Grantees and Delegate Agencies

Title 45 Code of Federal Regulations 1069.3 (OEO Instruction 6910–1) was originally published on July 12, 1969 at 34 FR 11546. Significant changes were made in §§ 1109.3–5 and 6 by 38 FR 7117, published March 16, 1973. As a result of the decision and order in *Local 2677, AFGE* v. *Phillips* 353 F. Supp. 60 (1973), significant questions were raised as to the validity of these changes in 45 CFR 1069.3–5 and 6; consequently these sections were revoked by a notice in 39 FR 27439, published July 28, 1974.

As a result of the revocation of §§ 1069.3–5 and 6, there is no valid regulation governing when grantees must seek CSA approval for out-of-community travel costs, though the provisions of OEO Instruction 6910–1 as it was in force from 1969 to 1973 are generally being followed and do represent CSA policy. Therefore, CSA is repromulgating those provisions and making some other minor technical changes needed to update 45 CFR 1069.3.

Public comment on this regulation is invited. Any comments received before September 8, 1976 will be taken into account in deciding whether any further revision of this regulation is necessary. Please address any comments to Community Services Administration, Office of Operations, 1200 19th Street, N.W., Washington, D.C. 20506.

Effective date: September 8, 1976.

SAMUEL R. MARTINEZ,
Director.

Title 45 Code of Federal Regulations Part 1069 is revised to read as follows:

Sec.
1069.3–1 Applicability of this subpart.
1069.3–2 Policy.
1069.3–3 Accounting for travel funds.
1069.3–4 General travel regulations.
1069.3–5 Restrictions on charging out-of-community travel costs to grant funds.
1069.3–6 Approval of travel outside the continental United States.

AUTHORITY: Sec. 602, 78 Stat. 530, 42 U.S.C. 2942.

§ 1069.3–1 Applicability of this subpart.

This subpart applies to all grant programs financially assisted under Titles II, III–B and VII of the Community Services Act, as amended, if the assistance is administered by the Community Services Administration.

§ 1069.3–2 Policy.

(a) All grantees and delegate agencies are required to follow the travel policies set forth in the Standardized Government Travel Regulations (SGTR). However, when a grantee or delegate agency has existing travel policies that are more restrictive than those in the SGTR, or when the grant contains more restrictive limitations, the more restrictive policies should be followed.

(b) The governing or administering board of each grantee or delegate agency shall approve its written travel regulations and designate responsible officials to assure that the regulations comply with the requirements of this subpart and are adhered to by employees when using grant funds (including the required non-Federal share) to pay for their travel.

(c) In common with other expenditures, payments for travel are subject to audit by independent licensed public accountants and Federal auditors. Expenditures for travel which fail to meet the requirements of this subpart may be questioned as proper charges against grant funds. Grantees are responsible for providing the documentation needed to prove that questioned travel expenditures were reasonable and necessary.

(d) In addition, grant funds may not be used to reimburse costs incurred for travel which violates any CSA Instruction or grant condition. Particular attention is directed to the limitations on travel for the purpose of lobbying set forth in OEO Instruction 6907–01, and to the authorized uses for project vehicles discussed in OEO Instruction 7001–01a, Section 8d (45 CFR 1071.73).

§ 1069.3–3 Accounting for travel funds.

All grantee or delegate agency payments for travel by employees, consultants, and members of governing or administering boards must be authorized in advance and must be supported by properly approved invoices covering both travel and, if applicable, per diem.

§ 1069.3–4 General travel regulations.

(a) General travel regulations issued by grantees and delegate agencies should contain the restrictions set forth as follows:

(1) Where a grantee or delegate agency has a previously established travel policy which contains requirements that are more restrictive than those of the SGTR, the more restrictive requirements shall be followed.

(2) Mileage costs for use of privately owned automobiles shall be paid in accordance with prevailing rates in a community. In no event, however, may the rates paid exceed 15 cents a mile.

(3) Less than first-class travel accommodations shall be used in all instances except the following:

(i) These accommodations do not exist or are not available within a reasonable time;

(ii) Less than first-class would result in higher overall costs because of required routing, time urgency, baggage differential or other factors;

(iii) Physical condition of the traveler or other extenuating circumstances require the use of first-class.

(4) The reason(s) for traveling first-class must be shown on travel vouchers submitted for reimbursement.

(b) Grantee and delegate agency travelers shall have their travel authorized in advance in accordance with their organization's rules on the subject. The authorization shall include a brief explanation of the purpose of the trip, destination, and period during which the travelers will be on travel status. Reimbursements for travel expenses should be supported by vouchers that show the name of the individuals who traveled and refer to the authorization that approved the travel.

(c) Local travel expenses for persons whose position requires daily or intermittent travel should be covered by a general travel authorization and should only be reimbursed after presentation of a local expense statement submitted at regular intervals.

(d) When program personnel are in a travel status through the ending date of a program year and into a new program year, the cost of their transportation shall be charged to the period in which the tickets for their travel were purchased. However, mileage, per diem, and other expenses reimbursed to a traveler shall be charged to the proper program year grant in accordance with the days in which the expenses were incurred and the per diem was due.

§ 1069.3–5 Restrictions on charging out-of-the-community travel costs to grant funds.

(a) Grantees may use CSA grant funds to reimburse out-of-the-community travel costs incurred by grantee and delegate agency employees, consultants and members of governing or administering boards without obtaining prior CSA approval, if the travel was for purposes outlined below and meets the geographical limitations of § 1069.3–6:

(1) Travel in response to a specific invitation from the CSA Headquarters or a CSA Regional Office to attend a conference or meeting for the purpose of furthering grantee activity.

(2) Travel to attend conferences and meetings of professional organizations whose efforts are closely related to the poverty programs being administered by the grantee. This would include, but not be limited to, conferences and meetings sponsored by State Economic Opportunity Offices operating under a CSA grant, the National Congress for Community Economic Development, the National Association for Community Development, and Community Action Directors' Associations. No specific limit is imposed on the number of trips which may be charged to the grant within the approved budget. However, grantees and delegate agencies should be prepared to show to CSA auditors, inspectors or evaluation teams that each such trip was reasonable and contributed to the development or management of the grantee's approved program.

(3) Travel to interview prospective employees or to procure services, supplies or equipment when it can be shown that the travel was necessary and advantageous in the instances involved.

(b) All other travel must be specifically approved in writing, in advance, by CSA before reimbursement from grant funds is authorized.

(c) NOTE: In the event CSA determines that travel by a grantee employee or employees is necessary as discussed in (a)(1) above, and sufficient funds for such travel are not available within the grant, the granting office may directly reimburse the grantee employee for the travel costs incurred. However, when such payments are made, the granting office must inform the grantee involved, in writing, that the employee(s) has been reimbursed for the travel costs and that no additional reimbursement is authorized. Grantees are cautioned that they are responsible for establishing the controls needed to prevent duplicate payments for travel in such instances.

§ 1069.3–6 Approval of travel outside the Continental United States.

(a) All travel to places outside of the limits of 48 continental United States must be approved in writing, in advance, by the Regional Director for regionally administered grants or the appropriate Assistant/Associate Director for Headquarters administered grants.

(b) Travel is also permitted between Puerto Rico and the Virgin Islands for area meetings and conferences and similarly between Micronesia (the Trust Territories) and Guam.

[FR Doc.76–23041 Filed 8–6–76;8:45 am]

Title 47—Telecommunication

CHAPTER I—FEDERAL COMMUNICATIONS COMMISSION

[FCC 76–717; Docket No. 20234]

PART 21—DOMESTIC PUBLIC LAND MOBILE RADIO SERVICES (OTHER THAN MARITIME MOBILE)

Power Limitations of Transmitters

1. On November 14, 1974, we initiated this proceeding by issuance of a Notice of proposed rulemaking, 39 FR 40590, for the purpose of promulgating in Part 21 of the Commission's rules a new regulation concerning the output power of mobile stations in the Domestic Public Land Mobile Radio Service.

2. A review of Part 21 of the Commission's rules had disclosed that current applicable provisions would appear to permit land mobile stations to operate at transmitter output powers equal to that of base stations. Although airborne stations are limited by the rules to 25 watts output power, land mobile stations are limited only by policy to 60 watts output power, and so it appeared necessary to formally include the 60 watt limitation in the rules to reduce the radio interference potential of mobile stations operating in the extremes of the service area of their associated base station.

3. The proposed rulemaking would have set an upper limit of 60 watts "rated" power output on all "land mobile transmitters" licensed in the future and would have excluded the use of external radio frequency amplifiers.

4. Comments have been filed on the proposed rulemaking by the following parties: Fresno Mobile Radio, Inc. (Fresno) on December 2, 1974; The National Association of Radiotelephone Systems (NARS) on December 19, 1974; The American Telephone and Telegraph Company (AT&T) on December 20, 1974; and Motorola, Inc. (Motorola) on December 20, 1974.

5. The majority of the comments support the proposed rulemaking being considered by this Report and Order, but suggestions concerning the use of external radio frequency amplifiers and requests for clarification of terminology have been made.

6. Of those filing comments, only Fresno has serious objections to the proposed rule, Fresno's objections to the proposal are: (1) Limiting the power output of mobiles to 60 watts would put RCC's (Radio Common Carriers) at more of a competitive disadvantage to stations in Business Radio and Special Industrial services who operate their mobile units in most cases at a maximum input power of 180 watts (i.e. 90 watts output assuming 50 percent efficiency of

V 41 154 AUG 9 76 UMI

the final radio frequency stage); (2) Subscribers in remote rural areas need all the power possible to talk out; (3) Since most of Fresno's VHF base stations operate at 80 watts output, to enable the mobiles to communicate with the base station, equal power should be allowed for mobile units even if special waivers are required; and (4) Much of the existing mobile equipment available is type accepted at output powers of 110 watts or higher.

7. NARS contends that the proposed rule should be adopted, however it objects to the provision banning the use of external radio frequency amplifiers except if otherwised authorized. In support of its position NARS uses an example of equipment where the use of external amplification is necessary. NARS states that many subscribers to DPLMRS facilities have been utilizing handheld portable units to meet both their mobile and portable requirements. When used as portables these units could operate without external radio frequency amplifiers, but when used in a vehicle as a mobile unit the power amplifiers are necessary to obtain the same performance as a regular mobile unit. NARS believes that requiring specific authorization for these amplifiers would be unnecessary if the rule allowed the use of external amplification as long as the output power of the transmitter and amplifier combined does not exceed the 60 watt limitation.

8. AT&T also supports the proposed rule making as being beneficial in reducing potential radio interference from mobile units. In addition, AT&T believes that with good engineering there would be no need for mobile stations to ever exceed the 60 watt limitation.

9. Motorola supports the proposed rule making but requests clarification as to whether the rule will apply only to mobile units and whether waiver requests to operate in excess of the limitation will be granted upon proper showing by the applicant. Motorola's first reservation is based on the fear that the wording "land mobile transmitter" might be construed as meaning base stations as well as mobile stations. Their second reservation is based on the fear that if 60 watts were not sufficient due to terrain or some other unusual circumstance the applicant would have no other recourse but to limit his service area or go off the air due to poor service to the subscriber.

10. With regard to Fresno's first argument that the limitation on power would put RCC's at a competitive disadvantage with stations in the Business Radio and Special Industrial Services (services in the Safety and Special Radio services (SSRS)), the Commission wishes to point out that stations in the DPLMRS and in the SSRS are not considered to be in direct competition. Stations in the DPLMRS are operated on an interference-free basis. Stations in the SSRS operate without protection from harmful co-channel electrical interference. Because of this difference, each of these services appeals to a different segment of the radio user market and thus, are not in direct competition. Therefore, the 60 power output limitation in the DPLMRS would not place the RCC at a competitive disadvantage.

11. Both Motorola and Fresno are concerned with the ability of mobile stations to communicate with their associated base station when operating in remote regions or in areas of rugged terrain. We do recognize that RCC's, in many cases, do not have the engineering and monetary resources to draw upon to implement the complex systems that may be necessary to overcome these propagation problems. Therefore, upon a significant showing that 60 power output is insufficient for effective mobile operation and that other engineering solutions are not feasible, requests for waiver of this rule will be considered and noted on either the base station or the individual mobile station authorization if granted.

12. With regard to Fresno's comment that much of the existing mobile equipment is type accepted under Part 21 of the Commission's Rules for rated output powers greater than the 60 watt limitation, we have changed the proposed rule so that it would limit output power and not necessarily rated output power. This change would allow the use of a mobile station transmitter type accepted under Part 21 with a rated power output greater than 60 watts as long as the actual output power was reduced to the 60 watt limitation. The appropriate change has been made in the rule. See text below.

13. NARS has objected to the restriction of external radio frequency (R.F.) power amplifiers because R.F. power amplifiers would allow hand-held portables to operate in a vehicle with the same capabilities as a regular mobile unit. The Commission has type accepted under Part 21 portable transmitters capable of use with mobile mounting facilities which amplify the signals of the portable transmitters. Both operational configurations are included under a single type acceptance grant. We intend to continue the authorization of such equipment for use under Part 21, and therefore believe the concerns of NARS are adequately addressed. We will consider that R.F. power amplifiers are acceptable when included as part of a transmitter-amplifier combination type accepted by the Commission. However, we stress that the combination of transmitter and amplifier must be type accepted by the Commission. In addition, the power output of the combination must not exceed the 60 watt limitation. The rule has been amended to reflect these considerations. See text below.

14. Motorola is fearful that the language of the rule may lead to confusion because the terminology, "land mobile transmitter", could be construed to mean base station transmitter as well as mobile transmitter. Therefore, the rule has been changed so that the wording is in exact accordance with the definitions listed in Part 21.1 of the Commission's rules. The wording land mobile transmitter has been changed to land mobile station transmitter and the wording airborne mobile transmitter has been changed to airborne station transmitter. Land mobile station and airborne station are defined in § 21.1. The term transmitter as it applies here has been defined in paragraph 13 of this order. Therefore, the rule has been amended accordingly. See text below.

15. Accordingly, *it is hereby ordered*, That pursuant to the authority contained in sections 4(i) and 303 of the Communications Act of 1934, [47 U.S.C. sections 154(i), 303], Part 21 of the Commission's rules and regulations Is Amended as set forth below, effective September 9, 1976.

(Secs. 4, 303, 48 Stat., as amended, 1066, 1082; 47 U.S.C. 154, 303.)

Adopted: July 27, 1976.

Released: August 5, 1976.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

Part 21 of Chapter 1 of Title 47 of the Code of Federal Regulations is amended as follows:

1. Section 21.506, paragraph (b) is redesignated as paragraph (c) and new paragraph (b) is added to read as follows:

§ 21.506 Power limitations.

* * * * *

(b) The power output of land mobile station transmitters shall not exceed 60 watts. The power output of airborne station transmitters shall not exceed 25 watts. A transmitter may consist of an exciter plus a radio frequency power amplifier provided that such a combination is type accepted by the Commission.

* * * * *

[FR Doc.76-22992 Filed 8-6-76;8:45 am]

[FCC 76-730; Docket No. 20764]

PART 73—RADIO BROADCAST SERVICES

Free Time for Candidates

Adopted: July 27, 1976; Released: August 5, 1976.

In the matter of amendment of the Commission's rules to require stations to notify opposing candidates of gifts of time for use within 72 hours prior to the day of an election.

1. The Commission has before it the Notice of proposed rule making in this proceeding, 41 FR 15425, adopted April 1, 1976, and the filings in response to the Notice. Comments were filed by American Broadcasting Companies, Inc. ("ABC"), National Broadcasting Company, Inc. ("NBC"), Post-Newsweek Stations ("Post-Newsweek"), Henry Geller and the National Association of Broadcasters ("NAB"). Post-Newsweek was the only party to file reply comments.

2. At issue in the proceeding is a situation in which a licensee provides free time to be used by or on behalf of one or more (but not all) candidates for a public office during the period 72 hours before an election. Specifically, the Commission proposed a rule which would require the licensee in such instances to notify all other candidates early enough of this giving of free time so they could assert their "equal opportunities" or "Zapple"[1] rights, whichever applied. As proposed, the rule paralleled one already in force which, inter alia, utilized such a notification procedure in cases where a licensee during the 72 hour period before the election editorialized on behalf of one or more candidates or against one or more opposing candidates. In Dolph-Pettey Broadcasting Co., 30 F.C.C. 2d 675 (1971) the Commission ruled that notification of candidates during the closing days just before the election was necessary, and pointed out that failure to notify opposing candidates of the giving of free time could in effect nullify the statutory right to equal opportunities. To avoid such a result, the Commission proposed (as in Dolph-Pettey it said it would) a rule requiring the licensee to employ a notification procedure in such cases.

3. The parties which filed in this proceeding did not question the goal of the rule proposed. They did question the need for the rule to achieve such a result. Moreover, they feared that the rule if adopted could cause considerable harm. Damage, they asserted would be caused to public and licensee alike. In their view, a licensee would not be able to discharge the obligations imposed by the rule and thus would tend to avoid political programs as a means of protecting itself from the predicament the rule would create. Therefore, they ask that no rule be adopted. Alternatively, one party suggested another means than notification to achieve the purposes for which the rule was designed.

4. Several parties expressed particular concern about the obligation to notify all opposing candidates, as they doubt the licensee would know all of those it would be required to inform. CBS in particular has detailed the difficulties which would obtain in determining who all the legally qualified candidates are. It claims that many candidates, particularly write-in candidates, are not known, and, it does not see how a licensee could comply with a rule mandating notification of all candidates. While it believes that the Commission did not intend any "chilling effect" it fears that such would be its inevitable impact.

5. The filing parties express other reasons for questioning why such a rule is needed when the consequence could be so severe. They point, for example, to a possible inadvertent appearance of a candidate, as on a call-in show. In such a case a licensee would not be prepared to respond through notification. Thus, if a rule were to be adopted, NBC asked that it be limited to apply only to instances where the time was turned over to the candidate for use without restriction. CBS offered an argument in some respects similar when it viewed the key ingredient which distinguished this proposal from the existing rule applicable to editorializing as the fact that the latter is under the direct control of the licensee. This, it believed, could warrant use of a separate standard, one that could not legitimately be applied here.

6. Other practical problems were mentioned such as the fact that most elections are on Tuesdays, so the preceding three day period is mostly on the weekend. The parties questioned how a notification process could successfully function then when there might well be no way to contact many of the candidates. PBS states that it has a particular problem in regard to the proposed rule dealing with the giving of free time by virtue of the fact that its member stations are noncommercial. Thus, all time is free, so that the rule would have a more severe impact. PBS doubted that a licensee could discharge its responsibility to determine who to notify unless candidates were required to step forward and document the fact that they are legally qualified. Other parties echoed this point about a licensee's lack of information upon which to judge who to notify.

7. With all this in mind, the commenting parties question the need for a rule when, in their view, there has not been a serious or recurring problem. Thus, they conclude that the need is not great and they urge us not to proceed with the adoption of the rule just on behalf of a theoretical objective. Only the NAB offered a suggestion of a possible alternative approach which could possibly avoid the concerns which had been raised and yet would accomplish the desired ends. While others offered alternatives, if the Commission were determined to proceed, they were simply a more restricted version of the original proposal. The NAB proposed that instead of adopting a rule requiring notification of all candidates about the licensee's having given free time, the rule could be amended to treat gifts of time on the same basis as requests for time.[2] Thus, all candidates could become aware that free time is to be or has been given and the process for doing so would not involve the burdens which notification would entail.

8. Although we believed the proposed rule would serve an important purpose, it was not premised on the current existence of serious or frequent abuses. Rather it was designed to avoid the potential for such abuse (or the appearance of it). These are important goals, but we have become aware that the method proposed to deal with the situation could create more problems than it would solve. Unless another mode of responding can be developed which would avoid these problems, it would be better to continue with the present situation. Fortunately, we believe that an arrangement has been devised that will be satisfactory in practice and will respond to the concerns expressed in the filings.

9. The choice we have decided to follow is a variation of a suggestion made by the NAB. In essence, NAB urged us to use a procedure which paralleled the one now in use for candidate-initiated purchases of or requests for time. Licensees are already required to maintain a political file at the station and to promptly place pertinent material in the file for public examination. With this material as a guide, candidates are in a position to exercise the right to equal opportunities. Licensees would be able to examine the documentation offered and decide whether the candidate is legally qualified. The key element here is that the licensee does not have to guess or operate in the dark. It can require the submission of the information it needs to establish the legally qualified status of the candidate. While it is true that the burden is placed on the candidate to assert a right to equal opportunities, it is by no means an unfair one. The method of responding is clear, simple and easy to follow. The licensee is then in a position to reply to any such request as might be received. This process provides the licensee with the data needed to make the necessary judgments on these requests and avoids the problems which would arise if the licensee had to notify all candidates. Adopting such a procedure here is considered a fair balance of the equities involved and should prove beneficial in its operation.

10. Accordingly, we are adopting rules[3] which will require that the licensee immediately place in the station's political file information regarding all non-exempt[4] gifts of time for use during the three days preceding the election. Time is most clearly of the essence here, so no delay in placing the material in the file would be acceptable.

11. The rule we are adopting does not distinguish between appearances by a candidate and broadcasts on behalf of a candidate; the latter, which do not constitute a "use" because the candidate himself does not appear, are governed by Zapple and subsequent cases. Requiring the licensee to include this material is not intended to indicate that a request for time necessarily need be granted under Zapple. Thus no conflict exists between our action here and the Fairness Report which stated that Zap-

[1] Equal opportunities applies to non-exempt candidate appearances and Nicholas Zapple, 23 F.C.C. 2d 707 (1970), applies to appearances by others on a candidate's behalf.

[2] Licensees are required to maintain files for public inspection which must contain all requests for time by or on behalf of candidates, the disposition of the request, and the charges, if any, that are made.

[3] Because of the change from a notification procedure to one involving record keeping, there is a change in the particular rule sections affected.

[4] Since exempt uses give rise to no right to equal opportunities, there is no reason to include them within the coverage of the rule.

V 41 154 AUG 9 76 UMI

ple "did not establish that in the political broadcast field there is now a quasi-equal opportunities approach applicable to all candidates and parties, including those of a fringe nature," 48 F.C.C. 2d 1 at 44 (1974). Now that we have decided that a simple entry in the file will suffice, we leave the Zapple area unaffected by our action here and no further discussion in that regard is required.

12. Accordingly, *it is ordered*, That pursuant to the authority contained in sections 4(i), 303(r) and 315 of the Communications Act of 1934, as amended, §§ 73.120(d), 73.290(d), 73.590(d), 73.657(d) and 76.205(c) are amended to read as set forth below, effective September 10, 1976.

13. *It is further ordered*, That this proceeding is terminated.

(Secs. 4, 303, 315, 48 Stat., as amended, 1066 1082, 1088; 47 U.S.C. 154, 303, 315.)

Adopted: July 27, 1976.

Released: August 5, 1976.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

1. In § 73.120, paragraph (d) is revised as follows:

§ 73.120 Broadcast by candidates for public office.

• • • • •

(d) *Records, inspection.* Every licensee shall keep and permit public inspection of a complete record (political file) of all requests for broadcast time made by or on behalf of candidates for public office, together with an appropriate notation showing the disposition made by the licensee of such requests, and the charges made, if any, if request is granted. In addition, where a license provides free time for use by or on behalf of such candidates within 72 hours prior to the day of the election, the licensee shall immediately place a record of any free time provided in the station's political file. All records required by this paragraph shall be retained for a period of two years.

NOTE.—See § 1.526 of this chapter.

• • • • •

2. In § 73.290, paragraph (d) is revised as follows:

§ 73.290 Broadcast by candidates for public office.

• • • • •

(d) *Records, inspection.* Every licensee shall keep and permit public inspection of a complete record (political file) of all requests for broadcast time made by or on behalf of candidates for public office, together with an appropriate notation showing the disposition made by the licensee of such requests, and the charges made, if any, if request is granted. In addition, where a licensee provides free time for use by or on behalf of such candidates within 72 hours prior to the day of the election, the licensee shall immediately place a record of any free time provided in the station's political file. All records required by this paragraph shall be retained for a period of two years.

NOTE.—See § 1.526 of this chapter.

• • • • •

3. In § 73.590, paragraph (d) is revised as follows:

§ 73.590 Broadcast by candidates for public office.

• • • • •

(d) *Records, inspection.* Every licensee shall keep and permit public inspection of a complete record (political file) of all requests for broadcast time made by or on behalf of candidates for public office, together with an appropriate notation showing the disposition made by the licensee of such requests, and the charges made, if any, if request is granted. In addition, where a licensee provides free time for use by or on behalf of such candidates within 72 hours prior to the day of the election, the licensee shall immediately place a record of any free time provided in the station's political file. All records required by this paragraph shall be retained for a period of two years.

NOTE.—See § 1.526 of this chapter.

• • • • •

4. In § 73.657, paragraph (d) is revised as follows:

§ 73.657 Broadcast by candidates for public office.

• • • • •

(d) *Records, inspection.* Every licensee shall keep and permit public inspection of a complete record (political file) of all requests for broadcast time made by or on behalf of candidates for public office, together with an appropriate notation showing the disposition made by the licensee of such requests, and the charges made, if any, if request is granted. In addition, where a licensee provides free time for use by or on behalf of such candidates within 72 hours prior to the day of the election, the licensee shall immediately place a record of any free time provided in the system's political file. All records required by this paragraph shall be retained for a period of two years.

• • • • •

[FR Doc.76-23033 Filed 8-6-76;8:45 am]

PART 0—COMMISSION ORGANIZATION

Editorial Amendment

In the matter of editorial amendment of § 0.4, rules and regulations.

1. The Telephone and Telegraph Committees have been combined into the Telecommunications Committee. Section 0.4 of the Commission's Statement of Organization should therefore be amended to reflect this change.

2. Accordingly, it is ordered, effective August 16, 1976. That § 0.4 of the Rules and Regulations is amended as set forth below. Authority for this amendment is set out in Sections 4 (i) and (j) and 5(d) of the Communications Act of 1934, as amended, 47 U.S.C. 154 (i) and (j) and 155(d), and in § 0.231(d) of the Rules and Regulations, 47 CFR 0.231(d). Because the amendment is editorial and informational in nature, the prior notice and effective date provisions of 5 U.S.C. 553 are inapplicable.

(Secs. 4, 5, 48 Stat., as amended, 1064, 1068, 47 U.S.C. 154, 155.)

Adopted: August 2, 1976.

Released: August 3, 1976.

R. D. LICHTWARDT,
Executive Director.

In Part O of Chapter I of Title 47 of the Code of Federal Regulations, § 0.4 is revised to read as follows:

§ 0.4 Standing committees of Commissioners.

There are 2 standing committees of Commissioners, the Telecommunications Committee and the Subscription Television Committee. These committees are delegated authority to act or study and report on certain common carrier and subscription television matters.

[FR Doc.76-23079 Filed 8-6-76;8:45 am]

Title 50—Wildlife and Fisheries

CHAPTER I—U.S. FISH AND WILDLIFE SERVICE, DEPARTMENT OF THE INTERIOR

PART 32—HUNTING

Quivira National Wildlife Refuge, Kansas

The following special regulation is issued and is effective August 9, 1976.

§ 32.12 Special regulations; migratory game birds; for individual wildlife refuge areas.

KANSAS

QUIVIRA NATIONAL WILDLIFE REFUGE

Public hunting of migratory game birds on the Quivira National Wildlife Refuge, Kansas, is permitted from September 1, 1976 through January 31, 1977, inclusive, as set by federal and state regulations, but only on the areas designated by signs as open to hunting. These open areas, comprising 7,990 acres, are delineated on maps available at refuge headquarters, Stafford, Kansas and from the Area Manager, U.S. Fish and Wildlife Service, Federal Building, Room 1748, 601 East 12th Street, Kansas City, Missouri 64106. Hunting of migratory waterfowl, mourning doves, snipe, rails and woodcock is permitted when the respective seasons are concurrent with the seasons as designated by the Kansas Forestry, Fish and Game Commission subject to the following special regulations:

(1) Blinds—only temporary blinds constructed above ground of natural vegetation are permitted.

(2) Dogs—not to exceed two per hunter may be used only for retrieving.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through January 31, 1977.

CHARLES R. DARLING,
Refuge Manager, Quivira National Wildlife Refuge, Stafford, Kans.

JULY 23, 1976.

[FR Doc.76-23023 Filed 8-6-76;8:45 am]

PART 32—HUNTING

Quivira National Wildlife Refuge, Kans.

The following special regulation is issued and is effective on August 9, 1976.

§ 32.22 Special regulations; upland game; for individual wildlife refuge areas.

KANSAS

QUIVIRA NATIONAL WILDLIFE REFUGE

The public hunting of ring-necked pheasants, bobwhite, squirrel and rabbits on the Quivira National Wildlife Refuge, Kansas is permitted only in the areas open to waterfowl hunting. These areas, comprising 7,990 acres are delineated on maps available at refuge headquarters, Stafford, Kansas, and from the Area Manager, U.S. Fish and Wildlife Service, Federal Building, Room 1748, 601 East 12th Street, Kansas City, Missouri 64106. Hunting shall be in accordance with all applicable State regulations governing the hunting of ring-necked pheasants, bobwhite, squirrel and rabbits September 1, 1976 through January 31, 1977, inclusive, subject to the following special conditions:

(1) The use of rifles is prohibited for taking squirrel and rabbits.

(2) The hunting of any species after sunset is prohibited.

(3) The hunting of all upland game will close at the end of the ring-necked pheasant and/or bobwhite seasons.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through January 31, 1977.

CHARLES R. DARLING,
Refuge Manager, Quivira National Wildlife Refuge, Stafford, Kansas.

JULY 23, 1976.

[FR Doc.76-23024 Filed 8-6-76;8:45 am]

PART 32—HUNTING

Des Lacs National Wildlife Refuge, N. Dak.

The following special regulation is issued and is effective on August 9, 1976.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

NORTH DAKOTA

DES LACS NATIONAL WILDLIFE REFUGE

Public hunting of deer by those possessing a Special Federal Permit will be permitted on Des Lacs National Wildlife Refuge, North Dakota, except for a 1,000 acre area surrounding the town of Kenmare which is posted as "Closed to Hunting." The area open to hunting, comprising 17,740 acres, is delineated on a map available at the refuge headquarters and from the Area Manager, U.S. Fish and Wildlife Service, Post Office Box 1897, Bismarck, North Dakota 58501. Hunting shall be in accordance with all applicable State Regulations covering the hunting of deer, subject to the following conditions.

(1) All hunters must exhibit their hunting licenses, Special Federal Permit deer tag, game and vehicle contents to Federal and State Officers upon request.

(2) Vehicle travel is restricted to public highways and public roads crossing or passing through the refuge. The provisions of this special regulation supplement the regulations which govern hunting on National Wildlife Refuge Areas which are set forth in Title 50, Code of Federal Regulations, Part 32 and are effective through November 21, 1976.

AUGUST 2, 1976.

CHARLES S. PECK,
Refuge Manager, Des Lacs National Wildlife Refuge Complex.

AUGUST 2, 1976.

[FR Doc.76-23094 Filed 8-6-76;8:45 am]

PART 32—HUNTING

Lostwood National Wildlife Refuge, N. Dak.

The following special regulation is issued and is effective on August 9, 1976.

§ 32.32 Special regulations; big game; for individual wildlife refuge areas.

NORTH DAKOTA

LOSTWOOD NATIONAL WILDLIFE REFUGE

Public hunting of deer by those possessing a Special Federal Permit will be permitted on Lostwood NWR, North Dakota, except for a one mile square area surrounding the Refuge Headquarters buildings which is posted "Closed to Hunting". The area open to hunting, comprising 25,300 acres is designated by "Public Hunting Area" signs and is delineated on a map available at the refuge headquarters, and from the Area Manager, U.S. Fish and Wildlife Service, Post Office Box 1897, Bismarck, North Dakota 58501. Hunting shall be in accordance with all applicable State Regulations and the following special conditions.

(1) All hunters must exhibit their hunting licenses, Special Federal Permit, deer tag, game and vehicle contents to Federal and State Officers upon request.

(2) Vehicle travel is restricted to public highways and the refuge entrance road from State Highway 8 to Refuge Headquarters. The provisions of this special regulation supplement the regulations which govern hunting on National Wildlife Refuge Areas which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through November 21, 1976.

CHARLES S. PECK,
Refuge Manager, Lostwood National Wildlife Refuge.

AUGUST 2, 1976.

[FR Doc.76-23095 Filed 8-6-76;8:45 am]

V 41 154 AUG 9 76 UMI

PART 32—HUNTING

Lostwood National Wildlife Refuge, N. Dak.

The following special regulation is issued and is effective on August 9, 1976.

§ 32.22 Special regulations; upland game, for individual wildlife refuges.

NORTH DAKOTA

LOSTWOOD NATIONAL WILDLIFE REFUGE

Public hunting of sharp-tailed grouse and Hungarian Partridge on the Lostwood National Wildlife Refuge, North Dakota is permitted only on that area designated by signs as open to hunting during the 1976 State Game and Fish Department grouse and partridge season. The open area, comprising 4,720 acres during the period prior to deer gun season and 26,101 acres during the remainder of the grouse and partridge season following deer gun season, is delineated on maps available at the refuge headquarters, Kenmare, North Dakota, and from the Area Manager, U.S. Fish and Wildlife Service, Bismarck, North Dakota 58501. Hunting shall be in accordance with all applicable State regulations and the following special conditions.

1. Vehicle travel is restricted to public highways and the refuge entrance road from State Highway No. 8 to refuge headquarters. All other refuge roads and trails are closed to vehicles.

The provisions of this special regulation supplement the regulations which govern hunting on wildlife refuge areas, generally, which are set forth in Title 50, Code of Federal Regulations, Part 32, and are effective through December 31, 1976.

CHARLES S. PECK,
Refuge Manager,
Lostwood National Wildlife Refuge.

AUGUST 2, 1976.

[FR Doc.76-23096 Filed 8-6-76;8:45 am]

proposed rules

This section of the FEDERAL REGISTER contains notices to the public of the proposed issuance of rules and regulations. The purpose of these notices is to give interested persons an opportunity to participate in the rule making prior to the adoption of the final rules.

DEPARTMENT OF AGRICULTURE

Agricultural Marketing Service

[7 CFR Part 993]

DRIED PRUNES PRODUCED IN CALIFORNIA

Proposed Expenses and Rate of Assessment for 1976–77 Crop Year

Notice is hereby given of a proposal regarding expenses of the Prune Administrative Committee for the 1976–77 crop year and rate of assessment for that crop year, pursuant to §§ 993.80 and 993.81 of the marketing agreement, as amended, and Order No. 993, as amended (7 CFR Part 993), regulating the handling of dried prunes produced in California. The amended marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

The Prune Administrative Committee has recommended for the crop year beginning August 1, 1976, a budget of expenses in the total amount of $222,500 and an assessment rate of $1.51 per ton of assessable prunes. Expenses in that amount and the assessment rate are specified in the proposal hereinafter set forth. The assessable tonnage is estimated by the Committee at 148,000 natural condition tons.

Consideration will be given to any written data, views, or arguments pertaining to the proposal which are received by the Hearing Clerk, U.S. Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250, not later than August 20, 1976. All written submissions made pursuant to this notice should be in quadruplicate and will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The proposal is as follows:

§ 993.327 Expenses of the Prune Administrative Committee and rate of assessment for the 1976–77 crop year.

(a) *Expenses.* Expenses in the amount of $222,500 are reasonable and likely to be incurred by the Prune Administrative Committee during the crop year beginning August 1, 1976, for its maintenance and functioning and for such other purposes as the Secretary may, pursuant to the applicable provisions of the marketing agreement, as amended, and this part, determined to be appropriate.

(b) *Rate of assessment.* The rate of assessment for such crop year which each handler is required, pursuant to § 993.81, to pay to the Prune Administrative Committee as his pro rata share of the said expenses is fixed at $1.51 per ton of salable prunes handled by him as the first handler thereof.

Dated: August 4, 1976.

CHARLES R. BRADER,
Acting Director,
Fruit and Vegetable Division.

[7 CFR Part 993]

DRIED PRUNES PRODUCED IN CALIFORNIA

Undersized Regulation and Salable and Reserve Percentages for the 1976–77 Crop Year

Notice is hereby given of a proposal recommended by the Prune Administrative Committee to: (1) Establish salable and reserve percentages of 100 percent and 0 percent, respectively, for the 1976–77 crop year; and (2) establish an undersized prune regulation for prunes received by handlers from producers and dehydrators during the 1976–77 crop year. The proposals are in accordance with the provisions of the marketing agreement, as amended, and Order No. 993, as amended (7 CFR Part 993), regulating the handling of dried prunes produced in California. The amended marketing agreement and order are effective under the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601–674).

The Committee's recommendations are based on its estimate that California's 1976 dried prune production would approximate 165,000 tons (processed weight), and that carrying on August 1, 1976, the beginning of the 1976–77 crop year, of salable prunes from 1975 production would be about 33,000 tons.

The estimated 1976 production, coupled with the estimated carry-in would result in a supply exceeding 1976–77 trade demand for prunes by about 17,800 tons. However, the Committee recommended no volume regulation for the 1976–77 crop year. Instead, it recommended establishment of an undersized regulation applicable to all prunes received by handlers from producers and dehydrators during that crop year. The objective of the undersized regulation would be to remove the smallest—i.e., the least desirable—prunes from the 1976 crop. Handlers cannot market undersized prunes for human consumption, but can dispose of them in nonhuman consumption outlets such as livestock fed. The Committee estimated that the proposed undersized regulation would reduce the apparent excess of about 17,800 tons by approximately 12,400 tons, still leaving sufficient prunes to fulfill foreign and domestic trade demand during the 1976–77 crop year, and provide an adequate carryout on July 31, 1977.

Under the proposal, French variety prunes which pass freely through a screen opening $24/32$ of an inch in diameter would be classified as undersized prunes. For non-French prunes, the opening would be $30/32$ of an inch in diameter.

Consideration will be given to any written data, views, or arguments pertaining to the proposal which are received by the Hearing Clerk, U.S. Department of Agriculture, Room 112, Administration Building, Washington, D.C. 20250, no later than August 23, 1976. All written submissions made pursuant to this notice should be in quadruplicate and will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

1. Salable and reserve percentages for the 1976–77 crop year.

§ 993.212 Salable and reserve percentages for prunes for the 1976–77 crop year.

The salable and reserve percentages for the 1976–77 crop year shall be 100 percent and 0 percent, respectively.

2. The proposed undersized prune regulation for the 1976–77 crop year is as follows:

§ 993.403 Undersized prune regulation for the 1976–77 crop year.

Pursuant to §§ 993.49(c) and 993.52, an undersized prune regulation for the 1976–77 crop year is hereby established. Undersized prunes are prunes which pass freely through round openings as follows: For French prunes, $24/32$ of an inch in diameter; for non-French prunes, $30/32$ of an inch in diameter.

It is hereby certified that the economic and inflationary impacts of this regulation have been carefully evaluated in accordance with OMB Circular A–107.

Dated: August 2, 1976.

G. H. GOLDSBOROUGH,
Acting Director,
Fruit and Vegetable Division.

Notice is hereby given of the filing with the Hearing Clerk of this recommended decision with respect to proposed amendments to the tentative marketing agreements and orders regulating the handling of milk in the aforesaid marketing areas.

Interested parties may file written exceptions to this decision with the Hearing Clerk, United States Department of Agriculture, Washington, D.C. 20250, on or before August 24, 1976. The exceptions should be filed in quadruplicate. All written submissions made pursuant to this notice will be made available for public inspection at the office of the Hearing Clerk during regular business hours (7 CFR 1.27(b)).

The above notice of filing of the decision and of opportunity to file exceptions thereto is issued pursuant to the provisions of the Agricultural Marketing Agreement Act of 1937, as amended (7 U.S.C. 601 et seq.), and the applicable rules of practice and procedure governing the formulation of marketing agreements and marketing orders (7 CFR Part 900).

PRELIMINARY STATEMENT

The hearing on the record of which this recommended decision is based was conducted at Clayton, Missouri, on June 2-4, 1976, pursuant to notice thereof which was issued May 10, 1976 (41 FR 19650).

The material issue on the record of the hearing relates to whether the procedure for announcing the Class II price should be changed in the orders affected by this proceeding.

BACKGROUND

In 1970, interested parties asked the Department to conduct a rulemaking hearing on proposals to provide uniform classification provisions which ultimately included 39[1] milk orders. The Milk Industry Foundation, representing regulated handlers, proposed, among other things, that advance pricing be provided for Class II and Class III milk.

The hearings on these proposals were conducted in 1970 and 1971. In August 1974 the orders were changed to provide for 3 classes in place of the previous 2-class system. The proposal for advance pricing, however, was denied. MIF had requested that if there were to be three classes the Secretary should announce the Class II and Class III price on the 5th of the month for which the price was applicable. That is, on June 5th the Secretary would announce the Class II and Class III price for the month of June. Historically, the orders have provided that the price for producer milk going into manufactured products be announced on the 5th of the month following the month to which it was applicable.

In exceptions filed to the revised recommended decision, there was a general concensus among both handler (including MIF) and producer groups that the present method of announcing surplus prices should continue with respect to Class III milk. These groups generally urged, however, that the Class II price for the month be announced by the fifth day of the month and be based on the Minnesota-Wisconsin price for the preceding month.

In the decisions issued on the matters at issue the Assistant Secretary concluded that:

> • • • the prices paid by regulated handlers for Class III milk should correspond very closely with the pay prices during the month of delivery for manufacturing grade milk if these handlers are to be competitive in the sale of the principal surplus products.
>
> The same considerations are involved in the case of an advance announcement of prices for milk used in the proposed Class II products. The influence of the manufacturing milk price level on the competitive relationship of producer milk for Class II use is similar to that for producer milk used in the proposed Class III products. Therefore the price for Class II milk should be announced on the same basis as the price for Class III milk. (Ref. 39 FR 8731, March 6, 1974)

It was intended that these conclusions would be weighed in the context of earlier findings in the decision dealing with the appropriate level and procedure for pricing surplus milk which clearly established the problem which can result when Class II and Class III prices get out of alignment with each other or with manufacturing grade milk values.

[1] The number later was reduced to 32 through the merger of various orders in Texas and in the Upper Midwest. The Appalachian and Knoxville orders are included in this proceeding (bringing the total to 34) because they are involved in a merger proceeding with the Chattanooga market which originally was included in the uniform classification proceeding.

Previously in the decision in discussing the appropriate means of pricing surplus milk the Assistant Secretary stated:

> • • • as adopted herein the new Class II price under each order would be the Minnesota-Wisconsin price plus 10 cents. Should the Class III price drop significantly below the price for producer milk used in Class II, there would be an incentive for processors of such Class II products as ice cream and cottage cheese to displace producer milk with nonfat dry milk and butter made from milk priced at the lower Class III price. The net effect of this practice would be an uneconomical lowering of total returns to producers. (Ref. 39 FR 8719, March 6, 1974)

The Assistant Secretary stated further in the decision:

> Although cooperatives proposed Class II price differentials of 10, 15, 20 and 25 cents, the Class II differential for each market should be the same. The distribution of the adopted Class II products from a single plant often extends over a broad region encompassing several Federal order marketing areas. Numerous examples were cited on the record concerning the widespread sales of yogurt, cream items, frozen desserts, and cottage cheese in particular. Because of the intermarket competition, a uniform Class II price differential should be provided in these orders to complement the uniform classification provision. A price differential of 10 cents reasonably reflects the added value which handlers are able to pay for producer milk in such uses as compared to processing milk supplies or finished products from other sources. (Ref. 39 FR 8722, March 6, 1974)

Following the decision, and order, 57 handlers regulated by 26 marketing orders filed a petition pursuant to section (15)(A) of the Act. The petition alleged that the Secretary erred in denying the MIF proposal for advance pricing on Class II milk. The arguments were made by petitioners that the method of pricing Class II milk, as currently found in the orders, was a denial of due process, that the Secretary lacked statutory authority for such pricing and that the hearing record did not contain substantial evidence supporting the Secretary's decision for denying the proposal.

On April 29, 1976, the Judicial Officer issued a decision and other in which he found the provisions of the 26 marketing orders not to be in accordance with law. In reaching this conclusion he found the findings of the Assistant Secretary in the decision to deny advance pricing for Class II milk to be "totally inadequate." The Judicial Officer also found that he could not, on the basis of the evidence in record, agree with the petitioners' proposed findings that their proposed method of pricing would effectuate the purposes of the Act. He also denied petitioners' contention that the Secretary lacked statutory authority for the present method of pricing and that such pricing was a denial of due process. In summary, the Judicial Officer's decisions supported the Secretary in all aspects, with the exception of the inadequate findings in the decision following the rulemaking proceedings.

The Judicial Officer referred the matter to the Secretary in order that the Department could take whatever corrective action it deemed necessary. The Judicial Officer retained jurisdiction of the

proceeding for purposes of allowing the petitioners to come before the Judicial Officer if they were not satisfied with the corrective action taken by the Department. The Department concluded that a hearing should be convened to consider further the issue of advance pricing for Class II milk.

FINDINGS AND CONCLUSIONS

The following findings and conclusions on the material issue are based on evidence presented at the hearing and the record thereof:

Class II pricing. The orders should not be amended to change the procedure for announcing the Class II milk price.

The orders presently provide that the Class II milk price shall be the basic formula price for the month (the Minnesota-Wisconsin price) plus 10 cents. The orders provide further that the market administrator shall announce publicly on or before the 5th day of each month the Class II price for the preceding month.

A number of the handlers regulated by the orders covered by this proceeding were represented at the hearing by the Milk Industry Foundation and the International Association of Ice Cream Manufacturers. The Milk Industry Foundation is a trade association representing fluid milk processors regulated by each of the orders under consideration in the proceeding. Members of the association operate about 1,000 fluid milk processing plants and process about 75 percent of the total fluid milk packaged in the U.S. The Foundation also represents some of the companies which manufacture, distribute and sell cottage cheese, yogurt, dips, dressings, sour cream, and other products which are included in the Class II definition of the orders covered by this proceeding.

Likewise, the International Association of Ice Cream Manufacturers is a trade association representing a number of manufacturers of frozen desserts. These include ice cream, ice milk, sherbets, milk shakes and other mixes and combinations which are classified as Class II by the orders in this hearing. Members of the association operate 800 frozen dessert plants and manufacture about 85 percent of the total frozen desserts manufactured in the U.S.

The associations made alternative proposals at the hearing to:

(1) Announce the Class II prices on the same date as Class I prices are announced (Under present procedures this would provide that the Minnesota-Wisconsin price, which is announced on the 5th of each month, be applied to milk purchased the following month; thereby providing for a 25-day advance notice in most months); or (2) use the Minnesota-Wisconsin price announced on the 5th day of the month to set the Class II price effective on the 20th of the month, or on the first Monday following the 20th of each month to accommodate the current policy of the many retailers to make price changes on Mondays.

A third proposal was offered which would provide about 15 days advance notice by revising the method of computing the basic formula price of the respective orders and the announcement date of the Class II price. After objections and arguments by interested parties, the Administrative Law Judge presiding ruled that the proposal to modify the basic formula price was outside the scope of the hearing notice and the workpapers and exhibits supporting such proposal were excluded from evidence. On this basis, no further consideration concerning this proposal is given herein.

Producer cooperative associations were generally represented by the National Milk Producers Federation. The Federation is an organization whose membership consists exclusively of cooperative associations of dairy farmers and federations of such cooperative associations. Milk of one or more member cooperative associations is marketed in each area regulated by a Fedreal order subject to the hearing.

The producer association represented by the Federation, and most other producer representatives who appeared at the hearing, testified that advance Class II pricing should not be adopted on the basis of this proceeding. They pointed out that studies were underway in an effort to devise a means whereby the desires of handlers for more current surplus class price announcements might be accommodated in conjunction with a modification of the Class I pricing procedure. In the interim they argued that any effort to modify the Class II pricing procedure on the basis of this record could only create problems which would have serious disruptive and disorderly effects on milk marking under the respective orders.

Handlers testified that they do not know the Class II milk price until the 5th day after the close of the month. They pointed out that they have brought the raw milk, manufactured various Class II products, generally sold such products to their customers, and often have made collections for such sales without knowing the cost of the most important single cost element involved in the price of such products. They allege that they cannot estimate or anticipate the actual Class II price with sufficient accuracy or consistency to serve as a reasonable basis for costing and thus are placed in an intolerable and unwarranted competitive position.

The announcement of class prices, other than Class I, after the end of the month has been traditional under Federal milk orders and has never previously been challenged. The apparent reason for the current challenge is that the time involved in effectuating resale price changes has been significantly extended in recent years. Currently, a large percentage of Class II items processed is sold to retail food chains which are highly concentrated organizations. Usually, cottage cheese, yogurt, ice cream, and similar products which are supplied to such stores are bought centrally. Frequently, prices for Class II products sold through the individual stores of the chain are established for entire divisions at a central level. According to proponents, this activity requires planning and, most importantly, communication with a number of people in order to effectuate a price change.

After receiving notification of the Class II price which necessitates changes in prices to wholesale accounts, handlers must prepare new price lists and discuss the contemplated price changes with their customers who in turn, if agreeing to the change, must notify their own retail outlets of any changes which may be appropriate. Handlers' testimony is that usually changes in a Federal order handler's Class II product prices cannot be effective until retail store prices can be adjusted. Handlers claimed that to implement the entire pricing procedure in an orderly manner there must be at least 15 days' notice from the time Class II prices are announced until they become effective.

In describing the foregoing situation, handlers stressed that the food industry is characterized by vigorous competition. Each package size of each item the manufacturer or retailer handles is a factor in his ultimate gross margin. In the case of staple products, such as dairy products, a change in the retail price may weigh heavily in forming a consumer's view of the store's general price level. Thus, according to proponents, retailers are always concerned that any increase in the retail price of dairy products will result in reduced overall sales and a reduction in gross margin dollars rather than an increase.

The general procedure involved in implementing a price change was represented as follows: (1) Pre-notification of the customer that a price change is imminent; (2) transmission of a new price list and negotiation with the customer; (3) management decision on the part of the retail food chain regarding new prices; (4) preparation of a new price list by the retail food chain for distribution to each store; (5) distribution of the new price list to each store; and (6) effectuation of the new price list.

Proponents urged that Class II prices be announced on the same date that Class I prices are announced. Under present procedures this would require that the Minnesota-Wisconsin price for the preceding month, which is announced on the 5th day of the month, be the applicable price for milk purchased the following month, thereby providing for a 25-day advance notice in most months. As an alternative they proposed use of the Minnesota-Wisconsin price announced on the 5th of the month as the Class II price for the period from the 20th of the month through the 19th of the following month. They further suggested the possibility of making the price effective for the period beginning on the first Monday following the 20th.

Proponents testified at length that handlers would not be disadvantaged under advance pricing for Class II milk. Presumably, this point was stressed to refute one of the findings to this effect set forth in the Department's decision

V 41 154 AUG 9 76 UMI

denying advance Class II pricing. However what proponents have failed to understand is that the basic concern of the Department relates to the marketing problems which would result from price disparities between regulated handlers who use producer milk in the manufacture of Class II products, and dealers using nonfederally regulated supplies. Because regulated handlers can readily adjust their operations to remove the competitive disadvantages, it is producers who in the end suffer the adverse consequences of the price disparities.

As would be expected, the evidence in this proceeding is that because regulated handlers have flexibility to adjust their operations, they would not be disadvantaged under advance Class II pricing in competing with unregulated handlers. Under normal circumstances if the Class II price were too high in relation to the Class III price, regulated handlers could reject producer milk and buy cheaper ingredients made from Class III milk for making Class II products. This would insure that they continue to be competitive with unregulated handlers. On the other hand, if the Class II price were lower than the Class III price, regulated handlers would have a strong incentive for the use of lower-price producer milk in producing Class II products. Under such circumstances they would actually have an advantage in competition with unregulated handlers.

Producer witnesses testified, almost unanimously, that the present Class II pricing provisions should not be changed on the basis of this proceeding. They contended that adoption of provisions for advanced announcement of the Class II price under existing circumstances would set the stage for disorderly marketing conditions which could only result in reduced returns to producers generally.

The record evidence indicates that cottage cheese and frozen desserts represent an important outlet for reserve milk supplies in regulated markets. For 1975, about 11 percent of the producer milk priced under the orders in this proceeding was used in Class II, and over 75 percent of such Class II utilization was represented by cottage cheese and frozen desserts.

Cottage cheese and frozen dessert plants, for the most part, are located in heavily populated areas and are most often operated in conjunction with the fluid milk business. Proprietary handlers seemingly prefer fresh producer milk in the production of Class II products, particularly cottage cheese. Accordingly, they look to producers and their cooperative associations for a supply of fluid milk for such Class II utilization.

While proprietary handlers may desire a regular and dependable supply of milk for use in Class II, they are not required by the respective orders to accept any milk they do not need or want. Furthermore, handlers' needs for local milk for Class II use are strongly influenced by price considerations. Dairy farmers, on the other hand, must have a market for their milk every day of the year.

Cooperative associations generally perform the essential role of balancing handlers' needs, and of providing an assured market for their member producer milk. This is an important consideration in evaluating whether disorderly marketing conditions could result from adopting advance pricing for Class II milk.

An analysis of data introduced into evidence shows that if advance pricing of Class II milk, based on the basic formula price of the second preceding month, had been in effect for the 52-month period of January 1972 through April 1976, there would have been 30 months (nearly 60 percent of the time) when the Class II price would have been lower than the Class III price. In only 10 months (20 percent of the time) would the Class II price have exceeded the Class III price by more than 10 cents.

The prevalence of Class II prices that are lower than Class III prices could not promote continuing orderly marketing conditions. Several tables of a handler exhibit introduced into evidence computed the values of butterfat and nonfat dry milk solids using the current, previous and second preceding month's Minnesota-Wisconsin price. The computed values were compared with the value of butterfat and nonfat milk solids based on market prices of butter and powder. This data purported to demonstrate that advance pricing would not result in sufficient price differences to influence handler decisions to use producer milk for Class II.

The market prices of butterfat and nonfat milk solids of course reflect the processing costs of converting whole milk into butter and powder. No comparable costs were included in the calculations for converting the various Minnesota-Wisconsin prices into the value of butterfat and nonfat milk solids; i.e., separation and other related processing. Thus, it is not surprising that the data might indicate that handlers would have no significant incentive to purchase manufactured products for use in the processing of Class II items rather than using producer milk. Additionally, the calculations did not reflect the 10 cent Class II differential which would add about 1-cent per pound to the cost of nonfat solids in producer milk.

The data presented by proponents indicate that the value per pound of fat does not alter appreciably whether the current, preceding, or second preceding month's Minnesota-Wisconsin price is used to establish the Class II price. There are two reasons why the proposed advance pricing has but a minor effect on the butterfat value. First and most importantly, the butterfat differential used in computing the value of butterfat, is based on the current month's butter quotations. This is prescribed by the order. Secondly, since the announced price is for milk containing 3.5 percent butterfat, most of the weight of any price change in the Minnesota-Wisconsin series necessarily is allocated to the skim value. Thus, considering butterfat values only, it would take a 3-cent per pound change in butterfat value to cause a 10 cent price change for milk of 3.5 percent test. In only 2 of the 51 months (January 1972–March 1976) would the proposed 2-month advance pricing yield a butterfat value difference in excess of 3 cents per pound.

Based on data in the record for the period January 1972 through March 1976, skim milk values computed from the Minnesota-Wisconsin price of the second preceding month would have been higher in 10 months, and lower in 41 months than skim milk values computed from the Minnesota-Wisconsin price for the current month. When it is considered that the Class II price is 10 cents over the Class III price, the resulting situation is that the Class II skim values would have been less than Class III skim values in 29 months, or more than one-half the time.

The largest proportion of Class II skim milk use is in the production of cottage cheese. During 14 of the 51 months (about one-fourth of the time) use of the second preceding month's Minnesota-Wisconsin price would have resulted in a skim milk value more than 44 cents less than that which would have resulted from use of the current month's Minnesota-Wisconsin price. Since it is commonly accepted that 100 pounds of whole milk will yield about 15 pounds of cottage cheese curd, a 44 cent per 100 pounds lower price would be the equivalent of 3 cents per pound on cottage cheese. Handlers subject to advance Class II pricing who make cottage cheese thus would have had at least a 3-cent per pound advantage over other cottage cheese manufacturers about one-fourth of the time. This could have far reaching consequences since the record indicates that cottage cheese sales are very competitive in the retail market and hence resale prices tend to reflect current adjustments in ingredients costs.

Other cottage cheese manufacturers competing for sales with regulated handlers under these orders would almost necessarily have to adjust their prices to remain competitive and absorb the cost or risk loss of sales to handlers subject to the advance notice. In either case, a secondary result would be the shifting of milk supplies away from cottage cheese into other higher-valued surplus uses. Such higher-valued uses under such circumstance likely would be butter-powder or hard cheese. The increased quantities of milk going into these residual milk products reasonably could be expected to have a depressing effect on manufacturing milk values and hence on the Minnesota-Wisconsin price. This would effect a lower basic formula price which in turn would lower the pool value of milk in all classes under the respective orders. Such effect would not be reflective of any change in total milk supplies, relative to demand. Advance pricing under such circumstances could not be concluded to be in furtherance of the expressed purposes of the Act.

The foregoing illustrates precisely the type of problem which could be created

by advance Class II pricing under existing circumstances. Over the past several years advanced pricing would have resulted in Class II prices as high as $1.52 per hundredweight over the Class III price and as low as $1.03 per hundredweight below the Class III price. Such price variances would have been in direct contradiction with the Department's finding that appropriately the Class II price should be maintained at a level 10 cents over the Class III price. Even handlers testified at the June 1976 hearing that this relationship should not be changed.

Witnesses for cooperative associations testified that they foresaw no end to the volatility of dairy product prices of the past few years. Substantial upward and downward movement is anticipated at least over the next 18 months. While handlers testified that there is less likely to be the degree of price volatility there has been in the past, their prognostication was limited to the period through December 1976.

A provision for advance Class II pricing in the respective orders would have far greater consequences than merely providing handlers with a convenient means of implementing resale price changes for their customers. Disorderly marketing conditions readily could be created in any circumstances where order Class II prices are lower than residual manufacturing milk values (Class III price).

The evidence on the record indicates that returns to producers under these orders would have been reduced by $14 million if advance Class II pricing, based on the basic formula price of the second preceding month, had been in effect from the effective date of the uniform classification provisions (August 1974) through April 1976. During that period the Class II price would have averaged 11 cents less than the Class III price instead of being 10 cents over the Class III price as presently prescribed.

If advance Class II pricing had been based on the basic formula of the preceding month, producer revenue would have been decreased $6 million, and the Class II price would have averaged about the same as the Class III price.

The 10-cent Class II differential was established in recognition of the additional value of Class II milk to handlers and as a partial compensation to producers for the additional costs in moving milk for such use to the central market. Advance Class II pricing, in effect, would have created a negative differential which would have resulted in an unjustified reduction in producer returns. There is no economic justification why dairy farmers or cooperative associations should sell milk for Class II use for a price less than the Class III price plus 10 cents.

Whenever the Class II price was lower than the Class III price, cooperative associations would have a strong urgency to move the milk into other manufacturing uses (Class III) because there would be no economic incentive for the delivery of milk to the central market for Class II use. On the other hand, whenever the Class II price was above the Class III price handlers would have an incentive to use other source milk in the form of butterfat and nonfat dry milk or condensed skim milk and turn member milk back to cooperatives.

The number of facilities available for processing butter, hard cheese, and nonfat dry milk has gradually diminished over the years. While facilities are generally adequate for processing reserve milk into Class III products, it is often necessary to move milk great distances to available facilities. If dairy farmers through their cooperative associations were forced to find alternative markets for milk previously used in Class II, substantial additional hauling costs would be incurred in many circumstances in moving milk to widely scattered and distant manufacturing facilities. This could only result in lower net returns to member producers.

Where convenient manufacturing outlets are not available there could be an incentive to seek fluid outlets in other than normal markets. This could result in a competitive situation in which it might be impossible to recover necessary service charges to the end that serious disorderly marketing conditions could be created.

Under usual situations in most markets it is cooperative associations that coordinate the disposition of the market's normal seasonal reserves. Because cooperatives are committed to an assured market for their members' milk, handlers buying member and nonmembers milk usually adjust their supply by adjusting the intake of cooperative member milk. If cooperatives were asked to handle additional milk, formerly used in Class II, this would, in many cases, tax this coordination severely and result in uneconomic and costly movement of milk. As a specific example, one producer witness testified that if the cooperative association's plant at Franklinton, Louisiana, had to handle milk in excess of capacity because milk previously used in Class II in the Greater Louisiana order had to be processed, other milk might then have to be moved into Kentucky and Tennessee, if outlets were available there. Then, other milk normally disposed of to the Kentucky and Tennessee facilities would have to be moved further north. The overall effect could be related to the cost of hauling milk from Louisiana to the Upper Midwest for processing. The same witness indicated that the cooperative experiences the same chain reaction in handling reserve supplies for Florida and other Southeastern markets.

It is necessary that surplus milk be priced at the highest practical level consistent with disposing of all the milk in a market. The milk ought to be moved where it can return the greatest value and yet clear the market of reserve milk. Class III milk normally is channelled into manufactured products such as butter, nonfat dry milk, and cheese. It is reasonable and necessary that milk so used be priced competitively with manufactured grade milk which is sold competitively on a national market. The present basis for pricing Class III milk reflects these considerations through use of the Minnesota-Wisconsin price. Such price reflects the value of milk for manufacturing uses being sold in a national market.

These pricing considerations are equally applicable to Class II milk, since Class III products are readily substitutable in the manufacture of Class II products. The Class II differential of 10 cents recognizes the fact that fresh producer milk has some additional value to handlers for use in Class II as well as the fact that producers incur additional costs in the marketing of milk for Class II use. The differential was limited to 10 cents on the basis of evidence indicating that any greater amount could encourage the substitution of dairy products for producer milk in the manufacture of Class II products.

Handlers reiterated in this proceeding, as in the earlier uniform classification proceeding, that the Class III milk price must be closely aligned with manufacturing milk values and that the Class II price differential should be not more than 10 cents over the Class III price.

It is concluded that because of the volatility of manufacturing milk values, advance Class II pricing under existing circumstances could result in an unintended but effective reduction in the Class II price level which prospectively could only have an adverse impact on manufacturing milk prices and hence on the level of Class I and Class III prices. To the extent that manufacturing milk values were affected, producer returns for both manufacturing grade and milk regulated under Federal milk orders would be reduced.

It has previously been determined by the Department for the orders in this proceeding that the Class I and Class II price differentials must be at the stated levels relative to the basic formula price (also the Class III price) to assure dairy farmers of sufficient revenue to generate adequate supplies of milk for the respective markets. Any provision that would undermine those relationships must, of necessity, set into motion economic forces that will tend to jeopardize an adequate supply of milk for the respective markets.

The proposals for advance Class II pricing, therefore, must be and hereby are denied.

Ruling on Proposed Findings and Conclusions

Briefs and proposed findings and conclusions were filed on behalf of certain interested parties. These briefs, proposed findings and conclusions and the evidence in the record were considered in making the findings and conclusions set forth above. To the extent that the suggested findings and conclusions filed by interested parties are inconsistent with the findings and conclusions set forth herein, the requests to make such findings or reach such conclusions are denied for the reasons previously stated in this decision.

V 41 154 AUG 9 76 UMI

DETERMINATION

The findings and conclusions of this decision do not require any change in the regulatory provisions of the orders regulating the handling of milk in the aforesaid marketing areas.

Signed at Washington, D.C., on August 3, 1976.

DONALD E. WILKINSON,
Administrator.

DEPARTMENT OF TRANSPORTATION

Federal Aviation Administration

[14 CFR Part 71]

[Airspace Docket No. 76-CE-11]

FORT MADISON, IOWA

Alteration of Transition Area

The Federal Aviation Administration is considering amending Part 71 of the Federal Aviation Regulations so as to alter the transition area at Fort Madison, Iowa.

Interested persons may participate in the proposed rule making by submitting such written data, views or arguments as they may desire. Communications should be submitted in triplicate to the Director, Central Region, Attention: Chief, Air Traffic Division, Federal Aviation Administration, Federal Building, 601 East 12th Street, Kansas City, Mo. 64106. All communications received on or before September 8, 1976 will be considered before action is taken on the proposed amendment. No public hearing is contemplated at his time, but arrangements for informal conferences with Federal Aviation Administration officials may be made by contacting the Regional Air Traffic Division Chief. Any data, views or arguments presented during such conferences must also be submitted in writing in accordance with this notice in order to become part of the record for consideration. The proposal contained in this notice may be changed in the light of comments received.

A public docket will be available for examination by interested persons in the Office of the Regional Counsel, Federal Aviation Administration, Federal Building, 601 East 12th Street, Kansas City, Mo. 64106.

Since designation of controlled airspace at Fort Madison, Iowa, two new public use instrument approach procedures have been developed for the Fort Madison Municipal Airport. Accordingly, it is necessary to alter the Fort Madison 700-foot transition area to adequately protect aircraft executing the new approach procedures.

In consideration of the foregoing, the Federal Aviation Administration proposes to amend Part 71 of the Federal Aviation Regulations as hereinafter set forth:

In § 71.181 (41 FR 440), the following transition area is amended to read:

FORT MADISON, IOWA

That airspace extending upward from 700 feet above the surface within a 6-mile radius of Fort Madison Municipal Airport (latitude 40°39'30" N., longitude 91°19'30" W.): and within 2 miles each side of the Burlington, Iowa, VORTAC 258° radial, extending from the 6-mile radius area to 12 miles west of the VORTAC excluding the portion which overlies the Burlington, Iowa, transition area.

This amendment is proposed under the authority of sec. 307(a) of the Federal Aviation Act of 1958 (49 U.S.C. 1348), and of sec. 6(c) of the Department of Transportation Act [49 U.S.C. 1655(c)].

Issued in Kansas City, Missouri, on July 27, 1976.

JOHN E. SHAW,
Acting Director,
Central Region.

[FCC 76-746; Docket No. 20097 RM-1997 RM-2218]

[47 CFR Part 63]

EXTENSION OF LINES AND DISCONTINUANCE OF SERVICE BY CARRIERS

Resale and Shared Use of Common Carrier Services and Facilities; Order Modifying Paragraph 132 of Report & Order

In the matter of regulatory policies concerning resale and shared use of common carrier services and facilities.

1. The Commission has before it for consideration (a) a "Motion for Postponement" of the dates specified in paragraph 132 of the Report and Order in the captioned proceeding (FCC 76-641, released July 16, 1976), filed by Western Union Telegraph Company on July 26, 1976, and (b) "Comments" thereon filed by American Telephone and Telegraph Company on July 29, 1976. In our Report and Order in this proceeding, we ordered common carriers subject to our jurisdiction to file, by September 1, 1976, revised tariffs eliminating restrictions on the resale and shared use of private line services. Any motions for stay of the effectiveness of our Report and Order were required to be filed by August 2, 1976.

2. Western Union states that an additional two weeks are required within which to file a motion for stay, if necessary, and the revised tariffs. It asserts that the period between the release of the Report and Order and the date upon which motions for stay are due is too short for review and analysis of a lengthy document to determine whether a stay request should be made. Also, Western Union states that its management personnel are being placed in the field in anticipation of a strike and that this makes difficult a review of the document within the specified time. AT&T comments that it does not oppose the motion, but that it will file a motion for stay of the effectiveness of the Report and Order pending disposition of a petition for reconsideration to be filed.

3. We have considered the foregoing and conclude that the requested extension of filing dates is reasonable, and would not unduly delay this proceeding. Accordingly, it is ordered, That paragraph 132 of the Report and Order in Docket No. 20097 (FCC 76-641) is modified to specify that revised tariffs must be filed by September 15, 1976, and motions to stay the effectiveness of this action must be filed by August 16, 1976.

Adopted: July 30, 1976.

Released: August 4, 1976.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

FM BROADCAST STATIONS; TABLE OF ASSIGNMENTS

Order Extending Time for Filing Reply Comments

In the matter of amendments of § 73.202(b), table of assignments, FM Broadcast Stations. (Pinckneyville, Illinois)

1. On May 11, 1976, the Commission adopted a *Notice of Proposed Rule Making* in the above-entitled proceeding (41 Fed. Reg. 21364). The date for filing comments has expired and the date for filing reply comments is presently August 6, 1976.

2. On July 28, 1976, counsel for Du Quoin Broadcasting Company requested that the time for filing reply comments be extended to and including August 27, 1976. Counsel states that more time is needed in order to study and investigate the many new facts and contentions put forth by Coalbelt Broadcasters, another party to this proceeding. He also adds that it is probable Du Quoin will have to prepare an additional engineering showing to submit with its reply comments but work on such a showing cannot begin until the investigation now in progress is completed. Counsel states that the counsel for Coalbelt Broadcasters has consented to the extension requested herein.

3. We are of the view that the requested additional time is warranted. Accordingly, It Is Ordered, that the time for filing reply comments Is Extended to and including August 27, 1976.

4. This action is taken pursuant to authority found in Sections 4(i), 5(d)(1) and 303(r) of the Communications Act of 1934, as amended, and Section 0.281 of the Commission's Rules.

Adopted: August 2, 1976.

Released: August 3, 1976.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[Docket No. 20721 RM-2432]

NETWORK BROADCASTING

Order Extending Time for Filing Reply Comments

In the matter of review of Commission rules and regulatory policies concerning network broadcasting by standard (AM) and FM broadcasting stations. Petitions of Mutual Broadcasting Systems, Inc. for rules applicable to audio services furnished by newswire services.

1. On February 19, 1976, the Commission adopted a *Notice of Proposed Rule Making* and *Notice of Inquiry*, 41 Fed. Reg. 9191, in the above-entitled proceeding. The dates originally set for filing of comments and reply comments were May 10 and June 7, 1976, respectively. On May 5, 1976, an *Order* extending the time for filing comments and reply comments was granted to July 9 and August 6, 1976, respectively.

2. On July 28, 1976, United Press International, Inc. (UPI), by counsel, requested that the time for filing reply comments be extended to and including August 23, 1976. Counsel states that some 23 parties responded to the Notice and after examining the large amount of material filed, UPI finds that the 20 working days provided is insufficient for it to complete and file appropriate reply comments. He also notes that Cleveland counsel for UPI, in addition to his regular activities, will be required to be absent from his office during the first week of August due to a previous business commitment.

3. We are of the view that the public interest would be served by extending the time in this proceeding. Accordingly, it is ordered, that the date for filing reply comments is extended to and including August 23, 1976.

4. This action is taken pursuant to authority found in Sections 4(i), 5(d)(1), and 303(r) of the Communications Act of 1934, as amended, and Section 0.281 of the Commission's Rules.

Adopted: August 2, 1976.

Released: August 3, 1976.

FEDERAL COMMUNICATIONS COMMISSION,
WALLACE E. JOHNSON,
Chief, Broadcast Bureau.

[FCC 76-722; Docket No. 20827]

CABLE TELEVISION SERVICE

Cablecasts by Legally Qualified Candidates for Public Office

By the Commission: Chairman Wiley issuing a separate statement.[1]

In the matter of amendment of Part 76 of the Commission's rules relating to cablecasts by legally qualified candidates for public office.

1. By *Report and Order in Docket No. 20779* FCC 76-698, ---- FCC 2d ---- (1976) adopted this date, the Commission has amended Part 73 of its Rules relating to broadcasts by legally qualified candidates for public office so as to provide that such a candidate is one who "either" has qualified for a place on the ballot or "has publicly committed himself to seeking election by the write-in method," and is eligible under the applicable law to be voted for.

2. As explained in that *Report and Order*, the proposal for the rule change was an outgrowth of the decision of the Seventh Circuit Court of Appeals in *Flory* v. *FCC*, ---- F 2d ----, Case No. 74-2010, decided December 23, 1975, which raised a question as to the requirements which must be met before a candidate will be considered a legally qualified "write-in" candidate, stating:

[A] candidate who has not yet qualified for ballot position under state election laws is nevertheless entitled to equal time if he is otherwise eligible under the second prong of §§ 73.120(a) and 73.657(a) and commits himself to seeking selection by the write-in method in the subsequent election. Sl. op. at 13.

3. For the same reasons underlying the adoption of the change in our broadcast rules we believe it appropriate to similarly amend our pertinent cable television rule. Accordingly, the Commission, pursuant to authority contained in Sections 4(i), 303(r), and 315(g) of the Communications Act of 1934, as amended, proposes to amend Section 76.5(y) of the Rules as indicated below.

4. Pursuant to applicable procedures set forth in Sections 1.415 and 1.49 of the Commission's rules, interested persons may file comments on or before September 9, 1976, and reply comments on or before September 20, 1976. All relevant and timely comments and reply comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision in this proceeding the Commission may also take into account other relevant information before it, in addition to the specific comments invited by this Notice.

5. In accordance with the provisions of Section 1.419 of the Rules, an original and 11 copies of all comments, replies, pleadings, briefs, and other documents shall be furnished to the Commission. All filings made in this proceeding will be made available for examination by interested parties during regular business hours in the Commission's Public Reference Room at its headquarters, 1919 "M" Street, N.W., Washington, D.C.

FEDERAL COMMUNICATION COMMISSION,
VINCENT J. MULLINS,
Secretary.

It is proposed that § 76.5(y) be revised as follows:

§ 76.5 Definitions.

* * * * *

(y) *Legally qualified candidate.* Any person who has publicly announced that he is a candidate for nomination by a convention of a political party or for nomination or election in a primary, special, or general election, municipal, county, state or national and who meets the qualifications prescribed by the applicable laws to hold the office for which he is a candidate, so that he may be voted for by the electorate directly or by means of delegates or electors, and who either:

(1) Has qualified for a place on the ballot, or

(2) Has publicly committed himself to seeking election by the write-in method, and is eligible under the applicable law to be voted for by sticker, by writing in his name on the ballot, or other method; and makes a substantial showing that he is a bona fide candidate for nomination or office, as the case may be.

* * * * *

[47 CFR Parts 81 and 83]

[FCC 76-714; Docket No. 20825]

SPECIAL RADIO SERVICES

Proposed Use of VHF Channel 17 for State Control Intership Communications

In the matter of amendment of Parts 81 and 83 of the Commission's rules and regulations to allow the use of 156.850 MHz (very high frequency marine Channel 17) for State Control intership communications.

1. Notice of Proposed Rule Making is hereby given in the above-entitled matter.

2. The Commission has been requested by the Nevada Department of Fish and Game to make Channel 17 available for ship to ship State Control communications, in addition to the currently au-

V 41 154 AUG 9 76 UMI

thorized use for ship to coast State Control communications. They felt that the designation of Channel 17 for intership State Control use would allow more effective coordination between State agencies, and also provide a clear channel for State boats in times of certain emergencies.

3. It appears that the requested amendment would allow for closer coordination among state boats and related shore stations and this should result in an improvement to safety. Accordingly, we propose that the rules be amended as requested, and as shown below, to permit the exchange of State Control communications between vessels as well as between coast and ship stations.

4. The proposed amendments of the rules, as set forth below, are issued pursuant to the authority contained in Sections 4(i), 303 (b), (f) and (r) of the Communications Act of 1934, as amended.

5. Pursuant to applicable procedures set forth in Section 1.415 of the Commission's rules, interested persons may file comments on or before September 9, 1976, and reply comments on or before September 20, 1976. All releyant and timely comments and reply comments will be considered by the Commission before final action is taken in this proceeding. In reaching its decision in this proceeding, the Commission may also take into account other relevant information before it, in addition to the specific comments invited by this Notice.

6. In accordance with the provisions of Section 1.419 of the Commission's rules, an original and 11 copies of all statements, briefs, or comments filed shall be furnished to the Commission. Responses will be available for public inspection during regular business hours in the Commission's Public Reference Room at its headquarters in Washington, D.C.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

Parts 81 and 83 of Chapter I of Title 47 of the Code of Federal Regulations are amended as follows:

PART 81—STATIONS ON LAND IN THE MARITIME SERVICES AND ALASKA—PUBLIC FIXED STATIONS

1. § 81.7, paragraph (r) is amended to read as follows:

§ 81.7 Operational.

* * * * *

(r) *State control.* Communications, in the maritime mobile service on very high frequencies (VHF), between non-Federal government coast and ship stations or between non-Federal government ship stations, in which messages are restricted to those related directly to the coordination, regulation or control of boating activities or the rendering of assistance to vessels.

* * * * *

2. In § 81.356, paragraph (b)(9) is amended to read as follows:

§ 81.356 Assignable frequencies in the band 156–162 MHz.

* * * * *

(b) * * *

(9) Available for assignment to limited coast stations for State Control communications with ship stations. Also available for intership State Control communications.

* * * * *

PART 83—STATIONS ON SHIPBOARD IN THE MARITIME SERVICES

1. In § 83.6, paragraph (k) is amended to read as follows:

§ 83.6 Operational.

* * * * *

(k) *State control.* Communications, in the maritime mobile service on very high frequencies (VHF), between non-Federal government coast and ship stations or between non-Federal government ship stations, in which messages are restricted to those related directly to the coordination, regulation or control of boating activities or the rendering of assistance to vessels.

[FR Doc.76-23075 Filed 8-6-76;8:45 am]

FEDERAL ENERGY OFFICE

[10 CFR Part 212]

PASSTHROUGH OF INCREASED NON-PRODUCT COSTS BY REFINERS BEFORE FEBRUARY 1, 1976

Proposed Class Exception and Public Hearing

I. PROPOSED CLASS EXCEPTION

The Federal Energy Office ("FEO") hereby proposes a class exception to permit refiners not constrained during 1975 by the profit margin limitation to recompute the amounts of increased non-product costs passed through each month from January 1975 through January 1976 as though the regulations in effect during that period had provided for a proportionate recovery of increased product costs and increased non-product costs each month. FEO will receive written comments and hold a public hearing on the proposal.

The Federal Energy Office was established in the Executive Office of the President by Executive Order 11930, effective July 31, 1976 (41 FR 32399, August 3, 1976) and was delegated authority by the President which had formerly been delegated to the Federal Energy Administration, prior to the expiration of that agency on the July 30, 1976 expiration of the Federal Energy Administration Act.

II. BACKGROUND

A. AMENDMENTS ADOPTED AS OF FEBRUARY 1, 1976

On January 7, 1976 the Federal Energy Administration ("FEA") gave notice of a proposed rulemaking and public hearing (41 FR 1680, January 9, 1976) to consider proposals to amend Part 212 of Title 10, Code of Federal Regulations, to implement the pricing policies of Sections 401 and 402 of the Energy Policy and Conservation Act ("EPCA," Pub. L. 94–163). On February 1, 1976 (41 FR 5111, February 4, 1976) FEA issued amendments as a result of that rulemaking proceeding. One of the amendments added to the price regulations applicable to refiners a new § 212.85, Sequence of Recoupment of Costs.

The new § 212.85 provided, among other things, that increased non-product costs would be the last category of cost to be deemed to have been recouped, and FEA stated in this regard that:

> Except for the complexities introduced by the statutory two-month and ten percent limitations, the order specified in the new § 212.85 is the same as that under the regulations previously in effect. (41 FR 5113)

In the preamble to the amendments issued on February 1, 1976, FEA noted that it was considering the initiation of a separate rulemaking proceeding to consider, among other things, modification of the rule then stated in § 212.82 and § 212.85 that increased product costs must be recouped first and the rule stated in § 212.83(e)(9) that increased non-product costs which are not recovered in the current month may not be carried forward ("banked") for recovery in a subsequent month.

On February 27, 1976 a notice of proposed rulemaking was issued to consider whether modifications in these regulations were needed and whether such modifications should be made retroactive to February 1, 1976 (41 FR 9199, March 3, 1976).

On the basis of its careful evaluation of the comments received, FEA concluded that there was a strong likelihood that undesirable consequences would result from the combined effects of the EPCA limitations on "banking" of increased crude oil costs and the requirement that non-product costs be recouped last and not "banked." The refiner price regulations were therefore amended, effective retroactively to February 1, 1976 (the effective date of the EPCA-conforming limitations), to delete the prohibition of § 212.83(e)(9) against the carryforward of increased non-product costs which are not recovered on a current basis and to revise the order in which the categories

of increased costs are deemed to have been recouped (41 FR 15330, April 12, 1976).

In connection with these amendments, FEA also provided certain limitations on the time within which both increased non-product costs and increased purchased product costs may be recovered. Such increased costs may be recovered, like increased crude oil costs, without limitation for two months after the month in which they are incurred. However, increased non-product and purchased product costs which are not recouped within that two month period are subject to a limitation on use in each future month of either 10 percent of the total "bank" of such unrecouped costs or that amount of such unrecouped costs which, when applied to compute maximum allowable selling prices, results in a maximum allowable selling price in the current month that is no more than 10 percent higher than the highest price at which at least 25 percent of the sales of the product concerned in the prior month were priced, whichever is greater.

The basis for adopting these April 6, 1976 amendments was stated as follows:

> Several reasons have convinced FEA of the need for these rule changes. FEA has determined that continuing the one-month restriction on the time of recoupment of increased non-product costs would tend to have undesirable inflationary effects on current market prices by imposing pressures on refiners to recover increased non-product costs by monthly price increases, because such increased non-product costs would be lost under existing regulations if not recouped in the month following the month in which they were incurred.
>
> Prices would also tend to wide monthly fluctuations as refiners sought to set prices to recoup all increased non-product costs each month, rather than deferring price changes and seeking to recover increased non-product costs more in line with historic seasonal pricing and other market factors.
>
> * * * * *
>
> During the public hearing conducted as part of the rulemaking proceeding, refiners commented that refining operations have current earnings substantially below 1973 levels, with very small percentage returns on assets employed. Two refiners reported absolute losses, one for all of 1975 and one for the first ten months of 1975. At such low rates of return, which were further threatened by the February 1 rules limiting recovery of increased costs incurred, capital investments to expand refinery capacity might have been reconsidered and deferred or eliminated. (41 FR 15330, April 12, 1976)

FEA also stated:

> FEA is also still considering appropriate action, including further regulation amendments pursuant to this rulemaking proceeding, regarding the rules on recoupment of increased non-product costs prior to February 1, 1976. (41 FR 15330, April 12, 1976)

This notice of proposed class exception and public hearing is addressed to the application of the rules regarding the recoupment of increased non-product costs in effect from January 1, 1975 through January 31, 1976.

B. REGULATIONS IN EFFECT FROM JANUARY 1, 1975 THROUGH JANUARY 31, 1976

During 1975 and January 1976, the passthrough of increased non-product costs was subject to a profit margin limitation (i.e., a refiner could pass through increased non-product costs only if its profit margin in the current fiscal year did not exceed its base period profit margin). The regulations referred to the pass through of increased non-product costs as a price increase above base prices. Section 212.83(e)(9) prohibited "banking" of unrecovered increased non-product costs; § 212.87(b) provided for allocation of such costs to each product or product category of the type "i" on a volumetrically proportional basis; and §212.83(d) required increased non-product costs to be recovered among individual covered products in the same proportions as increased product costs were recovered. The purpose of § 212.83(d) was to provide a basis for allocating increased non-product costs among individual covered products within the category of general refinery products, in much the same manner that § 212.87(b) provided for allocation of increased non-product costs among products or product categories of the type "i."

However, it appears that § 212.83(d) was understood by many refiners to authorize a proportional computation of the portions of each type of increased costs — product and non-product — deemed to have been recovered in prices charged by refiners, whether or not all available increased product costs had first been recovered. The FEA audit manual, which was apparently available to some but not all refiners, also partially reflected this view.

Statements included in various notices of proposed rulemaking, however, have generally reflected the former rather than latter interpretation of the regulatory language referred to above, which required increased product costs to be recovered before increased non-product costs. FEA stated, for example, in proposing the deletion of the prenotification requirement in effect during 1974, that the computation of prices was a two-step sequential procedure:

> At present, refiners may pass through increased costs in two ways: first, pursuant to § 212.83 and the Instructions to Form FEA–96, increased product costs may automatically be passed through on a dollar-for-dollar basis. This is part of the base price calculation. Second, pursuant to § 212.82 and the Instructions to Form CLC–22, increased non-product costs may be passed through on a dollar-for-dollar basis after the firm has prenotified the FEA of its proposed price increases and waited 30 days, during which time the FEA can suspend, modify, alter, defer, or disapprove the price increase request. If the FEA takes no action, the price increase may be put into effect on transactions occurring after the expiration of the 30-day waiting period. (39 FR 32718 September 10, 1974)

The difference between the approach authorized in the regulations and the "proportionality" approach may be illustrated as follows:

> $2,200,000 increased costs were recovered on sales of a product in a month.
> $300,000 non-product cost increases were available.
> $3,000,000 product cost increases were available.
> $3,300,000 total increased costs were available.
>
> "Proportional" recovery:
> $2,200,000/$3,300,000 = ⅔ of available increased costs were recovered;
> ⅔ × $300,000 = $200,000 of non-product cost creases were recovered;
> ⅔ × $3,000,000 = $2,000,000 of product cost increases were recovered.
> $1,000,000 of product cost increases may be carried forward;
> The unrecovered $100,000 of non-product cost increases may not be carried forward.
>
> "Sequential" recovery:
> $2,200,000 of product costs increases were recovered; no non-product cost increases were recovered;
> $800,000 of product cost increases may be carried forward;
> The unrecovered $300,000 of non-product cost increases may not be carried forward.

It is FEO's understanding that some refiners interpreted the regulations in yet another manner, to permit the addition to May 15, 1973 prices of, first, available increased non-product costs and, second, the amount of available increased product costs required to reach desired selling prices, thus permitting the refiner to carry forward or "bank" all unrecovered increased costs—since under this approach all such unrecovered costs would have been deemed unrecovered increased product costs, which could be carried forward. The regulations were not intended to authorize this approach nor can FEO find in the regulations any arguable basis for use of this approach.

III. DISCUSSION OF PROPOSED CLASS EXCEPTION

According to comments received on the February 27, 1976 proposal, either "proportionality" or treatment of increased non-product costs as having been recovered before increased product costs has already been reflected in product prices of many—perhaps even a majority of—refiners.

To enforce the regulations as requiring recovery of all increased product costs prior to the recovery of any increased non-product costs during the period January 1, 1975 through January 31, 1976—thus resulting in potentially massive refunds or "bank" reductions—could have a drastic effect on cash resources of refiners who in good faith set prices based on the "proportional" interpretation of the regulations.

If firms were to be required to apply individually for exceptions relief, FEO believes that a significant number of refiners would apply and be eligible for such relief on the basis of serious hardship or gross inequity.

Although FEO believes that its interpretation of the meaning of the language used in the regulations is correct—i.e., increased product costs were required to be recovered first; banking of unrecovered increased non-product costs was not permitted—it nevertheless acknowledges that refiners might have concluded in good faith that recoupment on a proportional basis was permitted as a result of possibly ambiguous language in § 212.83(d) and certain information disseminated by FEA.

FEO hereby proposes a class exception to authorize the "proportional" cost recovery approach retroactively for all re-

V 41 154 AUG 9 76 UMI

finers who were not restrained by the profit margin limitation. Under such an approach, "banks" of refiners which were not subject to the profit margin limitation and which properly applied the cost recovery rules would be adjusted to levels reflecting "proportional" cost passthroughs during the period to assure, insofar as possible, equitable treatment for them.

IV. Comments and Data Requested

FEO requests written comments and oral testimony on, among other things, the extent to which deviations have occurred from the sequential recovery provided for in the refiners' cost passthrough rules (formerly contained in §§ 212.83 (e)(9), 212.87(b), and 212.83(d) of the regulations), the appropriateness of those regulations as applied to specific segments of the industry, the extent of and reasons for industry reliance on erroneous but good faith interpretations of the regulations, the extent to which deviations from sequential recovery resulted in serious public injury, and whether failure to provide retroactive relief would result in a serious hardship or gross inequity to a substantial segment of the industry. Data and information relating to these issues which have already been submitted to FEO in other proceedings should be resubmitted and related to the substantive and procedural issues raised in this notice. FEO stresses the need for refiners to be fully responsive to its requests for information on this issue in order to establish an adequate factual basis on which a decision on this proposed class exception may be premised.

FEO believes the price impacts of the proposed class exception have already been largely felt. In order, however, to ascertain the exact cost consequences to purchasers of the alternative regulatory enforcement procedures, pursuant to §§ 210.91 and 212.126(b) of the FEO regulations, FEO is contemporaneously by telegram surveying each refiner subject to Subpart E of Part 212 to determine the amounts of increased product and non-product costs incurred during the period December 1, 1974 through December 31, 1975 and considered by such refiner to have been passed through during the period January 1, 1975 through January 31, 1976. The telegrams state that all refiners are requested to compute and submit to FEO the survey data requested (the format is reproduced in part V). The telegrams also state that any refiner wishing to participate any relief pursuant to this class exception must submit such data as a condition of such participation.

The reports must be received by FEO August 18, 1976. Other written comments are due September 16, 1976.

FEO will aggregate and publish the cost data computed from the forms on about September 6, 1976 including:

Total amount of increased non-product costs incurred;

Amount actually passed through;

Amount permitted to be passed through under FEA's "sequential" interpretation of the regulations;

Amount permitted to be passed through under the proposed class exception; and

Amount passed through in excess of even the "proportionality" rule.

FEO welcomes comments analyzing the impact of the class exception on any type of purchaser or ultimate consumer.

FEO also requests comments on the most feasible and appropriate method of applying the "proportional" recovery method to general refinery products. Possible alternatives are that the amounts of increased product costs and increased non-product costs deemed recovered should be calculated once only for all general refinery products or that the amounts deemed recovered should be calculated on a product-by-product basis. FEO believes that the former method would be simpler and more feasible.

V.—*Reporting format*

	No. 2 oils	Gasoline	General refinery products	Totals (dollars)
A. Were price increases to reflect increased nonproduct costs prenotified prior to Jan. 1, 1975? (§ 212.121) Yes ____. No ____.				
B. Amount of increased nonproduct costs (as defined in FEA regulations) incurred from December 1974 through December 1975.				
C. Were increased nonproduct costs passed through in prices from January 1975 through January 1976? If yes, explain by what method.				
D. Amount of increased nonproduct costs actually recovered in revenues from January 1975 through January 1976.				
E. On what line on FEO-96 were nonproduct costs entered?				
F. Amount of increased nonproduct costs which would have been recovered if increased nonproduct costs had been passed through last each month (and not "banked").				
G. Amount of increased nonproduct costs which would have been recovered if increased nonproduct costs has been passed through proportionally each month (and not "banked"), that is, pursuant to proposed class exception.				
H. Amount of increased nonproduct costs passed through over or under ( ) amount calculated pursuant to proportional method.				
I. Name each month of measurement when all month of measurement costs were not recovered in revenues in the subsequent "current" month.	*Month*			
J. From January 1975 through December 1975 for what period(s) was the firm constrained by the profit margin test from passing through increased nonproduct costs. (§§ 212.11, 212.82(d), 212.31). Provide 1975 revenues, operating income and profit margin for the entire entity by quarters for this period(s).				
K. Provide 1975 revenues, operating income, and net profit for the refining entity.				

VI. Comment Procedures

Interested persons are invited to participate in this class exception proceeding by submitting data, views or arguments with respect to the proposed class exception set forth in this notice to Executive Communications, Room 3309, Federal Energy Office, Box IC, Washington, D.C. 20461.

Comments should be identified on the outside envelope and on documents submitted to FEO Executive Communications with the designation "Passthrough of Increased Non-Product Costs by Refiners Before February 1, 1976." Fifteen copies should be submitted. All comments received by Thursday, September 16, 1976, before 4:30 p.m., e.d.s.t., will be considered by the Federal Energy Office before final action is taken on the proposed exception.

Any information or data considered by the person furnishing it to be confidential must be so identified and submitted in writing, one copy only. The FEO reserves the right to determine the confidential status of the information or data and to treat it according to its determination.

The public hearing regarding the proposed class exception will be held at 9:30 a.m., e.d.s.t., on Tuesday, September 21, 1976, and will be continued, if necessary, on Wednesday, September 22, 1976, in Room 2105, 2000 M Street, N.W., Washington, D.C. 20461, in order to receive comments from interested persons on the matters set forth herein.

Any person who has an interest in this matter, or who is a representative of a group or class of persons that has an interest in this matter, may make a written request for an opportunity to make oral presentation. Such a request should be directed to Executive Communications, FEO, and must be received before 4:30 p.m., e.s.t., on Monday, September 13, 1976. Such a request may be hand delivered to Room 3309, Federal Building, 12th and Pennsylvania Avenue, NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday. The person making the request should be prepared to describe the interest concerned, if appropriate, to state why he is proper representative of a group or class of persons that has such an interest, and to give a concise summary of the proposed oral presentation and a phone number where he may be contacted through Monday, September 20, 1976. Each person selected to be heard will be so notified by the FEO before 4:30 p.m., e.s.t., Wednesday, September 15, 1976 and must submit 100 copies of his statement to Regulations Management, FEO, Room 2214, 2000 M Street, NW., Washington, D.C. 20461, before 4:30 p.m., e.s.t., on Monday, September 20, 1976.

The FEO reserves the right to select the persons to be heard at these hearings, to schedule their respective presentations, and to establish the procedures governing the conduct of the hearings. The length of each presentation may be limited, based on the number of persons requesting to be heard.

An FEO official will be designated to preside at the hearings. These will not be judicial or evidentiary-type hearings. Questions may be asked only by those conducting the hearings, and there will be no cross-examination of persons presenting statements. Any decision made by the FEO with respect to the subject matter of the hearings will be based on all information available to the FEO. At the conclusion of all initial oral statements, each person who has made an oral statement will be given the opportunity, if he so desires, to make a rebuttal statement. The rebuttal statements will be given in the order in which the initial statements were made and will be subject to time limitations.

Any interested person may submit questions to be asked of any person making a statement at the hearings, to Executive Communications, FEO, before 4:30 p.m., e.s.t., Thursday, September 16, 1976. Any person who wishes to ask a question at the hearings may submit the question, in writing, to the presiding officer. The FEO or the presiding officer, if the question is submitted at the hearings, will determine whether the question is relevant, and whether the time limitations permit it to be presented for answer.

Any further procedural rules needed for the proper conduct of the hearings will be announced by the presiding officer.

A transcript of the hearings will be made and the entire record of the hearings, including the transcript, will be retained by the FEO and made available for inspection at the Freedom of Information Office, Room 2107, Federal Building, 12th and Pennsylvania Avenue, NW., Washington, D.C., between the hours of 8 a.m. and 4:30 p.m., Monday through Friday. Any person may purchase a copy of the transcript from the reporter.

A copy of this notice has been submitted to the Administrator of the Environmental Protection Agency for his comments concerning the impact of this proposal on the quality of the environment. The Administrator had no comments on this proposal.

Issued in Washington, D.C. August 3, 1976.

Michael F. Butler,
General Counsel,
Federal Energy Office.

DEPARTMENT OF THE TREASURY

[26 CFR Part 1]
Internal Revenue Service

FOREIGN BASE COMPANY SHIPPING INCOME

Proposed Rule Making

Notice is hereby given that the regulations set forth in tentative form in the attached appendix are proposed to be prescribed by the Commissioner of Internal Revenue, with the approval of the Secretary of the Treasury or his delegate. Prior to the final adoption of such regulations, consideration will be given to any comments pertaining thereto which are submitted in writing (preferably six copies) to the Commissioner of Internal Revenue, Attention: CC:LR:T, Washington, D.C. 20224, by October 11, 1976. Pursuant to 26 CFR 601.601(b), designations of material as confidential or not to be disclosed, contained in such comments, will not be accepted. Thus, persons submitting written comments should not include therein material that they consider to be confidential or inappropriate for disclosure to the public. It will be presumed by the Internal Revenue Service that every written comment submitted to it in response to this notice of proposed rule making is intended by the person submitting it to be subject in its entirety to public inspection and copying in accordance with the procedures of 26 CFR 601.702(d)(9). Any person submitting written comments who desires an opportunity to comment orally at a public hearing on these proposed regulations should submit a request, in writing, to the Commissioner by October 11, 1976. In such case, a public hearing will be held, and notice of the time, place, and date will be published in a subsequent issue of the Federal Register unless the person or persons who have requested a hearing withdraw their requests for a hearing before notice of the hearing has been filed with the Office of the Federal Register. The proposed regulations are to be issued under the authority contained in sections 955(b) and 7805 of the Internal Revenue Code of 1954 (89 Stat. 63 and 68A Stat. 917; 26 U.S.C. 954 and 26 U.S.C. 7805).

Donald C. Alexander,
Commissioner of Internal Revenue.

This document contains proposed amendments to the Income Tax Regulations (26 CFR Part 1) in order to conform such regulations to certain provisions of section 602 of the Tax Reduction Act of 1975 (Pub. L. 94-12, 89 Stat. 58) (hereafter called the "Act"), relating to the taxation of earnings and profits of controlled foreign corporations and their shareholders.

Under present law foreign corporations are generally taxed at the corporate level by the United States only to the extent that they are engaged in business in the United States (and to some extent on other income derived here). As a result, the United States generally does not impose a tax at the corporate level on the foreign source income of a foreign corporation even though it is owned or controlled by a U.S. corporation or by individual U.S. citizens or residents. A foreign corporation is generally subject to tax at the corporate level, if at all, only by the foreign country in which it operates.

In addition, the foreign source income of a foreign corporation is generally subject to U.S. income tax at the shareholder level only when it is actually remitted to the U.S. corporate or individual shareholders as a dividend. The fact that no U.S. tax is imposed in this case at either the corporate or the shareholder level until (and unless) the income is distributed to the U.S. shareholders is sometimes referred to as tax deferral.

Present law, however, provides for an exception to the general rule of deferral under the so-called subpart F provisions of the Code (sections 951 through 964). Under these provisions income from so-called tax haven activities ("foreign base company income") is currently taxed at the shareholder level whether or not it is actually received in the form of a dividend. These rules apply only to U.S. persons owning 10 percent or more of the voting power of a foreign corporation, and only if more than 50 percent of the voting power in the corporation is owned by U.S. persons who each own 10 percent or larger interests.

Section 602(d) of the Act provides for a fourth category of foreign base company income which is called "foreign base company shipping income." The term "foreign base company shipping income" is defined in § 1.954-6. As with other types of foreign base company income, foreign base company shipping income is reduced under § 1.954-1(c) to take into account deductions (including taxes) which are properly allocable to that income.

In order to prevent any amounts from being included in foreign base company income twice, § 1.954-1(f)(3) provides that, if income is determined to be foreign base company shipping income, that income is not also considered to fall into any of the other three categories of foreign base company income. In addition, § 1.954-1(b)(2) provides that, if a controlled foreign corporation distributes foreign base company shipping income as a dividend through a chain of ownership to another controlled foreign corporation, that distribution will generally be excluded from the foreign base company income of the recipient controlled foreign corporation.

Foreign base company shipping income is excluded under § 1.954-1(b)(1) from foreign base company income to the extent that it is reinvested in qualified shipping assets. The amount of the reinvestment for any taxable year is the increase in "qualified investments in foreign base company shipping operations" (see § 1.954-7). Foreign base company shipping income of a controlled foreign corporation which is excluded from foreign base company income by reason of its investment in foreign base company shipping operations will be taxed to the U.S. shareholders of the controlled foreign corporation when and if it is subsequently withdrawn from such investment. The amount of previously excluded income withdrawn from investment in foreign base company shipping operations for any taxable year is the decrease in qualified investments in foreign base company shipping operations, subject to certain limitations (see § 1.955A-1(b)). The rules for determining the increase in, and the withdrawal from, investment in foreign base company shipping operations are similar to those used under sections 954(f) and 955 (as in effect before the enactment of the Tax Reduction Act

V 41 154 AUG 9 76 UMI

of 1975) to determine the increase in, and the withdrawal from, investment in less developed countries.

A special rule is provided for amounts invested in less developed country shipping companies described in section 955(c)(2) (as in effect before the enactment of the Tax Reduction Act of 1975). These amounts, which were previously classified as qualified investments in less developed countries, are treated as qualified investments in foreign base company shipping operations under § 1.955A-2(b).

The term "qualified investments in foreign base company shipping operations" is defined in § 1.955A-2 to include aircraft or vessels used in foreign commerce and all related shipping assets. The term also may include securities of another controlled foreign corporation (see § 1.955A-2(c)) and an interest in a partnership (see § 1.955A-2(d)). The amount to be taken into account with respect to any qualified investment in foreign base company shipping operations is the adjusted basis of the investment property reduced by any liability to which the property is subject (see § 1.955A-2(g)).

Section 1.955A-3 provides that an investment in foreign base company shipping operations made by one controlled foreign corporation may be treated as having been made by another controlled foreign corporation. Under § 1.955A-3, a group of related controlled foreign corporations can, in effect, combine their foreign base company shipping income and their increase or decrease in qualified investments in foreign company shipping operations.

As was the case under prior law with respect to investments in less developed countries, a U.S. shareholder of a controlled foreign corporation may elect (under § 1.955A-4) to compute the increase or decrease in qualified investments in foreign base company shipping operations as of the following taxable year.

Section 602 of the Act applies to taxable years of foreign corporations beginning after December 31, 1975, and to taxable years of U.S. shareholders within which, or with which, the taxable years of the foreign corporations end.

Related amendments to the Income Tax Regulations, including amendments to the regulations under section 951 and amendments to supply the provisions reserved herein, will be forthcoming.

PROPOSED AMENDMENTS TO THE REGULATIONS

In order to conform the Income Tax Regulations (26 CFR Part 1) to certain provisions of section 602 of the Tax Reduction Act of 1975, such regulations are amended as follows:

PARAGRAPH 1. Section 1.952-2(c)(2)(v) is amended to read as follows:

§ 1.952-2 Determination of gross income and taxable income of a foreign corporation.

* * * * *

(c) *Special rules for purposes of this section.* * * *

(2) *Application of principles of § 1.964-1.* * * *

(v) *Exchange gain or loss.* (a) Exchange gain or loss, determined in accordance with the principles of § 1.964-1(e), shall be taken into account for purposes of determining gross income and taxable income.

(*b*) Exchange gain or loss shall be treated as foreign base company shipping income (or as a deduction allocable thereto) to the extent that it is attributable to foreign base company shipping operations. The extent to which exchange gain or loss is attributable to foreign base company shipping operations may be determined under any reasonable method which is consistently applied from year to year. For example, the extent to which the exchange gain or loss is attributable to foreign base company shipping operations may be determined on the basis of the ratio which the foreign base company shipping income of the corporation for the taxable year bears to its total gross income for the taxable year, such ratio to be determined without regard to this subdivision (v).

(c) The remainder of the exchange gain or loss shall be allocated between subpart F income and non-subpart F income under any reasonable method which is consistently applied from year to year. For example, such remainder may be allocated to subpart F income in the same ratio that the gross subpart F income (exclusive of foreign base company shipping income) of the corporation for the taxable year bears to its total gross income (exclusive of foreign base company shipping income) for the taxable year, such ratio to be determined without regard to this subdivision (v).

* * * * * *

PAR. 2. Immediately after § 1.952-2 new § 1.952-3 is added to read as follows:

§ 1.952-3 Order of computations.

(a) *Scope.* (1) *In general.* This section describes and illustrates the computations which a United States shareholder of a controlled foreign corporation is required to make in connection with the application of section 954 and the subsequent application of section 952. However, this section does not apply to any controlled foreign corporation to which section 953 (relating to income from insurance of United States risks) applies. For rules relating to the application of section 953 and the relationship between sections 953 and 954, see the regulations under section 953.

(2) *Effective date.* This section applies to taxable years of foreign corporations beginning after December 31, 1975, and to taxable years of United States shareholders (as defined in section 951(b)) within which or with which such taxable years of such foreign corporations end.

(b) *General rule.* Except as provided in paragraph (c) of this section, a United States shareholder must determine the subpart F income of a controlled foreign corporation to which this section applies in the following manner:

(1) *Step 1.* Determine gross income under § 1.952-2, and (if applicable) § 1.959-2 (relating to the exclusion of certain dividends from gross income).

(2) *Step 2.* Determine net foreign base company shipping income as follows:

(i) *First.* Determine foreign base company shipping income under § 1.954-6;

(ii) *Second.* Exclude from foreign base company shipping income the items thereof which are excluded from subpart F income under § 1.952-1(b)(2) (relating to the exclusion of United States income from subpart F income), or which are excluded from foreign base company income under § 1.954-1(b)(2) and (3) (relating, respectively, to chain rule and to corporation not availed of to reduce tax);

(iii) *Third.* Reduce the balance by the deductions allocable thereto under § 1.954-1(c); and

(iv) *Fourth.* Reduce the remaining balance by the increase in qualified investments in foreign base company shipping operations as determined under § 1.954-7 (see § 1.954-1(b)(1)).

(3) *Step 3.* Determine net foreign personal holding company income, net foreign base company sales income, and net foreign base company services income as follows:

(i) *First.* Determine foreign personal holding company income under § 1.954-2, foreign base company sales income under § 1.954-3, and foreign base company services income under § 1.954-4;

(ii) *Second.* Exclude from each such type of income the items thereof which are excluded from subpart F income under § 1.952-1(b)(2) or which are excluded from foreign base company income under § 1.954-1(b)(2) and (3);

(iii) *Third.* Reduce the balance of each such type of income by the deductions allocable thereto under § 1.954-1(c).

(4) *Step 4.* The foreign base company income is the sum of the net amounts determined in subparagraphs (2) and (3) of this paragraph.

(5) *Step 5.* The subpart F income is the lesser of—

(i) The sum of (A) the foreign base company income as determined under subparagraph (4) of this paragraph and (B) the exchange gain (or loss) allocable (under § 1.952-2(c)(2)(v)(c)) to subpart F income; or

(ii) The earnings and profits limitation stated in section 952(c) (see § 1.952-1(c)).

(6) *Step 6.* The subpart F income of an export trade corporation (as defined in section 971(a)) must be reduced as provided in § 1.970-1(b).

(c) *Section 954(b)(3) ratio less than 10 percent or more than 70 percent.* (1) *Less than 10 percent.* Under § 1.954-1(d)(1), if the foreign base company income of a controlled foreign corporation to which this section applies (determined as provided in subparagraph (3) of this paragraph) is less than 10 percent of the gross income (determined as provided in paragraph (b)(1) of this section), the subpart F income of that controlled foreign corporation is zero.

(2) *More than 70 percent.* Under § 1.954-1(d)(2), if the foreign base company income of a controlled foreign corporation to which this section applies (determined as provided in subparagraph (3) of this paragraph) is more than 70 percent of the gross income (determined as provided in paragraph (b)(1) of this section), a United States shareholder must determine the subpart F income of that controlled foreign corporation in the following manner:

(i) *Step 1.* The foreign base company income is the gross income (determined as provided in paragraph (b)(1) of this section), reduced as follows:

(A) First, exclude the items thereof which are excluded from subpart F income under § 1.952-1(b)(2) or which are excluded from foreign base company income under § 1.954-1(b)(3);

(B) Second, reduce the balance by the deductions allocable thereto under § 1.954-1(c);

(C) Third, reduce the remaining balance by the amount of the reinvested shipping income determined as provided in subparagraph (4) of this paragraph.

(ii) *Step 2.* The subpart F income is the lesser of—

(A) The foreign base company income as determined under subdivision (i) of this subparagraph; or

(B) The limitation stated in section 952(c) (see § 1.952-1(c)).

(iii) *Step 3.* The subpart F income of an export trade corporation (as defined in section 971(a)) must be reduced as provided in § 1.970-1(b).

(3) *Foreign base company income.* Solely for purposes of subparagraphs (1) and (2) of this paragraph, the foreign base company income of a controlled foreign corporation shall be the sum of the balances determined after applying paragraph (b)(2)(ii) and (3)(ii) of this section.

(4) *Reinvested shipping income.* Solely for purposes of subparagraph (2)(i)(C) of this paragraph, the amount of reinvested shipping income of a controlled foreign corporation shall be determined as follows:

(i) *Step 1.* Determine foreign base company shipping income under § 1.954-6;

(ii) *Step 2.* Exclude from foreign base company shipping income the items thereof which are excluded from subpart F income under § 1.952-1(b)(2) or which are excluded from foreign base company income under § 1.954-1(b)(3);

(iii) *Step 3.* Reduce the balance by the deductions allocable thereto under § 1.954-1(c);

(iv) *Step 4.* The amount of reinvested shipping income is the lesser of—

(A) The remaining balance, or

(B) The increase in qualified investments in foreign base company shipping operations as determined under § 1.954-7.

(d) *Illustrations.* The application of this section may be illustrated by the following examples, in each of which it is assumed that A is a United States shareholder who owns stock in a controlled foreign corporation on December 31, 1976, the corporation uses the calendar year as the taxable year, and for 1976, the corporation has no income derived from the insurance of United States risks (within the meaning of section 953(a)) and is not an export trade corporation (within the meaning of section 971(a)):

Example (1). (a) For 1976, P Corporation has no foreign base company sales income and no foreign base company shipping income.

(b) A must apply the test prescribed by section 954(b)(3) to P's taxable year 1976 as follows, based on the facts shown in the following table:

(1)	Gross income		$1,000
(2)	(i) Foreign personal holding company income	$200	
	(ii) Less: Items of foreign personal holding company income excluded under §§ 1.952-1(b)(2), 1.954-1(b)(2), and 1.954-1(b)(3)	10	
	(iii) Balance		190
(3)	(i) Foreign base company services income	450	
	(ii) Less: Items of foreign base company services income excluded under §§ 1.952-1(b)(2) and 1.954-1(b)(3)	100	
	(iii) Balance		350
(4)	Tentative foreign base company income (line (2)(iii) plus line (3)(iii))		540
(5)	Section 954(b)(3) ratio (line 4 ÷ line (1)) (percent)		54

(c) Since the section 954(b)(3) ratio is not less than 10 percent nor more than 70 percent, A must determine P's subpart F income for 1976 as follows, based on the facts shown in the following table:

(1)	Gross income		$1,000
(2)	(i) Foreign personal holding company income		200
	(ii) Less: items of foreign personal holding company income excluded under §§ 1.952-1(b)(2), 1.954-1(b)(2), and 1.954-1(b)(3)		10
	(iii) Balance		190
	(iv) Less: deductions allocable to balance		170
	(v) Net foreign personal holding company income		20
(3)	(i) Foreign base company services income		450
	(ii) Less: items of foreign base company services income excluded under §§ 1.952-1(b)(2) and 1.954-1(b)(3)		100
	(iii) Balance		350
	(iv) Less: Deductions allocable to balance		250
	(v) Net foreign base company services income		100
(4)	Subpart F income: (i) Foreign base company income (line (2)(v) plus line (3)(v))		120
	(ii) Exchange gain attributable to subpart F income		7
	(iii) Tentative subpart F income (line (i) plus line (ii))		127
	(iv) Earnings and profits limitation		225
	(v) Subpart F income (lesser of lines (iii) and (iv))		127

Example (2). (a) For 1976, N Corporation has no foreign personal holding company income, no foreign base company sales income, and no foreign base company services income. However, N receives $100 of dividends from another controlled foreign corporation which is excluded from foreign base company income under § 1.954-1(b)(2) as attributable to foreign base company shipping income, but which is not excluded from gross income under section 959(b).

(b) A must apply the test prescribed by section 954(b)(3) to N's taxable year 1976 as follows, based on the facts shown in the following table:

(1)	Gross income		$1,000
(2)	(i) Foreign base company shipping income		1,000
	(ii) Less: Items of foreign base company shipping income excluded under §§ 1.952-1(b)(2), 1.954-1(b)(2), and 1.954-1(b)(3)		100
	(iii) Balance		900
(3)	Section 954(b)(3) ratio (line (2)(iii) ÷ line (1)) (percent)		90

(c) Since the section 954(b)(3) ratio exceeds 70 percent, A must determine the amount of N's reinvested shipping income for 1976 as follows, based on the facts shown in the following table:

(1)	Foreign base company shipping income	$1,000
(2)	Less: Items of foreign base company shipping income excluded under §§ 1.952-1(b)(2) and 1.954-1(b)(3)	0

V 41 154 AUG 9 76 UMI

(3) Balance	1,000
(4) Less: Deductions allocable to balance	750
(5) Remaining balance	250
(6) Increase in qualified investments in foreign base company shipping operations	250
(7) Reinvested shipping income (lesser of lines (5) and (6))	250

(d) A must determine N's subpart F income for 1976 as follows, based on the facts shown in the following table:

(1) (i) Gross income	$1,000
(ii) Less: Items of gross income excluded under §§ 1.952–1(b)(2) and 1.954–1(b)(3)	0
(iii) Balance	1,000
(iv) Less: Deductions allocable to balance	750
(v) Remaining balance	250
(vi) Less: reinvested shipping income	250
(vii) Foreign base company income	0
(2) Earnings and profits limitation	1,200
(3) Subpart F income (lesser of lines (1)(vii) and (2))	0

Example (3). (a) For 1976, M Corporation has no foreign personal holding company income, no foreign base company sales income, and no foreign base company services income.

(b) A must apply the test prescribed by section 954(b)(3) to M's taxable year 1976 as follows, based on the facts shown in the following table:

(1) Gross income	$1,000
(2) (i) Foreign base company shipping income	650
(ii) Less: Items of foreign base company shipping income excluded under §§ 1.952–1(b)(2), 1.954–1(b)(2), and 1.954–1(b)(3)	0
(iii) Balance	650
(3) Section 954(b)(3) ratio (line (2)(iii) ÷ line (1)) (percent)	65

(c) Since the section 954(b)(3) ratio is not less than 10 percent nor more than 70 percent, A must determine M's subpart F income for 1976 as follows, based on the facts shown in the following table:

(1) Gross income	$1,000
(2) Net foreign base company shipping income: (i) Foreign base company shipping income	650
(ii) Less: Items of foreign base company shipping income excluded under §§ 1.952–1(b)(2), 1.954–1(b)(2), and 1.954–1(b)(3)	0
(iii) Balance	650
(iv) Less: Deductions allocable to balance	550
(v) Remaining balance	100
(vi) Less: Increase in qualified investments in foreign base company shipping operations	80
(vii) Net foreign base company shipping income	20
(3) Subpart F income: (i) Foreign base company income (line (2)(vii))	20
(ii) Exchange gain attributable to subpart F income	0
(iii) Tentative subpart F income (line (1) plus line (ii))	20
(iv) Earnings and profits limitation	15
(v) Subaprt F income (lesser of lines (iii) and (iv))	15

Example (4). (a) For 1976, Q Corporation has no foreign base company sales income and no foreign base company services income.

(b) A must apply the test prescribed by section 954(b)(3) to Q's taxable year 1976 as follows, based on the facts shown in the following table:

(1) Gross income		$1,000
(2) (i) Foreign base company shipping income	$450	
(ii) Less: Items of foreign base company shipping income excluded under §§ 1.952–1(b)(2), 1.954–1(b)(2), and 1.954–1(b)(3)	100	
(iii) Balance		350
(3) (i) Foreign personal holding company income	200	
(ii) Less: Items of foreign personal holding company income excluded under §§ 1.952–1(b)(2), 1.954–1(b)(2), and 1.954–1(b)(3)	10	
(iii) Balance		190

(4) Tentative foreign base company shipping income (line (2)(iii) plus line (3)(iii))	540
(5) Section 954(b)(3) ratio (line (4) ÷ line (1)) (percent)	54

(c) Since the section 954(b)(3) ratio is not less than 10 percent nor more than 70 percent, A must determine Q's subpart F income for 1976 as follows, based on the facts shown in the following table:

(1) Gross income	$1,000
(2) (i) Foreign base company shipping income	450
(ii) Less: Items of foreign base company shipping income excluded under §§ 1.952–1(b)(2), 1.954–1(b)(2), and 1.954–1(b)(3)	100
(iii) Balance	350
(iv) Less: Deductions allocable to balance	250
(v) Remaining balance	100
(vi) Less: Increase in qualified investments in foreign base country shipping operations	135
(vii) Net foreign base company shipping income (not less than zero)	0
(3) (i) Foreign personal holding company income	200
(ii) Less: Items of foreign personal holding company income excluded under §§ 1.952–1(b)(2), 1.954–1(b)(2), and 1.954–1(b)(3)	10
(iii) Balance	190
(iv) Less: Deductions allocable to balance	70
(v) Net foreign personal holding company income	120
(4) Subpart F income: (i) Foreign base company income (line (2)(vii) plus line (3)(v))	120
(ii) Exchange gain attributable to subpart F income	7
(iii) Tentative subpart F income (line (1) plus line (ii))	127
(iv) Earnings and profits limitation	225
(v) Subpart F income (lesser of lines (iii) and (iv))	127

Example (5). (a) For 1976, corporation R's only income is comprised of interest and dividends which are treated as foreign base company shipping income under § 1.954–6(f)(1)(i). Consequently, R has no foreign personal holding company income, foreign base company sales income or foreign base company services income for 1976 (see section 954(b)(6)(A) and § 1.954–1(f)(3)).

(b) A must apply the test prescribed by section 954(b)(3) to R's taxable year 1976 as follows, based on the facts shown in the following table:

(1) Gross income	$1,000
(2) (i) Foreign base company shipping income	1,000
(ii) Less: items of foreign base company shipping income excluded under §§ 1.952–1(b)(2), 1.954–1(b)(2), and 1.954–1(b)(3)	400
(iii) Balance	600
(3) Section 954(b)(3) ratio (line (2)(iii) ÷ line (1)) (percent)	60

(c) Since the section 954(b)(3) ratio is not less than 10 percent nor more than 70 percent, A must determine R's subpart F income for 1976 as follows, based on the facts shown in the following table:

(1) Gross income	$1,000
(2) Net foreign base company shipping income: (i) Foreign base company shipping income	1,000
(ii) Less: Items of foreign base company shipping income excluded under §§ 1.952–1(b)(2), 1.954–1(b)(2), and 1.954–1(b)(3)	400
(iii) Balance	600
(iv) Less: Deductions allocable to balance	50
(v) Remaining balance	550
(vi) Less: Increase in qualified investments in foreign base company shipping operations	530
(vii) Net foreign base company shipping income	20
(3) Subpart F income: (i) Foreign base company income (line (2)(vii))	20
(ii) Exchange gain attributable to subpart F income	0
(iii) Tentative subpart F income (line (i) plus line (ii))	20
(iv) Earnings and profits limitation	25
(v) Subpart F income (lesser of lines (iii) and (iv))	20

PAR. 3. Section 1.954 is amended by revising section 954 (a), (b), and (f), adding a new sentence at the end of section 954(d)(1), adding a new section 954(g), and revising the historical note to read as follows:

§ 1.954 Statutory provisions; foreign base company income.

Sec. 954. *Foreign base company income*—(a) *Foreign base company income.*—For purposes of section 952(a)(2), the term "foreign base company income" means for any taxable year the sum of—

(1) The foreign personal holding company income for the taxable year (determined under subsection (c) and reduced as provided in subsection (b)(5)),

(2) The foreign base company sales income for the taxable year (determined under subsection (d) and reduced as provided in subsection (b)(5)),

(3) The foreign base company services income for the taxable year (determined under subsection (e) and reduced as provided in subsection (b)(5)), and

(4) The foreign base company shipping income for the taxable year (determined under subsection (f) and reduced as provided in subsection (b)(5)).

(b) *Exclusions and special rules.*

(1) [Repealed]

(2) *Exclusion for reinvested shipping income.* For purposes of subsection (a), foreign base company income does not include foreign base company shipping income to the extent that the amount of such income does not exceed the increase for the taxable year in qualified investments in foreign base company shipping operations of the controlled foreign corporation (as determined under subsection (g)).

(3) *Special rule where foreign base company income is less than 10 percent or more than 70 percent of gross income.* For purposes of subsection (a)—

(A) If the foreign base company income (determined without regard to paragraphs (2) and (5)) is less than 10 percent of gross income, o part of the gross income of the taxable year shall be treated as foreign base company income.

(B) If the foreign base company income (determined without regard to paragraphs (2) and (5)) exceeds 70 percent of gross income, the entire gross income of the taxable year shall, subject to the provisions of paragraph (2), (4), and (5), be treated as foreign base company income.

(4) *Exception for forcign corporations not availed of to reduce taxes.* For purposes of subsection (a), foreign base company income does not include any item of income received by a controlled foreign corporation if it is established to the satisfaction of the Secretary or his delegate that neither—

(A) The creation or organization of such controlled foreign corporation under the laws of the foreign country in which it is incorporated (or, in the case of a controlled foreign corporation which is an acquired corporation, the acquisition of such corporation, created or organized under the laws of the foreign country in which it is incorporated), nor

(B) The effecting of the transaction giving rise to such income through the controlled foreign corporation, has as one of its significant purposes a substantial reduction of income, war profits, or excess profits or similar taxes.

(5) *Deductions to be taken into account.* For purposes of subsection (a), the foreign personal holding company income, the foreign base company sales income, the foreign base company services income, and the foreign base company shipping income shall be reduced, under regulations prescribed by the Secretary or his delegate, so as to take

V 41 154 AUG 9 76 UMI

into account deductions (including taxes) properly allocable to such income.

(6) *Special rules for foreign base company shipping income.* Income of a corporation which is foreign base company shipping income under paragraph (4) of subsection (a) (determined without regard to the exclusion under paragraph (2) of this subsection)—

(A) Shall not be considered foreign base company income of such corporation under any other paragraph of subsection (a) and

(B) If distributed through a chain of ownership described under section 958 (a), shall not be included in foreign base company income of another controlled foreign corporation in such chain.

• • • • • •

(d) *Foreign base company sales income*—(1) *In general.* • • •

For purposes of this subsection, personal property does not include agricultural commodities which are not grown in the United States in commercially marketable quantities.

• • • • • •

(f) *Foreign base company shipping income.* For purposes of subsection (a) (4), the term "foreign base company shipping income" means income derived from, or in connection with, the use (or hiring or leasing for use) of any aircraft or vessel in foreign commerce, or from, or in connection with, the performance of services directly related to the use of any such aircraft, or vessel, or from the sale, exchange, or other disposition of any such aircraft or vessel. Such term includes, but is not limited to—

(1) Dividends and interest received from a foreign corporation in respect of which taxes are deemed paid under section 902, and gain from the sale, exchange, or other disposition of stock or obligations of such a foreign corporation to the extent that such dividends, interest, and gains are attributable to foreign base company shipping income, and

(2) That portion of the distributive share of the income of a partnership attributable to foreign base company shipping income.

(g) *Increase in qualified investments in foreign base company shipping operations.* For purposes of subsection (b) (2), the increase for any taxable year in qualified investments in foreign base company shipping operations of any controlled foreign corporation is the amount by which—

(1) The qualified investments in foreign base company shipping operations (as defined in section 955 (b)) of the controlled foreign corporation at the close of the taxable year, exceed

(2) The qualified investments in foreign base company shipping operations (as so defined) of the controlled foreign corporation at the close of the preceding taxable year.

[Sec. 954 as added by sec. 12(a), Rev. Act 1962 (76 Stat. 1006); as amended by sec. 909, Tax Reform Act 1969 (83 Stat. 718); sec. 602, Tax Reduction Act 1975 (89 Stat. 58).]

PAR. 4. Section 1.954–1 is amended as follows:

1. The heading and paragraphs (a), (b) (1), and (b) (2) are revised.

2. Paragraph (b) (3) is redesignated as paragraph (b) (4), and paragraph (b) (4) is redesignated as paragraph (b) (3).

3. Paragraph (b) (3) (as redesignated) is revised as follows:

a. The heading is revised.

b. Subdivision (i) is revised by deleting "ending after October 9, 1969", and inserting in lieu thereof "beginning after December 31, 1975".

c. Subdivision (ii) is amended by revising (*a*), by deleting "subparagraph (3)" in (*b*) and inserting in lieu thereof "subparagraph (4)", and by deleting "subparagraph (3) (viii)" in the last sentence and inserting in lieu thereof "subparagraph (4) (vii)".

d. Subdivision (iv) is revised by adding a new sentence at the end thereof.

e. Subdivision (v) is amended by deleting "Income Tax Division" and inserting in lieu thereof "Corporate Tax Division".

f. Subdivision (vi) is amended by deleting "subparagraph (3) (vi)" and inserting in lieu thereof "subparagraph (4) (v)", and by deleting "subparagraph (3) (vii)" and inserting in lieu thereof "subparagraph (4) (vi)".

g. Subdivision (vii) is amended by revising the heading, by deleting "example" in the first sentence and inserting in lieu thereof "examples", by redesignating the example as example (1), by deleting "1969" in the seventh sentence of example (1) (as redesignated) and inserting in lieu thereof "1977", and by adding a new example (2) at the end thereof.

4. Paragraph (b) (4) (as redesignated) is revised as follows:

a. The heading, subdivisions (i) and (ii), and so much of subdivision (iii) as precedes (*a*) thereof are revised.

b. Subdivisions (iii) (*a*) (*1*) and (2), (iii) (*b*), and (iv) are each revised by deleting "in respect to" and inserting in lieu thereof "in respect of".

c. Subdivision (v) is deleted.

d. Subdivisions (vi), (vii), and (vii) are redesignated as subdivisions (v), (vi), and (vii), respectively.

e. Subdivision (v) (as redesignated) is revised by deleting "the creation or organization of a controlled foreign corporation results in" and inserting in lieu thereof "there has been", by deleting "29 percent" and inserting in lieu thereof "9 percent", and by deleting "71 percent" and inserting in lieu thereof "91 percent".

f. Subdivision (vi) (as redesignated) is revised by deleting "subdivisions (i) to (vi)" and inserting in lieu thereof "subdivisions (i) to (v)".

g. Example (1) of subdivision (vii) as (redesignated) is revised by deleting "1963" and inserting "1976" in lieu thereof, and by deleting "organization of B Corporation in country Y did not have the effect of substantially reducing" and inserting in lieu thereof "there has been no substantial reduction of".

h. Example (2) of subdivision (vii) (as redesignated) is revised by deleting "organization of B Corporation in country Y did have the effect of substantially reducing" and inserting in lieu thereof "there has been a substantial reduction of".

i. Example (3) of subdivision (vii) (as redesignated) is reserved, and example (4) of subdivision (vii) (as redesignated) is deleted.

5. Paragraph (c) is revised by amending the first and last sentences thereof.

6. Paragraph (d) is revised as follows:

a. The heading is revised.

b. Subparagraph (1) is revised by deleting "30" in both places where it appears and inserting in lieu thereof "10".

c. Subparagraph (2) is amended by deleting "(1)," immediately after "except as provided in paragraphs", and by inserting "(1), (b) (3)," immediately after "and paragraphs (b)".

d. Subparagraph (3) is revised.

e. So much of subparagraph (4) as precedes the example is revised.

f. The example in subparagraph (4) is amended by deleting "30" in all three places where it appears and by inserting in lieu thereof "10".

7. Paragraph (e) is amended by deleting "1.954–5" and inserting in lieu thereof "1.954–7".

8. Paragraph (f) is amended by deleting "1.954–5" and inserting in lieu thereof "1.954–7", and by adding a new subparagraph (3) at the end thereof.

The added and amended provisions read as follows:

§ 1.954–1 Foreign base company income; taxable years beginning after December 31, 1975.

(a) *In general.* The subpart F income of a controlled foreign corporation for any taxable year includes its foreign base company income for such taxable year. See section 952(a). For taxable years beginning after December 31, 1975, the foreign base company income of a controlled foreign corporation consists of the sum of its foreign personal holding company income, as defined in § 1.954–2, its foreign base company sales income, as defined in § 1.954–3, its foreign base company services income, as defined in § 1.954–4, and its foreign base company shipping income, as defined in § 1.954–6, modified and adjusted in accordance with this section. For corresponding rules applicable to taxable years beginning before January 1, 1976, see 26 CFR § CFR § 1.954–1 (Rev. as of April 1, 1975). For additional rules relating to the computation of foreign base company income, see § 1.952–3.

(b) *Exclusions from foreign base company income.* Foreign base company income does not include the following items:

(1) *Reinvested shipping income.*—Foreign base company income does not include foreign base company shipping income to the extent that the amount of such income does not exceed the controlled foreign corporation's increase for the taxable year in qualified investments in foreign base company shipping operations. See section 954(b) (2). For definition of the term "qualified investments in the foreign base company shipping operations", see section 955(b) and § 1.955A–2. For rules relating to the determination of the increase for a taxable year in qualified investments in foreign base company shipping operations, see section 954(g) and § 1.954–7. For rules relating to the computation of the amount excluded from foreign base company income under this subparagraph, see § 1.952–3.

(2) *Chain rule for shipping income.*—Except as provided in section 954(b) (3)

(and notwithstanding any provision of § 1.954–6), dividends distributed by a controlled foreign corporation through a chain of ownership described in section 958(a) to another controlled foreign corporation shall not be included in the foreign base company income of such other controlled foreign corporation to the extent that such dividends are attributable (under § 1.954–6(f) (4)) to foreign base company shipping income. Thus, a distribution which is not excluded from gross income under section 959(b) and § 1.959–2 may be excluded from foreign base company income under section 954(b) (6) (B) and this subparagraph.

(3) *Income of controlled foreign corporations not availed of to substantially reduce income or similar taxes.* • • •

(ii) *Substantial reduction of income taxes.* • • •

(*a*) Item of foreign personal holding company income described in § 1.954–2 or an item of foreign base company shipping income described in § 1.954–6 shall be made by applying the principles of subparagraph (4) (ii) of this paragraph, or

• • • • • •

(iv) *Application of significant purpose test.* • • • The fact that an aircraft or vessel is registered in any particular foreign country does not mean that the income-producing activity in connection with which the aircraft or vessel is used is carried on in that country.

• • • • • •

(vii) *Illustrations.* • • •

Example (2). Controlled foreign corporation X is incorporated under the laws of foreign country A, and uses the calendar year as the taxable year. Corporation X has conducted business for a substantial period of years prior to 1977. Before 1977, X Corporation was subject, under the laws of country A, to an effective tax rate of 46.6 percent on the income (after allocable deductions other than income or similar taxes) derived from purchasing and selling activities conducted throughout the world. A substantial part of its income for 1976 was derived from transactions in which it purchased from an unrelated person in foreign country C raw materials produced in country C and sold them to Z Corporation, a related person organized under the laws of foreign country B for use in country B. If X Corporation had been incorporated under the laws of country B it would have paid income and similar taxes to country B for 1976 in an amount effectively equal to 51.2 percent of the income (after allocable deductions other than income or similar taxes) derived from the sales to Z Corporation. If X Corporation had been incorporated under the laws of country C, it would have paid income and similar taxes to country C for years before 1977 in an amount effectively equal to 52 percent of the income (after allocable deductions other than income or similar taxes) derived from the sales to Z Corporation. In 1977, X Corporation also derives a substantial part of its income from transactions in which it purchases from an unrelated person in country C raw materials produced in country C and sells them to Z Corporation for use in country B. Effective January 1, 1977, there is a general reduction in income tax rates in country A, so that X Corporation pays an income tax to country A for 1977 in an amount effectively equal to 45 percent of the income (after allocable deductions other than income or similar taxes) from the sales to Z Corporation. The income tax laws of countries B and C applicable for 1976 remain applicable to 1977 without change. During years both before and after the reduction in country A tax, X Corporation actively conducts a trade or business of purchasing personal property from unrelated persons and selling such property to unrelated persons as well as to Z Corporation. For 1977, the percentage of total income of X Corporation derived from sales of the raw materials to Z Corporation and the nature of the raw materials so sold to Z Corporation remain substantially unchanged from that for 1976. Although the rate of income and similar taxes paid by X Corporation to country A for 1977 on the income from the sales to Z Corporation is less than 90 percent of, and as much as 5 percentage points less than, the rate (51.2 percent) of the income and similar taxes which X Corporation would have paid to country B on the income from the sales to Z Corporation, under subdivision (iv) of this subparagraph the other facts and circumstances in this example will establish to the satisfaction of the district director that (a) the organization of X Corporation in country A, and (b) the effecting through X Corporation of the sales to Z Corporation during 1977, did not have as a significant purpose a substantial reduction of income or similar taxes. Foreign base company income of X Corporation for 1977 does not include income derived from such sales. However, if the percentage of the total income of X Corporation derived from sales of raw materials to Z Corporation were substantially increased, or if the nature of the raw materials so sold to Z Corporation were significantly changed, the facts and circumstances of this example would not establish to the satisfaction of the district director that the effecting through X Corporation of the additional or unusual sales to Z Corporation during 1977 did not have as a significant purpose a substantial reduction of income or similar taxes.

(4) *No substantial reduction of income or similar taxes*—(i) *Scope.*—This subparagraph prescribes rules for the application of subparagraph (3) of this paragraph.

(ii) *Foreign personal holding company income and foreign base company shipping income.*—[Reserved]

(iii) *Foreign base company sales and services income.*—For purposes of this paragraph, there will be considered to have been no substantial reduction of income, war profits, excess profits, or similar taxes with respect to an item of foreign base company sales income described in § 1.954–3 or an item of foreign base company services income described in § 1.954–4 if the effective rate of such taxes paid to a country or countries for the taxable year in respect of such item of income by the controlled foreign corporation equals or exceeds 90 percent of, or is not as much as 5 percentage points less than —

• • • • • •

(c) *Gross income and deductions to be taken into account.* For purposes of section 954 and this section, foreign personal holding company income as defined in § 1.954–2, foreign base company sales income as defined in § 1.954–3, foreign base company services income as defined in § 1.954–4, and foreign base company shipping income as defined in § 1.954–6 shall be taken into account in determining foreign base company income after allowance for deductions properly allocable to such categories of income. • • • However, if the foreign base company income of a controlled foreign corporation exceeds 70 percent (as determined under paragraph (d) of this section) of gross income, the entire expenses, taxes, and other deductions shall be taken into account, except expenses, taxes, and other deductions properly allocable to amounts excluded from foreign base company income under the provisions of paragraph (4) of section 954(b) and paragraph (b) (3) of this section and expenses, taxes, and other deductions properly allocable to amounts excluded from subpart F income under sections 952(b) and the regulations thereunder.

(d) *Special rules where foreign base company income is less than 10 percent or more than 70 percent of gross income.* • • •

(3) *Method of computation.*—See § 1.952–3 for rules relating to the method of determining the percentage which foreign base company income is of gross income under subparagraphs (1) and (2) of this paragraph.

(4) *Branches of controlled foreign corporations treated as separate corporations.* (i) *In general.*—The 10-percent and 70-percent tests described in subparagraphs (1) and (2) of this paragraph apply to the foreign base company income of each controlled foreign corporation. In addition, if a branch or similar establishment of a controlled foreign corporation is treated as a separate wholly owned subsidiary corporation of such corporation under section 954(d) (2) and paragraph (b) of § 1.954–3, the 10-percent and 70-percent tests apply separately to the income allocated under such paragraph to such branch or similar establishment, to other branches and similar establishments similarly treated, and to the remainder of the controlled foreign corporation.

(ii) *Illustration.* The application of this subparagraph may be illustrated by the following example:

• • • • • •

(f) *Classification of an item of income.* • • •

(3) *Shipping classification applies first.*—Foreign base company shipping income (as determined under § 1.954–6) of a controlled foreign corporation shall not also be considered foreign personal holding company income, foreign base company sales income, or foreign base company services income. See section 954 (b) (6) (A).

PAR. 5. Section 1.954–2 is amended as follows:

1. The first sentence of paragraph (a) is amended by inserting "section 954(b) (6) (A)," immediately before "section 954(c) (3) and (4)", and by striking out "(e)" and inserting "(f)" in lieu thereof.

2. A new paragraph (f) is added at the end thereof to read as follows:

V 41 154 AUG 9 76 UMI

§ 1.954–2 Foreign personal holding company income.

. . . . . .

(f) *Shipping income for taxable years beginning after December 31, 1975.* For taxable years beginning after December 31, 1975, foreign base company shipping income of a controlled foreign corporation (as determined under § 1.954–6) shall not also be considered foreign personal holding company income of that controlled foreign corporation.

PAR. 6. Section 1.954–3 is amended by inserting "or foreign base company shipping income under § 1.954–6" immediately after "§ 1.954–2" in the fourth sentence of paragraph (a) (1) and by adding a new paragraph (c) to read as follows:

§ 1.954–3 Foreign base company sales income.

. . . . . .

(c) *Shipping income for taxable years beginning after December 31, 1975.* For taxable years beginning after December 31, 1975, foreign base company shipping income (as determined under § 1.954–6) of a controlled foreign corporation shall not also be considered foreign base company sales income of that controlled foreign corporation.

PAR. 7. Section 1.954–4(d) is amended by deleting "or" at the end of subparagraph (1), by deleting the period at the end of subparagraph (2) and inserting in lieu thereof "; or", and by adding a new subparagraph (3) at the end thereof to read as follows:

§ 1.954–4 Foreign base company services income.

. . . . . .

(d) *Items excluded.* * * *

(3) For taxable years beginning after December 31, 1975, foreign base company shipping income (as determined under § 1.954–6).

PAR. 8. Immediately after § 1.954–5 new §§1.954–6 and 1.954–7 are added to read as follows:

§ 1.954–6 Foreign base company shipping income.

(a) *Scope.* (1) *In General.*—This section prescribes rules for determining foreign base company shipping income under the provisions of section 954 (f), as amended by the Tax Reduction Act of 1975.

(2) *Effective date.*—(i) The rules prescribed in this section apply to taxable years of foreign corporations beginning after December 31, 1975, and to taxable years of United States shareholders (as defined in section 951 (b)) within which or with which such taxable years of such foreign corporations end.

(ii) Foreign base company shipping income does not include amounts earned by a foreign corporation in a taxable year of such corporation beginning before January 1, 1976. See example (1) of paragraph (g) (2) of this section for an illustration of the effect of this subparagraph on partnership income. See example (3) of paragraph (f) (4) (ii) of this section for an illustration of the effect of this subparagraph on certain dividend income. See paragraph (f) (5) (iii) of this section for the effect of this subparagraph on certain interest and gains.

(b) *Definitions.* (1) *Foreign base company shipping income.*—The term "foreign base company shipping income" means—

(i) Gross income derived from, or in connection with, the use (or hiring or leasing for use) of any aircraft or vessel in foreign commerce (see paragraph (c) of this section),

(ii) Gross income derived from, or in connection with, the performance of services directly related to the use of any aircraft or vessel in foreign commerce (see paragraph (d) of this section),

(iii) Gross income incidental to income described in subdivisions (i) and (ii) of this subparagraph, as provided in paragraph (e) of this section.

(iv) Gross income derived from the sale, exchange, or other disposition of any aircraft or vessel used (by the seller or by a person related to the seller) in foreign commerce,

(v) In the case of a controlled foreign corporation, dividends, interest, and gains described in paragraph (f) of this section,

(vi) Income described in paragraph (g) of this section (relating to partnerships, trust, etc.), and

(vii) Exchange gain, to the extent allocable to foreign base company shipping income (see § 1.952–2(c) (2) (v) (b)).

(2) *Foreign base company shipping operations.*—For purposes of sections 951 through 964, the term "foreign base company shipping operations" means the trade or business from which gross income described in subparagraph (1) (i) and (ii) of this paragraph is derived.

(3) *Foreign commerce.*—For purposes of sections 951 through 964—

(i) An aircraft or vessel is used in foreign commerce if it is used in transportation of property or passengers—

(A) Between a port (or airport) in the United States or possession of the United States and a port (or airport) in a foreign country, or

(B) Between a port (or airport) in a foreign country and another in the same country or between a port (or airport) in a foreign country and one in another foreign country.

Thus, for example, a trawler, a factory ship, and an oil drilling ship are not considered to be used in foreign commerce. On the other hand, a cruise ship which visits one or more foreign ports is considered to be so used.

(ii) The term "vessel" includes all water craft and other artificial contrivances of whatever description and at whatever stage of construction, whether on the stocks or launched, which are used or are capable of being used or are intended to be used as a means of transportation on water.

(iii) The term "port" means any place where aircraft or vessels are accustomed to load or unload goods or to take on or let off passengers.

(iv) Any vessel (such as a lighter or beacon lightship) which serves other vessels used (within the meaning of subdivision (i) of this subparagraph) in foreign commerce shall, to the extent so used, also be considered to be used in foreign commerce.

(v) For the meaning of the term "foreign country", see section 638(2).

(4) *Use in foreign commerce.*—For purposes of sections 951 through 964, the use of an aircraft or vessel in foreign commerce includes the hiring or leasing (or subleasing) of an aircraft or vessel to another for use in foreign commerce. Thus, for example, an aircraft or vessel is "used in foreign commerce" within the meaning of section 955(b) (1) (A) if such aircraft or vessel is chartered (whether pursuant to a bareboat charter, time charter, or otherwise) to another for use in foreign commerce.

(5) *Related person.*—With respect to a controlled foreign corporation, the term "related person" means a related person as defined in § 1.954–1(e) (1), and the term "unrelated person" means an unrelated person as defined in § 1.954–1 (e) (2).

(c) *Aircraft or vessel income.*—(1) *In general.*—The term "income derived from, or in connection with, the use (or hiring or leasing for use) of any aircraft or vessel in foreign commerce" as used in paragraph (b) (1) (i) of this section means—

(i) Income derived from transporting passengers or property by aircraft or vessel in foreign commerce and

(ii) Income derived from hiring or leasing an aircraft or vessel to another for use in foreign commerce.

(2) *Illustrations.*—The application of this paragraph may be illustrated by the following examples:

Example (1). Foreign corporation C owns a foreign flag vessel which it charters under a long-term charter to foreign corporation D. The vessel is used by D as a tramp which has no fixed or regular schedule. The vessel carries bulk and packaged cargoes, as well as occasional passengers, under charter parties, contracts of affreightment, or other contracts of carriage. The carriage of cargoes and passengers is between a port in the United States and a port in a foreign country or between a port in one foreign country and another port in the same or a different foreign country. The charter hire paid to C by D constitutes income derived from the use of the vessel in foreign commerce. The charter hire and freight and passenger revenue (including demurrage and dead freight) derived by D also constitute income derived from the use of the vessel in foreign commerce.

Example (2). (a) Foreign corporation F owns a foreign flag tanker which it charters under a long-term bareboat charter to foreign corporation F for use in foreign commerce. F produces oil in a foreign country and ships the oil to other foreign countries and to the United States. The vessel, when not engaged in carrying F's oil, is used to carry bulk cargoes for unrelated persons in foreign commerce as opportunity offers. The charter hire received by E constitutes income derived from the use of the vessel in foreign commerce. The income derived by F from carrying bulk cargoes for unrelated persons also constitutes income derived from the use of the vessel in foreign commerce.

(b) F is forced to lay up the vessel as a result of adverse market developments. Pursuant to the terms of the charter, F continues to pay charter hire to E during the period of lay-up. The charter hire received by E during the period of lay-up constitutes income derived from the use of the vessel in foreign commerce.

Example (3). (a) A shipment of cheese is loaded into a container owned by controlled foreign corporation S at the consignor's place of business in Hamar, Norway. The cheese is transported to Milan, Italy, by the following routings:

(1) Overland by road from Hamar, Norway, to Gothenburg, Sweden, by unrelated motor carriers via Oslo, Norway,

(2) By sea from Gothenburg to Rotterdam, Netherlands, by feeder vessel under foreign flag, time chartered to S by unrelated owner,

(3) By sea from Rotterdam to Algeciras, Spain, by feeder vessel under foreign flag, time chartered to S by unrelated owner,

(4) By sea from Algeciras to Genoa, Italy, by line-haul vessel under U.S. flag, chartered by S from related company, and

(5) Overland from Genoa to Milan, Italy, by unrelated motor carrier.

(b) The consignor pays S total charges of $1,710, and S pays $676 to unrelated third parties, which amounts may be broken down as follows:

Description of charges	Amount billed to customer and collected by S	Revenue collected by S on behalf of an unrelated party	Costs paid to unrelated 3d party and absorbed by S
Ocean freight	$1,420		
Trucking charge of empty equipment to shipper's facility	50	$50	
Trucking charges Hamar to Oslo	60	60	
Trucking charges Oslo to Gothenburg			$315
Trucking charges Genoa to Milan	180	180	
Brokerage Commission in Europe			71
Total	1,710	290	386

(c) Of the $1,710 amount billed to the consignor and collected by S, $290 is collected by S on behalf of unrelated third parties. This $290 amount is not includible in S's gross income, and is therefore not includible in S's foreign base company shipping income. The remaining $1,420 amount (i.e., $1,710 −$290) is includible in S's foreign base company shipping income. The $386 amount paid by S to unrelated third parties and absorbed by S is deductible from foreign base company shipping income under § 1.954–1(c).

(d) *Services directly related.* (1) *In general.*—The term "income derived from, or in connection with, the performance of services directly related to the use of an aircraft or vessel in foreign commerce", as used in paragraph (b) (1) (ii) of this section, means—

(i) Income derived from, or in connection with, the performance of services described in subparagraph (2) or (3) of this paragraph, and

(ii) Income treated as foreign base company shipping income under subparagraph (4) of this paragraph.

(2) *Intragroup services.*—The services described in this subparagraph are services performed for a person who is the owner, lessor, or operator of an aircraft or vessel used in foreign commerce, by such person or by a person related to such person, and which fall into one or more of the following categories:

(i) Terminal services, such as dockage, wharfage, storage, lights, water, refrigeration, and similar services;

(ii) Stevedoring and other cargo handling services;

(iii) Container related services (including the rental of containers and related equipment) performed in connection with the local drayage or inland haulage of cargo;

(iv) Services performed by tugs, lighters, barges, scows, launches, floating cranes, and other similar equipment;

(v) Maintenance and repairs;

(vi) Training of pilots and crews;

(vii) Licensing of patents, know-how, and similar intangible property developed and used in the course of foreign base company shipping operations;

(viii) Services performed by a booking, operating, or managing agent; and

(ix) Any service performed in the course of the actual transportation of passengers or property.

(3) *Services for passenger, consignor, or consignee.*—The services described in this subparagraph are services provided by the operator (or person related to the operator) of an aircraft or vessel in foreign commerce for the passenger, consignor, or consignee, such as—

(i) Services described in one or more of the categories set out in subparagraph (2) (i) through (iv) and (ix) of this paragraph,

(ii) The rental of staterooms, berths, or living accommodations and the furnishing of meals.

(iii) Barber shop and other services to passengers aboard vessels.

(iv) Excess baggage, and

(v) Demurrage, dispatch, and dead freight.

(4) *The 70-percent test.*—All the gross income for a taxable year derived by a foreign corporation from any facility used in connection with the performance of services described in one or more of the categories set out in subparagraph (2) (i) through (ix) of this paragraph is foreign base company shipping income if more than 70 percent of such gross income for either—

(i) Such taxable year, or

(ii) Such taxable year and the two preceding taxable years,

is foreign base company shipping income (determined without regard to this subparagraph). Thus, for example, if 80 percent of the gross income derived by a controlled foreign corporation at a stevedoring facility is treated as foreign base company shipping income under subparagraph (2) of this paragraph, then the remaining 20 percent is treated as foreign base company shipping income under this subparagraph.

(5) *Rules for applying subparagraph (4).*—(i) Solely for purposes of applying subparagraph (4) of this paragraph, foreign base company shipping income and gross income shall be deemed to include an arm's length charge (see paragraph (h) (5) of this section) for services performed by a foreign corporation for itself.

(ii) In determining whether services performed by a foreign corporation are performed at a single facility or at two or more different facilities, all of the facts and circumstances involved will be taken into account. Ordinarily, all services performed by a foreign corporation within a single port area will be considered performed at a single facility.

(iii) The application of this subparagraph and subparagraph (4) of this paragraph may be illustrated by the following example:

Example. (a) Controlled foreign corporation X uses the calendar year as the taxable year. For 1976, X is divided into two operating divisions, A and B. Division A operates a number of vessels in foreign commerce. Division B operates a terminal facility at which it performs services described in subparagraph (2) (i) of this paragraph for vessels some of which are operated by division A, some of which are operated by persons related to X, and some of which are operated by persons unrelated to X. For 1976, the gross income derived by division B is reconstructed for purposes of subparagraph (4) of this paragraph as follows, based on the facts shown in the following table:

(1) Gross income derived from persons unrelated to X	$20
(2) Gross income derived from persons related to X	10
(3) Actual gross income (line (1) plus line (2))	30
(4) Hypothetical gross income derived from division A (determined by the application of subdivision (i) of this subparagraph)	70
(5) Total reconstructed gross income (line (3) plus line (4))	100

(b) Since 80 percent of the reconstructed gross income derived by division B would be treated as foreign base company shipping income under subparagraph (2) of this paragraph, the entire $30 amount of the gross income actually derived by division B is treated as foreign base company shipping income under subparagraph (4) of this paragraph.

(6) *Arm's length charge.*—For purposes of this section, the arm's length charge for services performed by a foreign corporation for itself shall be determined by applying the principles of section 482 and the regulations thereunder as if the party for whom the services are performed and the party by whom the services are performed were not the same person, but were controlled taxpayers within the meaning of § 1.482–1(a) (4).

(7) *Illustrations.*—The application of this paragraph may be illustrated by the following examples.

Example (1). Controlled foreign corporation A acts as a managing agent for foreign corporation B, a related person which contracts to construct and charter a foreign flag vessel for use in foreign commerce. As managing agent for B, A performs a broad range of services relating to the use of the vessel, including arranging for, and supervising of, construction and chartering of the vessel, and handling of operating services after construction is completed. The income derived by A from its management and operating services constitutes income derived in connection with the performance of services directly related to the use of the vessel in foreign commerce.

V 41 154 AUG 9 76 UMI

Example (2). Controlled foreign corporation C uses the calendar year as the taxable year. During 1976, C is engaged in the trade or business of acting as a steamship agent solely for unrelated persons. C's activities as steamship agent range from "husbanding" (i.e., arranging for fuel, supplies and port services, and attending to crew and customs matters) to the solicitation and booking of cargo at a number of foreign ports. None of C's other gross income for 1976 is foreign base company shipping income. Under these circumstances, C's gross income derived from its steamship agency does not constitute foreign base company shipping income.

(e) *Incidental income.* (1) *In general.*—Foreign base company shipping income includes all incidental income derived by a foreign corporation in the course of the active conduct of foreign base company shipping operations.

(2) *Examples.*—Examples of incidental income derived in the course of the active conduct of foreign base company shipping operation are—

(i) Gain from the sale, exchange or other disposition of assets which are related shipping assets within the meaning of § 1.955A–2(b),

(ii) Income derived from temporary investments described in § 1.955A–2(b)(2)(i) and (iii),

(iii) Interest on accounts receivable and evidences of indebtedness described in § 1.955A–2(b)(2)(ii),

(iv) Income derived from granting concessions to others aboard aircraft or vessels used in foreign commerce,

(v) Income derived from stock and currency futures described in § 1.955A–2(b)(2)(vii) and (viii), and

(vi) Income derived by the lessor of an aircraft or vessel used in foreign commerce from additional rentals for the use of related equipment (such as a complement of containers).

(f) *Certain dividends, interest, and gain* (1) *In general.*—The foreign base company shipping income of any controlled foreign corporation which would be deemed under section 902 (b) to pay taxes in respect of another foreign corporation includes—

(i) Dividends and interest received from such other foreign corporation, and

(ii) Gain recognized from the sale, exchange, or other disposition of stock or obligations of such other foreign corporation, to the extent that such dividends, interest, and gains are attributable to foreign base company shipping income. This subparagraph applies whether or not such other foreign corporation is a controlled foreign corporation.

(2) *Corporation deemed to pay taxes.*—(i) For purposes of this paragraph, a controlled foreign corporation would be deemed under section 902 (b) to pay taxes in respect of any other foreign corporation if such controlled foreign corporation would be deemed, for purposes of applying section 902 (a) to any United States shareholder of such controlled foreign corporation, to pay taxes in respect of dividends which were received from such other foreign corporation (whether or not such other foreign corporation actually pays any taxes or dividends). Solely for purposes of this subdivision, each United States shareholder (within the meaning of section 951 (b)) shall be deemed to be a domestic corporation.

(ii) The application of subdivision (i) of this subparagraph may be illustrated by the following examples:

Example (1). Domestic corporation M owns 100 percent of the one class of stock of controlled foreign corporation X, which in turn owns 40 percent of the one class of stock of foreign corporation Y. Y is not a controlled foreign corporation. For purposes of subdivision (i) of this subparagraph, X is deemed to pay taxes in respect of Y.

Example (2). The facts are the same as in example (1), except that United States shareholder A, an individual, owns 90 percent of the stock of corporation X, and United States shareholders B and C, parent and child, own the other 10 percent in equal shares. For purposes of applying this paragraph to all three United States shareholders (A, B, and C), X is deemed to pay taxes in respect of Y.

(3) *Obligation defined.*—For purposes of this section, the term "obligation" means any bond, note, debenture, certificate, or other evidence of indebtedness. In the absence of legal, governmental, or business reasons to the contrary, the indebtedness must bear interest or be issued at a discount.

(4) *Dividends.*—(i) For purposes of this paragraph and § 1.954–1(b)(2), the portion of a dividend which is attributable to foreign base company shipping income is that amount which bears the same ratio to the total dividend received as the earnings and profits out of which such dividend is paid that are attributable to foreign base company shipping income bears to the total earnings and profits out of which such dividend is paid. For purposes of this subdivision, the source of the earnings and profits out of which a distribution is made shall be determined under section 316(a), except that the source of the earnings and profits out of which a distribution is made by a controlled foreign corporation with respect to stock owned (within the meaning of section 958(a)) by a United States shareholder of such controlled foreign corporation shall be determined under § 1.959–3.

(ii) The application of this subparagraph may be illustrated by the following examples:

Example (1). Domestic corporation M owns 100 percent of the one class of stock of controlled foreign corporation X, which in turn owns 40 percent of the one class of stock of foreign corporation Y. Y, which is not a controlled foreign corporation, makes a distribution of $100 to X. Under section 316(a), such distribution is made out of Y's earnings and profits for 1978. Sixty percent of Y's earnings and profits for 1978 are attributable to foreign base company shipping income. As a result, $60 of the $100 distribution constitutes foreign base company shipping income to X under subdivision (i) of this subparagraph.

Example (2). The facts are the same as in example (1), except that under section 316(a) $20 of the $100 dividend is paid out of Y's earnings and profits for 1979, and the other $80 is paid out of Y's earnings and profits for 1978. Thirty percent of Y's earnings and profits for 1979 are attributable to foreign base company shipping income. Since 60 percent of Y's earnings and profits for 1978 are also attributable to foreign base company shipping income, $54, i.e. (.60×$80)+(.30×$20), of the $100 distribution constitutes foreign base company shipping income to X under subdivision (i) of this subparagraph.

Example (3). The facts are the same as in example (1) except that under section 316(a) the $100 dividend is made out of Y's earnings and profits for 1972. Since under pargraph (a)(2)(ii) of this section foreign base company shipping income does not include amounts earned by a foreign corporation in a taxable year beginning before January 1, 1976, no amount of such $100 distribution constitutes foreign base company shipping income to X under subdivision (i) of this subparagraph.

Example (4). Domestic corporation N owns 100 percent of the one class of stock of controlled foreign corporation S, which in turn owns 100 percent of the one class of stock of controlled foreign corporation T. T makes a distribution of $100 to S, of which $80 is allocable under § 1.959–3 to earnings and profits for 1977 which are described in § 1.959–3(c)(2), and $20 is allocable to earnings and profits for 1978 which are described in § 1.959–3(c)(3). The $80 amount is excluded from S's gross income under section 959(b) and therefore is not included in S's foreign base company shipping income. One hundred percent of T's earnings and profits for 1978 described in § 1.959–3(c)(3) were attributable to reinvested foreign base company shipping income. As a result, the entire $20 amount is included in S's foreign base company shipping income under this paragrph. See § 1.954–1(b)(2) for the rule that such $20 amount may be excluded from the foreign base company income of S.

(5) *Interest and gain.*—(i) Except as provided in subdivisions (ii) and (iii) of this subparagraph, the portion of any interest paid by a foreign corporation, or gain recognized from the sale, exchange, or other disposition of stock or obligations of a foreign corporation, which is attributable to the foreign base company shipping income of such foreign corporation is that amount which bears the same ratio to such interest or gain as the foreign base company shipping income of such corporation for the period described in subparagraph (6) of this paragraph bears to its gross income for such period.

(ii) Interest which is paid by a controlled foreign corporation is attributable to such corporation's foreign base company shipping income to the same extent that such interest is allocable (under the principles of § 1.954–1(c)) to its foreign base company shipping income.

(iii) If interest is paid by a foreign corporation, or if stock or obligations of a foreign corporation are sold, exchanged, or otherwise disposed of, during a taxable year of such foreign corporation beginning before January 1, 1976, then no portion of such interest or gain is attributable to foreign base company shipping income.

(iv) Solely for purposes of subdivision (i) of this subparagraph, if a controlled foreign corporation (the "first corporation") owns more than 10 percent of the stock of another controlled foreign corporation (the "second corporation"), then

(A) The gross income of the first corporation for any taxable year shall be

(1) Increased by its pro rata share of the gross income of the second corporation for the taxable year which ends with or within such taxable year of the first corporation, and

(2) Decreased by the amount of any dividends received from the second corporation; and

(B) The foreign base base company shipping income of the first corporation for any taxable year shall be—

(1) Increased by its pro rata share of the foreign base company shipping income of the second corporation for the taxable year which ends with or within such taxable year of the first corporation, and

(2) Decreased by the amount of any dividends received from the second corporation which constitute foreign base company income.

(v) Solely for purposes of applying subdivision (i) of this subparagraph, the district director shall make such other adjustments to the gross income and the foreign base company shipping income of any foreign corporation as are necessary to properly determine the extent to which any interest or gain is attributable to foreign base company shipping income, including proper adjustments to reflect any transaction during the test period described in subparagraph (6) of this paragraph to which section 332, 351, 354, 355, 356, or 361 applies.

(6) *Test period.*—(i) Except as provided in subdivisions (ii) and (iii) of this subparagraph, the period described in this subparagraph with respect to any foreign corporation is the 3-year period ending with the close of such corporation's taxable year preceding the year during which interest was paid or stock or obligations were sold, exchanged, or otherwise disposed of, or such part of such period as such corporation was in existence.

(ii) The period described in this paragraph shall not include any part of a taxable year beginning before January 1, 1976.

(iii) If interest is paid by a foreign corporation, or if stock or obligations of a foreign corporation are sold, exchanged, or otherwise disposed of during its first taxable year, then the period described in this paragraph shall be such first taxable year.

(iv) For purposes of subdivision (iii) of this subparagraph, the first taxable year of a foreign corporation is the later of—

(A) The first taxable year of its existence, or

(B) Its first taxable year beginning after December 31, 1975.

(g) *Income from partnerships, trusts, etc.* (1) *In general.* The foreign base company shipping income of any foreign corporation includes—

(i) Its distributive share of the gross income of any partnership, and

(ii) Any amounts includible in its gross income under section 652(a), 662(a), 671, or 691(a),

to the extent that such items would have been includible in its foreign base company shipping income had they been realized by it directly.

(2) *Illustrations.*—The application of subparagraph (1) of this paragraph may be illustrated by the following examples:

Example (1). Controlled foreign corporations X and Y are equal partners in partnership P. The taxable years end on December 31 for X, June 30 for Y, and March 31 for P. In the fiscal year ending March 31, 1976, P's sole business activity is the use of a vessel in foreign commerce. P derives gross income of $200 from the use of the vessel, and incurs expenses, taxes, and other deductions of $160. Assume X's distributive share of such $200 of P's gross income is $100, all of which is includible in X's gross income. If X had realized its distributive share of $100 directly, then the amount which would have been includible in X's foreign base company shipping income under this paragraph is the portion allocable to the months of January, February, and March of 1976. Such amount, $25 (i.e., ½ × $200 × 3 months/12 months), is included in X's foreign base company shipping income for its taxable year ending December 31, 1976. Similarly, X is entitled under this paragraph to a deduction from foreign base company shipping income of $20 (i.e., ½ × $160 × 3 months/12 months). Since foreign base company shipping income does not include amounts earning by a foreign corporation in a taxable year beginning before January 1, 1976, Y has no foreign base company shipping income (under this paragraph or otherwise) for its taxable year beginning on July 1, 1975.

Example (2). The facts are the same as in example (1), except that P incurs expenses, taxes, and deductions of $240 in its taxable year ending on March 31, 1976. Accordingly, $25 is includible in X's foreign base company shipping income, and the amount deductible therefrom under this paragraph is $30 (i.e., ½×$240×3 months/12 months).

(3) *Other income.*—Except as expressly provided in subparagraph (1) of this paragraph, foreign base company shipping income does not include any amount includible in the gross income of a controlled foreign corporation under part I of subchapter J (section 641 and following, relating to estates, trusts, and beneficiaries), and gains from the sale or other disposition of any interest in an estate or trust.

(h) *Additional rules.* (1) *Gross income.*—For purposes of this section and § 1.955A–2, the gross income of a foreign corporation (whether or not a controlled foreign corporation) shall be determined in accordance with the provisions of section 952 and § 1.952–2. Thus, for example, section 883 (relating to exclusions from gross income of foreign corporations) is inapplicable under § 1.952–2(a)(1) and (c)(1). In addition, the gross income of a controlled foreign corporation shall be determined, with respect to a United States shareholder of such controlled foreign corporation, by excluding distributions received by such corporation which are excluded from gross income under section 959(b) with respect to such shareholder.

(2) *Earnings and profits.*—For purposes of this section, the earnings and profits of a foreign corporation (whether or not a controlled foreign corporation) shall be determined in accordance with the provisions of section 964 and the regulations thereunder.

(3) *No double counting.*—No item of gross income shall be counted as foreign base company shipping income under more than one provision of this section. For example, if $200 of gross income derived from the use of a lighter is treated as foreign base company shipping income under both paragraph (b)(1)(i) and paragraph (b)(1)(ii) of this section, then such $200 is counted only once as foreign base company shipping income.

(4) *Losses.*—(i) Generally, if a controlled foreign corporation has losses which are properly allocable to foreign base company shipping income, the extent to which such losses are deductible from such income shall be determined by treating such foreign corporation as a domestic corporation and applying the principles of section 63. See §§ 1.954–1(c) and 1.952–2(b). Thus, for example, losses from sales or exchanges of capital assets are allowable only to the extent of gains from such sales or exchanges.

(ii) If gain from the sale, exchange, or other disposition of any stock or obligation would be treated (to any extent) as foreign base company shipping income, then loss from such sale, exchange, or other disposition is properly allocable to foreign base company shipping income (to the same extent).

(iii) In determining the extent to which any loss on the disposition of a qualified investment in foreign base company shipping operations is deductible from foreign base company shipping income, it is immaterial that such loss is taken into account under § 1.955A–1(b)(1)(ii) as a reduction in the amount of the decrease in qualified investments in foreign base company shipping operations.

(5) *Hypothetical charges.* — Under paragraph (d)(5)(i) of this section and § 1.955A–2(a)(4)(ii)(A), gross income may be deemed to include hypothetical arm's length charges for services performed by a controlled foreign corporation for itself. Under paragraph (d)(2) of this section, certain of these hypothetical charges may be treated as foreign base company shipping income. Such hypothetical charges are deemed to be income solely for purposes of applying the "extent of use" tests prescribed by paragraph (d)(4) of this section and § 1.955A–2(a)(4). Charges for services performed by a controlled foreign corporation for itself shall in no event be included in income for any other purpose.

§ 1.954–7 Increase in qualified investments in foreign base company shipping operations.

(a) *Determination of investments at close of taxable year.* (1) *In general.*—Under section 954(g), the increase in qualified investments in foreign base company shipping operations, for purposes of section 954(b)(2) and paragraph (b)(1) of § 1.954–1, of any controlled foreign corporation for any taxable year is, except as provided in paragraph (b) of this section, the amount by which—

V 41 1154 AUG 9 76 UMI

(i) The controlled foreign corporation's qualified investments in foreign base company shipping operations at the close of the taxable year, exceed

(ii) Its qualified investments in foreign base company shipping operations at the close of the preceding taxable year.

(2) *Preceding taxable year.*—For purposes of this section, a taxable year which begins before January 1, 1976, may be a preceding taxable year.

(3) *Cross-reference.*—See section 955(b) and § 1.955A–2 for the definition of the term "qualified investments in foreign base company shipping operations".

(b) *Election to determine investments at close of following taxable year.* (1) *General rule.* In lieu of determining an increase in qualified investments in foreign base company shipping operations for a taxable year in the manner provided in paragraph (a) of this section, a United States shareholder of a controlled foreign corporation may make an election under section 955(b)(3) to determine the increase for the corporation's taxable year by ascertaining the amount by which—

(i) Such corporation's qualified investments in foreign base company shipping operations at the close of the taxable year immediately following such taxable year, exceed

(ii) Its qualified investments in foreign base company shipping operations at the close of the taxable year immediately preceding such following taxable year.

(2) *Election with respect to first taxable year.* Notwithstanding subparagraph (1) of this paragraph, if an election is made without consent by a United States shareholder under § 1.955A–4 (b)(1) with respect to a controlled foreign corporation the increase in such controlled foreign corporation's qualified investments in foreign base company shipping operations for the first taxable year to which such election applies shall be the amount by which—

(i) Such corporation's qualified investments in foreign base company shipping operations at the close of the taxable year immediately following such first taxable year, exceed

(ii) Its qualified investments in foreign base company shipping operations at the close of the taxable year immediately preceding such first taxable year.

(3) *Manner of making election.* For the manner of making an election under section 955(b)(3), and for rules pertaining to the revocation of such an election, see § 1.955A–4.

(4) *Coordination with prior law.* If a United States shareholder makes an election without consent under § 1.955A–4 (b)(1) with respect to a controlled foreign corporation, then such corporation's increase in qualified investments in foreign base company shipping operations for the first taxable year to which such election applies shall be determined by disregarding any change which occurs during such taxable year in the amount of such corporation's investments in stock or obligations of a less developed country shipping company described in § 1.955–5 (b) if both of the following conditions exist:

(i) Such taxable year is the first taxable year of such corporation which begins after December 31, 1975, and

(ii) Such United States shareholder has elected to determine the change in such corporation's qualified investments in less developed countries for its last taxable year beginning before January 1, 1976, under § 1.954–5 (b) or § 1.955–3.

(5) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example (1). (a) Controlled foreign corporation X is a wholly-owned subsidiary of domestic corporation M. X uses the calendar year as the taxable year. The amounts of X's qualified investments in foreign base company shipping operations at the close of 1975 through 1979 are as follows:

Qualified investments at Dec. 31, 1975	$16,000
Qualified investments at Dec. 31, 1976	17,000
Qualified investments at Dec. 31, 1977	23,000
Qualified investments at Dec. 31, 1978	28,000
Qualified investments at Dec. 31, 1979	30,000

(b) Assume that M properly files without consent a timely election under § 1.955A–4(b)(1) to determine X's increase for 1976 in qualified investments in foreign base company shipping operations pursuant to this paragraph, and that the election remains in force through 1978. Then X's increases for 1976 through 1978 in qualified investments in foreign base company shipping operations are as follows:

Increase for 1976 ($23,000 minus $16,000)	$7,000
Increase for 1977 ($28,000 minus $23,000)	5,000
Increase for 1978 ($30,000 minus $28,000)	2,000

Example (2). Assume the same facts as in example (1), except that M never files an election under § 1.955A–4(b)(1). X's increases for 1976 through 1978 in qualified investments in foreign base company shipping operations are as follows:

Increase for 1976 ($17,000 minus $16,000)	$1,000
Increase for 1977 ($23,000 minus $17,000)	6,000
Increase for 1978 ($28,000 minus $23,000)	5,000

Example (3). The facts are the same as in example (1), except that X's qualified investments in foreign base company shipping operations include an investment in less developed country shipping companies described in § 1.955–5(b) of $500 on December 31, 1975, and $750 on December 31, 1976. Assume further that M has made an election under section 955(b)(3) (as in effect before the enactment of the Tax Reduction Act of 1975) with respect to X's taxable year 1975. Then X's increase in qualified investments in foreign base company shipping operations for 1976 is $6,750 (i.e., $7,000−$250).

(c) *Illustration.* The application of this section may be illustrated by the following example:

Example. (a) Controlled foreign corporation X uses the calendar year as the taxable year. On December 31, 1975, X's qualified investments in foreign base company shipping operations (determined as provided in § 1.955A–2(g)) consist of the following amounts:

Cash	$6,000
Readily marketable securities	1,000
Stock of related controlled foreign corporations	4,000
Traffic and other receivables	14,000
Foreign income tax refunds receivable	1,000
Prepaid shipping expenses and shipping inventories ashore	1,000
Vessel construction funds	0
Vessels	123,000
Vessel plans and construction in progress	3,000
Containers and chassis	0
Terminal property and equipment	2,000
Shipping office (land and building)	1,000
Vessel spare parts ashore	1,000
Performance deposits	2,000
Deferred charges	2,000
Stock of less developed country shipping company described in § 1.955–5(b)	10,000
	171,000

(b) On December 31, 1976, X's qualified investments in foreign base company shipping operations (determined as provided in § 1.955A–2(g)) consist of the following amounts:

Cash	$5,000
Readily marketable securities	2,000
Stock of related controlled foreign corporations	4,000
Traffic and other receivables	16,000
Foreign income tax refunds receivable	3,000
Prepaid shipping expenses and shipping inventories ashore	2,000
Vessel construction funds	1,000
Vessels	117,000
Vessel plans and construction in progress	12,000
Containers and chassis	4,000
Terminal property and equipment	2,000
Shipping office (land and building)	1,000
Vessel spare parts ashore	1,000
Performance deposits	2,000
Deferred charges	2,000
Stock of less developed country shipping company described in § 1.955–5(b)	0
	$174,000

(c) For 1976, X's increase in qualified investments in foreign base company shipping operations is $3,000, which amount is determined as follows:

Qualified investments at Dec. 31, 1976	$174,000
Qualified investments at Dec. 31, 1975	171,000
Increase for 1976	3,000

PAR. 9. A new § 1.955–0 is added immediately after § 1.955:

§ 1.955–0 Effective dates.

(a) *Section 955 as in effect before the enactment of the Tax Reduction Act of 1975.* [Reserved]

(b) *Section 955 as amended by the Tax Reduction Act of 1975.* Except as otherwise provided therein, §§ 1.955A through 1.955A–4 are applicable to taxable years of foreign corporations beginning after December 31, 1975, and to taxable years of United States shareholders (as defined in section 951(b)) within which or with which such taxable years of such foreign corporations end.

PAR. 10. Section 1.955–1(b) is amended as follows:

1. Subparagraph (2)(i)(*a*) is revised by inserting "(including prior taxable years beginning after December 31, 1975)" immediately after "1962".

2. Subparagraph (2)(ii)(*a*) is amended.

3. A new subparagraph (3) is added.

The added and amended provisions read as follows:

§ 1.955–1 Shareholder's pro rata share of amount of previously excluded subpart F income withdrawn from investment in less developed countries.

* * * * *

(b) *Amount withdrawn by controlled foreign corporation.* * * *

(2) *Limitations applicable in determining decreases.* * * *

(ii) *Treatment of earnings and profits.* * * *

(*a*)(*1*) Amounts which, for the current taxable year, are included in the gross income of a United States shareholder of such controlled foreign corporation under section 951(a)(1)(A)(i) or (iii), or

(2) Amounts which, for any prior taxable year, have been included in the gross income of a United States shareholder of such controlled foreign corporation under section 951(a) and have not been distributed; or

* * * * *

(*3*) *Taxable years beginning after December 31, 1975.* (i) In the case of a taxable year of a controlled foreign corporation beginning after December 31, 1975, § 1.955–2(b)(5) must be applied in determining the amount of its qualified investments in less developed countries on both of the determination dates applicable to such taxable year.

(ii) The application of this subparagraph may be illustrated by the following examples:

Example (1). (a) Controlled foreign corporation M uses the calendar year as the taxable year. Throughout 1974 through 1976, M owns 100 percent of the only class of stock of foreign corporation N, a less developed country shipping company described in § 1.955–5(b), and M owns no other stock or obligations. The amount taken into account under § 1.955–2(d) with respect to the stock of N is $10,000 at the close of 1974, 1975, and 1976. The amount of M's previously excluded subpart F income which is withdrawn for 1975 (a year to which § 1.955–2(b)(5) does not apply) from investment in less developed countries is zero, determined as follows:

(1)	Qualified investments in less developed countries at the close of 1974	$10,000
(2)	Less: qualified investments in less developed countries at the close of 1975	10,000
(3)	Balance	0

(Further computations similar to those set out in lines (iv) through (ix) of example (1) of paragraph (d) of this section are unnecessary because the balance in line (3) of this example is zero.)

(b) As a result of § 1.955–2(b)(5)(ii), the amount of M's previously excluded subpart F income which is withdrawn for 1976 from investment in less developed countries is zero, determined as follows:

(1)	Qualified investments in less developed countries at the close of 1975	$0
(2)	Less: qualified investments in less developed countries at the close of 1976	0
(3)	Balance	0

Example (2). The facts are the same as in example (1), except that foreign corporation N is a less developed country corporation described in § 1.955–5(a). The amount of M's previously excluded subpart F income withdrawn for 1976 from investment in less developed countries is zero, determined as follows:

(1)	Qualified investments in less developed countries at the close of 1975	$10,000
(2)	Less: qualified investments in less developed countries at the close of 1976	10,000
(3)	Balance	0

PAR. 11. Section 1.955–2 is amended by revising paragraph (b)(4) and adding new paragraphs (b)(5), (b)(6), and (d)(4) thereto to read as follows:

§ 1.955–2 Amount of a controlled foreign corporation's qualified investments in less developed countries.

* * * * *

(b) *Special rules.* * * *

(4) *Date of acquisition.* For purposes of paragraphs (a)(2) and (b)(5)(i) of this section, stock or an obligation shall be considered acquired by a foreign corporation as of the date such corporation acquires an adjusted basis in the stock or obligation.

For this purpose, in a case in which a foreign corporation acquires stock or an obligation in a transaction (other than a reorganization of the type described in section 368(a)(1)(E) or (F)) in which no gain or loss would be recognized had the transaction been between two domestic corporations, such corporation will be considered to have acquired an adjusted basis in such stock or obligation as of the date such transaction occurs.

(5) *Taxable years beginning after December 31, 1975.* For taxable years beginning after December 31, 1975, qualified investments in less developed countries do not include—

(i) Any property acquired after the latest determination date applicable to a taxable year beginning before December 31, 1975,

(ii) Stock or obligations of a less developed country shipping company described in § 1.955–5(b), and

(iii) Stock or obligations which were not treated as qualified investments in less developed countries on the later of the two determination dates applicable to the preceding taxable year.

See § 1.955–1(b)(3) for rules relating to the application of this subparagraph. See § 1.955A–2(h) for rules relating to the treatment of investments in stock or obligations described in subdivision (ii) of this subparagraph as qualified investments in foreign base company shipping operations.

(6) *Determination dates.* For purposes of subparagraph (5) of this paragraph and § 1.955–1(b)(3), the determination dates applicable to a taxable year of a controlled foreign corporation are—

(i) Except as provided in subdivision (ii) of this subparagraph, the close of such taxable year and the close of the preceding taxable year, and

(ii) With respect to a United States shareholder who has made an election under section 955(b)(3) to determine such corporation's increase in qualified investments in less developed countries at the close of the following taxable year, the close of such taxable year and the close of the taxable year immediately following such taxable year.

* * * * *

(d) *Amount attributable to property.* * * *

(4) *Taxable years beginning after December 31, 1975.* For taxable years beginning after December 31, 1975, the amount taken into account under subparagraph (1) of this paragraph with respect to any property which constitutes a qualified investment in less developed countries shall not exceed the amount taken into account with respect to such property at the close of the preceding taxable year.

PAR. 12. Section 1.955–3 is amended as follows:

1. Paragraph (b)(2) is revised by adding a new sentence after the second sentence thereof.

2. Paragraph (c)(3) is revised by adding a new sentence after the fifth sentence thereof.

3. Paragraph (c)(3)(i) is amended by inserting "name, address, and taxpayer identification number" in lieu of "name and address".

The added provisions read as follows:

§ 1.955–3 Election as to date of determining qualified investments in less developed countries.

* * * * *

(b) *Time and manner of making elections.* * * *

(2) *With consent.* * * * Consent will not be granted if the first taxable year of the controlled foreign corporation with respect to which the shareholder desires to compute an amount described in section 954(b)(1) in accordance with the election provided in this section begins after December 31, 1975.

(c) *Effect of election.* * * *

(3) *Revocation.* * * * The application may also be filed in a taxable year beginning after December 31, 1975.

* * * * *

PAR. 13. The following new sections are added immediately after § 1.955–6:

V 41 1154 AUG 9 76 UMI

§ 1.955A Statutory provisions; withdrawal of previously excluded subpart F income from qualified investment.

Sec. 955. *Withdrawal of previously excluded subpart F income from qualified investment.* (a) *General rules.* (1) *Amount withdrawn.* For purposes of this subpart, the amount of previously excluded subpart F income of any controlled foreign corporation withdrawn from investment in foreign base company shipping operations for any taxable year is an amount equal to the decrease in the amount of qualified investments in foreign base company shipping operations of the controlled foreign corporation for such year, but only to the extent that the amount of such decrease does not exceed an amount equal to—

(A) The sum of the amounts excluded under section 954(b)(2) from the foreign base company income of such corporation for all prior taxable years, reduced by

(B) The sum of the amounts of previously excluded subpart F income withdrawn from investment in foreign base company shipping operations of such corporation determined under this subsection for all prior taxable years.

(2) *Decrease in qualified investments.* For purposes of paragraph (1), the amount of the decrease in qualified investments in foreign base company shipping operations of any controlled foreign corporation for any taxable year is the amount by which—

(A) The amount of qualified investments in foreign base company shipping operations of the controlled foreign corporation at the close of the preceding taxable year, exceeds

(B) The amount of qualified investments in foreign base company shipping operations of the controlled foreign corporation at the close of the taxable year,

to the extent that the amount of such decrease does not exceed the sum of the earnings and profits for the taxable year and the earnings and profits accumulated for prior taxable years beginning after December 31, 1975, and the amount of previously excluded subpart F income invested in less developed country corporations described in section 955(c)(2) (as in effect before the enactment of the Tax Reduction Act of 1975) to the extent attributable to earnings and profits accumulated for taxable years beginning after December 31, 1962. For purposes of this paragraph, if qualified investments in foreign base company shipping operations are disposed of by the controlled foreign corporation during the taxable year, the amount of the decrease in qualified investments in foreign base company shipping operations of such controlled foreign corporation for such year shall be reduced by an amount equal to the amount (if any) by which the losses on such dispositions during such year exceed the gains on such dispositions during such year.

(3) *Pro rata share of amount withdrawn.* In the case of any United States shareholder, the pro rata share of the amount of previously excluded subpart F income of any controlled foreign corporation withdrawn from investment in foreign base company shipping operations for any taxable year is his pro rata share of the amount determined under paragraph (1).

(b) *Qualified investments in foreign base company shipping operations.* (1) *In general.* For purposes of this subpart, the term "qualified investments in foreign base company shipping operations" means investments in—

(A) Any aircraft or vessel used in foreign commerce, and

(B) Other assets which are used in connection with the performance of services directly related to the use of any such aircraft or vessel.

Such term includes, but is not limited to, investments by a controlled foreign corporation in stock or obligations of another controlled foreign corporation which is a related person (within the meaning of section 954(d)(3)) and which holds assets described in the preceding sentence, but only to the extent that such assets are so used.

(2) *Qualified investments by related persons.* For purposes of determining the amount of qualified investments in foreign base company shipping operations, an investment (or a decrease in investment) in such operations by one or more controlled foreign corporations may, under regulations prescribed by the Secretary or his delegate, be treated as an investment (or a decrease in investment) by another corporation which is a controlled foreign corporation and is a related person (as defined in section 954(d)(3)) with respect to the corporation actually making or withdrawing the investment.

(3) *Special rule.* For purposes of this subpart, a United States shareholder of a controlled foreign corporation may, under regulations prescribed by the Secretary or his delegate, elect to make the determinations under subsection (a)(2) of this section and under subsection (g) of section 954 as of the close of the years following the years referred to in such subsections, or as of the close of such longer period of time as such regulations may permit, in lieu of on the last day of such years. Any election under this paragraph made with respect to any taxable year shall apply to such year and to all succeeding taxable years unless the Secretary or his delegate consents to the revocation of such election.

(4) *Amount attributable to property.* The amount taken into account under this subpart with respect to any property described in paragraph (1) shall be its adjusted basis, reduced by any liability to which such property is subject.

(5) *Income excluded under prior law.* Amounts invested in less developed country corporations described in section 955(c)(2) (as in effect before the enactment of the Tax Reduction Act of 1975) shall be treated as qualified investments in foreign base company shipping operations and shall not be treated as investments in less developed countries for purposes of section 951(a)(1)(A)(ii).

(Sec. 955 as added by sec. 602(d)(3), Tax Reduction Act 1975 (89 Stat. 62).)

§ 1.955A–1 Shareholder's pro rata share of amount of previously excluded subpart F income withdrawn from investment in foreign base company shipping operations.

(a) *In general.* Section 955 provides rules for determining the amount of a controlled foreign corporation's previously excluded subpart F income which is withdrawn for any taxable year beginning after December 31, 1975, from investment in foreign base company shipping operations. Pursuant to section 951(a)(1)(A)(iii) and the regulations thereunder, a United States shareholder of such controlled foreign corporation must include in his gross income his pro rata share of such amount as determined in accordance with paragraph (c) of this section.

(b) *Amount withdrawn by controlled foreign corporation.* (1) *In general.* For purposes of sections 951 through 964, the amount of a controlled foreign corporation's previously excluded subpart F income which is withdrawn for any taxable year from investment in foreign base company shipping operations is an amount equal to the decrease for such year in such corporation's qualified investments in foreign base company shipping operations. Such decrease is, except as provided in § 1.955A–4—

(i) An amount equal to the excess of the amount of its qualified investments in foreign base company shipping operations at the close of the preceding taxable year over the amount of its qualified investments in foreign base company shipping operations at the close of the taxable year, minus

(ii) The amount (if any) by which recognized losses on sales or exchanges by such corporation during the taxable year of qualified investments in foreign base company shipping operations exceed its recognized gains on sales or exchanges during such year of qualified investments in foreign base company shipping operations,

but only to the extent that the net amount so determined does not exceed the limitation determined under subparagraph (2) of this paragraph. See § 1.955A–2 for determining the amount of qualified investments in foreign base company shipping operations.

(2) *Limitation applicable in determining decreases.* (i) *In general.* The limitation referred to in subparagraph (1) of this paragraph for any taxable year of a controlled foreign corporation shall be the lesser of the following two limitations:

(A) The sum of (*1*) the controlled foreign corporation's earnings and profits (or deficit in earnings and profits) for the taxable year, computed as of the close of the taxable year without diminution by reason of any distribution made during the taxable year, (2) the sum of its earnings and profits (or deficits in earnings and profits) accumulated for prior taxable years beginning after December 31, 1975, and (3) the amount described in subparagraph (3) of this paragraph; or

(B) The sum of the amounts excluded under section 954(b)(2) (see subparagraph (4) of this paragraph from the foreign base company income of such corporation for all prior taxable years beginning after December 31, 1975, minus the sum of the amounts (determined under this paragraph) of its previously excluded subpart F income withdrawn from investment in foreign base company shipping operations for all such prior taxable years.

(ii) *Certain exclusions from earnings and profits.* For purposes of determining the earnings and profits of a controlled foreign corporation under subdivision (i)(A) (*1*) and (2) of this subparagraph, such earnings and profits shall be considered not to include any amounts which are attributable to—

(A) (*1*) Amounts which, for the current taxable year, are included in the gross income of a United States shareholder of such controlled foreign corporation under section 951(a)(1)(A)(i), or

(2) Amounts which, for any prior taxable year, have been included in the gross income of a United States shareholder of such controlled foreign corporation under section 951(a) and have not been distributed; or

(B) (*1*) Amounts which, for the current taxable year, are included in the gross income of a United States shareholder of such controlled foreign corporation under section 551(b) or would be so included under such section but for the fact that such amounts were distributed to such shareholder during the taxable year, or

(2) Amounts which, for any prior taxable year, have been included in the gross income of a United States shareholder of such controlled foreign corporation under section 551(b) and have not been distributed.

The rules of this subdivision apply only in determining the limitation on a controlled foreign corporation's decrease in qualified investments in foreign base company shipping operations. See section 959 and the regulations thereunder for rules relating to the exclusion from gross income of previously taxed earnings and profits.

(3) *Carryover of amounts relating to investments in less developed country shipping companies.* (i) *In general.* The amount described in this subparagraph for any taxable year of a controlled foreign corporation beginning after December 31, 1975, is the lesser of—

(A) The excess of the amount described in subdivision (ii) of this subparagraph, over the amount described in subdivision (iii) of this subparagraph, or

(B) The limitation determined under subdivision (iv) of this subparagraph.

(ii) *Previously excluded subpart F income invested in less developed country shipping companies.* The amount described in this subdivision for all taxable years of a controlled foreign corporation beginning after December 31, 1975, is the lesser of—

(A) The amount of such corporation's qualified investments (determined under § 1.955–2 other than paragraph (b)(5) thereof) in less developed country shipping companies described in § 1.955–5(b) at the close of the last taxable year of such corporation beginning before January 1, 1976, or

(B) The limitation determined under § 1.955–1(b)(2)(i)(b) (relating to previously excluded subpart F income) for the first taxable year of such corporation beginning after January 1, 1976.

(iii) *Amounts previously carried over.* The amount described in this subdivision for any taxable year of a controlled foreign corporation shall be the sum of the excesses determined for each prior taxable year beginning after December 31, 1976, of—

(A) The amount (determined under this paragraph) of such corporation's previously excluded subpart F income withdrawn from investment in foreign base company shipping operations, over

(B) The sum of the earnings and profits determined under subparagraph (2)(i)(A) (*1*) and (2) of this paragraph.

(iv) *Extent attributable to accumulated earnings and profits.* The limitation determined under this subdivision for any taxable year of a controlled foreign corporation is the sum of such controlled foreign corporation's earnings and profits (or deficits in earnings and profits) accumulated for taxable years beginning after December 31, 1962, and before January 1, 1976. For purposes of the preceding sentence, earnings and profits shall be determined by excluding the amounts described in subparagraph (2)(ii)(A) and (B) of this paragraph.

(v) *Illustration.* The application of this subparagraph may be illustrated by the following example:

Example. (a) Throughout the period here involved A is a United States shareholder of controlled foreign corporation M. M is not a foreign personal holding company, and M uses the calendar year as the taxable year.

(b) The amount described in this subparagraph for M's taxable year 1978 with respect to A is determined as follows, based on the facts shown in the following table:

(1) Investment in less developed country shipping companies on December 31, 1975 (subdivision (ii)(A) amount)	$10,000
(2) § 1.955–1(b)(2)(i)(b) limitation for 1976 (previously excluded subpart F income not withdrawn from investment in less developed countries) (subdivision (ii)(B) amount)	50,000
(3) Subdivision (ii) amount (lesser of lines (1) and (2))	10,000
(4) Subdivision (iii) amount: Excess for 1977 of M's previously excluded subpart F income withdrawn from investment in foreign base country shipping operations, $3,000, over the sum of the amounts determined under subparagraphs (2)(i)(A) (*1*) and (2) of this paragraph, $1,000	2,000
(5) Excess of line (3) over line (4)	8,000
(6) Sum of M's earnings and profits accumulated for 1962 through 1975, determined on December 31, 1978	26,000
(7) Amount described in this subparagraph for 1978 (lesser of line (5) and line (6))	8,000

(c) For 1978, M's earnings and profits (reduced as provided in § 1.955–1(b)(2)(ii)(*a*)(*1*)) are $19,000, and the amount of M's previously excluded subpart F income withdrawn from investment in less developed countries determined under § 1.955–1(b)) is $42,000. Consequently, $23,000 of M's earnings and profits accumulated for 1962 through 1975 are attributable to such $42,000 amount, and will therefore be excluded under subparagraph (2)(ii)(A) (*2*) of this paragraph from M's earnings and profits accumulated for 1962 through 1975, determined as of December 31, 1979. No other portion of M's earnings and profits accumulated for 1962 through 1975 is distributed or included in the gross income of a United States shareholder in 1978.

(d) The amount described in this subparagraph for M's taxable year 1979 with respect to A is determined as follows, based on the additional facts shown in the following table:

(1) Subdivision (ii) amount (line (3) from paragraph (b) of this example)	$10,000
(2) Subdivision (iii) amount: (i) Excess for 1977 from line (4) of paragraph (b) of this example	2,000
(ii) Plus: excess for 1978 of M's previously excluded subpart F income withdrawn from investment in foreign base country shipping operations, $6,000, over the sum of the amounts determined under subparagraphs (2)(i)(A) (*1*) and (2) of this paragraph, $25,000	0
(iii) Subdivision (iii) amount	2,000
(3) Excess of line (3) over line (4)(iii)	8,000
(4) Sum of M's earnings and profits accumulated for 1962 through 1975, determined on December 31, 1979 ($26,000 minus $23,000)	3,000
(5) Amount described in this subparagraph for 1979 (lesser of line (5) and line (6))	3,000

(4) *Amount excluded.* For purposes of subparagraph (2)(i)(B) of this paragraph, the amount excluded under section 954(b)(2) from the foreign base company income of a controlled foreign corporation for any taxable year beginning after December 31, 1975, is the excess of—

(i) The amount which would have been equal to the subpart F income of such corporation for such taxable year if such corporation had had no increase in qualified investments in foreign base company shipping operations for such taxable year, over

(ii) The subpart F income of such corporation for such taxable year.

(c) *Shareholder's pro rata share of amount withdrawn by controlled foreign corporation.* (i) *In general.* A United States shareholder's pro rata share of a controlled foreign corporation's previously excluded subpart F income withdrawn for any taxable year from investment in foreign base company shipping operations is his pro rata share of the amount withdrawn for such year by such corporation, as determined under paragraph (b) of this section. See section 955(a)(3). Such pro rata share shall be determined in accordance with the principles of § 1.951–1(e).

(2) *Special rule.* A United States shareholder's pro rata share of the net

V 41 154 AUG 9 76 UMI

amount determined under paragraph (b)(2)(i)(B) of this section with respect to any stock of the controlled foreign corporation owned by such shareholder shall be determined without taking into acount any amount attributable to a period prior to the date on which such shareholder acquired such stock. See section 1248 and the regulations thereunder for rules governing treatment of gain from sales or exchanges of stock in certain foreign corporations.

(d) *Illustrations.* The application of this section may be illustrated by the following examples:

Example (1). A, a United States shareholder, owns 60 percent of the only class of stock of M Corporation, a controlled foreign corporation throughout the entire period here involved. Both A and M use the calendar year as a taxable year. The amount of M's previously excluded subpart F income withdrawn for 1978 from investment in foreign base company shipping operations is $40,000, and A's pro rata share of such amount is $24,000, determined as follows based on the facts shown in the following table:

(a) Qualified investments in foreign base company shipping operations at the close of 1977	$125,000
(b) Less: qualified investments in foreign base company shipping operations at the close of 1978	75,000
(c) Balance	50,000
(d) Less: excess of recognized losses ($15,000) over recognized gains ($5,000) on sales during 1978 of qualified investments in foreign base company shipping operations	10,000
(e) Tentative decrease in qualified investments in foreign base company shipping operations for 1978	40,000
(f) Earnings and profits for 1976, 1977, and 1978	45,000
(g) Plus: amount determined under paragraph (b)(3) of this section	0
(h) Earnings and profits limitation	45,000
(i) Excess of amount excluded under section 954(b)(2) from foreign base company income for 1976 ($75,000) over amount of previously excluded subpart F income withdrawn for 1977 from investment in foreign base company shipping operations ($25,000)	50,000
(j) M's amount of previously excluded subpart F income withdrawn for 1978 from investment in foreign base company shipping operations (item (e), but not to exceed the lesser of item (h) or item (i))	40,000
(k) A's pro rata share of M Corporation's amount of previously excluded subpart F income withdrawn for 1978 from investment in foreign base company shipping operations (60 percent of $40,000)	24,000

Example (2). The facts are the same as in example (1), except that M's earnings and profits (determined under paragraph (b)(2) of this section) for 1976, 1977, and 1978 (item (f)) are $30,000 instead of $45,000. M's amount of previously excluded subpart F income withdrawn for 1978 from investment in foreign base company shipping operations is $30,000. A's pro rata share of such amount is $18,000 (60 percent of $30,000).

Example (3). The facts are the same as in example (1), except that the excess of the amount excluded under section 954(b)(2) for 1976 from M Corporation's foreign base company income over the amount of its previously excluded subpart F income withdrawn for 1977 from investment in foreign base company shipping operations (item (i)) is $20,000 instead of $50,000. M's amount of previously excluded subpart F income withdrawn for 1978 from investment in foreign base company shipping operations is $20,000. A's pro rata share of such amount is $12,000 (60 percent of $20,000).

§ 1.955A-2 Amount of a controlled foreign corporation's qualified investments in foreign base company shipping operations.

(a) *Qualified investments.* (1) *In general.* Under section 955(b), for purposes of sections 951 through 964, a controlled foreign corporations "qualified investments in foreign base company shipping operations" are investments in—

(i) Any aircraft or vessel, to the extent that such aircraft or vessel is used (or hired or leased for use in foreign commerce.

(ii) Related shipping assets (within the meaning of paragraph (b) of this section),

(iii) Stock or obligations of a related controlled foreign corporation, to the extent provided in paragraph (c) of this section,

(iv) A partnership, to the extent provided in paragraph (d) of this section, and

(v) Stock or obligations of a less developed country shipping company described in § 1.955-5(b), as provided in paragraph (h) of this section.

(2) *Coordination of provisions.* No amount shall be counted as a qualified investment in foreign base company shipping operations under more than one provision of this section. Thus, for example, if a $10,000 investment in stock of a controlled foreign corporation is treated as a qualified investment in foreign base company shipping operations under both subparagraph (1) (iii) and (v) of this paragraph, then such $10,000 is counted only once as a qualified investment in foreign base company shipping operations.

(3) *Definitions.* If the meaning of any term is defined or explained in § 1.954-6, then such term shall have the same meaning when used in this section.

(4) *Extent of use.* (i) For purposes of subparagraph (1)(i) of this paragraph and paragraph (b)(1) of this section, the extent to which an asset of a controlled foreign corporation is used during a taxable year in foreign base company shipping operations shall be determined on the basis of the proportion for such year which the foreign base company shipping income derived from the use of such asset bears to the total gross income derived from the use of such asset.

(ii) For purposes of determining under subdivision (i) of this subparagraph the amounts of foreign base company shipping income and gross income of a controlled foreign corporation—

(A) Such amounts shall be deemed to include an arm's length charge (see § 1.954-6(h)(5)) for services performed by such corporation for itself,

(B) Such amounts shall be deemed to include an arm's length charge for the use of an asset (such as a vessel under construction or laid up for repairs) which is held for use in foreign base company shipping operations, but is not actually so used,

(C) Foreign base company shipping income shall be deemed to include amounts earned in taxable years beginning before January 1, 1976, and

(D) The district director shall make such other adjustments to such amounts as are necessary to properly determine the extent to which any asset is used in foreign base company shipping operations.

(b) *Related shipping assets.* (1) *In general.* For purposes of this section, the term "related shipping asset" means any asset which is used (or held for use) for or in connection with the production of income described in § 1.954-6(b)(1) (i) or (ii), but only to the extent that such asset is so used (or is so held for use).

(2) *Examples.* Examples of assets of a controlled foreign corporation which are used (or held for use) for or in connection with the production of income described in subparagraph (1) of this paragraph include—

(i) Money, bank deposits, and other temporary investments which are reasonably necessary to meet the working capital requirements of such corporation in its conduct of foreign base company shipping operations,

(ii) Accounts receivable and evidences of indebtedness which arise from the conduct of foreign base company shipping operations by such corporation or by a related person,

(iii) Amounts (other than amounts described in subdivision (i) of this subparagraph) deposited in bank accounts or invested in readily marketable securities pursuant to a specific, definite, and feasible plan to purchase any tangible asset for use in foreign base company shipping operations,

(iv) Amounts paid into escrow to secure the payment of (A) charter hire for an aircraft, vessel, or other asset used in foreign base company shipping operations or (B) a debt which constitutes a specific charge against such an asset,

(v) Capitalized expenditures (such as progress payments) made under a contract to purchase any asset for use in foreign base company shipping operations,

(vi) Prepaid expenses and deferred charges incurred in the course of foreign base company shipping operations,

(vii) Stock acquired and retained to insure a source of supplies or services

used in the conduct of foreign base company shipping operations, and

(viii) Currency futures acquired and retained as a hedge against international currency fluctuations in connection with foreign base company shipping operations.

(3) *Limitations.* (i) Notwithstanding any other provision of this paragraph, the term "related shipping assets" does not include any money or other intangible assets of a controlled foreign corporation, to the extent that such assets are permitted to accumulate in excess of the reasonably anticipated needs of the business.

(ii) If a controlled foreign corporation accumulates money or other intangible assets pursuant to a plan to purchase one or more vessels for use in foreign commerce, and if—

(A) The amount so accumulated, plus

(B) The sum of the amounts accumulated by other controlled foreign corporations which are related persons (within the meaning of section 954(d)(3)) pursuant to similar plans,

at any time exceeds 110 percent of a reasonable down payment on the first vessel so planned to be purchased, then such plan will not normally be considered to be feasible. For purposes of the preceding sentence, a reasonable down payment shall not exceed 25 percent of the total cost of acquisition.

(iii) In determining whether a plan to purchase any asset other than a vessel for use in foreign base company shipping operations is feasible, principles similar to those stated in subdivision (ii) of this subparagraph shall be applied.

(4) *Cross-reference.* See § 1.954-7(c) for additional illustrations bearing on the application of this paragraph.

(c) *Stock and obligations.* (1) *In general.* Investments by a controlled foreign corporation (the "first corporation") in stock or obligations of a second controlled foreign corporation which is a related person (within the meaning of section 954(d)(3)) are considered to be qualified investments in foreign base company shipping operations only if each asset held by such second corporation is either (i) an aircraft or vessel used (at least to some extent) in foreign commerce, or (ii) a related shipping asset, and then only to the extent that the assets of such second corporation are used in foreign base company shipping operations. See subparagraph (2) of this paragraph.

(2) *Extent of use.* On any determination date applicable to a taxable year of the first corporation, the extent to which the assets of the second corporation are used in foreign base company shipping operations shall be determined on the basis of the proportion which the amount of such second corporation's qualified investments in foreign base company shipping operations bears to its net worth, such proportion to be determined at the close of the second corporation's last taxable year which ends on or before such determination date. For purposes of the preceding sentence—

(i) A controlled foreign corporation's net worth is the total adjusted basis of the corporate assets reduced by the total outstanding principal amount of the corporate liabilities, and

(ii) The determination dates applicable to a taxable year of a controlled foreign corporation are—

(A) Except as provided in (B) of this subdivision, the close of such taxable year and the close of the preceding taxable year, and

(B) With respect to a United States shareholder who has made an election under section 955(b)(3) to determine such corporation's increase in qualified investments in foreign base company shipping operations at the close of the following taxable year, the close of such taxable year and the close of the taxable year immediately following such taxable year.

(3) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example (1). On December 31, 1976, controlled foreign corporation X owns 100 percent of the single class of stock of controlled foreign corporation Y. X and Y both use the calendar year as the taxable year. On December 31, 1976, Y's assets consist entirely of a vessel used in foreign commerce and related shipping assets. On such date Y has qualified investments in foreign base company shipping operations (determined under paragraph (g) of this section) of $60,000, and a net worth of $100,000. If X's investment in the stock of Y is $50,000, then $30,000 of such amount, i.e.,

$$\frac{\$\ 60{,}000}{\$100{,}000} \times \$50{,}000$$

is a qualified investment in foreign base company shipping operations.

Example (2). The facts are the same as in example (1), except that on December 31, 1976, Y has qualified investments in foreign base company shipping operations (determined under paragraph (g) of this section) of $16,000 and a net worth of $20,000. If X's investment in the stock of Y is $50,000, then $40,000, i.e.,

$$\frac{\$16{,}000}{\$20{,}000} \times \$50{,}000$$

is a qualified investment in foreign base company shipping operations.

(d) *Partnerships.* (1) *In general.* A controlled foreign corporation's investment in a partnership at the close of any taxable year of such corporation shall be considered a qualified investment in foreign base company shipping operations to the extent of the proportion which such operation's foreign base company income for such taxable year would bear to its gross income for such taxable year if—

(i) Such corporation had realized no income other than its distributive share of the partnership gross income, and

(ii) Such corporation's income were adjusted in accordance with the rules stated in paragraph (a)(4)(ii) (B) and (D) of this section.

(2) *Transitional rule.* For purposes of subparagraph (1)(i) of this paragraph, the controlled foreign corporation's distributive share of the partnership gross income shall not include any amount attributable to income earned by the partnership before the first day of such corporation's first taxable year beginning after December 31, 1975.

(3) *Cross-reference.* See paragraph (g)(4) of this section for rules relating to the determination of the amount of a controlled foreign corporation's investment in a partnership.

(e) *Trusts.* (1) *In general.* An investment in a trust is not a qualified investment in foreign base company shipping operations.

(2) *Grantor trusts.* Notwithstanding subparagraph (1) of this paragraph, if a controlled foreign corporation is treated as the owner of any portion of a trust under Subpart E of Part I of Subchapter J (relating to grantors and others treated as substantial owners), then for purposes of this section such controlled foreign corporation is deemed to be the actual owner of such portion of the assets of the trust. Accordingly, its investments in such assets (as determined under paragraph (g)(5) of this section) may be treated as a qualified investment in foreign base company shipping operations.

(3) *Definitions.* For purposes of this section, the term "trust" means a trust as defined in § 301.7701-4.

(f) *Excluded property.* For purposes of paragraph (b) of this section, property acquired principally for the purpose of artificially increasing the amount of a controlled foreign corporation's qualified investments in foreign base company shipping operations will not be recognized; whether an item of property is acquired principally for such purpose will depend upon all the facts and circumstances of each case. One of the factors that will be considered in making such a determination with respect to an item of property is whether the item is disposed of within 6 months after the date of its acquisition.

(g) *Amount attributable to property.* (1) *General rule.* For purposes of this section, the amount taken into account under section 955(b)(4) with respect to any property which constitutes a qualified investment in foreign base company shipping operations shall be its adjusted basis as of the applicable determination date, reduced by the outstanding principal amount of any liability (other than a liability described in subparagraph (2) of this paragraph) to which such property is subject on such date, including a liability secured only by the general credit of the controlled foreign corporation. Liabilities shall be taken into account in the following order:

(i) The adjusted basis of each and every item of corporate property shall be reduced by any specific charge (nonrecourse or otherwise) to which such item is subject. For this purpose, if a liability constitutes a specific charge against several items of property and cannot definitely be allocated to any single item of property, the specific charge shall be apportioned against each of such items of property in that ratio which the

V 41 154 AUG 9 76 UMI

adjusted basis of such item on the applicable determination date bears to the adjusted basis of all such items on such date. The excess against property over the adjusted basis of such property shall be taken into account as a liability secured only by the general credit of the corporation.

(ii) A liability which is evidenced by an open account or which is secured only by the general credit of the controlled foreign corporation shall be apportioned against each and every item of corporate property in that ratio which the adjusted basis of such item on the applicable determination date (reduced as provided in subdivision (i) of this subparagraph) bears to the adjusted basis of all the corporate property on such date (reduced as provided in subdivision (i) of this subparagraph); provided that no liability shall be apportioned under this subdivision against any stock or obligations described in paragraph (h)(1) of this section.

(2) *Excluded charges.* For purposes of subparagraph (1) of this paragraph, a liability created principally for the purpose of artificially increasing or decreasing the amount of a controlled foreign corporation's qualified investments in foreign base company shipping operations will not be recognized. Whether a liability is created principally for such purpose will depend upon all the facts and circumstances of each case. One of the factors that will be considered in making such a determination with respect to a loan is whether the loan is from a related person, as defined in section 954(d)(3) and paragraph (e) of § 1.954–1. Another such factor is whether the liability was created after March 29, 1975, in a taxable year beginning before January 1, 1976.

(3) *Statement required.* If for purposes of this section the adjusted basis of property which constitutes a qualified investment in foreign base company shipping operations by a controlled foreign corporation is reduced on the ground that such property is subject to a liability, each United States shareholder shall attach to his return a statement setting forth the adjusted basis of the property before the reduction and the amount and nature of the reduction.

(4) *Partnership interest.* If a controlled foreign corporation is a partner in a partnership, its investment in the partnership taken into account under section 955(b)(4) shall be its adjusted basis in the partnership determined under section 722 or 742, adjusted as provided in section 705, and reduced as provided in subparagraph (1) of this paragraph. (However, if the partnership is not engaged solely in the conduct of foreign base company shipping operations, such amount shall be taken inot account only to the extent provided in paragraph (d)(1) of this section.)

(5) *Grantor trust.* If a controlled foreign corporation is deemed to own a portion of the assets of a trust under paragraph (e)(2) of this section, then the amount taken into account under section 955(b)(4) with respect to such assets shall be determined as provided in subparagraph (1) of this paragraph by the application of the following rules:

(i) Such controlled foreign corporation's adjusted basis in such assets shall be deemed to be a proportionate share of the trust's adjusted basis in such assets, and

(ii) A proportionate share of the liabilities of the trust shall be deemed to be liabilities of such controlled foreign corportion and to constitute specific charges against such assets.

(6) *Translation into United States dollars.* The amounts determined in accordance with this paragraph shall be translated into United States dollars in accordance with the principles of § 1.964–1(e)(4).

(h) *Investments in shipping companies under prior law.* (1) *In general.* If an amount invested in stock or obligations of less developed country shipping company described in § 1.955–5(b) is treated as a qualified investment in less developed countries under § 1.955–2 (applied without regard to paragraph (b)(5)(ii) thereof) on the applicable determination date for purposes of section 954(g) or section 955(a)(2) with respect to a taxable year beginning after December 31, 1975, then such amount shall be treated as a qualified investment in foreign base company shipping operations on such determination date. See section 955(b)(5).

(2) *Effect on prior law.* See § 1.955–2(b)(5)(ii) for the rule that investments which are treated as qualified investments in foreign base company shipping operations under subparagraph (1) of this paragraph shall not be treated as qualified investments in less developed countries for purposes of section 951(a)(1)(A)(ii).

(3) *Illustration.* The application of this paragraph may be illustrated by the following example:

Example. (a) Throughout the period here involved controlled foreign corporation X owns 100 percent of the single class of stock of controlled foreign corporation Y. X and Y each use the calendar years as the taxable year. At the close of 1975, X's $50,000 investment in the stock of Y is treated as a qualified investment in less developed countries under § 1.955–2 (applied without regard to § 1.955–2(b)(5)(ii)), and Y is a less developed country shipping company described in § 1.955–5(b).

(b) On December 31, 1976, Y is still a less developed country shipping company and X's $50,000 investment in the stock of Y is still treated as a qualified investment in less developed countries under § 1.955–2 (applied without regard to § 1.955–2(b)(5)(ii)). Under subparagraph (1) of this paragraph, X's entire $50,000 investment in the stock of Y is treated as a qualified investment in foreign base company shipping operations.

(c) For 1977, Y's gross income is $10,000 and Y's foreign base company shipping income is $7,500. Since Y fails to meet the 80-percent income test of § 1.955–5(b)(1), Y is no longer a less developed country shipping company described in § 1.955–5(b), and X's investment in the stock of Y is no longer treated as a qualified investment in less developed countries under § 1.955–2 (applied without regard to § 1.955–2(b)(5)(ii)). However, assume that on December 31, 1977, Y's assets consist entirely of a vessel used in foreign commerce and related shipping assets, that Y's net worth (as defined in paragraph (c)(2)(i) of this section) is $100,000, that Y's qualified investments in foreign base company shipping operations (determined under this section) on December 31, 1977, are $75,000, and that X's investment in the stock of Y (as determined under paragraph (g) of this section) continues to be $50,000. Then $37,500, i.e.,

$$\frac{\$\ 75{,}000}{\$100{,}000} \times \$50{,}000$$

of X's $50,000 investment in the stock of Y is treated as a qualified investment in foreign company shipping operations under paragraph (c) of this section.

(d) For 1978, all of Y's gross income is foreign base company shipping income. Although Y is again a less developed country shipping company described in § 1.955–5(b), X's investment in the stock of Y is no longer treated as a qualified investment in less developed countries under § 1.955–2(b)(5)(iii). Thus, X's investment in the stock of Y is not treated as a qualified investment in foreign base company shipping operations under subparagraph (1) of this paragraph. However, X's investment in the stock of Y may be so treated under another provision of this section, as was the case in item (c) of this example.

§ 1.955A–3 Election as to qualified investments by related persons.

(a) *In general.* If a United States shareholder elects the benefits of section 955(b)(2) with respect to a related group (as defined in paragraph (b)(1) of this section) of controlled foreign corporations, then an investment in foreign base company shipping operations made by one member of such group will be treated as having been made by another member to the extent provided in paragraph (c)(4) of this section, and each member will be subject to the other provisions of paragraph (c) of this section. For the manner of making an election under section 955(b)(2), and for rules relating to the revocation of such an election, see paragraph (d) of this section. For rules relating to the coordination of sections 955(b)(2) and 955(b)(3), see paragraph (e) of this section.

(b) *Related group.* (1) *Related group defined.* The term "related group" means two or more controlled foreign corporations, but only if all of the following requirements are met:

(i) All such corporations use the same taxable year,

(ii) The same United States shareholder controls each such corporation within the meaning of section 954(d)(3) at the end of such taxable year, and

(iii) Such United States shareholder elects to treat such corporations as a related group for such taxable year.

(2) *Group taxable years defined.* The "group taxable year" is the common taxable year of a related group.

(3) *Limitation.* If a United States shareholder elects to treat two or more corporations as a related group for a group taxable year (the "first group taxable year"), then such United States shareholder may not also elect to treat two or more other corporations as a related group for a group taxable year any day of which falls within the first group taxable year.

(4) *Illustrations.* The application of this paragraph may be illustrated by the following examples:

Example (1). Domestic corporation M owns 100 percent of the only class of stock of controlled foreign corporations A, B, C, D, and E. A, B, and C use the calendar year as the taxable year. D and E use the fiscal year ending on June 30 as the taxable year. M may elect to treat A, B, and C as a related group. However, M may not elect to treat C, D, and E as a related group.

Example (2). The facts are the same as in example (1). In addition, M elects to treat A, B, and C as a related group for the group taxable year which ends on December 31, 1976. M may not elect to treat D and E as a related group for the group taxable year ending on June 30, 1977.

Example (3). United States shareholder A owns 60 percent of the only class of stock of controlled foreign corporation X and 40 percent of the only class of stock of controlled foreign corporation Y. United States shareholder B owns the other 40 percent of the stock of X and the other 60 percent of the stock of Y. Neither A or B (nor both together) may elect to treat X and Y as a related group.

(c) *Effect of election.* If a United States shareholder elects to treat two or more controlled foreign corporations as a related group for any group taxable year then, for purposes of determining the foreign base company income (see § 1.954–1) and the increase or decrease in qualified investments in foreign base company shipping operations (see §§ 1.954–7, 1.955A–1, and 1.955A–4) of each member of such group for such year, the following rules shall apply:

(1) *Intragroup dividends.* The gross income of each member of the related group shall be deemed not to include dividends receievd from any other member of such group, to the extent that such dividends are attributable (within the meaning of § 1.954–6(f)(4)) to foreign base company shipping income.

(2) *Group excess deduction.* (i) The deductions allocable under § 1.954–1(c) to the foreign base company shipping income of each member of the related group shall be deemed to include such member's pro rata share of the group excess deduction.

(ii) The group excess deduction for the group taxable year is the sum of the excesses for each member of the related group (having an excess) of—

(A) The member's deductions (determined without regard to this subparagraph) allocable to foreign base company shipping income for such year, over

(B) The member's foreign base company shipping income for such year.

(iii) A member's pro rata share of the group excess deduction is the amount which bears the same ratio to such group excess deduction as—

(A) The excess of such member's foreign base company shipping income over the deductions (so determined) allocable thereto, bears to

(B) The sum of such excesses for each member of the related group having an excess.

(iv) For purposes of this subparagraph, "foreign base company shipping income" means foreign base company shipping income (as defined in § 1.954–6), reduced by excluding therefrom all amounts which are—

(A) Excluded from subpart F income under section 952(b) (relating to exclusion of United States income) or

(B) Excluded from foreign base company income under section 954(b)(4) (relating to exception for foreign corporation not available of to reduce taxes).

(v) The application of this subparagraph may be illustrated by the following example:

Example. Controlled foreign corporations X, Y, and Z are a related group for calendar year 1976. The excess group deduction for 1976 is $9, X's pro rata share of the group excess deduction is $6, and Y's pro rata share is $3, determined as follows on the basis of the facts shown in the following table:

	X	Y	Z	Group
(1) Gross shipping income	$100	$90	$80	
(2) Shipping deductions	60	70	89	
(3) Net shipping income	40	20	(9)	
(4) Group excess deduction				$9
(5) X's pro rata share of group excess deduction ($9×$40/$60)	6			
(6) Y's pro rata share of group excess deduction ($9×$20/$60)		3		

(3) *Intragroup investments.* On both of the determination dates applicable to the group taxable year for purposes of section 954(g) or section 955(a)(2), the qualified investments in foreign base company shipping operations of each member of the related group shall be deemed not to include stock or obligations of any other member of the related group. In addition, neither the gains nor the losses on dispositions of such stock or obligations during the group taxable year shall be taken into account under § 1.955A–1(b)(1)(ii) in determining the decrease in qualified investments in foreign base company shipping operations of any member of such related group.

(4) *Group excess investment.* (i) On the later (and only the later) of the two determination dates applicable to the group taxable year for purposes of section 954(g) or section 955(a)(2), the qualified investments in foreign base company shipping operations of each member of the related group shall be deemed to include such member's pro rata share of the group excess investment.

(ii) The group excess investment for the group taxable year is the sum of the excess for each member of the related group (having an excess) of—

(A) The member's increase in qualified investments in foreign base company shipping operations (determined under § 1.954–7 after the application of subparagraph (3) of this paragraph) for such year, over

(B) The member's foreign base company shipping income for such year.

(iii) A member's pro rata share of the group excess investment is the amount which bears the same ratio to such group excess investment as—

(A) Such member's shortfall in qualified investments, bears to

(B) The sum of the shortfalls in qualified investments of each member of such related group having a shortfall.

(iv) If a member has an increase in qualified investments in foreign base company shipping operations (determined as provided in § 1.954–7 after the application of subparagraph (3) of this paragraph) for the group taxable year, then such member's "shortfall in qualified investments" is the excess of—

(A) Such member's foreign base company shipping income for such year, over

(B) Such increase.

(v) If a member has a decrease in qualified investments in foreign base company shipping operations (determined under § 1.955A–1(b)(1) or § 1.955A–4(a), whichever is applicable, after the application of subparagraph (3) of this paragraph) for the group taxable year, then such member's "shortfall in qualified investments" is the sum of—

(A) Such member's foreign base company shipping income for such year and

(B) Such decrease.

(vi) For purposes of this subparagraph, "foreign base company shipping income" means foreign base company shipping income (as defined in subparagraph (2)(iv) of this paragraph), reduced by the deductions allocable thereto under § 1.954–1(c) (including the additional deductions described in subparagraph (2) of this paragraph).

(vii) The application of this subparagraph may be illustrated by the following examples:

Example (1). (a) Controlled foreign corporations R, S, and T are a related group for calendar year 1977. S's pro rata share of the group excess investment is $15, and T's pro rata share is $5, determined as follows on the basis of the facts shown in the following table:

	R	S	T	Group
(1) Net shipping income	$100	$95	$85	
(2) Increase (decrease) in qualified investments	120	(55)	35	
(3) Excess investment	20			$20
(4) Shortfall		150	50	200
(5) S's pro rata share of group excess investment ($20×$150/$200)		15		
(6) T's pro rata share of group excess investment ($20×$50/$200)			5	

(b) On December 31, 1977, T has qualified investments in foreign base company shipping operations of $105 (determined without regard to this section), of which $15 consists of obligations of S. For purposes of determining T's increase or decrease in qualified investments in foreign base company shipping operations for 1977, the amount of T's qualified investments in foreign base company shipping operations on December 31, 1977, is deemed to be $95, determined as follows:

(1) Qualified investments (determined without regard to this section) at December 31, 1977	$105
(2) Less: Investments in obligations of another member of related group	15
(3) Balance	90
(4) Plus: Pro rata share of group excess investment	5
(5) Total qualified investments	95

V 41 N 154 AUG 9 76 UMI

(5) *Collateral effect.* (i) An election under this section by a United States shareholder to treat two or more controlled foreign corporations as a related group for a group taxable year shall have no effect on—

(A) Any other United States shareholder (including a minority shareholder of a member of such related group),

(B) Except as provided in subdivision (ii) of this subparagraph, any other controlled foreign corporation,

(C) The foreign personal holding company, foreign base company sales income, and foreign base company services income, and the deductions allocable under § 1.954–1(c) thereto, of any member of such related group, and

(D) Any other taxable year.

(ii) If—

(A) A United States shareholder elects to treat two or more controlled foreign corporations as a related group,

(B) Any member of the group holds an asset not described in § 1.955A–2(c)(1)(i) or (ii), and

(C) Another controlled foreign corporation owns stock or obligations of any member of such related group,

then with respect to such shareholder such stock or obligations will not be considered qualified investments in foreign base company shipping operations under § 1.955A–2(c).

(iii) The application of this subparagraph may be illustrated by the following examples:

Example (1). United States shareholder A owns 80 percent of the only class of stock of controlled foreign corporations X and Y. United States shareholder B owns the other 20 percent of the stock of X and Y. X and Y both use the calendar year as the taxable year. A elects to treat X and Y as a related group for 1977. For purposes of determining the amounts includible in B's gross income under section 951(a) in respect of X and Y, the election made by A shall be disregarded.

Example (2). The facts are the same as in example (1). In addition, the amount of X's qualified investments in foreign base company shipping operations on December 31, 1977, determined as provided in § 1.955A–2 and modified as provided in paragraph (c) (3) and (4) of this section, is $1,000.

A does not elect to treat X and Y as a related group for 1978. The amount of X's qualified investments in foreign base company shipping operations on December 31, 1978, determined without regard to paragraph (c) (3) and (4) of this section, is $1,200. The amount of X's qualified investments in foreign base company shipping operations on December 31, 1977, determined without regard to paragraph (c) (3) and (4) of this section, is $900. X's increase in qualified investments in foreign base company shipping operations for 1978 is $300.

Example (3). Controlled foreign corporations X, Y, and Z are all wholly-owned subsidiaries of domestic corporation M, and all use the calendar year as the taxable year. M elects to treat X and Y as a related group for 1977. On December 31, 1977, Z owns $1,000 of obligations of X. Assume that Y owns assets including a hotel on December 31, 1977. The obligations owned by Z are not treated as qualified investments in foreign base company shipping operations.

(d) *Procedure.* (1) *Time and manner of making election.* A United States shareholder shall make an election under this section to treat two or more controlled foreign corporations as a related group for a group taxable year by filing a statement to such effect with his return for the taxable year within which or with which such group taxable year ends. The statement shall include the following information:

(i) The name, address, taxpayer identification number, and taxable year of the United States shareholder;

(ii) The name, address, and taxable year of each controlled foreign corporation which is to be a member of the related group; and

(iii) A schedule showing the calculations by which the amounts described in this section have been determined.

(2) *Revocation.* (i) Except as provided in subdivision (ii) of this subparagraph, an election under this section by a United States shareholder shall be binding for the group taxable year for which it is made.

(ii) Upon application by the United States shareholder, an election made under this section may, subject to the approval of the Commissioner, be revoked. Approval will not be granted unless a material and substantial change in circumstances occurs which could not have been anticipated when the election was made. The application for consent to revocation shall be made by mailing a letter for such purpose to Commissioner of Internal Revenue, Attention: T:C:C, Washington, D.C. 20224, containing a statement of the facts which justify such consent.

(e) *Coordination with section 955(b)(3).* If a United States shareholder elects under this section to treat two or more controlled foreign corporations as a related group for any taxable year, and if such United States shareholder is required under § 1.955A-4(c)(2) for purposes of filing any return to estimate the qualified investments in foreign base company shipping operations of any member of such group, then such United States shareholder shall, for purposes of filing such return, determine the amount includible in his gross income in respect of each member of such related group on the basis of such estimate. If the actual amount of such investments is not the same as the amount of the estimate, the United States shareholder shall immediately notify the Commissioner. The Commissioner will thereupon redetermine the amount of tax of such United States shareholder for the year or years with respect to which the incorrect amount was taken into account. The amount of tax, if any, due upon such redetermination shall be paid by the United States shareholder upon notice and demand by the district director. The amount of tax, if any, shown by such redetermination to have been overpaid shall be credited or refunded to the United States shareholder in accordance with the provisions of sections 6402 and 6511 and the regulations thereunder.

(f) *Illustrations.* The application of this section may be illustrated by the following examples:

Example (1). (a) Controlled foreign corporations X and Y are wholly owned subsidiaries of domestic corporation M. X and Y use the calendar year as the taxable year. For 1977, X and Y are not export trade corporations (as defined in section 971(a)), nor have they any income derived from the insurance of United States risks (within the meaning of section 953(a)). M does not elect to treat X and Y as a related group for 1977.

(b) For 1977, X and Y each have gross income (determined as provided in § 1.954–8(h)(1)) of $1,000. X's foreign base company income is $20 and Y's foreign base company shipping income is $0, determined as follows, based on the facts shown in the following table:

	X	Y
(1) Foreign base company shipping income	$1,000	$1,000
(2) Less: amounts excluded from subpart F income under section 952(b) (relating to U.S. income) and amounts excluded from foreign base company income under section 954(b)(4) relating to corporation not availed of to reduce taxes)	0	0
(3) Balance	1,000	1,000
(4) Less: deductions allocable under § 1.954–1(c) to balance	800	1,010
(5) Remaining balance	200	0
(6) Less: increase in qualified investments in foreign base company shipping operations	180	
(7) Foreign base company income	20	

(c) For 1977, Y has a withdrawal of previously excluded subpart F income from investment in foreign base company shipping operations of $20, determined as follows, on the basis of the facts shown in the following table:

(1) Qualified investments in foreign base company shipping operations at Dec. 31, 1976	$1,210
(2) Less: qualified investments in foreign base company shipping operations at Dec. 31, 1977	1,170
(3) Balance	40
(4) Less: excess of recognized losses over recognized gains on sales during 1977 of qualified investments in foreign base company shipping operations	20
(5) Tentative decrease in qualified investments in foreign base company shipping operations for 1977	20
(6) Limitation described in § 1.955A–1(b)(2)	160
(7) Y's amount of previously excluded subpart F income withdrawn from investment in foreign base company shipping operations (lesser of lines (5) and (6))	20

Example (2). (a) The facts are the same as in example (1), except that M does elect to treat X and Y as a related group for 1977.

(b) The group excess deduction, which is solely attributable to Y's net shipping loss, is $40 (i.e., $1,040–$1,000). Since X is the only member of the related group with net shipping income, X's pro rata share of the group excess deduction is the entire $40 amount.

(c) X's foreign base company income for 1977 is zero, determined as follows:

(1) Preliminary net foreign base company shipping income (line (b)(5) of example (1))	$ 200
(2) Less: X's pro rata share of group excess deduction	40
(3) Remaining balance	160
(4) Less: increase in qualified investments in foreign base company shipping operations	180
(5) Foreign base company income	0

(d) The group excess investment, which is solely attributable to X's excess investment, is $20 (i.e., $180 minus $160). Since Y is the only member of the related group with a shortfall in qualified investments, Y's share of the group excess investment is the entire $20 amount.

(e) During 1976 and 1977, Y owns no obligation of X. Y's withdrawal of previously excluded subpart F income from investment in foreign base company shipping operations for 1977 is zero, determined as follows:

(1) Qualified investments at Dec. 31, 1976	$1,210
(2) (i) Qualified investments at Dec. 31, 1977 (determined without regard to paragraph (c)(4) of this section)	1,170
(ii) Y's pro rata share of group excess investment	20
(iii) Total qualified investments at Dec. 31, 1977 (line (i) plus line (ii))	1,190
(3) Balance (line (1) minus line (2)(iii))	20
(4) Less: excess of recognized losses over recognized gains on sales during 1977 of qualified investments in foreign base company shipping operations	20
(5) Decrease in qualified investments for 1977	0

§ 1.955A–4 Election as to date of determining qualified investment in foreign base company shipping operations.

(a) *Nature of election.* In lieu of determining the increase under the provisions of section 954(g) and § 1.954–7(a) or the decrease under the provisions of section 955(a)(2) and § 1.955A–1(b) in a controlled foreign corporation's qualified investments in foreign base company shipping operations for a taxable year in the manner provided in such provisions, a United States shareholder of such controlled foreign corporation may elect, under the provisions of section 955(b)(3) and this section, to determine such increase in accordance with the provisions of § 1.954–7(b) and to determine such decrease by ascertaining the amount by which—

(1) Such controlled foreign corporation's qualified investments in foreign base company shipping operations at the close of such taxable year exceed its qualified investments in foreign base company shipping operations at the close of the taxable year immediately following such taxable year, and reducing such excess by

(2) The amount determined under § 1.955A–1(b)(1)(ii) for such taxable year,

subject to the limitation provided in § 1.955A–1(b)(2) for such taxable year. An election under this section may be made with respect to each controlled foreign corporation with respect to which a person is a United States shareholder within the meaning of section 951(b), but the election may not be exercised separately with respect to the increases and the decreases of such controlled foreign corporation. If an election is made under this section to determine the increase of a controlled foreign corporation in accordance with the provisions of § 1.954–7(b) subsequent decreases of such controlled foreign corporation shall be determined in accordance with this paragraph and not in accordance with § 1.955A–1(b).

(b) *Time and manner of making election.*—(1) *Without consent.* An election under this section with respect to a controlled foreign corporation shall be made without the consent of the Commissioner by a United States shareholder's filing a statement to such effect with his return for his taxable year in which or with which ends the first taxable year of such controlled foreign corporation in which—

(i) Such shareholder is a United States shareholder, and

(ii) Such controlled foreign corporation realizes foreign base company shipping income, as defined in § 1.954–6.

The statement shall contain the name and address of the controlled foreign corporation and identification of such first taxable year of such corporation.

(2) *With consent.* An election under this section with respect to a controlled foreign corporation may be made by a United States shareholder at any time with the consent of the Commissioner. Consent will not be granted unless the United States shareholder and the Commissioner agree to the terms, conditions, and adjustments under which the election will be effected. The application for consent to elect shall be made by the United States shareholder's mailing a letter for such purpose to the Commissioner of Internal Revenue, Washington, D.C. 20224. The application shall be mailed before the close of the first taxable year of the controlled foreign corporation with respect to which the shareholder desires to compute an amount described in section 954(b)(2) in accordance with the election provided in this section. The application shall include the following information.

(i) The name, address, and taxpayer identification number, and taxable year of the United States shareholder;

(ii) The name and address of the controlled foreign corporation;

(iii) The first taxable year of the controlled foreign corporation for which income is to be computed under the election;

(iv) The amount of the controlled foreign corporation's qualified investments in foreign base company shipping operations at the close of its preceding taxable year; and

(v) The sum of the amounts excluded under section 954(b)(2) and § 1.954–1(b)(1) from the foreign base company income of the controlled foreign corporation for all prior taxable years during which such shareholder was a United States shareholder of such corporation and the sum of the amounts of its previously excluded subpart F income withdrawn from investment in foreign base company shipping operations for all prior taxable years during which such shareholder was a United States shareholder of such corporation.

(c) *Effect of election.*—(1) *General.* Except as provided in subparagraphs (3) and (4) of this paragraph, an election under this section with respect to a controlled foreign corporation shall be binding on the United States shareholder and shall apply to all qualified investment in foreign base company shipping operations acquired, or disposed of, by such controlled foreign corporation during the taxable year following its taxable year for which income is first computed under the election and during all suceeding taxable years of such corporation.

(2) *Returns.* Any return of a United States shareholder required to be filed before the completion of a period with respect to which determinations are to be made as to a controlled foreign corporation's qualified investments in foreign base company shipping operations for purposes of computing such shareholder's taxable income shall be filed on the basis of an estimate of the amount of the controlled foreign corporation's qualified investments in foreign base company shipping operations at the close of the period. If the actual amount of such investments is not the same as the amount of the estimate, the United States shareholder shall immediately notify the Commissioner. The Commissioner will thereupon redetermine the amount of tax of such United States shareholder for the year or years with respect to which the incorrect amount was taken into account. The amount of tax, if any, due upon such redetermination shall be paid by the United States shareholder upon notice and demand by the district director. The amount of tax, if any, shown by such redetermination to have been overpaid shall be credited or refunded to the United States shareholder in accordance with the provisions of sections 6402 and 6511 and the regulations thereunder.

(3) *Revocation.* Upon application by the United States shareholder, the election made under this section may, subject to the approval of the Commissioner, be revoked. Approval will not be granted unless the United States shareholder and the Commissioner agree to the terms,

V 41 N 154 AUG 9 76 UMI

conditions, and adjustments under which the revocation will be effected. Unless such agreement provides otherwise, the change in the controlled foreign corporation's qualified investments in foreign base company shipping operations for its first taxable year for which income is computed without regard to the election previously made will be considered to be zero for purposes of effectuating the revocation. The application for consent to revocation shall be made by the United States shareholder's mailing a letter for such purpose to the Commissioner of Internal Revenue, Washington, D.C. 20224. The application shall be mailed before the close of the first taxable year of the controlled foreign corporation with respect to which the shareholder desires to compute the amounts described in section 954(b)(2) or 955(a) without regard to the election provided in this section. The application shall include the following information:

(i) The name, address, and taxpayer identification number of the United States shareholder;

(ii) The name and address of the controlled foreign corporation;

(iii) The taxable year of the controlled foreign corporation for which such amounts are to be so computed;

(iv) The amount of the controlled foreign corporation's qualified investments in foreign base company shipping operations at the close of its preceding taxable year;

(v) The sum of the amounts excluded under section 954(b)(2) and § 1.954–1(b)(1) from the foreign base company income of the controlled foreign corporation for all prior taxable years during which such shareholder was a United States shareholder of such corporation and the sum of the amounts of its previously excluded subpart F income withdrawn from investment in foreign base company shipping operations for all prior taxable years during which such shareholder was a United States shareholder of such corporation; and

(vi) The reasons for the request for consent to revocation.

(4) *Transfer of stock.* If during any taxable year of a controlled foreign corporation—

(i) A United States shareholder who has made an election under this section with respect to such controlled foreign corporation sells, exchanges, or otherwise disposes of all or part of his stock in such controlled foreign corporation, and

(ii) The foreign corporation is a controlled foreign corporation immediately after the sale, exchange, or other disposition.

then, with respect to the stock so sold, exchanged, or disposed of, the change in the controlled foreign corporation's qualified investments in foreign base company shipping operations for such taxable year shall be considered to be zero. If the United States shareholder's successor in interest is entitled to and does make an election under paragraph (b)(1) of this section to determine the controlled foreign corporation's increase in qualified investments in foreign base company shipping operations for the taxable year in which he acquires such stock, such increase with respect to the stock so acquired shall be determined in accordance with the provisions of § 1.954–7(b)(1). If the controlled foreign corporation realizes no foreign base company income from which amounts are excluded under section 954,b)(2) and § 1.954–1(b)(1) for the taxable year in which the United States shareholder's successor in interest acquires such stock and such successor in interest makes an election under paragraph (b)(1) of this section with respect to a subsequent taxable year of such controlled foreign corporation, the increase in the controlled foreign corporation's qualified investments in foreign base company shipping operations for such subsequent taxable year shall be determined in accordance with the provisions of § 1.954–7(b)(2).

(d) *Illustrations.* The application of this section may be illustrated by the following examples:

Example (1). Foreign corporation A is a wholly owned subsidiary of domestic corporation M. Both corporations use the calendar year as a taxable year. In a statement filed with its return for 1977, M makes an election under section 955(b)(3) and the election remains in force for the taxable year 1978. At December 31, 1978, A's qualified investments in foreign base company shipping operations amount to $100,000; and, at December 31, 1979, to $80,000. For purpose of paragraph (a)(1) of this section, A Corporation's decrease in qualified investments in foreign base company shipping operations for the taxable year 1978 is $20,000 and is determined by ascertaining the amount by which A Corporation's qualified investments in foreign base company shipping operations at December 31, 1978 ($100,000) exceed its qualified investments in foreign base company shipping operations at December 31, 1979 ($80,000).

Example (2). The facts are the same as in example (1) except that A experiences no changes in qualified investments in foreign base company shipping operations during its taxable years 1980 and 1981. If M's election were to remain in force, A's acquisitions and dispositions of qualified investments in less developed countries during A's taxable year 1982 would be taken into account in determining whether A has experienced an increase or a decrease in qualified investments in foreign base company shipping operations for its taxable year 1981. However, M duly files before the close of A's taxable year 1981 an application for consent to revocation of M Corporation's election under section 955(b)(3), and, pursuant to an agreement between the Commissioner and M consent is granted by the Commissioner. Assuming such agreement does not provide otherwise, A's change in qualified investments in foreign base company shipping operations for its taxable year 1981 is zero because the effect of the revocation of the election is to treat acquisitions and dispositions of qualified investments in foreign base company shipping operations actually occurring in 1982 as having occurred in such year rather than in 1981.

Example (3). The facts are the same as in example (2) except that A's qualified investments in foreign base company shipping operations at December 31, 1982, amount to $70,000. For purposes of paragraph (b)(1)(i) of § 1.955A–1, the decrease in A's qualified investments in foreign base company shipping operations for the taxable year 1982 is $10,000 and is determined by ascertaining the amount by which A's qualified investments in less developed countries at December 31, 1981 ($80,000) exceed its qualified investments in less developed countries at December 31, 1982 ($70,000).

Example (4). The facts are the same as in example (1). Assume further that on September 30, 1979, M sells 40 percent of the only class of stock of A to N Corporation, a domestic corporation. N uses the calendar year as a taxable year. A remains a controlled foreign corporation immediately after such sale of its stock. A's qualified investments in foreign base company shipping operations at December 31, 1980, amount to $90,000. The changes in A Corporation's qualified investments in foreign base company shipping operations occurring in its taxable year 1979 are considered to be zero with respect to the 40-percent stock interest acquired by N Corporation. The entire $20,000 reduction in A Corporation's qualified investments in foreign base company shipping operations which occurs during the taxable year 1979 is taken into account by M for purposes of paragraph (c)(1) of this section in determining its tax liability for the taxable year 1978. A's increase in qualified investments in foreign base company shipping operations for the taxable year 1979 with respect to the 60-percent stock interest retained by M is $6,000 and is determined by ascertaining M's pro rata share (60 percent) of the amount by which A's qualified investments in foreign base company shipping operations at December 31, 1980 ($90,000) exceed its qualified investments in less developed countries at December 31, 1979 ($80,000). N does not make an election under section 955(b)(3) in its return for its taxable year 1980. Corporation A's increase in qualified investments in foreign base company shipping operations for the taxable year 1980 with respect to the 40-percent stock interest acquired by N is $4,000.

FEDERAL RESERVE SYSTEM

[12 CFR Part 225]

[Regulation Y; Docket No. R-0051]

BANK HOLDING COMPANIES

Proposed Rulemaking Relating to Providing Management Consulting Advice

The Board of Governors has received an application filed by Worcester Bancorp, Inc., Worcester, Massachusetts, pursuant to section 4(c)(8) of the Bank Holding Company Act (12 U.S.C. 1843(c)(8)) and § 225.4 of the Board's Regulation Y (12 CFR 225.4(b)(2)), for prior approval to engage de novo in providing management consulting advice to nonaffiliated savings banks. Providing such services to nonaffiliated commercial banks has previously been determined by the Board of Governors to be closely related to banking. (See 12 CFR § 225.4(a)(12).)

Applicant proposes to provide management consulting services to nonaffiliated savings banks under the same conditions and with the same restrictions that are applicable under § 225.4(a)(12) of Regulation Y (12 CFR § 225.4(a)(12)), which permits bank holding companies to provide management consulting advice to nonaffiliated banks:

Provided, That, (i) neither the bank holding company nor any of its subsidiaries own or control, directly or indirectly, any equity securities in the client [bank]; (ii) no officer, director or employee of the bank holding company or any of its subsidiaries serves as an officer, director or employee of the client [bank] except where such interlocking relationships are or would be permitted by section 212.3(g) of Regulation L; (iii) the advice is rendered on an explicit fee basis without regard to correspondent balances maintained by the client [bank] at any subsidiary bank of the bank holding company; and (iv) disclosure is made to each potential client [bank] of (a) the names of all banks that are affiliates of the consulting company, and (b) the names of all existing client [banks] located in the same market area(s) as the client [bank].

Further, in providing management consulting advice to commercial banks, bank holding companies are not authorized to perform tasks or operations or provide services to clients either on a daily or continuing basis, except as is necessary to instruct the client on how to perform such services for itself.

Section 4(c)(8) of the Bank Holding Company Act provides that a bank holding company may, with Board approval, acquire "shares of any company the activities of which the Board after due notice and opportunity for hearing has determined (by order or regulation) to be so closely related to banking or managing or controlling banks as to be a proper incident thereto." The Applicant believes that the proposed activity is so closely related to banking as to be a proper incident thereto.

In connection with this application, the Board will consider amending Regulation Y (12 CFR 225.4(a)) to add the activity of providing management consulting advice to nonaffiliated savings banks to the list of activities that the Board has previously determined to be permissible for bank holding companies.

Concurrently with that question, the Board will also consider the separate question of amending Regulation Y (12 CFR § 225.4(a)) to add the activity of providing management consulting advice to nonaffiliated, depository-type, financial institutions to the list of those permissible activities specified in § 225.4(a) of Regulation Y. Such institutions would include: savings banks (mutual or stock), savings and loan or building and loan associations (mutual or stock), credit unions, industrial banks, Morris Plan banks, cooperative banks, industrial loan companies and similar institutions.

Interested persons may express their views on the questions of whether providing management consulting advice to (1) nonaffiliated savings banks; or (2) nonaffiliated, depository-type, financial institutions is "so closely related to banking or managing or controlling banks as to be a proper incident thereto" within the meaning of section 4(c)(8).

Interested persons may also express their views on the question of whether consummation of the proposal by Worcester Bancorp can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices."

Any requests for a hearing on these questions should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application by Worcester Bancorp may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Boston. Expressions of views received by the Board may be inspected at the offices of the Board of Governors.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than September 8, 1976.

Boards of Governors of the Federal Reserve System, August 2, 1976.

THEODORE E. ALLISON,
Secretary of the Board.

PANAMA CANAL COMPANY

[35 CFR Part 133]

TOLLS FOR USE OF THE PANAMA CANAL

Change in Rates; Public Hearing

On May 14, 1976, the Panama Canal Company published notice of a proposed change in the rates of tolls for use of the Panama Canal (41 FR 19981). The notice stated that interested persons who had submitted written data not later than July 16, 1976, and had filed a notice of appearance by July 23, 1976 could participate in a public hearing to be held in New York City, New York, on August 23, 1976, at a time and location to be announced.

On July 8, 1976, the Panama Canal Company published notice that the public hearing referred to above would be held on August 23, 1976 in the Sutton South Room of the New York Hilton at Rockefeller Center, 1335 Avenue of the Americas, commencing at 9 am.

Notice is hereby given that the location in the New York Hilton at Rockefeller Center has been changed from the Sutton South to the Mercury Ballroom. The date and time remain unchanged.

THOMAS M. CONSTANT,
Secretary.

INTERSTATE COMMERCE COMMISSION

[49 CFR Part 1057]

[Ex Parte No. 55 (Sub-No. 23)]

FITNESS FLAGGING PROCEDURES

JULY 28, 1976.

At a general session of the Interstate Commerce Commission, held at its office in Washington, D.C., on the 28th day of July 1976.

It is ordered, That based on the reasons set forth in the attached notice, a rulemaking proceeding be, and it is hereby, instituted pursuant to 5 U.S.C. 552, 553, and 559 (the Administrative Procedure Act), and sections 5, 207, 209, 211, 309(c), 309(g), and 410(c) of the Interstate Commerce Act (49 U.S.C. 5, 307, 309, 311, 909(c), 909(g), and 1010(c)), for the purpose of adopting appropriate procedures for the determination of the circumstances that would raise a flagging issue and setting forth standards to be applied in determining whether a fitness flag is to be raised.

It is further ordered, That the attached notice be, and it is hereby, adopted and incorporated by reference into this order.

And it is further ordered, That notice of the institution of this rulemaking proceeding shall be given to the general public by depositing a copy of this order and the attached notice in the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., for public inspection and by delivering a copy of the notice to the Director, Office of the Federal Register, for publication in the Federal Register as notice to interested persons.

By the Commission. (Commissioner Corber concurred[1] and Commissioner MacFarland did not participate.)

ROBERT L. OSWALD,
Secretary.

• Purpose: As a result of certain developments in the area of fitness flagging procedures (a special internal staff committee study completed in July 1975, the findings of the "Blue Ribbon Staff Report," and the decisions in *North American Van Lines, Inc.* v. *ICC*, 386 F. Supp. 665 (1974) and *North American Van Lines, Inc.* v. *United States*, Civil Action No. F 75–31 (N.D. Ind.)), the Commission has determined that procedures indicating the circumstances that would raise a flagging issue and setting forth standards to be applied in determining whether a fitness flag is to be raised may be appropriate and such procedures are herein proposed. •

Under the provisions of the Interstate Commerce Act (sections 5, 207, 209, 211, 309(c), 309(g), and 410(c) of the Interstate Commerce Act (49 U.S.C. 5, 307, 309, 311, 909(c), 909(g), and 1010(c)), the Commission is required in proceedings where applicant seeks authority to conduct motor carrier, water carrier, broker, or freight forwarder operations or in proceedings under section 5 (combinations and consolidations of carriers) to make an appropriate statutory finding regarding an applicant's fitness as a prerequisite to the issuance of authority or the granting of permission to consummate transaction.

[1] Commissioner Corber's concurrence filed as part of original document.

V 41 154 AUG 9 76 UMI

The Commission has developed over the years certain internal procedures for determination of the fitness question. These procedures involved generally the determination of the question regarding fitness in a selected application proceeding which, in turn, would affect the fitness finding of each of that carrier's pending applications. The fitness question raised in the selected application proceeding could result in the flagging of each of the applicant's pending [2] applications thereby (1) causing the certificate or permit to be withheld pending determination of the fitness question in the selected application, (2) causing permission to consummate the transaction of pending applications to be withheld pending determination of the fitness question in the selected application, or (3) causing applicant's pending applications to be denied upon an adverse determination of the fitness question in the selected application.

These procedures for withholding final action on pending applications other than the selected proceeding have been ex parte, on the Commission's own motion. No hearing was held to allow the carrier to argue that a particular proceeding should not have been flagged. These procedures were developed consistent with the view that a question regarding a carrier's fitness was all pervasive and affected the issue of fitness in each pending application before the Commission. Individual applications were evaluated to determine their nexus with the selected proceeding and certain types of applications were traditionally excepted from the flagging process (i.e. gateway elimination applications, alternate route applications, and deviation route applications).

For the purposes of the discussion herein, the following definitions apply:

1. *Fitness*—an applicant's present or future willingness or ability to conform to the relevant provisions of the Interstate Commerce Act and the Interstate Commerce Commission's requirements, rules, and regulations thereunder.

2. *Flagging*—the raising of a question regarding an applicant's fitness by the Commission or DOT in both (1) the selected application proceeding and (2) all other pending applications by the carrier (which are determined to have a nexus on the fitness issue to the selected proceeding).

3. *Selected application proceeding*—the application proceeding in which the fitness issue is being fully developed and formally being contested for determination. This proceeding may consist of the participation by the Commission's Bureau of Enforcement (or the Department of Transportation) on the issue of fitness in the selected application proceeding or may consist of an application proceeding consolidated with an investigation or complaint proceeding (which are proceedings to determine the lawfulness or unlawfulness of conduct under the Interstate Commerce Act or the Commission's rules and regulations thereunder, but in which the statutory question of fitness is not itself in issue).

4. *Show cause hearing*—a separate procedural step, initiated by order at the time the Commission decides to consider raising the fitness flag. The purpose of this procedure is to determine whether there exists a nexus between the fitness issue raised in the selected application proceeding on the one hand, and the fitness issues raised in any other pending application of the carrier, on the other. This hearing, which will be handled on an expedited basis, will afford the applicant an opportunity to show cause why such a nexus does not exist as to any particular , pending application and therefore, why any such pending application should not be flagged for fitness.

5. *Flagged applications*—those other pending applications of a carrier in which after a show cause hearing, a nexus to the selected application proceeding on the issue of fitness has been determined to exist, and in which authority (or permission to consummate the transaction) shall be withheld until the issue of applicant's fitness is finally determined in the selected application proceeding.

[2] As used herein, the application has been deemed "pending" until the certificate or permit was actually issued or the control proceeding was consummated.

Background

The issue of a carrier's fitness technically involves two separate considerations: (1) the applicant's fitness, willingness, and ability to perform a particular operation (operational fitness), and (2) applicant's fitness, willingness, and ability to conform to the Act and the Commission's rules and regulations thereunder (conformity fitness). While the issue in (1) may more frequently involve matters related only to a specific proceeding, the issue in (2) may pervade many of a carrier's pending applications. In the instance where conformity fitness has been specifically questioned in a particular case, the question of an applicant's fitness, willingness, and ability to conform its operations to lawful requirements is a matter that ordinarily will relate to other pending proceedings and, by statutory mandate, this issue must be resolved before any authority (or permission) may be granted. It has been long standing Commission policy to withhold issuance of authority (or permission to consummate the transaction) to an applicant in any pending proceeding while its fitness is unresolved in a selected application proceeding. This policy was adopted due to the lack of adherence by carriers to the terms of their operating authorities and to their lack of observance of the Commission's regulations. In accordance with its obligation to promote a safe, effective, and efficient transportation system, the Commission had determined that strong and effective enforcement procedures were necessary. These procedures were never intended to be punitive but rather permitted the Commission sufficient time to evaluate properly a carrier's fitness pursuant to statutory requirements.

In the past, a flag has been raised in one of three ways: (1) by the Vice Chairman of the Commission, the Commission itself, or an appropriate Division thereof acting upon the recommendation of the Bureau of Enforcement at the time of the institution of an investigation proceeding, (2) by the Bureau of Enforcement's participation in an application proceeding under sections 5, 207, 209, 211, 309(c), 309(g), and 410(c) of the Interstate Commerce Act, pursuant to the delegation of authority by the Commission allowing the Bureau to participate in an application proceeding upon the Bureau's determination that it had information tending to raise a significant question regarding the fitness of an applicant, and (3) by the appropriate Division granting leave to intervene to the Department of Transportation in a pending proceeding wherein DOT by petition has alleged violation of the safety regulations.

When an applicant is formally flagged on the issue of its fitness, one of its pending applications is designated the selected application proceeding. This procedure permits all other pending applications to go forward on all issues other than fitness while the overall concurrent, required statutory issue of the applicant's fitness is being resolved in the selected application proceeding. The personnel requirements which would result in presenting the same evidence relating to an applicant's conformity fitness in every pending application proceeding clearly are beyond the staff capabilities of the Bureau of Enforcement, and no useful purpose would be served by repeating the same presentations in a number of pending applications nor should an applicant be put to the expense of rebutting the same evidence in successive hearings. In the same vein, consolidation of all pending applications with the fitness proceeding would be impractical because (1) that would involve interminable concurrent resolution of issues other than fitness, (2) not all applications are ripe for decision at the same time, and (3) not all applications are before the same decisional body at the same time (some may be required to be heard by a joint board, others may be more efficiently handled by modified procedure, and still others may be at an appellate level). Experience has shown that the selection of one application for a determination of the fitness issue while flagging the others has been the most realistic and administratively desirable way of resolving the issue of fitness. If a negative finding of fitness was made in the selected application proceeding (and that finding became administratively final), other flagged applications were denied on the basis of the same negative fitness finding. Once an applicant had failed to show that it was fit to receive the authority sought, it had to establish affirmatively its fitness before any new applications would be granted.

Discussion of Proposed Procedures

Because of the possible delay inherent in formally contesting an applicant's fitness in the selected application proceeding, which could defer a decision on that issue in all of its pending applications, if flagged, and because of the need to afford an applicant an opportunity to be heard on the question of flagging its other applications, the Commission has proposed revised procedures to be followed and the standards to be applied in determining whether a fitness flag is to be raised.

These proposed procedures, in conformity with the findings of the Court in the *North American Van Lines, Inc.* cases, supra, are being applied on an interim basis to those carriers currently subject to fitness questions so that they may enjoy the benefits of the proposed procedures and so that this Commission may continue the efficient and expeditious handling of its caseload.

The proposals provide information to the public respecting the standards for flagging and the method by which the question of fitness may be initiated. The Bureau of Enforcement may no longer intervene in application proceedings on its own; instead the Bureau will be required to make a request to participate in an application proceeding to the Commission or the appropriate Division which shall make a determination as to whether this request, if approved, could result in a negative fitness finding. If the Bureau is ordered to participate, an appropriate application will be selected as the proceeding in which the issue of fitness shall be determined (this proceeding shall be consolidated, if administratively possible, with an investigation or complaint proceeding involving applicant on the same issues). The fitness matters raised in the selected application proceeding may have no relation to other issues in the case. An order would then be issued notifying all parties of the fitness participation. The applicant would, by an appropriate order, be afforded an opportunity to show cause why its other pending applications should not be flagged for fitness (held open until resolution of the fitness issue in the selected application proceeding). The order would also notify applicant in general of the statutes, requirements, rules, and regulations allegedly violated and the general substance of the allegations made and identify all pending applications in which flagging is to be considered. The Bureau of Enforcement or DOT would then be required to advise applicant in writing of all matters of fact and law to be asserted with sufficient particularity to make clear the violations alleged and the nexus alleged to exist between those violations and other pending applications in which flagging is being considered. Applicant would be afforded an opportunity to submit written representations to show why all or any of its pending identified applications should not be flagged, and the Bureau and DOT would have an opportunity to respond to those representations.

Failure of an applicant timely to respond in a show cause proceeding will be construed as waiver of its right to hearing on the flagging issue and will cause the pending identified applications to be flagged. The issuance of a show cause order or an order authorizing fitness participation with the described show cause requirements will temporarily bar issuance of authority or consummation in any designated application proceeding until the issue of whether or not that designated application proceeding should be flagged is determined (70 day limit for determination) by the Commission or a Division thereof. The determination of the Commission or Division would be made in an appropriate order. This order shall be subject to petitions for reconsideration under the Commission's rules of practice. Denial of the petition shall result in an order sufficiently final to be appropriate for judicial review. Pending applications not flagged shall be processed to final determination on all issues. These determinations (flagging of pending applications; the fitness issue itself) shall be expedited.

Future applications by the same carrier shall be noticed and added to the list of identified applications in which the question of flagging has been raised and resolved in the show cause proceeding. If the show cause proceeding has already been resolved, applicant will be required to petition the Commission to have a new application excluded from flagging (failure to petition shall be construed as a waiver). An administratively final adverse fitness finding shall result in denial of the application in the selected proceeding and all designated pending flagged applications. In subsequently filed applications, the applicant will be expected (and required) to establish its fitness as in any ordinary proceeding, except that the Commission may take official notice of the prior adverse fitness finding.

The proposed action is not expected significantly to affect the quality of the human environment within the meaning of the National Environmental Policy Act of 1969. No oral hearing is contemplated at this time, but anyone wishing to make representations in favor of or against the proposals below may do so by the submission of written data, views, or arguments. An original and 15 copies (wherever possible) of such data, views, or arguments shall be filed with this Commission on or before September 13, 1976. Written submissions will be available for public inspection during regular business hours at the offices of the Interstate Commerce Commission, 12th and Constitution Avenue, Washington, D.C.

Notice to the general public of the matter herein under consideration will be given by depositing a copy of this notice in the Office of the Secretary of the Commission for public inspection and by filing a cop thereof with the Director, Office of the Federal Register.

By the Commission. (Commissioner Corber concurred and Commissioner MacFarland did not participate.)

Accordingly, it is proposed that the following procedures be adopted at 49 CFR 1067.

PART 1067 FITNESS FLAGGING PROCEDURES

§ 1067.1 Threshold occurrence signaling possible flagging issues.

(a) Institution of a formal Commission investigation into alleged violations of law that reasonably appear to bear on applicant's fitness, willingness, and ability to conduct regulated carrier operations;

(b) Participation by the Bureau of Enforcement or the Department of Transportation to develop a record concerning fitness in an application proceeding seeking ICC operating authority or approval of a transaction under section 5 of the Act.

§ 1067.2 Standard for flagging.

Allegations challenging the fitness, willingness and ability of an application to conform to the provisions of the Act and the requirements, rules and regulations of the Commission thereunder, as to which there is probable cause for believing that ultimately the applicant will not be able to meet statutory requirements for favorable Commission action on an application for operating authority or for authority to undertake a financial transaction within the meaning of section 5(2) of the Act, including:

(a) Past uncorrected or other significant violations denoting an indifference by the applicant towards lawful standards of behavior, or a pattern of neglect of its duties towards the public that betokens a refusal voluntarily to meet its duties under the Interstate Commerce Act; or

(b) Flagrant and persistent disregard of pertinent provisions of the Act or our lawful requirements, rules, or regulations (rather than, for instance, a bona fide difference of opinion or interpretation regarding the carrier's rights).

§ 1067.3 Procedure to determine Bureau of Enforcement participation in application proceedings.

(a) Upon its determination that it has information tending to put in question the fitness of an applicant, the Bureau of Enforcement shall request that it be directed to participate in an application proceeding arising under any of the following sections of the Act; 5, 207, 209, 211, 309(c), 309(g), or 410(c). This request, which shall be made to the appropriate Division or to the Commission, shall include a summary of the evidence which the Bureau proposes to introduce in the context of the entire record. In considering the request, the appropriate Division or the Commission shall base its decision to direct the Bureau to participate on fitness upon the publicly announced standard. Upon a decision to order the Bureau to participate in the

V 41 154 AUG 9 76 UMI

application proceeding, an appropriate order will be entered in the proceeding notifying the parties of the fitness participation.

(b) Upon the institution of a formal investigation proceeding involving issues bearing upon an applicant's fitness or qualifications, willingness and ability to conduct regulated operations, the Commission, a Division, or the Vice Chairman, as appropriate, will select a pending application, if any, of that applicant and by order direct the Bureau of Enforcement to participate on the issue of fitness if warranted.

§ 1067.4 Intervention or participation by the Department of Transportation.

(a) The Department of Transportation may participate in application proceedings on the issue of carrier fitness[2] by notifying the applicant and filing a petition for leave to intervene setting forth generally the nature of the evidence it will present, within 30 days (protest period) of publication of a notice of such application in the FEDERAL REGISTER. DOT may also petition to intervene in any fitness flag show-cause proceeding by filing a petition and verified written representations during the same 20 day period governing applicant in Item 7, infra. In such a situation, applicant may reply thereto within 15 days of such filing. If the Department of Transportation has not petitioned to interevne on the issues of fitness and flagging under the above procedures, its subsequent participation may be authorized at the discretion of the Commission.

(b) Under the procedures here announced, there is no change contemplated in the Department of Transportation's right to file a formal complaint with the Commission or a petition for the Commission to institute on its own motion a formal investigation proceeding, with respect to the activities and practices of a regulated carrier.

§ 1067.5 Flagging keyed to applications only.

Show-cause flagging procedures, if any, will be undertaken only in the application proceeding in which the Bureau of Enforcement or the Department of Transportation is participating on fitness.

§ 1067.6 Flagging consideration to be by show-cause procedure with opportunity to be heard.

When the decision is to consider the flagging of pending applications, either the order authorizing the Bureau of Enforcement or DOT to participate on the issue of fitness, or a separate show-cause order issued as a matter of convenience, will state in general the statutes, requirements, rules, and regulations allegedly violated and the general substance of the allegations made; identify by individual docket numbers all of those pending application proceedings in which fitness flagging is to be considered. The order, served and docketed in the usual manner, will require the Bureau of Enforcement or the Department of Transportation within 10 days from its issuance to advise applicant in wirting of all matters of fact and law to be asserted with sufficient particularity to make clear the violations alleged and the nexus alleged to exist between those violations and the application proceeding in which fitness flagging is being considered; afford applicant an opportunity to submit within 20 days thereafter any verified written representations including facts and arguments tending to show cause why all or any of its applications should not be flagged for fitness, and afford the Bureau of Enforcement or the Department of Transportation 15 days to reply to applicant's representations.

§ 1067.7 Flagging consideration a temporary bar to grants of applications.

The issuance of a show-cause order, or an order authorizing fitness participation with the described show-cause requirements does not constitute flagging. It will, however, temporarily bar issuance of authority in any designated application proceeding until the issue of fitness flagging is determined for a period of no longer than 70 days after the issuance of such order, except any extension of time granted applicant for any authorized or required filing shall not be counted.

§ 1067.8 Flagging triggered upon failure of applicant to respond.

Failure of any applicant subject to a fitness flagging show-cause order, or such provision in any order, to file verified representations within the time specified therein, as of the due date for such filing, shall cause the designated applications to be flagged for fitness and the parties will be so notified. A copy of such notice will be placed in the docket of each of the applications designated.

§ 1067.9 Flagging decision announced by Commission or division thereof.

Upon determination that the applicant has shown that the fitness flag should not be raised or has failed to make such showing with respect to any or all of the designated applications, the Commission or the appropriate Division thereof will issue an order setting forth, at least in general terms, its findings with respect to the publicly announced standard and specify the particular applications to which those findings and the fitness flag, if any, apply. Commission action on the fitness flagging issue is not a decision on the question of applicant's fitness, and shall not be construed as such.

§ 1067.10 Flagging procedure may be initiated where warranted at any stage of proceeding.

Should a determination be made that a fitness flagging procedure is not warranted or should a fitness issue not be raised at the outset and a situation develops at a later stage of any proceeding that suggests that flagging appears appropriate, flagging may be presented as an issue upon formal petition under these same announced procedures.

§ 1067.11 New application filed after commencement of fitness proceeding.

Where there is fitness participation in an application proceeding by the Bureau of Enforcement or the Department of Transportation and either fitness flagging is under consideration or a fitness flag has been raised, a new application by the same applicant will by notice be added to the list of designated proceedings unless with the application there is filed a petition, a copy of which is served on the Bureau of Enforcement or the Department of Transportation, as appropriate, to have it excluded therefrom. The petition must set forth applicant's alleged justification for such exclusion and action thereon will not be taken sooner than 30 days after notice of the application is published in the FEDERAL REGISTER. Action on the petition will be by an order of the Commission or a Division thereof and governed by the announced standard.

§ 1067.12 Processing pending applications.

All pending application proceedings affected by flagging consideration or designated as flagged will move forward toward a final disposition of all other issues, but all findings on fitness will be withheld. Any proceeding that has otherwise reached administrative finality but has not resulted in the issuance of operating rights or, in the case of finance proceedings, authority to consummate the transaction, prior to its designation for show-cause fitness flagging consideration, will by such designation be reopened or held open for reconsideration on the issue of fitness until its is either determined that flagging is not warranted, the fitness issue is resolved, or the fitness flag is removed.

§ 1067.13 Commission review of show-cause order.

Applicant's filing of representations under the show-cause order serves as a prompt and adequate opportunity for Commission review of that order, and may include a prayer for reconsideration of the issuance of the show-cause order, if applicant believes it appropriate. No separately-filed petition for reconsideration will be entertained. Any decision to flag or not to flag will result in issuance of an order by the Commission or a Division thereof in all proceedings where flagging is contested and that order will be subject to petitions for reconsideration under the Commission's rules of practice and will be disposed of as promptly as possible.

§ 1067.14 Fitness cases to be expedited.

The application proceeding in which the fitness issue is being contested will be processed on an expedited basis to the extent consistent with the Commission's other responsibilities.

§ 1067.15 Consolidation of proceedings.

To the extent equitable and practicable, the application proceeding in which fitness is being contested will be consolidated with investigation, complaint, or other proceeding involving the same or similar allegations.

§ 1067.16 Effect of adverse fitness finding on other proceedings.

Where the fitness flag has been raised, an administratively final determination that applicant has failed to show that it is fit will provide a sufficient basis for disposition of all designated pending applications. Following an administratively final ultimate finding unfavorable to applicant, all flagged proceedings will be denied by appropriate order.

§ 1067.17 Adverse fitness finding does not preclude new applications but may be considered.

Following an administratively final fitness determination unfavorable to applicant, fitness participation in any of its subsequently filed applications and flagging consideration will be considered on the same basis as the application of any carrier not previously found unfit, in accordance with the procedures announced herein. However, official notice of all prior findings is appropriate and may be found to bear on applicant's fitness.

TECHNICAL SUBCOMMITTEE OF THE ADVISORY COMMITTEE ON EXPLOSIVES TAGGING

Closed Meeting

Pursuant to Section 10(a)(2) of the Federal Advisory Committee Act (Public Law 92-463), notice is hereby given that a closed meeting of the Technical Subcommittee to the Advisory Committee on Explosives Tagging will be held on September 9, 1976, at the Federal Building, 12th and Pennsylvania Ave. NW., Washington, D.C., Room 5041 beginning at 9:00 a.m. (e.d.t.).

The Technical Subcommittee will discuss detailed proprietary scientific and technical data concerning various candidate explosive tagging systems that can be used in the detection and identification of explosives. The information which will be presented and discussed during the meeting will consititute trade secrets and commercial or financial information from a person privileged or confidential within the ambit of Title 5, United States Code, Section 552(b)(4). Accordingly, the meeting of the Technical Subcommittee of the Advisory Committee on Explosive Tagging will, under authority of Section 10(d) of the Federal Advisory Committee Act (Public Law 92-463), not be open to the public.

All communications regarding this Advisory Committee meeting should be addressed to the Bureau of Alcohol, Tobacco and Firearms, Washington, DC 20226, Attention: Mr. Robert F. Dexter, Committees Manager, Technical Services Division, Explosives Technology Branch, Room 8233.

Dated: August 2, 1976.

REX D. DAVIS,
Director, Bureau of Alcohol, Tobacco and Firearms.

Customs Service

CERTAIN SCISSORS AND SHEARS FROM BRAZIL

Preliminary Countervailing Duty Determination

JULY 28, 1976.

On April 6, 1976, a "Notice of Receipt of Countervailing Duty Petition and Initiation of Investigation" was published in the FEDERAL REGISTER (41 FR 14547). The notice indicated that a petition had been received alleging that payments, bestowals, rebates or refunds, granted by the Brazilian Government upon the manufacture, production, or exportation of certain scissors and shears from Brazil constitute the payment or bestowal of a bounty or grant, directly or indirectly, within the meaning of section 303 of the Tariff Act of 1930, as amended (19 U.S.C. 1303) (referred to in this notice as "the Act").

The scissors and shears are provided for in the Tariff Schedules of the United States as scissors and shears valued at more than $1.75 per dozen under item number 650.91.

On the basis of an investigation conducted pursuant to section 159.47(c), Customs Regulations (19 CFR 159.47(c)), it tentatively has been determined that benefits have been received by the Brazilian manufacturers/exporters of certain scissors and shears which may constitute bounties or grants within the meaning of the Act. These benefits include the granting to manufacturers and exporters of tax credits upon export, income tax reductions, preferential financing, and the exemption from import duties and certain indirect taxes on the importation of capital goods used in the production of scissors and shears for export. Programs tentatively determined not to be bounties or grants within the meaning of the Act include the exemption from certain indirect taxes upon exportation of the scissors and shears under consideration and the exemption from import duties and certain indirect taxes on the importation of raw materials used in the production of scissors and shears to be exported. A final decision in this case is required on or before February 9, 1977.

Before a final determination is made, consideration will be given to any relevant data, views or arguments, submitted in writing with respect to the preliminary determination. Submissions should be addressed to the Commissioner of Customs, 1301 Constitution Avenue, NW., Washington, D.C. 20229, in time to be received by his office not later than September 8, 1976.

This preliminary determination is published pursuant to section 303(a) of the Tariff Act of 1930, as amended (19 U.S.C. 1303(a)).

VERNON D. ACREE,
Commissioner of Customs.

Approved: August 4, 1976.

DAVID R. MACDONALD,
Assistant Secretary of the Treasury.

Office of the Secretary

[Public Debt Series—No. 18-76]

TREASURY NOTES OF SERIES J-1979

Interest Rates

AUGUST 4, 1976.

The Secretary of the Treasury announced on August 3, 1976, that the interest rate on the notes described in Department Circular—Public Debt Series—No. 18-76, dated July 29, 1976, will be 6⅞ percent per annum. Accordingly, the notes are hereby redesignated 6⅞ percent Treasury Notes of Series J-1979. Interest on the notes will be payable at the rate of 6⅞ percent per annum.

DAVID MOSSO,
Fiscal Assistant Secretary.

DEPARTMENT OF JUSTICE

UNITED STATES V. GUAM POWER AUTHORITY

Proposed Consent Judgment in Action To Enjoin Discharge of Pollutants

In accordance with Departmental Policy, 28 C.F.R. § 50.7, 38 Fed. Reg. 19020, notice is hereby given that on or about August 4, 1976, a proposed consent decree in *United States* v. *Guam Power Authority*, was lodged with the District Court of Guam. The proposed decree requires Guam Power Authority to achieve final compliance with sulfur dioxide new source performance standards at its Cabras station not later than July 31, 1981, if flue gas desulfurization equipment is chosen by the company, or earlier if low sulfur fuel oil is to be used. In addition, the company is required to submit detailed financial and operating information to the Court for evaluation.

The Department of Justice will receive for 30 days from the date of publication of this notice written comments relating to the proposed judgment. Comments should be addressed to the Assistant Attorney General for the Land and Natural Resources Division, Department of Justice, Washington, D.C. 20530, and refer to *United States* v. *Guam Power Authority*, D.J. Ref. 90-5-2-1-35.

The proposed consent decree may be examined at the office of the United States Attorney, District of Guam, Agana, Guam; the Region IX Office of the Environmental Protection Agency, Enforcement Division, 100 California Street, San Francisco, California 94111; the Clerk of the District Court, District of Guam, U.S. Courthouse, Agana, Guam; and the Pollution Control Section, Land and Natural Resources Division, Department of Justice, Room 2625, Department of Justice Building, Ninth Street and Pennsylvania Avenue, Northwest, Washington, D.C. A copy of the proposed consent judgment may be obtained in person or by mail from the Pollution Control Section. In requesting a copy, please enclose a check in the amount of $.60 (10 cents per page reproduction charge) payable to the Treasurer of the United States.

PETER R. TAFT,
Assistant Attorney General, Land and Natural Resources Division.

Antitrust Division

UNITED STATES V. BANKAMERICA CORPORATION, ET AL.

Pursuant to the Antitrust Procedures and Penalties Act, 15 U.S.C. § 16, the following written comment on the proposed judgment filed with the United States District Court for the Northern District of California in Civil Action No. 75 2109 RFP, *United States of America* v. *BankAmerica Corporation, et al.*, was received by the Department of Justice and is published herewith, together with Justice's response to this comment.

Dated: August 2, 1976.

CHARLES F. B. MCALEER,
Assistant Chief, Judgments and Judgment Enforcement Section.

Carlisle, Pa., May 27, 1976.

DWIGHT B. MOORE, Esq.,

Re: *U.S.* v. *BankAmerica Corp. et al* including E. *Hornsby Wasson* N.D. Cal. Civ. #75-2019RFP.

DWIGHT B. MOORE, Esq.
Antitrust Division,
U.S. Department of Justice,
U.S. Court House,
Los Angeles, Calif.

DEAR SIRS: Consideration of the proposed consent judgment should be deferred until an adequate competitive impact statement is prepared and published for comment.

Part IV of the Competitive Impact Statement is inadequate in that it focuses only on the possibility of negative effects on competition in event the already terminated relationship between defendant Wasson and the BankAmerica defendants had persevered.

Quite ignoring essential mootness of the order to which the parties are agreeable and consequent imposition on the court implicit in praying it to enter a largely empty order, it is submitted that the Justice Department has a burden to develop all competitive aspects of the order. This includes, without limitation, effects on BankAmerica defendants of loss of a director of defendant Wasson's experience and expertise. Restated, to what degree will the competitive effort of the BankAmerica enterprise (and, ultimately its equity and debt holders) be injured by loss of Mr. Wasson's talents?

This will require exposition of not only his experience and expertise but also the predicates for his invitation to join the BankAmerica boards and an assessment of his conduct whilst a number of those boards.

If it should develop that anti-competitive motivations and/or activities were involved, the proposed order is inadequate. If it should develop that no such motivations and/or activities were involved, the court might well entertain a motion for dismissal-by reason of mootness but the public would have opportunity to weigh social costs of both the proceeding and limitation on BankAmerica shareholders' choice of directors. In either event, adequacy of Section 8 of the Clayton Act to a competitive international economy would be illuminated.

Very truly yours,

JOHN A. MAHER.

U.S. DEPARTMENT OF JUSTICE,
ANTITRUST DIVISION,
Los Angeles, Calif., July 14 1976.

Re: *United States* v. *BankAmerica Corp., et al.*

Mr. JOHN A. MAHER,
726 Sherwood Drive,
Carlisle, Pa.

DEAR MR. MAHER: This letter responds to your letter of May 27, 1976 in which you made the following inquiry: to what degree will the competitive effort of the BankAmerica enterprise (and, ultimately its equity and debt holders) be injured by loss of Mr. Wasson's talents?

Section 8 of the Clayton Act requires no proof of an actual restraint of trade as an element of the violation and, accordingly, no evidence of an actual restraint was obtained in preparing the case for trial. Thus, the Competitive Impact Statement does not describe existing restraints and analyze the adequacy of the judgment in providing a remedy, but rather addresses only the *anticipated* curative effects on competition of the proposed final judgment. Similarly, the Competitive Impact Statement addresses only those curative competitive effects which were sought to be realized by the enactment and enforcement of Section 8.

The legislative materials used during Congress' consideration of and passage of Section 8 are helpful in identifying the competitive dangers sought to be remedied by the act. In 1914, President Wilson addressed Congress calling for the enactment of a law (the Clayton Act) which would prohibit interlocking directorates which . . . "in effect result in making those who borrow and those who lend practically one and the same, those who sell and those who buy but the same persons trading with one another under different names and in different combinations, and those who affect to compete in fact partners and masters of some whole field of business. . . ." Thus it was the potential for anticompetitive behavior by the interlocked corporations which Congress sought to remedy.

The Clayton Act imposed upon the Attorney General responsibility for the enforcement of Section 8 and consequently the responsibility to remedy the competitive dangers addressed by Congress in the act. It is the position of the Department of Justice that these are the only effects on competition which are properly reviewed by the Department in the Competitive Impact Statement.

If BankAmerica Corporation or its stockholders have suffered or will in the future suffer any injury as a result of Mr. Wasson's resignation from its Board of Directors and should it be determined through the pending litigation that his concurrent service on the Boards of Directors of the BankAmerica companies and the Prudential Insurance Company constitutes a violation of Section 8 of the Clayton Act, then the injury suffered would be only that which directly resulted from remedying a violation of that act. It is ordinarily not the role of the enforcement agency to balance speculative negative effects of the enforcement of a statute against its positive remedial effects. Such a balancing process has already been done by Congress particularly where, as here, Congress adopted a *per se* standard for a violation of Section 8. The injury, if such exists, is a price which Congress felt was necessary to pay in order to assure a free and competitive atmosphere in the board rooms of the nation's corporations.

In other respects, comment upon any competitive injury to the BankAmerica enterprise would be inappropriate. The Department of Justice has no reliable information from which it could conclude that the relief in the proposed final judgment would cause any injury to any corporation or individual stockholder. Indeed, it is the central thesis of the antitrust laws that unrestrained competition between many businesses acting unilaterally will yield the highest quality of products and services, the lowest prices, the best allocation of economic resources and the greatest material progress for all the citizens of the United States. (*Northern Pac. R. Co. v. United States*, 356 U.S. 1, 4 (1957)). Thus it is our expectation that the BankAmerica companies, the BankAmerica stockholders and other citizens of the nation will, in the long run, benefit from the elimination of this director interlock.

Additionally, the Department has no information that there exists any scarcity of prospective BankAmerica directors whose abilities and qualifications equal those of Mr. Wasson. It is reasonable to expect that other individuals, who do not have a concurrent fiduciary duty to a competing corporation, could serve as a director of the BankAmerica companies with skill and judgment equal to that of Mr. Wasson. Moreover, under the terms of the proposed judgment, BankAmerica could retain the services of Mr. Wasson if it could persuade him to terminate his association with Prudential.

Finally, the affidavit of Mr. Wasson (a copy of which is enclosed for your convenience) declares that Mr. Wasson had no invention of serving as a director of either of the BankAmerica corporations beyond March 18, 1976.

Thank you for your interest in this litigation and in the enforcement of the antitrust laws.

Sincerely yours,

CROSSAN R. ANDERSEN,
Attorney.

UNITED STATES DISTRICT COURT
NORTHERN DISTRICT OF CALIFORNIA

United States of America, Plaintiff, v. Bankamerica Corporation; Bank of America National Trust & Savings Association; Bankers Trust New York Corporation; Bankers Trust Company; The Prudential Insurance Company of America; E. Hornsby Wasson; and Paul A. Gorman, Defendants. (Civil Action No. 75 2109 RFP.)

V 41 154 AUG 9 76 UMI

State of California }
County of San Francisco } ss.

E. Hornsby Wasson, being first duly sworn, depoees and says:

1. I am a retired Chairman of the Board of Pacific Telephone and Telegraph Company and am currently Vice-Chairman of Stanford Research Institute with offices located at 1660 Crocker Plaza Building, San Francisco, California.

2. I was born on April 29, 1905.

3. Since April 3, 1962, I have served, and continue to serve, as a director of The Prudential Insurance Company of America (hereinafter "Prudential").

4. During the period February 21, 1967 to June 5, 1975, I served as a director of Bank of America National Trust and Savings Association (hereinafter "Bank of America"). (See Exhibit A, attached hereto and incorporated herein by reference). I was last elected to the position of director of Bank of America on March 18, 1975, at which time I was 69 years of age.

5. During the period March 18, 1969 to June 5, 1975, I served as a director of BankAmerica Corporation (hereinafter "BankAmerica"). (See Exhibit B, attached hereto and incorporated herein by reference). I was last elected to the position of director of BankAmerica on March 18, 1975, at which time I was 69 years of age.

6. Pursuant to the official retirement policy of the Bank of America, adopted by resolution of the Board of Directors on July 16, 1963, "No person shall be eligible for election or appointment as a director or advisory director of the Association after reaching the age of 70 years." (A copy of this resolution certified by the Secretary of Bank of America, is attached hereto as Exhibit C and incorporated herein by reference). Pursuant to the official retirement policy of BankAmerica, adopted by resolution of the Board of Directors on December 16, 1968, "No person shall be eligible to stand for election as a director of the Corporation after reaching the age of 70 years." (A copy of this resolution, certified by the Secretary of BankAmerica, is attached hereto as Exhibit D and incorporated herein by reference). I was aware of the retirement policies of both the Bank of America and BankAmerica during the tenure of my service as a director of those companies, and I had no intention or expectation of remaining a director of either of those companies beyond the expiration of my respective terms, March 18, 1976. In accordance with the retirement policies of the Bank of America and BankAmerica, I would have been ineligible for reelection or appointment as a director or advisory director of either the Bank of America or BankAmerica as of March 18, 1976 because I would be 70 years of age.

7. On or about May 27, 1975, I was advised of the possible institution of legal action against BankAmerica, Bank of America, Prudential and myself as a result of my simultaneous service upon the Board of Directors of the aforementioned companies. That was the first instance that I was ever made aware of any possible impropriety arising out of my simultaneous directorships of those companies. Whereupon, on June 5, 1975 I voluntarily resigned my positions as a member of the Board of Directors of Bank of America and BankAmerica to avoid any appearance of the possibility of improper conduct on my part. That decision was also a result of my knowing that I could not be reelected to the Board of Directors of either Bank of America or BankAmerica because of my age and their respective policies against electing anyone a director who was 70 years of age or older as of the date of his election.

8. I am no longer a director nor am I employed or consulted by either the Bank of America or BankAmerica.

9. Pursuant to the aforementioned official policies of Bank of America and BankAmerica, I am ineligible for further service as a director of either of those companies. Should the retirement policies with respect to members of the Board of Directors of either Bank of America or BankAmerica change at any time in the fuure, I will not, under any circumstances, accept a position or serve as a director of either Bank of America or BankAmerica so long as I am a director of Prudential.

AFFIDAVIT OF E. HORNSBY WASSON

10. At my present age, I have no intention of becoming involved as a member of the Board of Directors of any bank whatsoever.

11. I have never been a defendant in any other litigation involving Section 8 of the Clayton Act or any other federal antitrust law.

The foregoing statements are true and are based upon my own personal knowledge.

E. Hornsby Wasson.

Subscribed and sworn to before me this 5th day of January, 1976.

Halda M. Burket,
Notary Public.

EXHIBIT A

I, Jerry G. South, the duly appointed and qualified Secretary of Bank of America National Trust and Savings Association, a national banking association organized and existing under and by virtue of the laws of the United States of America, and having its principal place of business in the City and County of San Francisco, in the State of California, hereby certify and declare that E. Hornsby Wasson served as a director of Bank of America National Trust and Savings Association from February 21, 1967 to June 5, 1975.

In witness whereof, I have hereunto set my hand and affixed the seal of said Corporation on this 24th day of October, 1975.

Jerry G. South,
Secretary of Bank of America National Trust and Savings Association.

EXHIBIT B

I, Jerry G. South, the duly appointed and qualified Secretary of BankAmerica Corporation, a Delaware corporation, having its principal place of business in the City and County of San Francisco, in the State of California, hereby certify and declare that E. Hornsby Wasson served as a director of BankAmerica Corporation from March 18, 1969 to June 5, 1975.

In witness whereof, I have hereunto set my hand and affixed the seal of said Corporation on this 24th day of October, 1975.

Jerry G. South,
Secretary of BankAmerica Corporation.

EXHIBIT C

EXCERPT FROM RESOLUTION ESTABLISHING A RETIREMENT POLICY FOR BOARD OF DIRECTORS, COMMUNITY OFFICE AND REGIONAL ADVISORY BOARDS AND MANAGEMENT ADVISORY COUNCIL

"Resolved, That no person shall be eligible for election or appointment as a director or advisory director of the Association after reaching the age of 70 years.

Further resolved, That the following exceptions are hereby made to the foregoing limitation:

First, any person who was a director or advisory director of the Association on July 16, 1963 and had reached the age of 70 years as of such date shall not be ineligible for election or appointment to such offices by virtue of his or her age.

Second, that any person who was a director or advisory director of the Association and who would have attained the age of 70 years in less than five years after July 16, 1963 was eligible for election or appointment to such office, as the case may be, for the five terms of one year each after the term during which the date, July 16, 1963 occurred."

I, Jerry G. South, the duly appointed and qualified Secretary of Bank of America National Trust and Savings Association, a national banking association having its principal place of business in the City and County of San Francisco, in the State of California, hereby certify and declare that the foregoing is an excerpt from a resolution establishing a retirement policy for the Board of Directors, Community Office and Regional Advisory Boards and Management Advisory Council, all of said Bank; that such excerpt includes the provisions of said resolution applicable to the retirement of Directors and Advisory Directors of said Bank at age 70; that such resolution was adopted on July 16, 1963, and amended on December 16, 1968 and on February 18, 1975, by the Board of Directors of said Bank, in each case at a meeting at which a quorum was present and voted in favor of said resolution; and that such resolution has not been rescinded and that the same is still in full force and effect.

In witness whereof, I have hereunto set my hand and affixed the seal of said Bank on this 23rd day of October, 1975.

Jerry G. South,
Secretary of Bank of America National Trust and Savings Association.

RESOLUTION RE RETIREMENT POLICY

"Resolved, That no person shall be eligible to stand for election as a director of the Corporation after reaching the age of 70 years."

I, Jerry G. South, the duly appointed and qualified Secretary of BankAmerica Corporation, a Delaware corporation, having its principal place of business in the City and County of San Francisco, in the State of California, hereby certify and declare that the foregoing resolution is a full, true and correct copy of a resolution duly passed and adopted by the Board of Directors of said Corporation at a meeting thereof held on the 16th day of December, 1968, at which meeting a quorum of the Board of Directors was present and voted in favor of said resolution; that said resolution has not been rescinded and that the same is still in full force and effect.

In witness whereof, I have hereunto set may hand and affixed the seal of said Corporation on the 24th day of October, 1975.

Jerry G. South,
Secretary of BankAmerica Corporation.

DEPARTMENT OF COMMERCE

Office of the Secretary

PRIVACY ACT OF 1974

Solicitation of Public Comment

The Department of Commerce announces the conduct of a general review of its implementation of the Privacy Act of 1974 (Pub. L. 93-579, 5 U.S.C. 552a), which went into effect on September 27, 1975.

This solicitation of public comment is an important part of the review. It fulfills the pledge made by the Department when its Rules (15 CFR 4b) and Systems of Records under the Act were first published in draft form in the Federal Register dated August 5, 1975:

Finally, the Department intends to solicit the public's views on its implementation of the Act during the Fall of 1976. A notice to that effect will be published in the Federal Register. Although not required, citizen comments should provide valuable insight as to the success, or shortcomings, of the Department's efforts to implement the Act fully. (40 FR 32971)

Neither the general review nor this solicitation are called for in the provisions of the Act. They derive, instead, from Commerce's considered and complete commitment to the underlying concept of the statute, i.e., the individual's right to privacy, and from the Department's desire to implement the law in a manner which is genuinely responsive to citizens' requests. Comment is solicited on all aspects of the Department's implementation. This includes, but need not be restricted to, the following:

(a) The Department's regulations, which are accounted for below;

(b) The Department's systems of records and their uses, also accounted for below;

(c) The Department's internal procedures which are set forth in Department Administrative Order 205-15, a copy of which may be obtained without charge by writing or calling the office named below; and

(d) An individual's experience in dealing with the Department on Privacy Act or related matters.

For the guidance and reference use of the public, all of the relevant materials which have been published to date by the Department are enumerated below, with brief descriptions.

A. Regulations

1. Aug. 5, 1975 Federal Register, pages 32960 through 32969—proposed implementation statement, proposed regulations and appendices.

2. Oct. 2, 1975 Federal Register, pages 45619 through 45633—adoption of regulations proposed Aug 5, appendices, and additional proposed regulations.

3. Oct. 30, 1975 Federal Register, page 50662—adoption of additional regulations proposed Oct. 2, and correction of typographical errors.

4. Nov. 3, 1975 Federal Register, page 51168—corrections to Oct. 2, 1975 materials.

B. Systems of Records

1. Aug. 5, 1975 Federal Register, pages 32970 through 33006—notice of systems of records, prefatory statement of general routine uses, exemptions, and individual system descriptions.

2. Oct. 2, 1975 Federal Register, pages 45634 through 45674—adoption of systems noticed Aug. 5, plus notice of proposed new system and expanded routine uses.

3. Nov. 3, 1975 Federal Register, page 51173—corrections to Oct. 2, 1975 materials.

4. Nov. 7, 1975 Federal Register, page 52074—adoption of new system and expanded routine uses noticed Oct. 2.

5. Nov. 26, 1975 Federal Register, page 54850—further corrections to Oct. 2, 1975 materials.

6. Dec. 11, 1975 Federal Register, pages 57701 through 57703—notice in reference to the Regional Action Planning Commissions.

7. June 10, 1976 Federal Register, page 23446—proposed new general routine use.

8. June 18, 1976 Federal Register, pages 24744 through 24745—correction to June 10, 1976 materials and a proposed additional system of records.

Comments should be addressed to the Assistant Secretary for Administration, U.S. Department of Commerce, Washington, D.C. 20230, and should be submitted no later than September 8, 1976. All comments received will be available for public inspection in the Information Management Division, Room 5026, Main Commerce Building, 14th Street between Constitution Avenue and E Street, N.W., Washington, D.C. Oral inquiries may be made by calling the Information Management Division at 202-377-4217.

Dated: July 28, 1976.

Elliot L. Richardson,
Secretary of Commerce.

DEPARTMENT OF HEALTH, EDUCATION, AND WELFARE

Alcohol, Drug Abuse, and Mental Health Administration

ADVISORY COMMITTEES

Meetings

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory bodies scheduled to assemble during the month of September 1976:

Mental Health Small Grant Committee

September 16; 1 p.m., and September 17-18; 8:30 a.m.

Parlor A and the Oak Room, Burlington Hotel, Vermont Avenue at Thomas Circle, NW., Washington, D.C.

Open—September 16, 4-5 p.m. Closed—Otherwise.

Contact Mary E. Enyart, Room 10C-14, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852, 301-443-4337.

Purpose: The Committee is charged with the initial review of small grant applications for Federal assistance in the program areas administered by the National Institute of Mental Health relating to mental health research and makes recommendations to the National Advisory Mental Health Council for final review.

Agenda: From 4 to 5 p.m., September 16, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of sections 552(b)(5) and 552(b)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463 (5 U.S.C. Appendix I).

Drug Abuse Demonstration Review Committee

September 22-24; 9 a.m.

Conference Room 873, Rockwall Building, Rockville, Maryland.

Open—September 22, 9-10 a.m. Closed—Otherwise.

Contact Ms. Peggy Thompson, Room 628, Rockwall Building, 11400 Rockville Pike, Rockville, Maryland 20852, 301-443-4503.

Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute on Drug Abuse relating to demonstration ac-

V 41 154 AUG 9 76 UMI

tivities and makes recommendations to the National Advisory Council on Drug Abuse for final review.

Agenda: From 9 to 10 a.m., September 22, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assistance and will not be open to the public, in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of section 552(b)(5) and 552(b)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463 (5 U.S.C. App. I).

CRIME AND DELINQUENCY REVIEW COMMITTEE

SEPTEMBER 29-30, OCTOBER 1; 9 A.M.

Plaza Room, Dupont Plaza Hotel, 1500 New Hampshire Avenue, N.W., Washington, D.C.

Open—September 29, 9:00-10:15 a.m. Closed—Otherwise.

Contact Carol Beall, Room 18C-04, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852, 301-443-3728.

Purpose: The Committee is charged with the initial review of grant applications for Federal assistance in the program areas administered by the National Institute of Mental Health relating to research and training activities in crime and delinquency, law and mental health interactions, and individual violent behavior and makes recommendations to the National Advisory Mental Health Council for final review.

Agenda: From 9 to 10:15 a.m., September 29, the meeting will be open for discussion of administrative announcements and program developments. Otherwise, the Committee will be performing initial review of grant applications for Federal assisfance and will not be open to the public in accordance with the determination by the Administrator, Alcohol, Drug Abuse, and Mental Health Administration, pursuant to the provisions of section 552(b)(5) and 552(b)(6), Title 5, U.S. Code and section 10(d) of Pub. L. 92-463 (5 U.S.C. Appendix I).

Substantive information may be obtained from the contact persons listed above.

The NIDA Information Officer who will furnish summaries of the meeting and rosters of the Committee members is Mr. Joshua Hammong, Program Information Officer for Drug Abuse, NIDA, Room 814, Rockwall Building, 11400 Rockville Pike, Rockville, Maryland 20852, 301-443-6458. The NIMH Information Officer who will furnish summaries of the meetings and rosters of the Committee members is Mr. Edwin Long, Deputy Director, Division of Scientific and Public Information, NIMH, Room 15-105, Parklawn Building, 5600 Fisheries Lane, Rockville, Maryland 20852, 301-443-3600.

Dated: August 3, 1976.

CAROLYN T. EVANS,
Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

[FR Doc.76-23066 Filed 8-6-76;8:45 am]

COMMITTEE ON MENTAL HEALTH AND ILLNESS OF THE ELDERLY

Meeting

In accordance with section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), announcement is made of the following National Advisory body scheduled to assemble during the month of September 1976:

COMMITTEE ON MENTAL HEALTH AND ILLNESS OF THE ELDERLY

SEPTEMBER 9-10; 9:30 A.M.

Conference Room G, Parklawn Building, Rockville, Maryland.

Open meeting.

Contact Dr. Gene Cohen, Room 18-97, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852, 301-443-3726.

Purpose: The Committee on Mental Health and Illness of the Elderly will study and make recommendations to the Secretary, HEW, respecting: (1) the future needs for mental health facilities, manpower, research, and training to meet the mental health care needs of elderly persons; (2) the appropriate care of elderly persons who are in mental institutions or who have been discharged from such institutions; and (3) proposals for implementing the recommendations of the 1971 White House Conference on Aging respecting the mental health of the elderly. A report on the findings and recommendations of this Committee shall be submitted by the Secretary, HEW, to the Senate Committee on Labor and Public Welfare and to the House Committee on Interstate and Foreign Commerce; the Committee shall terminate 30 days after submission of the report.

Agenda: The September 9-10 meeting of the Committee (the first of five 2-day meetings planned to accomplish its purpose) will be open to the public. On Thursday, September 9, discussion will include the development, coordination and evaluation of programs of research, training, and services related to the mental health of the aging, including collaborative efforts with the newly-established Center for Studies of the Mental Health of the Aging, Division of Special Mental Health Programs, National Institute of Mental Health; Administration on Aging, HEW; the National Institute on Aging, National Institutes of Health; and other relevant offices and agencies in HEW and the Federal Government. On Friday, September 10, discussion will be devoted to general mental health issues in the area of aging as they relate to the work of the Committee, including attention to proposals for implementing the recommendations on mental health concerns of the 1971 White House Conference on Aging.

Attendance by the public will be limited to space available.

Substantive information may be obtained from the contact person listed above.

The NIMH Information Officer who will furnish summaries of the meeting and rosters of the Committee members is Mr. Edwin Long, Deputy Director, Division of Scientific and Public Information, NIMH, Room 15-105, Parklawn Building, 5600 Fishers Lane, Rockville, Maryland 20852, 301-443-3600.

Dated: August 3, 1976.

CAROLYN T. EVANS,
Committee Management Officer, Alcohol, Drug Abuse, and Mental Health Administration.

Food and Drug Administration

[Docket No. 75F-0208]

NALCO CHEMICAL CO.

Withdrawal of Petition for Food Additives

Pursuant to provisions of the Federal Food, Drug, and Cosmetic Act (sec. 409 (b), 72 Stat. 1786 (21 U.S.C. 348(b))), the following notice is issued:

In accordance with § 121.52 Withdrawal of petitions without prejudice of the procedural food additive regulations (21 CFR 121.52), Nalco Chemical Co., 2901 Butterfield Rd., Oak Brook, IL 60521, has withdrawn its petition (FAP 5H3110), notice of which was published in the FEDERAL REGISTER of Sept. 3, 1975 (40 FR 40568), proposing that § 121.1225 Adjuvants for pesticide use dilutions (21 CFR 121.1225) be amended to provide for the safe use of a sodium acrylate and acrylamide copolymer as a drift control agent to be added by a grower or applicator to fungicide formulations before applying to growing crops.

The Environmental Protection Agency amended, in the FEDERAL REGISTER of September 2, 1975 (40 FR 40161), § 180.1001 Exemptions from the requirement of a tolerance (40 CFR 180.1001) to provide for the use of acrylamide-sodium acrylate resins as thickeners in pesticide formulations applied to growing crops. Therefore, the proposed use of sodium acrylate and acrylamide copolymer is exempted from the requirement of a tolerance pursuant to § 121.102 (21 CFR 121.102) of the food additive regulations.

Dated: August 2, 1976.

HOWARD R. ROBERTS,
Acting Director, Bureau of Foods.

NATIONAL ADVISORY COUNCIL ON THE EDUCATION OF DISADVANTAGED CHILDREN

Meeting

Notice is hereby given, pursuant to PL 92-463, that the next meeting of the National Advisory Council on the Education of Disadvantaged Children will be held on Friday, August 27 and on Saturday, August 28, 1976. The meeting on August 27 will be held from 9:00 a.m.-5:30 p.m.; and, on August 28, the meeting will start at 9:00 a.m. and end at 1:00 p.m. The two-day meeting will be held at 425 Thirteenth Street, N.W., Suite 1012, Washington, D.C. 20004.

The National Advisory Council on the Education of Disadvantaged Children is established under section 148 of the Elementary and Secondary Act (20 U.S.C. 2411) to advise the President and the Congress on the effectiveness of compensatory education to improve the educational attainment of disadvantaged children.

The main purpose of the meeting is to hear committee reports, to hold an orientation session for the September 10-11, 1976 meeting at Pineridge and Rosebud Indian Reservations in South Dakota, and to report on the Missouri *Wheeler-Barrera* Case.

Because of limited space, all persons wishing to attend should call for reservations by August 20, 1976, area code 202/382-6945.

Records shall be kept of all Council proceedings and shall be available for public inspection at the Office of the National Advisory Council on the Education of Disadvantaged Children, located at 425 Thirteenth Street, N.W., Suite 1012, Washington, D.C. 20004.

Signed at Washington, D.C. on August 3, 1976.

ROBERTA LOVENHEIM,
Executive Director.

National Institute of Education

ADVISORY COMMITTEES

Notice of Change in Meeting Dates

Pursuant to the provisions of Section 10(a)(2) of the Federal Advisory Committee Act (5 U.S.C. Appendix I), a notice of meeting of the Panel on Education and Work of the National Institute of Education was published on page 32285 of the FEDERAL REGISTER of August 2, 1976.

The scheduled meeting dates are changed from August 17-19, 1976, to August 18-19, 1976. The open session of the meeting which was scheduled for August 17 will be held on August 18 from 9:00 to 10:30 a.m.

For additional information about this meeting, please contact Ivan Charner, Telephone: 202-254-5470.

Dated: August 3, 1976

RICHARD S. WERKSMAN,
Committee Management Officer, National Institute of Education.

[FR Doc.76-23081 Filed 8-6-76;8:45 am]

Social and Rehabilitation Service

WORK INCENTIVE PROGRAM

Social and Supportive Services

Notice is hereby given of reapportioned annual limits of entitlement for States for Federal financial participation in expenditures under the Work Incentive (WIN) Program pursuant to Section 402(a)(19)(G) and 403(d) of the Social Security Act, 42 U.S.C. § 602(a)(19)(G) and 603(d), for Fiscal Year 1976 (July 1, 1975 through June 30, 1976). The reapportioned annual limits of entitlement promulgated herein replace and supersede the limits of entitlement which were published in the FEDERAL REGISTER on March 26, 1976 (41 FR 12733). These reapportioned limits are based on a survey of States' Fiscal Year 1976 WIN Program needs which was completed on July 25, 1976, in accordance with Action Transmittal SRS-AT-76-112 dated July 8, 1976.

No response was received from 19 States by the July 25, 1976, deadline; the limits of entitlement for Fiscal Year 1976 for these 19 States remain the same as those published on March 26, 1976. Three States made estimates of Fiscal Year 1976 expenditures equal to their limits of entitlement for Fiscal Year 1976. Of the remaining 32 States, 12 States made estimates for Fiscal Year 1976 totalling $5,476,456 less than their previous Fiscal Year 1976 limit. Of these 12 States, 7 States requested that $1,086,043 be added to their limits of entitlement for the Transition Quarter, leaving $4,390,413 available for redistribution among the remaining 20 States whose Fiscal Year 1976 estimates exceeded the limits published on March 26, 1976, by $12,069,866. Since the $4,390,413 available for redistribution was less than the $12,069,866 by which the estimates exceeded the current limits, the $4,390,413 was redistributed according to the methodology outlined in SRS-AT-76-112.

Requests for Federal financial participation in expenditures incurred pursuant to Section 402(a)(19)(G) and 403(d) of the Social Security Act during the period July 1, 1975, through June 30, 1976, will be honored only to the extent of limits as follows:

Alabama	$1,295,158
Alaska	546,433
Arizona	1,419,200
Arkansas	817,517
California	8,226,461
Colorado	1,500,000
Connecticut	1,245,000
Delaware	420,000
District of Columbia	1,656,185
Florida	2,534,035
Georgia	3,394,515
Hawaii	538,767
Idaho	651,842
Illinois	4,643,132
Indiana	1,105,000

DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT

Assistant Secretary for Consumer Affairs and Regulatory Functions

[Docket No. N-76-575]

NATIONAL MOBILE HOME ADVISORY COUNCIL

Meeting

In accordance with Section 605 of Title VI of the Housing and Community Development Act of 1974 (Pub. L. 93-383) and Section 10(a)(2) of the Federal Advisory Committee Act (Pub. L. 92-463), announcement is made of the following meeting of the National Mobile Home Advisory Council:

The National Mobile Home Advisory Council will observe a National Bureau of Standards mobile home demonstration of egress windows, wind research and fire safety on the morning of August 31, 1976. The meeting of the Advisory Council is open to the public and will convene in Room 10233, Department of Housing and Urban Development, 451 Seventh Street, S.W., Washington, D.C. 20410 at 2:00 P.M., on August 31, 1976.

MEETING AGENDA

AUGUST 31, 1976

2:00 p.m.—Opening Remarks and Introduction of National Mobile Home Advisory Council, Constance B. Newman, Assistant Secretary, Consumer Affairs and Regulatory Functions.

Report from NBS on Mobile Home Demonstration and PD&R research, J. C. McCollum, HUD, PD&R.

Adjournment—To convene at 9:00 on September 1, 1976.

SEPTEMBER 1, 1976

9:00 A.M.—Opening Remarks, Harvey Weiner, Acting Deputy Assistant Secretary for Regulatory Functions.

Mobile Home Standards Division Organizational Structure, Harvey Weiner, Acting Deputy Assistant Secretary for Regulatory Functions.

Mobile Home Consumer Manual Requirements—Proposed Rules, Harvey Weiner, Acting Deputy Assistant Secretary for Regulatory Functions; William Jordan, HUD Office of General Counsel and Pertinent Mobile Home Standards Division Staff.

Other Mobile Home Standards Business, Harvey Weiner, Acting Deputy Assistant Secretary for Regulatory Functions.

5:00 P.M.—Adjournment.

Any member of the public may file a written statement with the Council before, during, or after the meeting. To the extent that time permits, the Chairman of the Council may allow public presentation of oral statements during the meeting.

All communications regarding this Advisory Council meeting should be addressed to:

Robert G. Hoag, Committee Management Officer, Room 227, Arlington Towers, Department of Housing and Urban Development, Washington, D.C. 20410.

Issued at Washington, D.C., on August 3, 1976.

CONSTANCE B. NEWMAN,
Assistant Secretary for Consumer Affairs and Regulatory Functions.

Federal Disaster Assistance Administration

[Docket No. NFD–354; FDAA–517–DR]

COLORADO

Major Disaster and Related Determinations

Pursuant to the authority vested in the Secertary of Housing and Urban Development by the President under Executive Order 11795 of July 11, 1974, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D–74–285; and by virtue of the Act of May 22, 1974, entitled "Disaster Relief Act of 1974" (88 Stat. 143); notice is hereby given that on August 2, 1976, the President declared a major disaster as follows:

I have determined that the damage in certain areas of the State of Colorado resulting from severe storms, flash flooding, mudslides, and landslides beginning about July 31, 1976, is of sufficient severity and magnitude to warrant a major disaster declaration under Public Law 93–288. I therefore declare that such a major disaster exists in the State of Colorado.

Notice is hereby given that pursuant to the authority vested in the Secretary of Housing and Urban Development under Executive Order 11795, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D–74–285, I hereby appoint Mr. Donald G. Eddy, HUD Region VIII, to act as the Federal Coordinating Officer for this declared major disaster.

I do hereby determine the following area of the State of Colorado to have been adversely affected by this declared major disaster:

The County of Larimer

(Catalog of Federal Domestic Assistance No. 14.701, Disaster Assistance.)

Dated: August 2, 1976.

THOMAS P. DUNNE,
Administrator, Federal Disaster Assistance Administration.

[Docket No. NFD–355; FDAA–506–DR]

NORTHERN MARIANA ISLANDS

Amendment to Notice of Major Disaster

Pursuant to the authority vested in the Secretary of Housing and Urban Development by the President under Executive Order 11795 of July 11, 1974, and delegated to me by the Secretary of Department of Housing and Urban Development Delegation of Authority, Docket No. D–74–285; and by virtue of the Act of May 22, 1974, entitled "Disaster Relief Act of 1974" (88 Stat. 143); notice is hereby given that on July 31, 1976, the President amended his major disaster declaration of June 17, 1976, as follows:

I hereby amend my June 17, 1976, declaration of a "major disaster" for the Northern Mariana Islands to read as follows:

I have determined that the damage in certain areas of the Northern Mariana Islands resulting from Typhoon Pamela, beginning about May 20, 1976, and from Typhoon Therese, beginning about July 13, 1976, is of sufficient severity and magnitude to warrant a major disaster declaration under Public Law 93–288. I therefore declare that such a major disaster exists in the Northern Mariana Islands.

Notice is hereby given that pursuant to the authority vested in the Secretary of Housing and Urban Development under Executive Order 11795, and delegated to me by the Secretary under Department of Housing and Urban Development Delegation of Authority, Docket No. D–74–285, I hereby appoint Mr. Robert C. Stevens, HUD Region IX, to act as the Federal Coordinating Officer for this declared major disaster.

I do hereby determine the following area to have been adversely affected by this declared major disaster:

Northern Mariana Islands

(Catalog of Federal Domestic Assistance No. 14.701, Disaster Assistance.)

Dated: August 2, 1976.

THOMAS P. DUNNE,
Administrator, Federal Disaster Assistance Administration.

CIVIL AERONAUTICS BOARD

[Order 76–8–17; Docket 29198]

ALASKA AIRLINES, INC., ET AL.

Domestic Passenger-Fare Increase

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 3rd day of August, 1976.

By Order 76–4–180, the Board suspended a proposal by Alaska Airlines, Inc. (Alaska) to increase 48-state-Alaska fares and southeast Alaska fares for jet aircraft by three percent effective May 1, 1976.[1] Alaska has filed a petition for reconsideration of that order, requesting that the Board vacate its suspension.[2]

Alaska contends that the 4.2 percent cost-inflation factor used by the Board is unrealistic and far below that used by the Board in evaluating other recent fare increases, pointing out that in permitting the mainland-Hawaii carriers to increase their promotional fares on May 1, 1976 (the same effective date of the proposed Alaska increases) the Board used an annual cost-inflation factor of 7.6 percent. The Hawaiian entity includes Alaska's three competitors—Northwest, Pan American, and Western. The Board also approved a domestic fare increase at that time predicated on an annual inflation rate of 5.9 percent. Alaska alleges that the Board's inflation estimate is flawed because it did not isolate (or ignore) nonrecurring equipment changes made by it and Western in 1975, which exerted downward pressure on available seat-mile costs. Alaska urges the use of a 7.6 percent inflation factor—the same as used by the Board in the mainland-Hawaii entity.

Alaska further contends that the Board's use of the revenue-offset approach to eliminate consideration of belly-cargo revenues significantly understates both passenger expenses and related investment; the direct effect is to attribute the entire and, in the states-Alaska market, not insubstantial profit from belly-cargo operations to passenger operations. Since belly-cargo revenue amounts to 18.45 percent of the total revenue in the states-Alaska market, the Board's methodology significantly understates passenger expenses. The carrier alleges that the cargo adjustment is further aggravated by reducing the investment base for passenger service by $26.8 million (or 24.6 percent of total investment base) to eliminate belly-cargo investment. It contends that, if the Board is going to saddle the passenger operations with belly-cargo profit, then the related belly-cargo investment must stay with the passenger operations, an adjustment which Alaska computes would reduce return on investment (ROI) from 12.6 to 9.5 percent.

Finally, Alaska contends that Pan American's mainland-Alaska investment base as computed by the Board is seriously understated, as evidenced by a comparison of capital turnover ratio (ratio of operating revenues to investment base) produced by the Board's computations with the same ratio for the carrier's domestic system.[3] The Board's computations produce a ratio of 2.27, versus 1.31 for its domestic system (the combination of its Alaskan and Hawaiian operations). In addition, Alaska cites a letter filed in this docket in which Pan American claims that investment assignable to Alaska services should be approximately $1.5 million higher than that used by the Board. Pan American bases its investment figure on an allocation of system investment found in the Board's Interim Financial Report for December 1975, allocated to Alaska based upon relative total expense levels.

Taking into account the foregoing three "adjustments," Alaska contends that the ROI for the states-Alaska entity becomes 8.96 percent without an increase (based on calendar 1975 data adjusted to the tariff effective date), and 11.55 percent after the requested fare increase (net of demand elasticity of −0.7), and including $2.15 million in subsidy for Alaska Airlines.

Upon consideration of the petition for reconsideration, and all other relevant facts, the Board concludes that Alaska has failed to put forth facts sufficient to warrant vacating the suspension of the fare increases, and, accordingly, the petition will be denied.

Alaska challenges the inflation factor employed by the Board, claiming that it

[1] The matching increases filed by Northwest Airlines, Inc. (Northwest) and Western Air Lines, Inc. (Western) in the states-Alaska market were also suspended.

[2] Northwest has filed an answer in support of Alaska's petition.

[3] Subsequent to issuance of Order 76–4–180, Pan American World Airways, Inc. (Pan American) advised the Board (by letter dated May 21, 1976) that its reporting of states-Alaska revenues was in error and it has filed revised reports. These revisions have been reflected in the Board's recomputation of entity return on investment (ROI) infra.

is out of line with those used in other operating entities. The inflation factor employed in this case was derived from data applicable to the states-Alaska operations of the four carriers involved, and has nothing whatever to do with 48-state or mainland-Hawaii operations. Fuel costs, for example, are reported for the states-Alaska stations and there is clearly no reason to use other data. In contending that available seat-mile costs are atypically low because of the equipment changes made by Alaska and Western during the latter part of 1974 and 1975, Alaska would, in effect, have the Board ignore productivity improvements in estimating the overall inflation factor.[4] Again there is simply no justification for doing so.[5]

Turning to the question of Pan American's investment, the fact that Pan American's states-Alaska service capital turnover ratio is higher than its overall domestic ratio does not necessarily demonstrate that the investment derived by the Board for Pan American is correct. Among other factors, Pan American operates older, more fully depreciated B–707 equipment in its Alaska services, whereas a very significant portion of its investment in the remainder of its domestic system (Hawaii) is newer, higher-valued, B–747 equipment. Consequently, the difference in the respective ratios is not surprising. By the same token, use of the investment figure cited in the Board's Interim Financial Report, which it then allocates to Alaska based on relative expenses, similarly overstates Alaskan investment due to the operation of highly depreciated B–707 equipment in this service.[6]

As for the ratemaking treatment of belly cargo, the Board recently reconsidered this issue and concluded that it had erroneously excluded belly-cargo investment in determining passenger service ROI. (Order 76–7–13.) Accordingly, we have similarly revised the Alaska ROI computation by adding back the previously excluded belly-cargo investment and interest expense related thereto.

After reflecting the belly-cargo adjustment, and further adjusting Alaska's operating expenses,[7] the Board calculates that the ratemaking ROI for the states-Alaska entity would be 13.16 percent with the requested three percent general increase. This ROI does not justify the proposed increase. (See Appendix A.)[8]

The myriad problems the Board has had to confront in dealing with this fare matter, many of which were discussed in Order 76–4–180, emphasize the necessity to subject this ratemaking entity to the scrutiny of a full evidentiary hearing and we intend to do so. We note, for example, the substantial disparity between Pan American, on the one hand, and the balance of the carriers, on the other, in terms of profitability and rate of return and expect the investigation we are setting down to provide a thorough evaluation of these differences.[9] Much of the difficulty which has arisen has related to the unavailability of critical data, and in sufficiencies in the material which is available.[10] For example, the carriers argue for an Alaskan cost differential of up to 20 percent, yet provide the sketchiest "support" for such a proposal. In short, the Board needs more precise information than it has had to date regarding those aspects of the states-Alaska operation which tend to increase carrier costs, if indeed they do, as well as those which result in more efficient operations. Finally, this is the only major ratemaking entity in which ratemaking standards have not been developed.[11]

Accordingly, pursuant to the Federal Aviation Act of 1958, *It is ordered*, That:

1. The petition of Alaska Airlines, Inc. for reconsideration of Order 76–4–180 is hereby denied;

2. An investigation is instituted to determine whether the rates, charges, and provisions applicable to Pan American World Airways, Inc., between Fairbanks, on the one hand, and New York, on the other, shown on 1st Revised Pages 139, 140, and 141 of Airline Tariff Publishing Company, Agent, Tariff C.A.B. No. 258, and the rules, regulations, or practices affecting such rates, charges, and provisions, including subsequent revisions or reissues thereof, are or will be unjust, unreasonable, unjustly discriminatory, unduly preferential, or otherwise unlawful, and, if found to be unlawful, to determine and prescribe the lawful rates, charges, and provisions and rules, regulations, and practices affecting such provisions;

3. The investigation ordered in paragraph 2 is consolidated into Docket 29198, and that investigation is hereby entitled the Alaska Fares Investigation;

4. Pan American World Airways, Inc. is hereby made party to the investigation in Docket 29198;

5. Copies of this order be served upon Alaska Airlines, Inc., Northwest Airlines, Inc., Pan American World Airways, Inc., and Western Air Lines, Inc.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

[FR Doc.76–23114 Filed 8–6–76;8:45 am]

[Order 76–8–18; Docket 21866–9]

UNITED AIR LINES, INC.

Domestic Passenger-Fare Investigation, Phase 9 Fare Structure; Order to Show Cause

Adopted by the Civil Aeronautics Board at its office in Washington, D.C. on the 4th day of August, 1976.

In the Domestic Passenger-Fare Investigation—Phase 9 (DPFI),[1] the Board termined that coach fares should be based upon a multielement formula and a variable line-haul charge. Various parties petitioned the Board for reconsideration and the Board confirmed its earlier conclusions in Order 74–12–109, December 27, 1974. Both orders reserved the Board's jurisdiction to "amend, modify, or revoke, with or without hearing, upon petition, or upon its own motion" the findings summarized above.

United Air Lines, Inc. (United) has now petitioned the Board to modify the above-cited orders to:

(1) Delete the proviso language of Paragraph 16 of Order 74–3–82 and of Paragraph 11 of Order 74–12–109 (whereby the Board retained jurisdiction to amend, modify etc. the prescriptive paragraphs of the Phase 9 decisions), and hereafter disregard the prohibition against individual fare filings in Order 74–3–82; or

(2) Modify Paragraph 12(b) of Order 74–3–82 and Paragraph 2(b) of Order 74–12–109 (which require carriers to file

[1] Order 74–3–82, March 18, 1974.

[4] Alaska would have the Board use the higher mainland-Hawaii inflation factor since, among other things, three of the four carriers operating in the states-Alaska market also operate in the mainland-Hawaii market. There is little or no merit in this argument because the Hawaiian inflation factor is heavily influenced by United Air Lines, Inc., a carrier with a high inflation factor which does not operate to Alaska. In any event, the nonfuel inflation factor used in the Board's computations for Northwest, Pan American, and Western is the same as that used in computing the mainland-Hawaii inflation factor.

[5] Alaska's argument actually works to its disadvantage. The Board recomputed the inflation factor by substituting recently acquired B–727 equipment for its previously operated B–720 equipment at the carrier's 1974 unit-cost levels for the B–727's with the result that available seat-mile costs were actually lower with the B–720 equipment.

[6] Moreover, the Board's determination of Pan American's "domestic" investment in the cited report differs from the methodology used for Domestic Passenger-Fare Investigation purposes, which was here used by the Board.

[7] In constructing Alaska's passenger-service results in Order 76–4–180, the Board used unit operating results furnished by Alaska which were for the year ended September 1975. Subsequent to the issuance of that order, the Board has obtained cost data for the fourth quarter of 1975, and has recast the Alaska results to reflect these more up-to-date costs. The end result is a slightly higher level of expenses for Alaska Airlines.

[8] Appendix A filed as part of original document.

[9] Pan American realized a negative return of 7.72 percent in calendar year 1975, whereas each of the other mainland-Alaska carriers realized returns in excess of 13 percent. Excluding Pan American, the entity return under existing rates, adjusted for cost escalation, is 13.05 percent.

[10] The carriers' justifications leave much to be desired, particularly in detailing and supporting states-Alaska results.

[11] The carriers' jurisdictions leave much to New York and Fairbanks were not at issue in Order 76–4–180. We will herein order an investigation of those fares and consolidate it into Docket 29198 so that the proceeding will encompass the entire ratemaking entity.

V 41 N 154 AUG 9 76 UMI

the DPFI formula fares), if the Board deems such action necessary; and

(3) Take whatever other action the Board deems necessary to recognize the right of a carrier to file individual tariffs, in individual markets, for the purpose of meeting the competition of lower fares in those markets.

In support of its petition, United alleges that "the Board's prohibition of individual fare filings is contrary to the Federal Aviation Act" (Act); that certain conclusions of law from which the Board derived its authority to prescribe general ratemaking standards and principles are erroneous; that the Board's intention was to effect a practical solution to the problem of tailoring individual fares, on a market-by-market basis, to the individual characteristics of each carrier, and was not to proscribe any and all deviation from one specific fare formula; and that as a practical matter the inflexibility of the Board's formula approach is burdensome in that its competitive corollary is a required unanimity among members of a highly divisive industry. United notes that the Board has previously found warranted an ad hoc exemption equivalent to the permanent authority it seeks here; [2] that permission to file nonformula tariffs in individual markets would be consistent with the Board's long-standing policy of allowing carriers to adjust fares to "meet competition"; and that under the present system the pressures of competition can deny a carrier revenue relief to which it is properly entitled under the Board's own ratemaking standards.

American Airlines, Inc. (American) and Continental Air Lines, Inc. (Continental) have answered in support of United's position. Both allege, inter alia, that nonuniform tariff effective dates among the various carriers for general fare increases have led to adverising claims bordering on the deceptive; that the Board has recently granted similar temporary exemption authority; that if the Board fails to make the proposed modifications "carriers would have to withdraw fully justified systemwide fare increases when they are not matched in a few specific markets * * * forc(ing) (them) to forego needed additional revenue * * *"; that the Board's proscription of individual fare filings not consistent with industrywide fares is contrary to the Act; and that "the Board's effort to force all carriers to file the exact same fare in every market is inconsistent with the competitive mandate of the Act, and inconsistent with the carriers' real world need for flexibility in setting fares to cope with constantly changing economic conditions."

North Central Airlines, Inc. (North Central) has answered in qualified support, asserting agreement with the general principle that the Board "grant air carriers flexibility to withdraw fare increases in specific markets * * * where such increases have not been met by other carriers" but opposing fare reductions in individual markets unrelated to that circumstances. Northwest Airlines Inc. (Northwest) has answered that the Board should not act "on the basis of the skimpy record produced by United's petition and the quickly prepared answers thereto," and requests that the matter be set for hearing.

Other than rearguing the lawfulness of the Board's Phase 9 decision, United has advanced no reasons for its request to terminate the Board's retention of jurisdiction of the prescriptive provisions of the Phase 9 decisions. In our decision in that proceeding we concluded that "the Board has the power to issue an order fixing rates for the future and to reject tariffs which are inconsistent with such Board-prescribed fares." The arguments now advanced by United to the contrary were exhaustively treated in our opinion, Order 74–3–82, p. 172. See also Order 74–12–109, p. 33. We are not persuaded against reaffirmation of those findings.[3]

Moreover, for the reasons which prompted adoption of a mileage-related formula, we are unable to grant United's alternative request for freedom to implement individual fares in individual markets. That request is not tied to exceptions to Board-approved fare increases for the purpose of meeting competitors who elect not to increase their fares, and would essentially permit a return to the pre-Phase 9 situation of an erratic and inequitable structure of fares, a posture the Board sought to correct in the DPFI.

At the same time, we recognize that implementation of fare increases found justifiable by the Board on the basis of industry revenue need can present difficult problems if required to be implemented on an "all-or-nothing basis" when other carriers have not filed or have delayed filing the fare increase. Accordingly, we have tentatively concluded that grant of United's petition would be appropriate to the extent that it requests blanket application of the ad hoc exemption authority granted by Order 76–2–98, February 25, 1976, for the reasons set forth therein. The circumstance which led to the issuance of that authority was the lack of uniformity in effective dates of industrywide tariffs filed for a general domestic passenger-fare increase. Such a circumstance can readily reoccur, and indeed has. It is also possible that situations may arise in which one or more carriers may elect to forego an increase altogether even though justified on an industry basis under the Board's ratemaking standards.

While we have tentatively concluded to permit this deviation from the Phase 9 rule, the Board is not prepared to permit this managerial latitude to develop into a two-tiered price structure, in which fares in monopoly markets are cross-subsidizing low fares on competitive routes. For ratemaking purposes, the Board will treat a fare increase as if it had been in effect for all carriers in all markets from the date implemented by even a single carrier. This is a natural extension of past practice where, in the face of varying effective dates, the Board has annualized the ratemaking calculations for a general fare increase from a single consolidated date. We will also entertain comment on the specific nature of this adjustment.

Accordingly, pursuant to the Federal Aviation Act of 1958, as amended, and particularly sections 204(a), 403, 404, and 1002 thereof, *It is ordered*, That:

1. All interested persons and all scheduled certificated air carriers are hereby directed to show cause why the Board should not make final its tentative findings and conclusions herein and amend Paragraph 2 of Order 74–12–109 (Domestic Passenger-Fare Investigation—Phase 9) to add, at the end of the paragraph, the following:

; and provided further that in implementing a Board-approved general fare increase, carriers may except particular markets to match competitors' fares.

All objections to this paragraph shall be filed within 20 days after the date of service of this order and responses to objections shall be filed within 10 days thereafter;

2. Parties requesting a hearing in this matter shall set forth in detail the reasons therefor, accompanied by a statement of the facts they intend to develop in a hearing; thus Northwest's unexplicated request for hearing will be denied; and

3. Copies of this order be served upon all parties to the Domestic Passenger-Fare Investigation, Docket 21866–9.

This order will be published in the FEDERAL REGISTER.

By the Civil Aeronautics Board.

PHYLLIS T. KAYLOR,
Secretary.

CIVIL RIGHTS COMMISSION

ILLINOIS ADVISORY COMMITTEE

Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Illinois Advisory Committee (SAC) to this Commission will convene at 9:00 a.m. and end at 6:00 p.m. on August 31, 1976, at the Mid-Western Regional Office Conference Room #3251, Chicago, Illinois 60604.

Persons wishing to attend this meeting should contact the Committee Chairperson, or the Mid-Western Regional Office, of the Commission, 230 South Dearborn Street, 32nd Floor, Chicago, Illinois 60604.

The purpose of this meeting is to discuss projects for fiscal year 1977 and plan for Education Conference involving Community Organizations in Chicago.

This meetnig will be conducted pursuant to the Rules and Regulations of the Commission.

Dated at Washington, D.C., August 2, 1976.

ISAIAH T. CRESWELL, JR.,
Advisory Committee Management Officer.

[FR Doc.76–23108 Filed 8–6–76;8:45 am]

KANSAS/MISSOURI ADVISORY COMMITTEE

Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Kansas/Missouri Advisory Committee (SAC) to this Commission will convene at 7:00 p.m. and end at 10:00 p.m. on September 1, 1976, at the Linwood Multi-Purpose Center, 3200 Wayne, Room W–105, Kansas City, Missouri.

Persons wishing to attend this meeting should contact the Committee Chairperson, or the Central States Regional Office of the Commission, Old Federal Office Building, Rm. 3103, 911 Walnut Street, Kansas City, Missouri 64106.

The purpose of this meeting is a planning session.

This meeting will be conducted pursuant to the Rules and Regulations of the Commission.

Dated at Washington, D.C., August 3, 1976.

ISAIAH T. CRESWELL, JR.,
Advisory Committee Management Officer.

[FR Doc.76–23107 Filed 8–6–76;8:45 am]

NORTH CAROLINA ADVISORY COMMITTEE

Open Meeting

Notice is hereby given, pursuant to the provisions of the Rules and Regulations of the U.S. Commission on Civil Rights, that a planning meeting of the North Carolina Advisory Committee (SAC) to this Commission will convene at 1:30 pm. and end at 7:00 pm. on August 27, 1976, at the Soul City Boulevard, Soul Tech I Building, Soul City, North Carolina 27553.

Persons wishing to attend this meeting should contact the Committee Chairperson, or the Southern Regional Office of the Commission, Citizens Trust Bank Building, Room 362, 75 Piedmont Avenue NE., Atlanta, Georgia 30303.

The purpose of this meeting is to plan for a study on the jury selection process in the state of North Carolina.

This meeting will be conducted pursuant to the Rules and Regulations of the Commission.

Dated at Washington, D.C., August 4, 1976.

ISAIAH T. CRESWELL, JR.,
Advisory Committee Management Officer.

[FR Doc.76–23105 Filed 8–6–76;8:45 am]

MICHIGAN ADVISORY COMMITTEE

Open Meeting

Notice is hereby given, pursuant to the provisions of the rules and regulations of the U.S. Commission on Civil Rights, that a planning meeting of the Michigan Advisory Committee (SAC) to this Commission will convene at 1:00 p.m. and end at 5:30 p.m. on August 20, 1976, at the Kalamazoo Center Inn, Room J, Second Level, 100 West Michigan Ave., Kalamazoo, Michigan 49006.

Persons wishing to attend this meeting should contact the Committee Chairperson, or the Mid-Western Regional Office of the Commission, 230 South Dearborn Street, 32nd Floor, Chicago, Illinois 60604.

The purpose of this meeting: (1) Followup to Model Cities Report; (2) Review of Sault Ste Marie draft report; (3) Future planning, etc.

This meeting will be conducted pursuant to the rules and regulations of the Commission.

Dated at Washington, D.C., August 3, 1976.

ISAIAH T. CRESWELL, JR.,
Advisory Committee Management Officer.

COMMODITY FUTURES TRADING COMMISSION

INDEMNIFICATION OF FXCHANGE OFFICIALS

Supplemental Notice of Comment

In the July 16, 1976, issue of the FEDERAL REGISTER, 41 Fed. Reg. 29474, the Commodity Futures Trading Commission published a statement that the Commission believes it would be against public policy, as expressed in the Commodity Exchange Act, as amended ("Act"), for an exchange designated as a contract market by the Commission directly or indirectly to indemnify its officials for a civil penalty imposed by the Commission pursuant to Section 6b of the Act.[1] The Commission took no position with respect to indemnification of exchange officials for liabilities arising out of civil proceedings instituted by private parties. The Commission did note, however, that its views were not limited to exchange officials, and expressed the belief that it would be against public policy for a registered futures commission merchant to indemnify its officers, partners, directors, or other officials for fines or civil penalties imposed pursuant to the provisions of the Act comparable to those pursuant to which exchange officials are penalized.

This release supplements the Commission's announcement by notifying the public that the Commission invites interested persons to submit written comments on the Commission's statement on indemnification.

The Commission has received several requests that interested parties be afforded an opportunity for hearing or an

[1] Section 6b provides in relevant part that:

* * * [I]f any contract market, or any director, officer, agent, or employee of any contract market otherwise is violating or has violated any of the provisions of this chapter or any of the rules, regulations, or orders of the Commission thereunder, the Commission may * * * make and enter an order directing that such contract market, director, officer, agent, or employee shall cease and desist from such violation, and assess a civil penalty of not more than $100,000 for each such violation. If such contract market, director, officer, agent, or employee * * * shall fail or refuse to obey or comply with such order, such contract market, director, officer, agent, or employee shall be guilty of a misdemeanor and, upon conviction thereof, shall be fined not more than $100,000 or imprisoned for not less than six months nor more than one year, or both. * * *

7 U.S.C. § 13a (Supp. IV, 1974).

V 41 154 AUG 9 76 UMI

opportunity to submit statements concerning the Commission's policy statement. In addition, persons have suggested that the Commission's policy "creates serious questions for those serving on Boards of Directors," and that "the adoption of this policy without soliciting comments, or allowing for a period of time for comment, would be counterproductive."

Before issuing its statement on indemnification, the Commission considered these and other questions. However, in the spirit of full public participation, the Commission has determined that interested persons should be given an opportunity to comment on the Commission's statement. The Commission will consider any written comments received within 45 days of the date of this publication.

The Commission is particularly interested in receiving comments on: (1) whether it would be appropriate to adopt a regulation concerning indemnification in circumstances having regulatory implications; (2) whether it would be against public policy to allow indemnification of exchange officials for liabilities arising out of civil proceedings instituted by private parties; (3) whether it would be against public policy to allow indemnification of exchange officials for legal fees incurred in the unsuccessful defense of an action brought by the Commission pursuant to Section 6b of the Act; and (4) whether it would be appropriate to hold a public hearing on the issue of indemnification. However, these questions are not intended, in any way, to restrict or limit comment. The Commission will consider any suggestions made by interested persons in connection with the Commission's policy on indemnification. Of course, notwithstanding its request for comments, the Commission's policy statement remains in effect.

Interested persons may submit comments in written form to the Commodity Futures Trading Commission, 2033 K Street, N.W., Washington, D.C. 20581, Attn: CCU. All comments received on or before September 23, 1976 will be considered by the Commission. Copies of all comments received respecting the Commission's policy on indemnification will be available for inspection at the Commission's office in Washington, D.C.

Issued in Washington, D.C., on August 3, 1976.

By the Commission.

WILLIAM T. BAGLEY,
Chairman, Commodity Futures Trading Commission.

[FR Doc.76-22981 Filed 8-6-76;8:45 am]

ENVIRONMENTAL PROTECTION AGENCY

[FRL 597-4; OPP-240014]

ALABAMA

Approval of Request for Interim Certification To Register Pesticides to Meet "Special Local Needs"

On July 3, 1975, final regulations for the registration, reregistration, and classification of pesticides pursuant to section 3 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), were published in the FEDERAL REGISTER (40 FR 28241). These regulations became effective August 4, 1975. Since that date, States have been prohibited from issuing new registrations for pesticide products or uses of pesticide products which are not registered by the Environmental Protection Agency (EPA) except pursuant to certification from the Administrator in accordance with section 24(c) of FIFRA.

On September 3, 1975, proposed regulations for State Registration of Pesticides to Meet Special Local Needs under section 24(c), FIFRA, were published in the FEDERAL REGISTER (40 FR 40538). Since it did not prove possible to promulgate final section 24(c) regulations prior to the effective date of the FIFRA section 3 regulations, some interruption in the authority of States to register pesticides has occurred. In order to prevent further disruption of State registration programs (particularly in relation to minor uses), a procedure has been established by which States may request interim certification to register pesticides to meet special local needs until such time as the final section 24(c) regulations are promulgated. If such a request is granted, a State may register pesticides subject to the terms of the certification and other limitations set out in the Preamble to the proposed regulations. Interim certfication will expire if the State has not submitted a plan pursuant to the final section 24(c) regulations within 60 days after the effective date of the Administrator's disapproval.

A State may request interim certification to register pesticides to meet special local needs at any time by having the Governor or Chief Executive Officer or their designee submit a request in writing to the Administrator. The request shall satisfy the requirements set out in the FEDERAL REGISTER announcement of the Interim Certification program (40 FR 40542), and the statutory standard set forth in section 24(c) of FIFRA.

The FEDERAL REGISTER announcement of the Interim Certification program provides that the Administrator shall notify the State of his approval or denial of a request for Interim Certification and publish notice of approval or denial in the FEDERAL REGISTER. The announcement further states that since the Agency expects Interim Certification to be of limited duration, it will not solicit public comment with respect to requests for Interim Certification. Adequate opportunity for public comment on State plans submitted pursuant to final section 24(c) regulations is provided for in proposed section 162.158(c).

The Agency has received a Request for Interim Certification to register pesticides to meet special local needs (Request) from the State of Alabama. After reviewing the Request, the Agency found that it satisfies the requirements set forth in the FEDERAL REGISTER announcement, and that it demonstrates that the State is capable of exercising adequate controls to assure that special local needs registrations it issues pursuant to Interim Certification will be in accord with the purposes of FIFRA.

Accordingly, notice is hereby given that the EPA has approved a Request for Interim Certification from the State of Alabama as described below, subject to the terms set forth in the FEDERAL REGISTER document of September 3, 1975.

ALABAMA

The Alabama Request sought authority to register "new products," as that term is defined in section 162.152(g) of the proposed regulations, to amend EPA registrations which involve "changed use patterns," as that term is defined in section 162.152(c), and to amend EPA registrations which do not involve changed use patterns. The Agency has found that the specific requirements of the Interim Certification program are saitsfied in the Request. Procedures for product hazard review and efficacy determination are part of the State's registration program; these procedures are adequate to assure that special needs registrations issued by this State will be in accord with the purposes of FIFRA.

The State agency which has been designated responsible for issuance of such registrations is the Alabama Department of Agriculture and Industries. This Agency was notified on July 8, 1976, that its Request had been approved.

A copy of the Alabama Request for Interim Certification, along with a letter reflecting the Agency's decision to approve the Request, are available at the following locations:

Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, EPA, Room 401, East Tower, 401 M St. SW., Washington, D.C. 20460.

Pesticide Branch, Hazardous Materials Control Division, EPA, 1421 Peachtree St., NE., Room 112, Atlanta, Georgia 30309.

Dated: August 4, 1976.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

[FR Doc.76-23148 Filed 8-6-76;8:45 am]

[FRL 597-5; OPP-42026]

INDIANA STATE PLAN

Certification of Pesticide Applicators

In accordance with the provisions of Section 4(a)(2) of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136) and 40 CFR Part 171, the Honorable Otis R. Bowen, M.D., Governor of the State of Indiana, has submitted a State Plan for Certification of Commercial and Private Applicators of Restricted Use Pesticides to the Environmental Protection Agency (EPA) for approval.

Notice is hereby given of the intention of the Regional Administrator, EPA Region V, to approve this plan contingent upon promulgation of implementing rules and regulations. Copies of the proposed rules and regulations are attached to the plan.

A summary of this plan follows. The entire plan, together with all attached appendices, may be examined during normal business hours at the following locations:

1. Agricultural Experiment Station, Purdue University, West Lafayette, IN 47907 (Office of the Indiana State Chemist, Department of Biochemistry, tel. (317)749-2391).

2. Room 1147, 230 South Dearborn Street, Chicago, Ill. 60604 (Pesticides Branch, Air & Hazardous Materials Division, EPA, Region V, tel. (312)353-6219).

3. Room 401, East Tower, Waterside Mall, 401 M Street, SW., Washington, D.C. 20460 (Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, EPA, tel. (202)755-4854).

SUMMARY OF STATE PLAN

The Office of the Indiana State Chemist has been designated by the Honorable Otis R. Bowen as the State lead agency for the administration of the pesticide applicator certification program, including enforcement activities, registration of restricted use pesticide dealers, and the coordination of field, laboratory, and office activities relating to pesticide regulation.

Cooperating agencies include the Indiana Cooperative Extension Service (Purdue University) and the Indiana Pesticide Review Board. The State Cooperative Extension Service has overall responsibility for the statewide pesticide applicator certification training program, including the preparation and administration of training courses, preparation of training materials and examinations, and distribution of training manuals.

The lead agency maintains close liaison with the Indiana Stream Pollution Control Board, Board of Health, and Department of Natural Resources through the Indiana Pesticide Review Board. The Board develops and recommends legislation, reviews and establishes necessary pesticide regulations and policies for State requirements.

The Indiana pesticide and pesticide container disposal program will be conducted by the State Board of Health as coordinated with the policies and recommendations of the Indiana Pesticide Review Board and Office of the State Chemist.

Legal authority for the program is contained in the Indiana Senate Enrolled Act No. 559 (Indiana Code 1971, 15-3, Chapter 3.5, 1971), the Indiana Pesticide Use and Application Act, Senate Enrolled Act No. 430 (Indiana Code 1971, 15-3, Chapter 3.6, 1975), and proposed regulations as attached to the plan.

The plan indicates that the State lead agency and cooperating agencies have or will have sufficient qualified personnel and funds necessary to carry out the proposed programs. State funds to support the certification program will be derived on a direct fee support basis. Through October 1976, the lead agency expects approximately $160,000 will be generated from direct support fees. The lead agency has applied for a Federal Assistance Grant to asist in the early phases of the State certification program.

An estimated 7700 commercial applicators and 35,000 private applicators will require certification. Plastic credit card type certificates will be furnished to all applicators upon meeting State certification requirements. In addition to the certificate, licenses will be issued to the commercial operator-owner or manager of an application business, commercial applicator-employee of an operator, and the public applicator.

Annual reports will be submitted to EPA by the lead agency not later than August 31 of each year. Other special reports will be provided as requested by the Administrator.

Commercial applicator categories proposed in the plan are those which are listed in 40 CFR 171.3. New subcategories proposed are as follows:

(1) Agricultural Pest Control
  (3) Aerial
(3) Ornamental and Turf Pest Control
  (1) Ornamental and Turf Pest Control
  (2) Turf
(6) Right-of-Way Pest Control
  (1) Ground
  (2) Aerial
(7) Industrial, Institutional, Structural, and Health Related Pest Control
  (1) Industrial, Institutional, and Health Related Control
  (2) Wood Destroying Pest Control
  (3) Food Manufacturing, Processing and Storage Pest Control

The State of Indiana plans to certify commercial applicators by means of a written examination covering the general or "core" material (40 CFR 171.4(b) and 171.6) and specific requirements of the category or subcategory (40 CFR 171.4(c)). Voluntary training sessions for commercial applicators will be organized and conducted primarily by the Indiana Cooperative Extension Service. Other contributors to the training program include Vincennes University—aerial applicators and some category 3, the State Entomologist—category 9, State Board of Health—contributing to category 8, and the State Chemist's office—laws and regulations. Ten Category Leaders, most of them Purdue University Extension Specialists, have been selected to coordinate the statewide training programs for each commercial applicator category. Commercial applicator training will be supplemented through the use of the EPA Core Manual, Indiana-specific material, slide-tapes, and EPA Category Specific Core Manuals. All commercial applicators required to meet State licensing provisions must be examined and certified to use both general and restricted use pesticides. Other commercial applicators will require certification only for use of restricted use pesticides.

Training of private applicators will be accomplished with the EPA Core Manual for Private Applicators augmented by State materials as appropriate. Indiana's ten extension areas will be used to facilitate both the accounting and contacting of private applicators and scheduling training sessions. Within the area system, Indiana has special Crop Production Agents who will be most utilized in actual training. County Agricultural Extension Agents will assist Crop Production Agents as appropriate. Private applicator certification will be accomplished by one of the following procedures: (1) successful completion of a worksheet administered during county level training sessions conducted by the Indiana Cooperative Extension Service, (2) completion of a programmed instruction course administered by the lead agency or cooperative extension service, or (3) written examination available upon applicant's request. In all above options, the lead agency will determine competency of private applicators who apply for a permit to use or supervise the use of restricted use pesticides.

In the event an applicator desiring certification is unable to read, he will be subjected to the same training session as others and then will be given any special oral training necessary to supplement the information available in the EPA Core Manual. The lead agency, following any special oral training, will conduct an interview to determine competency. Certification will be limited to the pesticide products for which the private applicator has demonstrated competency.

While training is not mandatory, all commercial and private applicators will be strongly encouraged to attend the sessions. Sample examination questions are attached to the plan.

The Indiana Extension Service will be the primary avenue for ensuring that applicators are kept up to date with changing technology and continue a suitable level of competency. By means of ongoing county education programs, private applicators will constantly receive additional information. Regarding commerical applicators, the Cooperative Extension Service plans to build upon the framework now in existence, including seminars, short courses and conferences. The State plans to utilize Continuing Education Units (CEU) as an indication that the private and commercial applicator is upgrading himself with changing technology. The lead agency and the Cooperative Extension Service will evaluate the nature of each type of training conference, seminar, or short course offered for the private and commercial applicator and determine the amount of CEU credit that appears justified. Current plans are for a 3-year certification period for both private and commercial applicators.

The Indiana State Plan indicates, that within sixty (60) days of the final approval of the Government Agency Plan (GAP) by EPA, a statement concerning acceptance of GAP qualified Federal employees will be forwarded for inclusion in the State plan.

Reciprocal agreements may be made with any other States provided they have substantially the same standards. Any such agreements will be submitted as amendments to Indiana's State plan.

Other regulatory activities listed in the State plan which will supplement the Indiana certification program are sampling, pesticide registration, and confiscation of pesticide products. All restricted use pesticide dealers must be registered by the Office of the Indiana State Chemist. Commercial applicators also require licensing, of which certification is a prerequisite.

V 41 154 AUG 9 76 UMI

The lead agency will have a pesticide inspection staff to monitor restricted use pesticide sales and distribution records of registered dealers, inspect commercial applicator use and application records, and spot check applicator licenses, certificates, and permits to insure compliance with State and Federal laws and regulations. They will perform regular inspections and follow up reports of alleged violations. Before October 1976, the lead agency intends to increase its pesticide staff by 6 positions in order to achieve goals of the State certification programs.

PUBLIC COMMENTS

Interested persons are invited to submit written comments on the proposed State plan for the State of Indiana to the Regional Administrator, Region V, U.S. Environmental Protection Agency, 230 S. Dearborn Street, Chicago, IL 60604. The comments must be received on or before September 10, 1976 and should bear the identifying notation (OPP-42026). All written comments filed pursuant to this notice will be available for public inspection at the above mentioned locations from 8:30 am to 3:30 pm Monday through Friday.

Dated: May 28, 1976.

GEORGE R. ALEXANDER, JR.,
Regional Administrator, U.S. Environmental Protection Agency, Region V.

[FRL 597-3; OPP-240013]

SOUTH DAKOTA AND OHIO

Approval of Requests for Interim Certification To Register Pesticides to Meet "Special Local Needs"

On July 3, 1975, final regulations for the registration, reregistration, and classification of pesticides pursuant to section 3 of the Federal Insecticide, Fungicide, and Rodenticide Act (FIFRA), as amended (86 Stat. 973; 7 U.S.C. 136), were published in the FEDERAL REGISTER (40 FR 28241). These regulations became effective August 4, 1975. Since that date, States have been prohibited from issuing new registrations for pesticide products or uses of pesticide products which are not registered by the Environmental Protection Agency (EPA), except pursuant to certification from the Administrator in accordance with section 24(c) of FIFRA.

On September 3, 1975, proposed regulations for State Registration of Pesticides to Meet Special Local Needs under section 24(c), FIFRA, were published in the FEDERAL REGISTER (40 FR 40538). Since it did not prove possible to promulgate final section 24(c) regulations prior to the effective date of the FIFRA section 3 regulations, some interruption in the authority of States to register pesticides has occurred. In order to prevent further disruption of State registration programs (particularly in relation to minor uses), a procedure has been established by which States may request interim certification to register pesticides to meet special local needs until such time as the final section 24(c) regulations are promulgated. If such a request is granted, a State may register pesticides subject to the terms of the certification and other limitations set out in the Preamble to the proposed regulations. Interim certification will expire if the State has not submitted a plan pursuant to the final section 24(c) regulations within 60 days after the effective date of the Administrator's disapproval.

A State may request interim certification to register pesticides to meet special local needs at any time by having the Governor or Chief Executive Officer or their designee submit a request in writing to the Administrator. The request shall satisfy the requirements set out in the FEDERAL REGISTER announcement of the Interim Certification program (40 FR 40542), and the statutory standard set forth in section 24(c) of FIFRA.

The FEDERAL REGISTER announcement of the Interim Certification program provides that the Administrator shall notify the State of his approval or denial of a request for Interim Certification and publish notice of approval or denial in the FEDERAL REGISTER. The announcement further states that since the Agency expects Interim Certification to be of limited duration, it will not solicit public comment with respect to requests for Interim Certification. Adequate opportunity for public comment on State plans submitted pursuant to final section 24(c) regulations is provided for in proposed section 162.158(c).

The Agency has received Requests for Interim Certification to register pesticides to meet special local needs (Request(s)) from the States of South Dakota and Ohio. After reviewing the Requests, the Agency found that they satisfy the requirements set forth in the FEDERAL REGISTER announcement, and that they demonstrate that each State is capable of exercising adequate controls to assure that special local needs registrations it issues pursuant to Interim Certification will be in accord with the purposes of FIFRA.

Accordingly, notice is hereby given that the EPA has approved Requests for Interim Certification from the States of South Dakota and Ohio as described below, subject to the terms set forth in the FEDERAL REGISTER document of September 3, 1975.

SOUTH DAKOTA

The South Dakota Request sought authority to register "new products", as that term is defined in section 162.152(g) of the proposed regulations, to amend EPA registrations which involve "changed use patterns", as that term is defined in section 162.152(c), and to amend EPA registrations which do not involve changed use patterns. The Agency has found that the specific requirements of the Interim Certification program are satisfied in the Request. Procedures for product hazard review and efficacy determination are part of the State's registration program; these procedures are adequate to assure that special needs registrations issued by this State will be in accord with the purposes of FIFRA.

The State agency which has been designated responsible for issuance of such registrations is the South Dakota Department of Agriculture. This Agency was notified on June 23, 1976, that its Request had been approved.

OHIO

The Ohio Request for Interim Certification sought authority to amend EPA registrations which involve changed use patterns and to amend EPA registrations which do not involve changed use patterns. The Agency has found that the specific requirements of the Interim Certification program are satisfied in the Request. Procedures for product hazard review and efficacy determination are part of the State's registration program; these procedures are adequate to assure that special local needs registrations issued by the State will be in accord with the purposes of FIFRA.

The State agency which has been designated responsible for issuance of such registrations, the Ohio Department of Agriculture, was notified on June 23, 1976, that its Request had been approved.

Copies of the South Dakota and the Ohio Requests for Interim Certification, along with letters reflecting the Agency's decision to approve the Requests, are available at the following locations:

Federal Register Section, Technical Services Division (WH-569), Office of Pesticide Programs, EPA, Room 401, East Tower, 401 M St. SW., Washington, D.C. 20460.
Pesticide Branch, Hazardous Materials Control Division, EPA, 1860 Lincoln St., Suite 900, Denver, Colorado 80203. (South Dakota request only.)
Pesticide Branch, Hazardous Materials Control Division, EPA, Federal Office Building, 230 South Dearborn St., Chicago, Illinois 60604. (Ohio request only.)

Dated: August 4, 1976.

EDWIN L. JOHNSON,
Deputy Assistant Administrator for Pesticide Programs.

[FRL 596-8]

STANDARDS OF PERFORMANCE FOR NEW STATIONARY SOURCES (NSPS) AND NATIONAL EMISSION STANDARDS FOR HAZARDOUS AIR POLLUTANTS (NESHAPS)

Delegation of Authority to State of California on Behalf of Madera County Air Pollution Control District

On December 23, 1971 (36 FR 24876) and March 8, 1974 (39 FR 9308), pursuant to Section 111 of the Clean Air Act, as amended, the Administrator promulgated regulations in 40 CFR Part 60 establishing standards of performance for twelve categories of new stationary sources (NSPS). In addition, on April 6, 1973 (38 FR 8820), pursuant to section 112 of the Clean Air Act, as amended, the Administrator promulgated in 40 CFR Part 61 national emission standards for three hazardous air pollutants (NESHAPS). Sections 111(c) and 112(d) require the Administrator to delegate authority to implement and enforce the standards to any State which submits an adequate procedure. Nevertheless, the Administrator retains concurrent authority to implement and enforce the standards following delegation of authority to a State.

On August 19, 1973, the Regional Administrator, Region IX forwarded to the States in his Region information setting forth the requirements for an adequate procedure for implementing and enforcing the NSPS and NESHAPS. On May 3, 1976 William H. Lewis, Jr., Executive Officer of the State of California Air Resources Board, submitted a request on behalf of the Madera County Air Pollution Control District for delegation of authority to implement and enforce the NSPS and NESHAPS. Included in that request were copies of the NSPS and NESHAPS regulations adopted by the Madera County Air Pollution Control District and citations to State law and District regulations which provide the State and District with the requisite authority to implement and enforce the NSPS and NESHAPS.

After a thorough review of the request for delegation, the Regional Administrator has determined that for the source categories set forth in paragraphs (A), (B) and (C) of the following official letter to Mr. Lewis, Executive Officer of the California Air Resources Board, delegation is appropriate subject to the conditions set forth in paragraphs (1) through (11) of that letter dated May 12, 1976:

Mr. WILLIAM H. LEWIS, JR.,
Executive Officer,
California Air Resources Board,
1709 11th Street,
Sacramento CA 95814.

Dear Mr. LEWIS: This is in response to your letter of May 3, 1976 requesting delegation of authority for implementation and enforcement of the Standards of Performance for New Stationary Sources (NSPS) and the National Emission Standards for Hazardous Air Pollutants (NESHAPS) to the State of California on behalf of the Madera County Air Pollution Control District..

We have reviewed the pertinent laws of the State of California and the rules and regulations of the Madera County Air Pollution Control District, and have determined that they provide an adequate and effective procedure for implementation and enforcement of the NSPS and NESHAPS by the Air Pollution Control District and the State of California. Therefore, we hereby grant delegation of the NSPS and NESHAPS to the State of California on behalf of the Madera County Air Pollution Control District as of the date of this letter as follows:

A. Authority for twelve categories of new sources located in the Madera County Air Pollution Control District subject to the standards of performance for new stationary sources promulgated in 40 CFR Part 60 as in effect November 12, 1974. The categories of new sources covered by the delegation are fossil fuel-fired steam generators; incinerators; portland cement plants; nitric acid plants; sulfuric acid plants; asphalt concrete plants; petroleum refineries; storage vessels for petroleum liquids; secondary lead smelters; secondary brass and bronze ingot production plants; iron and steel plants; and sewage treatment plants.

B. Authority for all sources located in the Madera County Air Pollution Control District subject to the national emission standards for three hazardous air pollutants promulgated in 40 CFR Part 61 as in effect November 12, 1974. The hazardous air pollutants covered by the delegation are asbestos; beryllium; and mercury.

This delegation is based upon the following conditions:

1. Quarterly reports will be submitted to EPA by the Madera County Air Pollution Control District through the State of California Air Resources Board.

2. Enforcement of the NSPS and NESHAPS in the Madera County Air Pollution Control District will be the primary responsibility of the District and the State of California Air Resources Board. If the District and the State determine that such enforcement is not feasible and so notify EPA, or where the District or the State act in a manner inconsistent with the terms of this delegation, EPA will exercise its concurrent enforcement authority pursuant to Section 113 of the Clean Air Act, as amended, with respect to sources within the District subject to the NSPS and NESHAPS.

3. Acceptance of this delegation of NPS and NESHAPS does not commit the State of California and the Madera County Air Pollution Control District to request or accept delegation of future standards and requirements. However, delegation of additional NSPS or NESHAPS standards or requirements, not hereby delegated would require a new request for delegation.

4. The State of California and the Madera County Air Pollution Control District are not requesting delegation of authority over Federal facilities within the District which are subject to the NSPS and NESHAPS. However, this does not relieve Federal facilities of the responsibility of complying with all applicable State laws and Madera County District regulations.

5. The Madera County Air Pollution Control District will at no time grant a variance from compliance with Madera County District Rule 422 and 423 except as provided in this paragraph. Should the District grant such a variance, EPA will consider the source receiving the variance to be in violation of the applicable Federal regulation and may initiate enforcement action against the source pursuant to Section 113 of the Clean Air Act. The granting of such variances by the District shall also constitute grounds for revocation of delegation by EPA. However, if the Madera County District in the future amends Rule 422 and 423 so as to make the District regulation more stringent than the applicable Federal regulation, the District may grant variances from the more stringent District regulation if such variances do not relieve subject sources of the responsibility of complying with standards equally as stringent as those contained in the applicable Federal regulations.

6. The Madera County Air Pollution Control District will utilize only the methods specified in 40 CFR Parts 60 and 61 in performing source tests pursuant to their NSPS and NESHAPS regulations. Any use of the District of test methods to determine compliance with NSPS or NESHAPS not in accordance with the terms and conditions of this delegation shall constitute grounds for revocation of delegation by EPA.

7. The Air Resources Board and EPA will develop a system of communication sufficient to guarantee that each office is always fully informed regarding the current compliance status of subject sources in the Madera County Air Pollution Control District and regarding interpretation of applicable regulations.

8. If at any time there is a conflict between a State or Madera County Air Pollution Control District regulation and a Federal regulation (40 CFR Part 60 or 61), the Federal regulation must be applied if it is more stringent than that of the State or District. In the event of such a conflict, if either the Air Resources Board or the District determine that it is unwilling or unable to apply the more stringent Federal regulation, it will so notify EPA. EPA, in consultation with the Air Resources Board and the District, will then modify or revoke the terms of this delegation to the extent it determines to be appropriate.

9. If the Regional Administrator determines that a State or Madera County Air Pollution Control District procedure for enforcing or implementing the NSPS or NESHAPS is inadequate, or is not being effectively carried out, this delegation may be revoked in whole or in part. Any such revocation shall be effective as of the date specified in a Notice of Revocation to the Air Resources Board.

10. As of the date of this delegation, sources subject to the NSPS or NESHAPS located within the Madera County Air Pollution Control District are required to submit all reports pursuant to the NSPS and NESHAPS to the Madera Air Pollution Control District and the EPA, Region IX.

11. The State of California and the Madera County Air Pollution Control District will notify all sources in the categories delegated herein and subject to continuous monitoring requirements contained in 40 CFR Part 60 of such requirements even if such requirements are not covered by the terms of this delegation.

A Notice announcing this delegation will be published in the FEDERAL REGISTER in the near future. The Notice will state, among other things, that, effective immediately, all reports required pursuant to the Federal NSPS and NESHAPS by sources located in the Madera County Air Pollution Control District should be submitted to the Air Pollution Control District Office at 135 W. Yosemite Avenue, Madera, CA 93637, as well as to EPA, Region IX.

Since this delegation is effective immediately, there is no requirement that the State notify EPA of its acceptance. Unless EPA receives from the State written notice of objections within 10 days of the date of receipt of this letter, the State and District will be deemed to have accepted all of the terms of the delegation.

Sincerely,

PAUL DE FALCO, JR.,
Regional Administrator.

cc: Madera County APCD

Therefore, pursuant to authority delegated to him by the Administrator, the Regional Administrator notified Mr. Lewis on May 12, 1976 that authority to implement and enforce the NSPS/NESHAPS was delegated to the State of California on behalf of the Madera County and Air Pollution Control District.

Copies of the request for delegation of authority and the Regional Administrator's letter of delegation are available for public inspection at the following addresses:

California Air Resources Board, 1709 11th Street, Sacramento CA 95814.
Environmental Protection Agency, Region IX, Enforcement Division, 100 California Street, San Francisco CA 94111.
Division of Stationary Source Enforcement, Room 3202 Waterside Mall, 401 "M" Street SW., Washington, D.C. 20460.

Effective immediately, all reports required pursuant to the NSPS and

V 41 154 AUG 9 76 UMI

NESHAPS by sources located in the Madera County Air Pollution Control District should be submitted to the office of the Air Pollution Control District, located at 135 W. Yosemite Avenue, Madera CA 93637, as well as to EPA, Region IX.

Dated: July 27, 1976.

PAUL DEFALCO,
Regional Administrator,
Region IX, EPA.

FEDERAL COMMUNICATIONS COMMISSION

INTERNATIONAL SYSTEM OF UNITS (SI)

Program Adoption

AUGUST 3, 1976.

On July 28, 1976, the Commission adopted a program for converting to the use of metric units. This program will facilitate development and use of a single system of units in the FCC rules. The program will be in accord with the objectives of both the House of Representatives Bill (H.R. 254), and the Senate Bill (S. 100).

Metric units will be used in all new and amended rules. Metric units will also be used on all license, equipment authorization, and construction permit applications, after complete conversion to metric units in the rules is accomplished. In the interim, the measurement system that is used in the relevant rules when filing an application should be used.

The program involves a gradual two stage conversion to metric unit usage. Metric units will appear with the U.S. equivalent stated in parenthesis (example: 2 meters (6.56 feet)). This program will allow for a smooth transition into metric unit usage.

Action by the Commission July 28, 1976. Commissioners Wiley (Chairman), Lee, Hooks, Quello, Washburn and Robinson.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

[FCC 76-731]

LICENSEE OBLIGATIONS

Effect of the 1976 Amendments to the Federal Election Campaign Act of 1971

AUGUST 3, 1976.

The Federal Election Campaign Act of 1971 was amended on May 11, 1976. Pub. L. 94-283. Section 323 of the 1976 Act states:

Whenever any person makes an expenditure for the purpoee of financing communications expressly advocating the election or defeat of a clearly identified candidate through any broadcasting station, newspaper, magazine, outdoor advertising facility, direct mailing, or any other type of general public political advertising, such communication—

(1) If Authorized by a candidate, his authorized political committee, or their agents, shall clearly and conspicuously, in accordance with regulations prescribed by the [Federal Election] Commission, state that the communiaction has been authorized; or

(2) if not authorized by a candidate his authorized political committees, or their agents, shall clearly and conspicuously, in accordance with regulations prescribed by the Commission, state that the communication is not authorized by any candidate, and state the name of the person who made or financed the expenditure for the communication, including, in the case of a political committee, the name of any affiliated or connected organization required to be disclosed under section 303(b)(2).

In June 1976, the Federal Election Commission issued a Campaign Guide. It states in pertinent part:

F. NOTICES OF AUTHORIZATION

1. Any Communication advocating the election or defeat of a "clearly identified candidate" through any type of public advertising must:

a. If authorized by the candidate, state that the communication is authorized;

b. If not authorized by the candidate, state:

(1) That the communication is not authorized; and

(2) The name of the person (and affiliated organization, if any) who financed the expenditure.

2. The statement must appear on the face or front page of printed matter, or at the beginning or end of a radio or television broadcast.

The foregoing language clearly places the responsibility for compliance with its provisions on candidates or their committees. Although licensees may receive taped or filmed announcements from candidates or their committees which contain language to comply with the 1976 amendments (e.g. The preceding announcement was authorized by the Candidate X Campaign Committee), pursuant to section 317 of the Communications Act of 1934, as amended, and § 73.1212 of the Commission's rules such announcements, when broadcast, must contain the statutory language of section 317, i.e. "paid for or furnished" or, as permitted by § 73.1212(a)(1), "sponsored by." Thus an announcement which states "Paid for and authorized by the Candidate X Campaign Committee" would comply with § 317 of the Communications Act.

A copy of this Public Notice is being sent to all broadcast licensees.

Action by the Commission July 27, 1976. Commissioners Wiley (Chairman), Lee, Hooks, Quello, Washburn and Robinson.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

[FR Doc.76-22993 Filed 8-6-76;8:45 am]

[Report No. 817]

COMMON CARRIER SERVICES INFORMATION

Applications Accepted for Filing

AUGUST 2, 1976.

The applications listed herein have been found, upon initial review, to be acceptable for filing. The Commission reserves the right to return any of these applications, if upon further examination, it is determined they are defective and not in conformance with the Commission's Rules and Regulations or its policies.

Final action will not be taken on any of these applications earlier than 31 days following the date of this notice, except for radio applications not requiring a 30 day notice period (see § 309(c) of the Communications Act), applications filed under Part 68, or as otherwise noted. Unless specified to the contrary, comments or petitions may be filed concerning radio and Section 214 applications within 30 days of the date of this notice and within 20 days for Part 68 applications.

In order for an application filed under Part 21 of the Commission's Rules (Domestic Public Radio Services) to be considered mutually exclusive with any other such application appearing herein, it must be substantially complete and tendered for filing by whichever date is earlier (a) the close of business one business day preceding the day on which the Commission takes action on the previously filed application; or (b) within 60 days after the date of the public notice listing the first prior filed application (with which the subsequent application is in conflict) as having been accepted for filing. In common carrier radio services other than those listed under Part 21, the cut-off date for filing a mutually exclusive application is the close of business one business day preceding the day on which the previously filed application is designated for hearing. With limited exceptions, an application which is subsequently amended by a major change will be considered as a newly filed application for purposes of the cut-off rule. [See § 1.227(b)(3) and 21.30(b) of the Commission's Rules.]

FEDERAL COMMUNICATION COMMISSION,
VINCENT J. MULLINS,
Secretary.

DOMESTIC PUBLIC LAND MOBILE RADIO SERVICE

22427-CD-P-(3)-76, Mobile Radio Telephone Service, Inc. (KUS312), Resubmitted C.P. to relocate existing facilities and change antenna system operating on 454.675, 454.850 and 454.925 MHz. to be located at Coon Peak, Oquirrh Range, 5.2 miles SSW of Garfield, Utah.

22507-CD-P/ML-76, Aircall, Inc. (KIY395), C.P. for additional control facilities to operate on 158.61 MHz at a new Location No. 3: 206 First Avenue, S.E., Hickory, North Carolina.

22508-CD-MP-76, Colton Telephone Company KOK339), C.P. to change antenna system operating on 454.400 MHz located at Goat Mountain, 8.1 miles SE of Colton, Oregon.

22509-CD-P-76, Souris River Telephone Mutual Aid Corporation (KAI930), C.P. for additional facilities to operate on 152.66 MHz. located 13.3 miles South of Minot, North Dakota.

22510-CD-P-76, Range Corporation (New), C.P. for a new 1-way station to operate on 152.24 MHz to be located One Mile NNE of Ripley, Michigan.

22511-CD-P-76, William L. Eisele d./b./a. Lake Shore Communications (KSJ818), C.P. to change antenna system operating on 152.060 MHz. located at Junction of Route 49 and Road 750 North, 4 miles North of Valparaiso, Indiana.

22512-CD-P-76, Services Unlimited, Inc. (KRH656), C.P. to relocate facilities and change antenna system operating on 158.70 MHz. at Location No. 2: 50 Miller Street, Winston-Salem, North Carolina.

22513-CD-P-76, Empire Paging Corporation (KRS674), C.P. for additional facilities to operate on 454.150 MHz. at a new Location No. 10: NW Corner of Freeway and Bangs Avenues, Neptune, New Jersey.

22514-CD-P-(2)-76, Mobilfone Northwest (KOF918), C.P. for additional Control facilities to operate on 454.250 MHz. at Location No. 2: 29 North Chelan, Wenatchee; and for additional Repeater facilities to operate on 459.250 MHz. at Location No. 3: Badger Mountain, 7 Miles NW. of Wenatchee, Washington.

22515-CD-P-76, William L. Eisele d/b/a Lake Shore Communications (KJU804), C.P. for additional facilities to operate on 152.18 MHz. at a new Location No. 2: Junction of Route 49 and Road 750 North, 4 miles North of Valparaiso, Indiana.

MAJOR AMENDMENT

21668-CD-P-75, Digital Paging Systems of Pittsburgh, Inc. (KWB370). Amend to change 152.24 MHz facilities to new Loc. No. 4: 1715 Grandview Ave., Pittsburgh, Pa. Lat. 40°26'28" N.—Long. 80°01'32" W. with increase in height and new antenna system. All other particulars of operation remain as reported in PN No. 757 dated 6-9-75.

20734-C2-P-74, Vegas Instant Page (KFL-943), Amend to change the base station frequency to 158.70 MHz. All other particulars are to remain as reported on PN No. 681 dated 1-2-74.

POINT TO POINT MICROWAVE RADIO SERVICE

(4242-C1-P-74), to reroute frequency 11095V MHz toward a new passive facility at Nieva, Puerto Rico on azimuth 53.0° and from passive toward Cerro Pinas, Puerto Rico on azimuth 281.9°.

4587-CF-MP-76, Same (WWM22), Cerro Pinas, 6.5 miles SW of Caguas, Puerto Rico. Lat. 18°09'16" N., Long. 66°04'51" W. Mod. of C.P. (4241-C1-P-74) to reroute frequency 11,645V MHz toward a new passive facility at Nieve, Puerto Rico on azimuth 101.8° and from passive toward Cidra, Puerto Rico on azimuth 233.0°.

4594-CF-P-76, Northwestern Bell Telephone Company (WHT56), Midway, 2 Miles South of Virginia, Minnesota. Lat. 47°29'14" N., Long. 92°31'15" W. C.P. to add a point of communication on frequency 2112.0V MHz toward Aurora, Minnesota on azimuth 77.8°.

4595-CF-P-76, American Telephone and Telegraph Company (KSB66), 240 North Meridian Street, Indianapolis, Indiana. Lat. 39°46'16" N., Long. 86°09'29" W. C.P. to change polarization from Horizontal to Vertical on frequencies 3730, 3810, 3890, 3970, 4050, and 4130 MHz and from Vertical to Horizontal on 3750, 3830, 3910, 4070, and 4150 MHz toward Sheridan, Indiana.

4596-CF-P-76, Same (KSO80), 2.5 Miles East of Sheridan, Indiana. Lat. 40°07'54" N., Long. 86°10'29" W. C.P. to change polarization from Vertical to Horizontal on frequencies 3710, 3790, 3870, 4030, and 4110 MHz and from Horizontal to Vertical on 3770, 3850, 3930, 4010, 4090, and 4170 and MHZ toward Indianapolis, Indiana.

4598-CF-P-76, Continental Telephone Company of Minnesota, Inc. (KBC53), 125 West First Avenue North, Aurora, Minnesota. Lat. 47°31'40" N., Long. 92°14'27" W. C.P. to change location of transmit station and add a point of communication on frequency 2162V MHz toward Midway, Minnesota on azimuth 258.0°.

4604-CF-MP-76, Southwestern Bell Telephone Company (WAU280), Vidauri, 12 Miles NE of Refugio, Texas. Lat. 28°26'11" N., Long. 97°08'09" W. Mod. of C.P. (2474-CF-P-75), to change polarization from Horizontal to Vertical on frequencies 3710 and 4190 MHz toward Victoria, Texas on azimuth 17.4°.

4605-CF-MP-76, Same (WAU282), 209 North Bridge Street, Victoria, Texas. Lat. 28° 48'03" N., Long. 97°00'23" W. Mod. of C.P. (2472-CF-P-75), to change polarization from Horizontal to Vertical on frequencies 3750 and 4198 MHz toward Vidauri, Texas on azimuth 197.4°.

4606-CF-P-76, Same (WDE59), 2.4 Miles ESE of Fort Stockton, Texas. Lat. 30°52'36" N., Long. 102°50'53" W. C.P. to correct coordinates and add a point of communication on frequency 2162.OH MHz toward Six Shooter Passive Reflector on azimuth 89.6° and from Passive Reflector toward Six Shooter, Texas on azimuth 169.5°.

1195-CF-P-76, Michigan Bell Telephone Co. (KQA 32), Millie Hill, Iron Mountain Michigan. (Lat. 45°49'17" N., Long. 88°02'42" W.): Construction permit to add 3870.V MHz toward Ralph, Michigan, on azimuth 24°6'.

1196-CF-P-76, Michigan Bell Telephone Co. (KQI 84), 3.3 miles NW of Ralph, Michigan. (Lat. 46°06'58" N., Long. 87°51'04" W.): Construction permit to add 3950.V MHz toward Forsyth, Michigan, on azimuth 62°8'.

1197-CF-P-76, Michigan Bell Telephone Co. (KQI 65,, 2 miles NE of Forsyth, Michigan. (Lat. 46°18'27" N., Long. 87°18'32" W.): Construction permit to add 6397.4H MHz toward Marquette, Michigan on azimuth 346°0'.

4593-CF-P-76, United Video, Inc. (WAH 570), 1.5 miles NW of Lincoln, Illinois. (Lat. 40°09'48" N., Long. 89°23'23" W.): Construction permit to add 11385.0H and 11465.0H MHz toward Clinton and Springfield, Illinois on azimuths 90°0' and 199° 3', respectively.

4600-CF-P-76, Eastern Microwave, Inc. (KEA 27), SW Cor. of Swarts and Townline Roads, Springwater, New York. (Lat. 42° 38'21" N., Long. 77°39'34" W.): Construction permit to add 6197.2V and 6315.9V MHz toward Attica; 6197.2V MHz toward Rochester, and 6197.2H MHz toward Dansville, New York on azimuths 296°3', 3°1', and 190°5' respectively.

4601-CF-MP-76, Eastern Microwave, Inc. (WPX 31), SE Cor. of Fallington and Werner Roads, Attica, New York. (Lat. 42°50'12" N., Long. 78°12'20" W.): Construction permit to add 5960.0V and 6019.3V MHz toward Buffalo, New York on azimuth 283°7'.

4602-CF-P-76, Eastern Microwave, Inc. (KGP 37), Chestnut Ridge Rd.—6.8 miles NW of Goshen, Pennsylvania. (Lat. 41°09'50" N., Long. 78°21'23" W.): Construction permit to add 6271.4V MHz, via power split, toward existing point of communication at Philipsburg, Pennsylvania on azimuth 153°8'.

4603-CF-P-76, Eastern Microwave, Inc. (WDD 61), 1.5 miles ENE of Fredericksville, Pennsylvania. (Lat. 40°27'27" N., Long. 75°39' 55" W.): Construction permit to add 6123.1H MHz toward Allentown and Easton, both in Pennsylvania, on azimuths 53°1' and 53°9', respectively.

4613-CF-P-76, Frank K. Spain/d.b.a. Microwave Service Co. (KPC 56), 29 miles SE of Missoula, Montana. (Lat. 46°35'30" N., Long. 113°33'15" W.): Construction permit to add 5974.8H and 6034.2H MHz toward McDonald Pass, Montana on azimuth 89°30'.

4614-CF-P-76, Frank K. Spain/d.b.a. Microwave Microwave Service Co. (KPC 57), 14 miles East of Helena, Montana. (Lat. 46°36' 01" N., Long. 112°18'06" W.): Construction permit to add 6630.7H and 6390.0H MHz toward Helena, Montana on azimuth 91°0'.

CORRECTIONS

4310-CF-P-76, Midwestern Relay Co. (WJL 50), 2.0 miles E of Stockbridge, Wisconsin. (Lat. 44°04'20" N., Long. 88°15'27" W.): This entry appearing in Public Notice of 7-6-76 is corrected to show azimuth 28°8' going toward Depere, Wisconsin. All other particulars remain the same.

4044-CF-P-76, United States Transmission Systems, Inc. (KFA 80), Gilles, Louisiana. This entry appearing in Public Notice of 7-12-76 is corrected to show the file number as listed as above. All other particulars remain the samc.

[FR Doc.76-23074 Filed 8-6-76;8:45 am]

MICROBAND CORP. OF AMERICA AND EASTERN MICROWAVE, INC.

[Docket Nos. 20822, 20823; File Nos. 2125-C5-P-72, 3085-C-5-P-72]

Memorandum Opinion and Order Designating Applications for Consolidated Hearing on Stated Issues

In re applications of Microband Corporation of America and Eastern Microwave, Inc.; for construction permits in the multipoint distribution service for a new station at Rochester, New York.

1. The Commission has before it the above-referenced applications of Microband Corporation of America, filed on October 13, 1971 and Eastern Microwave, Inc., filed on November 19, 1971. Both applications proposed Channel 1 operation in the Multipoint Distribution Service (MDS) in the Rochester, New York area, and thus are mutually exclusive and require comparative consideration. Both applications have been amended as a result of informal requests of the Commission staff for additional information, and no petitions to deny or other objections to any of the applications have been received.

2. Microband holds MDS licenses in nine cities including Washington, D.C., New York, New York and has been granted construction permits in several other cities. Eastern, a wholly-owned subsidiary of Newhouse Broadcasting Corporation, holds MDS construction permits in nine cities, including Pittsfield, Massachusetts, Binghamton, Burlington, Elmira, Syracuse, Utica and Watertown, New York. In addition, Newhouse Broadcasting has interests in broadcasting or cable systems in Syracuse, Elmira and Binghamton, New York.

3. Upon review of the captioned applications, we find that both applicants are legally, technically, financially, and otherwise qualified to provide the services which they propose, and that a hearing will be required to determine, on a comparative basis, which of these applications should be granted.

V 41 N 154 AUG 9 76 UMI

4. Accordingly, it is hereby ordered, That pursuant to Section 309(e) of the Communications Act of 1934, as amended, and Section 0.291 of the Commission's Rules, the above-captioned applications are designated for hearing, in a consolidated proceeding, at the Commission's offices in Washington, D.C., on a date and before an Administrative Law Judge to be specified by later order, to determine, on a comparative basis, which of the above-captioned applications should be granted in order to best serve the public interest, convenience, and necessity. In making such a determination, the following factors shall be considered:[1]

(a) The relative merits of each proposal with respect to service area and efficient frequency use;

(b) The nature of the services and facilities proposed, and whether they will satisfy service requirements known to exist or likely to exist in the Rochester, New York area.

(c) The anticipated quality and reliability of the service proposed, including selection of equipment, installation, subscriber security, and maintenance.

(d) The charges, regulations and conditions of the service to be rendered and their relation to the nature, quality and costs of service; and

(e) The managerial and entrepreneurial qualifications of the applicants.

5. It is further ordered, That Microband Corporation of America and Eastern Microwave, Inc., and the Chief, Common Carrier Bureau, are made parties to this proceeding.

6. It is further ordered, That parties desiring to participate herein shall file their notices of appearance in accordance with the provisions of Section 1.221 of the Commission's Rules.

Adopted: July 22, 1976.

Released: August 3, 1976.

FEDERAL COMMUNICATIONS COMMISSION,
JOSEPH A. MARINO,
Acting Chief, Common Carrier Bureau.

[FR Doc.76-23076 Filed 8-6-76;8:45 am]

[FCC 76-690; Docket No. 20849, File No. BR-1040; Docket No. 20850, File No. BP-19496; Docket No. 20851, File No. BRH-1495; Docket No. 20852, File No. BPH-8613]

WCAR, INC., ET AL.

Memorandum Opinion and Order Designating Applications for Consolidated Hearing on Stated Issues

In re applications of WCAR, Inc. (WCAR), Detroit, Michigan, Has: 1130 kHz, 10 kW/50 kW, DA-2, U, for renewal of broadcast license; The Hall Broadcasting Company, Inc., Detroit, Michigan, Requests: 1130 kHz, 10 kW/50 kW, DA-2, U, for construction permit for new standards broadcast station; WCAR, Inc. (WCAR-FM), Detroit, Michigan, Has: 92.3 MHz, Channel No. 222, 10 kW (H&V), for renewal of broadcast license; The Hall Broadcasting Company, Inc., Detroit, Michigan, Requests: 92.3 MHz, Channel No. 222, 10 kW(H&V); 480 feet, for construction permit for new FM broadcast station.

1. The Commission has before it (i) the above-captioned applications of WCAR, Inc., for renewal of its broadcast licenses for stations WCAR and WCAR-FM, Detroit, Michigan (WCAR); (ii) the above-captioned applications of The Hall Broadcasting Company, Inc., (Hall) for construction permits for new stations at Detroit, Michigan, to operate on the same frequencies and channel as stations WCAR and WCAR-FM; (iii) a petition to dismiss Hall's applications filed by WCAR; (iv) an opposition to WCAR's petition to dismiss filed by Hall; and (v) responsive pleadings thereto.[1]

2. In its petition to dismiss Hall's applications, WCAR requests that Hall's applications be dismissed without a hearing, or, in the alternative, that Hall's applications be designated for hearing in a noncomparative proceeding. WCAR has alleged that Hall's applications contain responses which are either misrepresentations of fact or evasions of the Commission's requirements. Specifically, WCAR challenges the contents of Hall's applications with respect to both the availability and suitability of its proposed transmitter site, its financial qualifications, and its ascertainment of community problems and needs.

3. WCAR states that there exist several reasons why Hall's proposed transmitter site is not available. It alleges that local zoning restrictions prohibit its use as a transmitter site, and that even if the property could be zoned for a transmitter site, its owners are not willing to make the land available to Hall. Also, WCAR asserts that Hall's proposed nine-tower directional antenna array will not fit on the site, as proposed.

4. Both parties agree that the land upon which Hall proposes to place its transmitter is zoned presently by the City of Trenton, Wayne County, Michigan, as "R-3 One-Family Residential." However, the parties disagree as to whether the property can be made available for use as a transmitter site. Hall states that there is every reasonable likelihood that the property can be zoned to permit such use. Conversely, WCAR alleges that the local zoning ordinance prohibits such rezoning. Further, WCAR alleges that Hall has not even requested a zoning change or a variance for its proposed site prior to filing its applications. In support of its position, Hall has submitted an affidavit from Mr. Pascual Pedroza, a representative of The Hall Broadcasting Company. Pedroza, in his affidavit, states that on July 1, 1974, he was advised by Mr. H. R. (Ray) Smith, an inspector employed by the City of Trenton Department of Building and Engineering, that the property was not zoned to permit erection of broadcast towers. However, Pedroza's affidavit also states that Smith had not suggested the existence of any conditions which would preclude rezoning subsequent to submission of a properly-filed rezoning application.[2] In its reply to Hall's opposition, WCAR has submitted an affidavit of Mr. Smith himself, in which he admits meeting with representatives of WCAR and with Mr. Pedroza. Smith's affidavit indicates that he told both parties that anyone could request rezoning. However, he also states as follows:

> • • • I knew that the Council for the City of Trenton would not grant the rezoning of the property which Mr. Pedroza referred to in that it amounts to "spot zoning" and the Council has not granted such zoning requests to my knowledge. It goes against the plans that the Council has for the City's development and the area involved.

In addition, Smith's affidavit refers to a section of the Trenton Zoning Ordinance which appears to preclude rezoning for use as a transmitter site.[3] It appears to be WCAR's contention that Mr. Smith's statement of opinion concerning Hall's zoning plus the effect of the provision contained in Section 2107(2) of the Trenton Zoning Ordinance leads to the conclusion that the proposed site is not available to Hall.

5. Despite the affidavits contained in WCAR's pleadings, we are not disposed to designate a site availability issue based upon WCAR's allegations regarding Hall's chances of having the property rezoned for use as a transmitter site. We have never required an applicant for a construction permit to build a broadcast station to obtain final approval of local zoning authorities for construction of broadcast facilities. Rather, we have required only that an applicant have "reasonable assurances" of local zoning approval. *Chronicle Publishing Company*, 3 RR 2d 529 (Rev. Bd. 1964). There is an assumption that an applicant's zoning request will be approved. *Eastside Broadcasting Company*, 1 RR 2d 763 (Rev. Bd. 1963). In order to rebut that assumption and thus to persuade us to designate a site availability issue against an applicant based upon that applicant's alleged inability to obtain zoning approval, a petitioner must make a reasonable showing of the improbability of a change in the zoning restrictions. *Indianapolis Broadcasting, Inc.*, 10 RR 1010C (1954). Such an issue was included against an applicant in *Massillon Broadcasting Co., Inc.*, 22 RR 95 (1961). In *Massillon*, there existed a local zoning regulation which, on its face, prohibited construction of the proposed tower, and which did not provide an available exception permitting waiver. Also, the applicant had not inquired about rezoning nor had it applied for rezoning at the time it filed its application with us. Rather, it stated that in the future, it would apply for a zoning waiver. However, the facts in *Massillon* differ from those presently before us. Hall, unlike the applicant in *Massillon*, did seek out information from the local governing authority. Although it was advised that rezoning was unlikely, it did determine that it was a possibility. Also, it is not certain that the provision of the Trenton Zoning Ordinance which appears to preclude Hall's use of the property as a transmitter site cannot be waived.

6. Although WCAR has submitted an affidavit of one Trenton Official regarding Hall's chances of obtaining the necessary zoning approval, that alone does not appear to be sufficient to justify inclusion of a site availability issue. In *Radio Ridgefield*, 47 FCC 2d 106, 30 RR 2d 447 (974), we indicated our reluctance to include a site availability issue based upon the predictions of individual members of local zoning authorities. See also *Lester H. Allen*, 20 FCC 2d 478, 17 RR 2d 914 (Rev. Bd. 1969) where the Review Board refused to add a site availability issue on the basis of a letter from a township solicitor which expressed the solicitor's opinion that the applicant would be unable to obtain rezoning from a local zoning authority. Hence, it seems clear that a petitioner must offer more than a local official's appraisal of an applicant's chances of having its proposed site approved to justify inclusion of a site availability issue. What is required to rebut the assumption of an applicant's reasonable expectancy of obtaining the necessary zoning approval is evidence that such attempts to secure approval have been unsuccessful. 4 FCC 2d 36, 7 RR 2d 767 (1966). In *Salem* and *Edina*, applicant's efforts to secure zoning approval had twice been denied by local authorities. In both cases, site availability issues were included based upon these denials. In the absence of past denials, we do not believe that a site availability issue should be included based upon the alleged improbability of success of Hall's rezoning efforts.

7. WCAR also asserts that Hall's proposed site will not be available to it because the present property owners have not agreed to make the land available to Hall. The site for the proposed AM station consists of several parcels of land owned by different parties. WCAR, in its petition, has alleged that Hall has failed to obtain reasonable assurances from each of the property owners that the property would be available for purchase by Hall. This allegation is disputed by Hall which asserts that all property owners have been contacted, and all have indicated their willingness to sell. Attached to WCAR's petition is a copy of a map from the City of Trenton Tax Assessor's Office. That map includes those portions of Hall's proposed site, which, asserts WCAR, are not available.

8. Among those parcels indicated on the Trenton map is one identified as K-3 owned by the Estate of Hyman Schwartz, of which the Detroit Bank and Trust Company is trustee. Hall proposes to place three of its towers on this site. WCAR states, however, that it has learned from a bank officer that this property will be sold only with an adjacent parcel of land also owned by the Estate of Hyman Schwartz, and that Hall has not arranged to purchase the adjacent property. This allegation is countered by Hall which includes with its opposition, an affidavit of Mr. Clyde Hall, its president. Mr. Hall states that he was told by a bank official that it would consider offers to sell the parcels of land separately. To rebut this statement, WCAR's reply contains a letter from a trust officer of the bank which states that the bank has received no "serious inquires" of prospects for this property, and that in its opinion the parcels should be sold together. However, the letter also states that the contiguous parcels would be sold separately contingent upon a simultaneous closing if that would benefit the estate.

9. Parcels 19 and 20, upon which Hall proposes to place two of its towers, are owned by Mr. and Mrs. Richard C. Cook. WCAR states that Mr. and Mrs. Cook are not interested in selling their property. However, this too is contradicted by Hall which has submitted another affidavit of its representative, Mr. Pedroza, stating that Mr. and Mrs. Cook told him (Pedroza) that they were anxious to sell these parcels because of the tax burdens of their ownership. WCAR's reply contains an affidavit of Mr. Sheldon A. Fealk which indicates that the Cooks admitted meeting with representatives of Hall and WCAR about their property, but that no offers had been received.

10. Another parcel of land included in Hall's proposed site is identified in the Trenton Tax Assessor's map as parcel number 21. It is owned by Mr. and Mrs. Milton Baltzer. According to WCAR, the Baltzers have not been contacted by Hall about selling their property. Hall, however, asserts that the Baltzer's property is reasonably available to it. Attached to Hall's opposition is another affidavit of Pedroza which indicates that the Baltzers had been approached by him on behalf of Hall prior to filing of Hall's applications, and that Baltzer had expressed interest in selling parcel number 21. WCAR's reply contains an unsworn statement signed by Mr. and Mrs. Baltzer which states that they were approached by Mr. Pedroza for Hall with regard to selling their property to Hall, but that no sales agreement had been reached.

11. In addition to the above representations regarding the property's availability, Hall's opposition contains allegations that representatives of WCAR have contacted property owners in an effort to persuade them not to sell their property to Hall. For example, Hall's opposition contains yet another affidavit of Pedroza in which he describes a meeting with Mrs. Joan Burkmier, an owner of parcel number 23, another portion of Hall's proposed site. According to this affidavit, Mrs. Burkmier had been approached by a representative of WCAR who warned her not to sell her property to representatives of a black-owned company (presumbably Hall) whose intent was to use the property to construct low income housing. Rather, she was advised to sell the property to WCAR which also had an interest in acquiring it. This affidavit of Pedroza is contradicted by an affidavit of Mrs. Burkmier herself which is attached to WCAR's reply. In her affidavit, she denies ever having been requested by any representative of WCAR not to sell her property to Hall. Further, she denies ever having been told that WCAR had any interest in acquiring her property.

12. Based upon the pleadings submitted in this matter, and the attachments and exhibits appended thereto, there appears to be genuine disagreement with regard to whether or not Hall has sought and received reasonable assurances that its proposed transmitter site would be available. Therefore, it will be necessary to include an issue on the availability of the proposed site. Since the question of site availability was raised by WCAR, it will have the burden of proceeding with the introduction of evidence on this question. The burden of proof of the availability of the site will be upon Hall.

13. In addition, there are unresolved allegations with regard to whether WCAR has interfered with Hall's efforts to obtain reasonable assurances of the availability of its proposed site. We believe that these allegations raise serious questions concerning the parties' basic qualifications which must be resolved prior to conclusion of this proceeding. If, as Hall alleges, WCAR has attempted to dissuade landowners from selling their property to Hall, that would cast grave doubts upon WCAR's fitness to remain a Commission licensee. Further, if WCAR denied such interference with Hall's efforts to secure a transmitter site, when, in fact, it had engaged in such conduct, its denial would constitute a misrepresentation to the Commission which

[1] Consideration of these factors shall be made in light of the Commission's discussion in *Peabody Telephone Answering Service, et. al.*, 55 F.C.C. 2d 626 (1975).

[1] Additional pleadings filed in this proceeding include the following: a reply to Hall's opposition to WCAR's petition to dismiss filed by WCAR; a motion for leave to file a memorandum of law, filed by WCAR, an opposition to motion for leave to file memorandum of law, filed by Hall; a reply to opposition to motion for leave to file memorandum of law, filed by WCAR; a memorandum of law, filed by WCAR; comments on memorandum of law, filed by Hall; reply to comments on memorandum of law, filed by WCAR; a motion for expedited action filed by WCAR; comments on motion for expedited action, filed by Hall; and reply to comments on motion for expedited action, filed by WCAR.

[2] In its opposition, Hall refers to this affidavit of Mr. Pedroza as one "wherein Mr. H. R. (Ray) Smith . . . confirms that there is every reasonable likelihood of the land being properly rezoned." Further, "Hall's Index to Affidavits" identifies this as "affidavit of H. R. Smith re:Zoning." Hence, it appears that Hall may have been attempting to create the erroneous impression that Mr. Smith submitted an affidavit regarding Hall's chances of obtaining favorable zoning for its site, when, in fact, Hall's pleadings contain no statement by Smith or any other Trenton official regarding the likelihood of success of Hall's efforts to have the proposed site rezoned.

[3] Section 2107 of the Zoning Ordinance of Trenton, Michigan states, in part, as follows:

> 2. Radio and television towers, public utility microwaves, and public utility TV transmitting towers, and their attendant facilities shall be permitted in I-1 and I-2 districts provided such use shall be located centrally on a continuous parcel of not less than one and one-half (1½) times the height of the tower measured from the base of said tower to all points on each property line.

V 41 154 AUG 9 76 UMI

would also have an effect upon WCAR's basic qualifications. However, if as WCAR alleges, Hall has fabricated its story about WCAR's contacts with the property owners, then Hall's statements with respect thereto would constitute misrepresentations to the Commission, and would affect its basic qualifications to become a licensee. Therefore, misrepresentation and character issues will be included as to both parties. In *The Citizens Committee, et al.* v. *F.C.C.*, 436 F. 2d 263 (D.C. Circ., 1970) at p. 271 it was held that "the truth is most likely to be refined and discovered in the crucible of an evidentiary hearing." We believe that the conflicting assertions presented to us in these pleadings necessitate a search for the truth which can only be accomplished by the hearing process.

14. In addition to WCAR's allegations with respect to the availability of Hall's proposed site, it also alleges that Hall's directional antenna system will not be able to be installed as proposed. This, it states, is because the site is too small to support the proposed 300 foot ground system for several of its nine towers. However, Hall states that its proposed array is technically feasible. Both sides have submitted engineering affidavits which support their conflicting positions. According to our examination of the engineering portion of Hall's application, its array will not fit on the proposed site. Hence, a site suitability issue will also be specified.

15. WCAR's petition asserts that Hall lacks the requisite financial qualifications to be awarded the construction permits. Analysis of Hall's financial documentation indicates that it will require $578,376 to construct its proposed facilities and operate the station for three months without reliance upon revenues,[1] itemized as follows:

Down payment on leased equipment	$2,265
Additional payments on equipment lease	7,361
Land	126,000
Buildings	20,000
Miscellaneous items (AM)	32,000
Miscellaneous items (FM)	20,000
Loan repayment	175,000
Working capital (3 months)	195,750
Total	578,376

To meet this requirement, Hall plans to utilize existing capital and a loan from a lending institution.

16. In support of its request for a financial issue, WCAR has challenged the validity of Hall's loan commitment from the Mid-States Mortgage Corporation. Also, it has questioned Hall's alleged ability to procure the necessary land for $126,000, as represented by Hall. Finally, WCAR states that Hall will not be able to construct its proposed stations for the amounts shown in its applications.

17. By its terms, Hall's loan commitment from Mid-States Mortgage Corporation in the amount of $1,600,000 expired on June 30, 1975. There is nothing in either of Hall's applications which indicates that this commitment has been renewed or extended. Further, Hall's applications do not include any documentation indicating that land will be available for $126,000 as alleged. Moreover, we note that Hall's most recently filed balance sheet is dated December 31, 1973. Thus, it is too old to be of significance in evaluating its financial qualifications at this time. Also, it appears that Hall's financial plan is based on cost estimates which are several years old and hence, may not be reflective of current prices. For the aforementioned reasons, a general financial issue will be specified.

18. WCAR's petition also contains allegations that Hall has failed to ascertain the problems and needs of Detroit, Michigan, its proposed community of service, and that it has made misrepresentations to the Commission with respect thereto. Specifically, WCAR disputes Hall's statements in its applications that it has interviewed 303 community leaders.[2] WCAR's allegations with respect to Hall's community leader survey are based upon WCAR's own interviews with thirteen of the leaders listed in Hall's applications as having been consulted by Hall. Of those thirteen, nine have indicated to WCAR that they do not recall ever being consulted by any one representing Hall. Hall, in its effort to refute WCAR's allegations, has included with its opposition, affidavits of those persons who conducted the consultations which have been challenged by WCAR. Hall's representatives have stated under oath that they did consult with those leaders. In response to these affidavits, WCAR has submitted with its reply, unsworn statements of two of those community leaders, and a sworn statement of another in which these persons deny any recollection of having been interviewed by representatives of Hall. Also included is an affidavit of WCAR's attorney in which the attorney states that two of Hall's listed interviewees told him that they did not recall ever having been interviewed by representatives of Hall.

19. Hence, we have been presented with contradictory allegations and statements with respect to whether or not Hall has consulted with all of the community leaders listed in its applications. Therefore, we believe that serious questions have been raised concerning the truthfulness of Hall's statements about its community survey. In these circumstances, inclusion of a misrepresentation issue against Hall is warranted. *California Stereo, Inc.*, 39 FCC 2d 401, 26 RR 2d 887 (Rev. Bd. 1973, *Belo Broadcasting Corp.*, 42 FCC 2d 1011, 28 RR 2d 732 (Rev. Bd. 1973), *Western Television Company*, 50 FCC 2d 453, 32 RR 2d 350 (Rev. Bd. 1974).

20. Since Hall proposes primarily black-oriented programming, while WCAR proposes general market programming, the relative need for these different types of programming will be considered under the standard comparative issue. *Ward L. Jones*, FCC 67–82 (1967).

21. In its Memorandum of Law, WCAR has alleged that Hall's proposed transmitter site does not comply with our rules adopted to implement the National Environmental Policy Act. These rules were adopted in our *Report and Order* in Docket No. 19555 (Implementation of the National Environmental Policy Act of 1969) released December 16, 1974. However, that *Report and Order* states that these rules are applicable to applications filed after January 20, 1975. Inasmuch as Hall's proposals were filed prior to that date, the rules do not apply, and therefore, it is not necessary to rule on WCAR's motion for leave to file a memorandum of law.

22. Except as indicated by the issues specified below, the applicants are legally, financially, technically, and otherwise qualified. However, since the proposals are mutually exclusive, they must be consolidated for a hearing.

23. Accordingly, IT IS ORDERED, That, pursuant to section 309(e) of the Communications Act of 1934, as amended, the above-captioned applications ARE DESIGNATED FOR A HEARING IN A CONSOLIDATED PROCEEDING at a time and place to be specified in a subsequent order, upon the following issues:

1. To determine whether The Hall Broadcasting Company has reasonable assurances that its proposed transmitter site will be available.

2. To determine whether the transmitter site selected by The Hall Broadcasting Company is suitable for its proposed directional antenna system.

3. To determine whether The Hall Broadcasting Company is financially qualified to construct and operate its proposed stations.

4. To determine with respect to WCAR, Inc.:

(a) whether it interfered with or attempted to interfere with the efforts of The Hall Broadcasting Company to obtain reasonable assurances of the availability of Hall's proposed transmitter site.

(b) whether it made misrepresentations to the Commission in connection with its interference with the efforts of The Hall Broadcasting Company to obtain reasonable assurances of the availability of Hall's proposed transmitter site.

(c) the effect of the facts adduced pursuant to (a) and (b) above, upon WCAR, Inc.'s basic and/or comparative qualifications to be a licensee.

[1] In *Orange Nine, Inc., et al.*, 7 FCC 2d 789, 9 RR 2d 1157 (1967) we held that the requirement that an applicant show the availability of sufficient funds to construct and operate its station for one year enunciated in *Ultravision Broadcasting Company*, 5 RR 2d 343 (1965), would not apply in situations where an applicant seeks to replace an existing station with an established record of advertising revenues. Rather, it would only be necessary to show sufficient revenues to construct the station and operate it for three months.

[2] Hall's application indicates that the bulk of its community leader interviews were conducted personally by Mr. Hall, and that he was assisted by several prospective management-level employees.

5. To determine with respect to The Hall Broadcasting Company:

(a) whether it made misrepresentations to the Commission with respect to WCAR's alleged interference with Hall's efforts to obtain reasonable assurances of the availability of its proposed transmitter site, and with respect to its survey of community leaders.

(b) the effect of the facts adduced pursuant to (a) above, upon The Hall Broadcasting Company's basic and/or comparative qualifications to be a licensee.

6. To determine which of the proposals would, on a comparative basis better serve the public interest.

7. To determine, in light of the evidence adduced pursuant to the foregoing issues, which, if either of the applications should be granted.

24. It is further ordered, That, the burden of proceeding with the introduction of evidence upon issues 1 through 3 shall be upon WCAR, Inc., and the burden of proof shall be upon The Hall Broadcasting Company, Inc.

25. It is further ordered, That, the burden of proceeding with the introduction of evidence and the burden of proof under issue 4 shall be upon The Hall Broadcasting Company, Inc.

26. It is further ordered, That, the burden of proceeding with the introduction of evidence under issue 5 shall be upon WCAR, Inc., and the burden of proof shall be upon The Hall Broadcasting Company, Inc.

27. It is further ordered, that WCAR, Inc.'s petition to dismiss the applications of The Hall Broadcasting Company, Inc., is hereby DENIED; that WCAR, Inc.'s motion for leave to file memorandum of law is GRANTED to the extent indicated above.

28. It is further ordered, That, to avail themselves of the opportunity to be heard, both applicants shall, pursuant to section 1.221(c) of the Commission's rules, in person or by attorney, within twenty (20) days of the mailing of this Order, file with the Commission, in triplicate, a written appearance stating an intention to appear on the date fixed for the hearing and present evidence on the issues specified in this Order.

29. It is further ordered, That, the applicants shall, pursuant to section 311(a)(2) of the Communications Act of 1934, as amended, give notice of the hearing within the time and in the manner prescribed in such rules, and shall advise the Commission of the publication of such notice as required by section 1.594(g) of the rules.

FEDERAL COMMUNICATIONS COMMISSION,
VINCENT J. MULLINS,
Secretary.

[FR Doc.76-23073 Filed 8-6-76;8:45 am]

FEDERAL MARITIME COMMISSION

CELTIC BULK CARRIERS

Agreement Filed

Notice is hereby given that the following agreement has been filed with the Commission for approval pursuant to section 15 of the Shipping Act, 1916, as amended (39 Stat. 733, 75 Stat. 763, 46 U.S.C. 814).

Interested parties may inspect and obtain a copy of the agreement at the Washington office of the Federal Maritime Commission, 1100 L Street, N.W., Room 10126; or may inspect the agreement at the Field Offices located at New York, N.Y., New Orleans, La., San Juan, Puerto Rico and San Francisco, California. Comments on such agreements, including requests for hearing, may be submitted to the Secretary, Federal Maritime Commission, Washington, D.C., 20573, on or before August 19, 1976. Any person desiring a hearing on the proposed agreement shall provide a clear and concise statement of the matters upon which they desire to adduce evidence. An allegation of discrimination or unfairness shall be accompanied by a statement describing the discrimination or unfairness with particularity. If a violation of the Act or detriment to the commerce of the United States is alleged, the statement shall set forth with particularity the acts and circumstances said to constitute such violation or detriment to commerce.

A copy of any such statement should also be forwarded to the party filing the agreement (as indicated hereinafter) and the statement should indicate that this has been done.

CELTIC BULK CARRIERS

JOINT SERVICE

(Modification of Agreement)

Notice of Agreement Filed by:

F. Conger Fawcett, Esq., Graham & James, One Martime Plaza, San Francisco, California 94111.

Agreement No. 10035–3 adds inland points in the United States and Europe served through ports on the U.S. West Coast and the United Kingdom, Ireland, Spain, Portugal, The Scan-Baltic area and the Bordeaux-Hamburg range to the scope of the joint service.

By order of the Federal Maritime Commission.

Dated: August 3, 1976.

FRANCIS C. HURNEY,
Secretary.

[FR Doc.76-22990 Filed 8-6-76;8:45 am]

[AGREEMENTS NOS. 10247, 10248 AND 10250]

COMMENT PERIOD

Extension

Notice of the filing of Agreements Nos. 10247 and 10248 was published in the FEDERAL REGISTER of July 7, 1976, (Vol. 41, No. 131, Page 27872), and Agreement No. 10250 was noticed in the FEDERAL REGISTER of July 14, 1976 (Vol. 41, No. 136, Page 29025).

Time for filing comments on these agreements is hereby enlarged to and including August 17, 1976.

By order of the Federal Maritime Commission.

Dated: August 3, 1976.

FRANCIS C. HURNEY,
Secretary.

FEDERAL POWER COMMISSION

[Docket No. E-9040]

CENTRAL VERMONT PUBLIC SERVICE COMMISSION

Compliance Filing

AUGUST 2, 1976.

Take notice that Central Vermont Public Service Corporation (Central Vermont) on April 27, 1976, filed a Report of Compliance with the Commission's April 5, 1976, order approving Settlement Agreement.

Central Vermont states that every resale customer will receive refunds under the Settlement Agreement of all amounts collected under Rate R–3P as originally filed which are attributable to the inclusion of CWIP in rate base. Central Vermont attaches a comparison showing refunds for the period from January 6, 1975, through November 30, 1975.

Central Vermont requests that the Commission issue a letter order approving this report, unconditionally approving the Settlement Agreement, and terminating this proceeding.

Any person desiring to be heard as to this compliance filing should file comments with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with the Commission's Rules of Practice and Procedure. All comments should be filed on or before August 16, 1976. Copies of this compliance filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-23047 Filed 8-6-76;8:45 am]

[Docket No. ER76-793]

DUKE POWER CO.

Tendered Contract Supplement

AUGUST 2, 1976.

Take notice that on July 19, 1976, Duke Power Company tendered for filing a supplement to its electric power contract with the Town of Dallas, North Carolina. The supplement provides for an increase in contract demand from 7,000 KW to 8,000 KW which Duke Power states was made at the request of the customer. The requested effective date is August 20, 1976.

Duke Power states that a copy of the filing has been mailed to the customer.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such

V 41 154 AUG 9 76 UMI

petitions or protests should be filed on or before August 17, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-794]

DUKE POWER CO.

Tendered Contract Supplement

AUGUST 2, 1976.

Take notice that on July 19, 1976, Duke Power Company tendered for filing a supplement to its electric power contract with the Town of Forest City, North Carolina. The supplement provides for an increase in contract demand at Delivery Point No. 1 from 4,800 KW to 5,800 KW and at Delivery Point No. 2 from 8,200 KW to 9,200 KW. Duke Power states that the increase is made at the request of the customer.

The requested effective date is August 20, 1976. Duke Power states that a copy of the filing has been mailed to the customer.

Any person desiring to be heard or to protest said filing should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 17, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken, but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this filing are on file with the Commission and are available for public inspection.

[Docket No. ER76-722]

NEW ENGLAND POWER CO.

Notice of Filing

AUGUST 2, 1976.

Take notice that on July 14, 1976, New England Power Company (NEPCO) filed an amendment to its Rate Schedule FPC No. 281 with Boston Edison Company effecting a reduction in the return on common equity contained therein from 14.00% to 13.5%. NEPCO states that since the date of filing of Rate Schedule FPC No. 281, it was confirmed between the parties that the applicable return on common equity under the terms of the agreement was 13.5%.

Any person desiring to be heard or to protest said application should file a petition to intervene or protest with the Federal Power Commission, 825 North Capitol Street, N.E., Washington, D.C. 20426, in accordance with Sections 1.8 and 1.10 of the Commission's Rules of Practice and Procedure (18 CFR 1.8, 1.10). All such petitions or protests should be filed on or before August 13, 1976. Protests will be considered by the Commission in determining the appropriate action to be taken but will not serve to make protestants parties to the proceeding. Any person wishing to become a party must file a petition to intervene. Copies of this application are on file with the Commission and are available for public inspection.

[Docket No. ER76-304, et al.]

NEW ENGLAND POWER CO.

Settlement Conference

AUGUST 2, 1976.

Take notice that on August 12, 1976, a conference of all parties to intervene in these proceedings, New England Power Company, and the Commission Staff will be held in the Commission's Conference Room No. 8402, at 825 North Capitol Street, NE., Washington, D.C., at 10:00 A.M.

Customers and other interested persons will be permitted to attend, but if such persons have not previously been permitted to intervene by order of the Commission, attendance at the conference will not be deemed to authorize intervention as a party in the proceedings.

All parties will be expected to come fully prepared to discuss the merits of all issues concerning the lawfulness of the proposed rate increase and any procedural matters preparatory to a full evidentiary hearing or to make commitments with respect to such issues and any offers of settlement or stipulations discussed at the conference.

KENNETH F. PLUMB,
Secretary.

[Docket No. ER76-17]

OHIO POWER CO.

Modification of Procedural Schedule

AUGUST 2, 1976.

On July 22, 1976, Staff Counsel filed a motion to extend the procedural dates fixed by order issued August 17, 1975, as most recently modified by notice issued May 12, 1976, in the above-designated proceeding and to permit the service of top sheets by the Commission Staff.

Upon consideration, notice is hereby given that the procedural schedule is modified as follows:

Service of Staff's Top Sheets, July 23, 1976.
Informal Settlement Conference, August 11, 1976.

All other procedural dates are deferred pending the outcome of settlement discussions.

By direction of the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-23050 Filed 8-6-76;8:45 am]

PRIVACY ACT OF 1974

New or Intended Routine Uses of Information in Existing Systems of Records

The Privacy Act of 1974, Pub. L. No. 93-579 (88 Stat. 1896), requires that each agency publish at least annually a notice of the existence and character of each "system of records", as defined in 5 U.S.C. 552a(a)(5), which the agency maintains, 5 U.S.C. 552a(e)(4). The Federal Power Commission has published such notice in the FEDERAL REGISTER at 40 FR 39353 (Aug. 27, 1975), 40 FR 41984 (Sept. 9, 1975), 40 FR 45118 (Sept. 30, 1975), 40 FR 52806 (Nov. 12, 1975), and 41 FR 9010 (March 2, 1976).

Pursuant to 5 U.S.C. 552a(e)(11), section 309 of the Federal Power Act, as amended (49 Stat. 858-859; 16 U.S.C. 825h), and section 16 of the Natural Gas Act, as amended (52 Stat. 830; 15 U.S.C. 717o), notice is hereby given that the Federal Power Commission proposes the adoption of new or intended uses of information in existing record systems which have been published in the FEDERAL REGISTERS cited hereinabove.

5 U.S.C. 552a(b)(7) provides for disclosure of records by an agency, without the written consent of the individual, in response to a request from "* * * another agency or * * * an instrumentality of any governmental jurisdiction * * * for a civil or criminal law enforcement activity * * *" The Privacy Act is silent on referrals of information for law enforcement purposes, without the individual's consent, which are initiated by the referring agency when the law enforcement agency may be unaware of the problem. The Federal Power Commission believes that it is necessary to include a routine use of the appropriate record systems to insure such referrals without the individual's consent in matters involving this fundamental agency responsibility to refer to appropriate authorities apparent violations of criminal and Civil laws.

Accordingly, the Federal Power Commission hereby gives notice of the addition of the following new routine use to the FPC record systems entitled, "Appeals, Grievances and Complaints Records" [40 FR 39354 (Aug. 27, 1975)], "Application for Interlocking Directorates—Security Files" [40 FR 39355 (Aug. 27, 1975)], "Blood Donor Records" [40 FR 39356 (Aug. 27, 1975)], "Claims by Employees for Losses of Personal Property" [40 FR 39357 (Aug. 27, 1975)], "Computer Usage Production Statistics for the Office of Regulatory Information Systems" [40 FR 39358 (Aug. 27, 1975)], "Data Operator Performance Statistics for the Office of Regulatory Information Systems" [40 FR 39359 (Aug. 27, 1975)], "Employee Conduct Records" [40 FR 39360 (Aug. 27, 1975)], "Pay and Pay-Related Records (Payroll, Travel, Attendance, Leave)" [40 FR 39363 (Aug. 27, 1975)], "Personnel Investigations Records (Security and Suitability)" [40 FR 39364 (Aug. 27, 1975)], "Personnel Records (General)" [40 FR 39365 (Aug. 27, 1975)], "Recruiting, Examining, and Placement Records" [40 FR 39366 (Aug. 27, 1975)], and "Time Distribution Reports" [40 FR 39368 (Aug. 27, 1975), 40 FR 41984 (Sept. 9, 1975)]:

In the event that a system of records maintained by the FPC to carry out its functions indicates a violation or potential violation of law, whether civil, criminal or regulatory in nature, and whether arising by general statute or particular program statute, or by regulation, rule or order issued pursuant thereto, the relevant records in the system of records may be referred, as a routine use, to the appropriate agency, whether federal, state, local or foreign, charged with the responsibility of investigating or prosecuting such violation or charged with enforcing or implementing the statute, or rule, regulation or order issued pursuant thereto.

The categories of records maintained in the affected systems and the authorities authorizing the maintenance of the information contained in these systems are set forth in the appropriate FEDERAL REGISTERS cited herein above.

Any interested person may submit to the Federal Power Commission, Washington, D.C. 20426, on or before September 8, 1976, in writing, concerning all or part of the notice proposed herein.

Submittals will be placed in the Commission's public files and will be available for public inspection at the Commission's Office of Pubic Information, Washington, D.C., 20426, during regular business hours. The Commission will consider all such submittals before acting on the matters proposed herein. An original and 14 conformed copies should be filed with the Secretary of the Commission. Submittals to the Commission should indicate the name and mailing address of the person filing the comments or suggestions.

The Secretary shall cause prompt publication of this notice to be made in the FEDERAL REGISTER.

By direction of the Commission.

KENNETH F. PLUMB,
Secretary.

[FR Doc.76-23046 Filed 8-6-76;8:45 am]

[Docket No. RM75-14]

NATIONAL RATES FOR JURISDICTIONAL SALES OF NATURAL GAS DEDICATED TO INTERSTATE COMMERCE ON OR AFTER JANUARY 1, 1973, FOR THE PERIOD JANUARY 1, 1975 TO DECEMBER 31, 1976

Order Denying Stay

AUGUST 2, 1976.

On July 28, 1976, a motion was filed with the Commission by the American Public Gas Association in conjunction with several organizations[1] (APGA, et al., or Petitioners), requesting the Commission to stay Opinion No. 770, ____ FPC ____, issued July 27, 1976, in Docket No. RM75-14, pending the Commission's final order on rehearing in this proceeding.

Also on July 28, 1976, the U.S. Court of Appeals for the District of Columbia Circuit, following Petitioners' motion there for a stay, stayed the Commission's order in this case "in order to afford [the] Court an opportunity more fully to consider the matter and the responses thereto." On July 29th the Court asked that responses be filed by August 3, 1976, and set oral argument for August 5. While the Court's stay is in effect, we recognize that the action we take here can have no immediate effect. However, inasmuch as we have directed our General Counsel to seek to have that stay lifted, we believe it is important to rule upon this motion now so that Opinion 770 can become effective immediately upon the lifting of that stay.

Virginia Petroleum Jobbers Ass'n v. *F.P.C.*, 104 U.S. App. D.C. 106, 259 F. 2d 921 (1958), sets forth the tests for a stay, *all* of which must be met. First, those requesting the stay (Petitioners) must show that there is a strong likelihood their views will prevail on appeal. Secondly, Petitioners must show that without such relief, they will be irreparably injured. Third, Petitioners must show that the issuance of a stay would not substantially harm other parties interested in the proceedings. Fourth, the Petitioners must show that the stay is in the public interest. We find that Petitioners have not met these standards and, accordingly, deny the stay.

1. Petitioners argue that they will, in all likelihood, succeed on the merits on appeal because, *inter alia*, (1) the Opinion 770 rate is based on the unregulated price of intrastate gas and not on costs, and is, therefore, unlawful; (2) Opinion No. 770 is procedurally defective since Petitioners' "constitutional and statutory right to a hearing was denied"; and (3) the Commission committed reversible error by "arbitrarily abandoning the actual taxes paid principle" and including an income tax component.

Petitioners' assertion that Opinion 770 is not cost-based, and that the Commission placed unwarranted reliance on intrastate prices is without merit. While the Commission cannot use unregulated intrastate prices as the sole criteria for establishing interstate producer prices,[2] it is clear that the Commission may consider such prices in conjunction with cost factors in determining just and reasonable producer rates.[3] While the Commission undoubtedly examined non-cost factors in Opinion No. 770, as it has in other opinions, those factors were not controlling, and the rate established is, as stated on pages 1-2 of the opinion "fully cost-based and justified." Opinion 770 is based on almost exactly the type of methodology which was upheld in *Shell Oil Company* v. *F.P.C., et al.*, 520 F. 2d 1061, *cert. den. sub nom. California Company, et al.* v. *F.P.C.*, dated June 14, 1976, 44 L.W. 3719.

Petitioners' arguments regarding the necessity for a full evidentiary hearing are similarly without merit. Exactly the same argument was made and rejected in *Shell, supra.*

Nor is there any merit to Petitioners' arguments concerning the Commission's allowance of an income tax component. While there was no such component in Opinion 699-H, it is clear that the situation has changed considerably since the adoption of that opinion. At the time of 699-H, producers were still allowed percentage depletion. That tax advantage is no longer generally available. Thus, the Commission's conclusion that producers will be paying taxes, at least on the marginal gas to which this opinion applies, is fully justified by the record.

2. Petitioners argue that without a stay, irreparable injury will occur because (1) there would be a tremendous rate impact on consumers from Opinion 770 prior to the issuance of a final Commission order and (2) there is no assurance that there would be refunds ordered of any amounts collected under Opinion 770 which are found to be excessive. Petitioners' argument is without merit. Petitioners acknowledge that the courts have left the issue of refunds to the Commission's discretion. This power exists whether or not it is expressly reserved in the Commission's opinion. *Consumer Federation of America* v. *F.P.C.*, 169 U.S. App. D.C. 116, 515 F. 2d 347, *cert. denied*, 423 U.S. 906 (1975).

As long as the Commission has this power there can, by definition, be no irreparable injury. *Cf. Atlanta Gas Light Co.* v. *F.P.C.*, 476 F. 2d 142 (5th Cir. 1973). The Commission has no policy denying refunds *per se*. Should such an issue arise here, the Commission would treat it on the merits based upon the then existing circumstances.

Moreover, for reasons set forth below, Petitioners are in error, both as to the amount and timing of the impact of our opinion.

(a) *Date of Impact of Order 770.* As set forth in ordering paragraph (D) of the opinion (page 161), there can be no direct impact on any pipeline customer until October 27, 1976, the earliest possible effective date of any pipeline rate in-

[1] Consumer Federation of America, New Jersey Board of Public Utility Commissioners, State of Minnesota, Minnesota Public Service Commission, United Steel Workers of America, United Automobile, Aerospace and Agricultural Implement Workers of America, International Association of Machinists & Aerospace Workers, National Rural Electric Cooperative Association, American Public Power Association, United States Conference of Mayors, National Farmers Union, National Farmers Organization, Energy Action Committee, Toward Utility Rate Normalization, Industrial Union Department, and AFL-CIO.

[2] *Federal Power Commission* v. *Texaco*, 417 U.S. 380, 397-99 (1974).

[3] *Mobil Oil Corp.* v. *F.P.C.*, 417 U.S. 283, 317-19 (1974). See discussion in Opinion 770 (mimeo. p. 111).

V 41 154 AUG 9 76 UMI

crease tracking any rate filings under Opinion 770. Any direct impact on residential retail customers of the pipeline's wholesale customers could not occur until after that time, and would depend upon the action of state regulatory agencies. We would expect that the rehearing for the sake of which Petitioners seek the stay would be completed by that date.

(b) *Cost Impact of Opinion.* While the Commission would not deny, and has in fact affirmatively stated, that Opinion 770 will result in a significant dollar volume of increased revenue to producers, an accurate understanding of the Commission's decision requires some response to the erroneous portions of Petitioners' arguments with regard to cost impact.

(i) In calculating the impact of the escalation of post-January 1, 1975 gas to the rate authorized by Opinion 770, Petitioners argue that the Commission has actually established a rate of $1.63, not $1.42. At page 3, n. 2 of their motion, they support this with the statement that "the present value of the revenues recevied from past commitment of volumes of gas adds 21¢ per Mcf."

This is completely incorrect. The price established by this opinion for 1975–76 gas is $1.42 for gas flowing from the date of the opinion until October 1, 1976. The price then escalates on that day to $1.43; on January 1, 1977 to $1.44, on April 1, 1977 to $1.45, and so forth, by 1¢ escalations per quarter, reaching $1.49 on January 1, 1978, and $2.04 on January 1, 1992. The discussion of a 21¢ addition to the price, and an effective rate of $1.63, simply indicates that the present value of these 1¢ escalator payments would be 21¢, and that on a present worth basis, this escalating stream of payments would be equivalent to a level series of payments at a rate of $1.63. However, this certainly does not mean that the amounts to be paid by consumers, or anyone else, will be anything other than the $1.42 today, with the 1¢ escalators as indicated.

The computations at pages 3–4 on emergency and limited-term sales are almost completely without validity. Emergency and limited-term sales have dropped sharply since the 1971–1974 period used in the calculations on page 4. In addition, there is no reason to believe that emergency and limited-term sales will be made at all, or will be made at a significant differential above the national rate, when the national rate is, as here, based on updated costs and conditions.

3. The issuance of a stay of Opinion No. 770 would cause irreparable injury to other parties to this proceeding. One of the major purposes of Opinion No. 770 was to increase the incentive for producers to dedicate gas to the interstate market, and to develop gas for dedication to the interstate market. So long as the effectiveness of this order is stayed, those incentives will not exist. With this country facing a succession of steady increases of curtailment of natural gas, such an impact would be an irreparable injury. While money paid between parties could ultimately be restored, gas which is not produced or delivered to interstate markets in the next several months will not be available for use during the coming winter heating season. Several recent Commission actions are indicative of the potentially serious nature of the natural gas situation. On July 20, 1976, the Commission issued in Docket No. RP76–116 an order initiating "hearings and conferences to evaluate the impact of natural gas shortages of interstate pipeline companies." On June 28, 1976, in Docket No. RP76–113, the Commission issued an order beginning an investigation of recent sharp increases in the price of Canadian gas imports. In the face of a serious gas situation, this Commission cannot countenance the maintenance of the status quo.

4. Finally, Petitioners argue that a stay in this proceeding would be in the public interest. Their stated argument here is based only on the alleged errors in the Commission's methodology, which we have rejected above. We would also point out that it is in the national interest to take adequate steps to maintain and, if possible, increase the interstate supply of natural gas, so as to lessen dependence on much higher price alternative sources, such as Canadian gas imports, LNG and SNG projects, and supplies of imported oil. A stay would continue and exacerbate the problems caused by reliance on such high-priced alternative supplies, and thus would not be in the public interest.

For all of the aforementioned reasons, Petitioners' motion for a stay of Opinion No. 770 shall be denied.

Also, on July 28, 1976, Senator Hubert H. Humphrey filed a pleading in support of the APGA, *et al.*'s motion, and requested that he be allowed to intervene. Furthermore, all of the parties listed in Footnote 1 request leave to intervene out of time in this proceeding. On July 30, 1976, a pleading was filed supporting APGA, *et al.*'s motion for stay which also requested late intervention on behalf of United States Senators Abourezk, Durkin, and Proxmire and United States Representatives Bedell, Brodhead, Harrington, Harris, Hughes, Maguire, Moffett, Moss, Ottinger, and Seiberling (Congressmen). The Commission shall permit the aforementioned requests for intervention subject to the condition that the intervenors take the record and state of the proceedings as they find them, and subject to the further condition that the granting of the interventions shall not be the basis for delaying or deferring the issuance of a final order on rehearing in this proceeding.

The Commission finds: (1) Good cause exists to deny the motion for stay of Opinion No. 770 filed on July 28, 1976, by APGA, *et al.*

(2) The participation of the aforementioned parties in this proceeding may be in the public interest, as hereinafter conditioned.

The Commission orders: (A) The motion for stay of Opinion No. 770 filed by APGA, *et al.*, on July 28, 1976, is denied.

(B) Senator Hubert H. Humphrey, Congressmen, and the parties listed in Footnote 1 are hereby permitted to intervene in these proceedings subject to the rules and regulations of the Commission; *Provided, however*, that participation of such intervenors shall be limited to matters affecting asserted rights and interests as specifically set forth in their petitions to intervene; and *Provided, further*, that the admission of such intervenors shall not be construed as recognition by the Commission that such intervenors might be aggrieved because of any order or orders of the Commission entered in this proceeding. The interventions granted above are hereby made subject to (1) the condition that the intervenors take the record and the state of the proceedings as they find them, and (2) the condition that interventions granted herein shall not be the basis for delaying or deferring the issuance of a final order on rehearing in this proceeding.

(C) The Secretary shall cause prompt publication of this order to be made in the FEDERAL REGISTER.

By the Commission. Commissioner Smith believes the stay entered by the United States Court of Appeals for the District of Columbia Circuit on July 28, 1976, in *American Public Gas Association, et al. v. F.P.C.*, Docket No. 76–1694, makes the motion before the Commission moot, and thus does not join in this Order.

KENNETH F. PLUMB,
Secretary.

FEDERAL RESERVE SYSTEM

FLORIDA NATIONAL BANKS OF FLORIDA, INC.

Order Denying Acquisition of Bank

Florida National Banks of Florida, Inc. ("Florida National"), Jacksonville, Florida, a bank holding company within the meaning of the Bank Holding Company Act, has applied for the Board's approval under § 3(a)(3) of the Act (12 U.S.C. 1842(a)(3)) to acquire 50.37 percent or more of the voting shares of the Citizens Bank of Bunnell ("Bank"), Bunnell, Florida.

Notice of the application, affording opportunity for interested persons to submit comments and views, has been given in accordance with § 3(b) of the Act. The time for filing comments and views has expired, and the Board has considered the application and all comments received in light of the factors set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

Florida National, the fifth largest banking organization in Florida, controls 32 banks with aggregate deposits of approximately $1.3 billion, representing 5.4 percent of the total deposits in commercial banks in the State.[1] Acquisition of Bank would increase Florida National's share of total commercial bank deposits by .04 percent and would not result in a significant increase in the concentration of banking resources in Florida.

Bank, the larger of the two banks in the relevant banking market,[2] controls total deposits of approximately $11 million representing 62.2 per cent of the total deposits in commercial banking institutions in the market. The closest subsidiary bank of Florida National is 23 miles southeast of Bank. No significant competition exists between any of Florida National's subsidiary banks and Bank, and it appears unlikely that such competition would develop in the future. Common ownership and control of Bank and the only other bank in the relevant market has led to common senior operating management and director interlocks. Because of this affiliate relationship, the two banking institutions do not presently compete with each other. If the subject proposal is approved, it is expected that the affiliate relationship will be terminated and Bank will become an independent alternative source of banking services in the relevant market. On the basis of the facts of record, the Board concludes that competitive considerations are consistent with, and lend some weight toward, approval of the application.

The financial condition and future prospects of Florida National, its subsidiaries and Bank are regarded as satisfactory. Accordingly, the Board concludes that financial considerations are consistent with approval of the application.

In the course of processing this application, the following information has come to the Board's attention.

(1) In May 1974 Florida National withdrew a previous application it then had pending to acquire 50.37 per cent of Bank.[3]

[1] All banking data are as of December 31, 1975.

[2] The relevant banking market is approximated by Flagler County.

[3] Following the 1966 Amendments to the Act, the DuPont Trust ("Trust") sought to divest its holdings in 30 Florida banks through an exchange of stock with a newly created bank holding company, Florida National. Subsequently, the Board determined that Trust was still controlling the 30 banks thorugh Florida National and by Order of October 15, 1973, the Board ordered the DuPont Trust to "terminate its control and/or controlling interest over Florida National and/or its subsidiary banks" by December 31, 1974. In May 1974, eight pending § 3(a)(3) applications of Florida National were returned because Trust had not yet complied with the Board's Order of October 15, 1973; and therefore any acquisitions of bank shares by Florida National would have constituted an indirect acquisition by Trust.

(2) In late May 1974, Florida National's counsel (who was also a director of Florida National) conferred with members of the Board's Legal Division to discuss the possibility of preserving Florida National's opportunity to acquire Bank by having officers of Florida National purchase the stock of Bank and hold it as individuals until such time as Florida National could purchase it from them.

(3) Subsequently, by letter of June 14, 1974, the Board's Legal Division informed Florida National's counsel that ". . . any action to acquire shares of a bank by officers, directors or other persons associated or related to a bank holding company, without Board approval, should be taken with extreme caution to insure that the bank holding company does not obtain direct or indirect control or power to control or exercise a controlling influence over the bank."

(4) On June 28, 1974, Florida National entered into a Stock Purchase Agreement with three of its officers[4] ("Officers") providing, in part, that Florida National, through one of its subsidiary banks, would loan its Officers funds with which to purchase 50.37 per cent of the voting shares of Bank. The Officers agreed to sell those shares to Florida National at a later date. In addition, "the entire risk of gain or loss on the transactions" was upon Florida National. Florida National also agreed to indemnify its Officers against loss in the event it was unable to purchase the shares from them.

(5) Inquiries by the Board's Legal Division in October 1974 resulted in a letter dated October 7, 1974, from Florida National's counsel committing Florida National and its Officers to (a) remove the loan from Florida National's subsidiary bank to an unaffiliated bank, (b) cancel, rescind, and render void and unenforceable the Stock Purchase Agreement of June 28, 1974, and (c) enter into a new Stock Purchase Agreement "which would be consistent with the Board's staff's recommendations and which would provide no indemnification."

(6) Florida National subsequently placed the loan with an unaffiliated bank. However, Florida National agreed to guarantee the loan.

(7) On May 1, 1975, Florida National submitted an application for prior approval to acquire 50.37 per cent of the outstanding voting shares of Bank from its Officers who had acquired the shares from Bank's principal shareholder.

(8) During processing of the application, staff discovered that the Stock Purchase Agreement between Florida National and its Officers had not been "cancelled and rescinded and rendered void and unenforceable from the beginning" and was in fact still in force. The only step that had been taken by Florida National in fulfillment of the commitments listed in the aforementioned October 7th letter was the transfer of the loan to Officers from Florida National's subsidiary bank to an unaffiliated bank. Florida National continues to guarantee the loan to its Officers[5] and all of the other provisions of the Stock Purchase Agreement remain in force.

(9) In response to a request by the Board's staff that Florida National explain its actions, Florida National and its counsel provided documents and arguments in support of its position that its actions should not be deemed a willful violation of the Act. Florida National and its counsel argue, in part, that Florida National acted upon the advice of counsel; that Florida National's agreement with its Officers had been structured to comply with prior holdings of the Board in similar cases; and that, at worst, the transaction was a technical violation of the Act.

Section 3(a) of the Act provides that it shall be unlawful, except with the prior approval of the Board ". . . (3) for any bank holding company to acquire direct or indirect ownership or control of any voting shares of any bank if, after such acquisition, such company will directly or indirectly own or control more than 5 per centum of the voting shares of such bank." Section 2(a)(2)(A) of the Act provides that any company has control over a bank or over any company if "(A) the company directly or indirectly or acting through one or more other persons owns, controls, or has power to vote 25 per centum or more of any class of voting securities of the bank or company."

It appears that, contrary to the specific recommendations and views expressed by the Board's Legal Division, Florida National, acting through its Officers, acquired control of 50.37 per cent of Bank's outstanding voting shares. Florida National was instructed by the Board's Legal Division not to finance its Officers' purchase of Bank's shares, not to guarantee any loan made to its Officers by an unaffiliated bank and not to indemnify its Officers against loss. Despite these directions and Florida National's awareness of the Board's publicly expressed concern with acquisitions by officers of holding companies acting to preserve corporate opportunities,[6] and without apparent concern for the consequences of its actions, Florida National nevertheless structured the transaction in a manner that clearly resulted in its acquiring control of Bank. Moreover, Florida National continues to guarantee the loan to its Officers and to indemnity those Officers against loss, and the control relationship thus continues.

On the basis of the facts of record, the Board concludes that Florida National controls Bank within the meaning of § 2(a)(2)(A) of the Act. The Board further concludes that Florida National violated

[4] Two of the officers were also directors of Florida National.

[5] At the time Florida National placed the loan with the unaffiliated lender, American National Bank of Jacksonville, it continued to guarantee the loan to its Officers. When Florida National subsequently sought to remove its guarantee of the loan, American National Bank of Jacksonville refused to excuse Florida National from its obligation.

[6] See *Mid America Bancorporation, Inc.*, 1974 Federal Reserve *Bulletin* 131; *The Jacobus Company and Inland Financial Corporation*, 1974 Federal Reserve *Bulletin* 130.

V 41 154 AUG 9 76 UMI

§ 3(a)(3) of the Act by acquiring control of Bank without the prior approval of the Board.

Among the factors enumerated in § 3(c) of the Act that the Board must consider in acting on applications is the managerial resources of the acquiring bank holding company. The reference to "managerial resources" does not, however, refer solely to the business abilities of management or its past financial success. The legislative history of this provision makes it clear that this factor relates not only to management's competence but also to management's integrity and disposition to conduct the affairs of company in accordance with the requirements of law.[7]

In assessing the managerial resources of an applicant, the Board must consider all the factors that bear upon the competence, quality and integrity of the management of any holding company seeking to acquire control of a bank. The Board has previously stated that when it comes to the Board's attention that an acquisition has been made, or activities have been commenced, without the requisite prior approval of the Board, whether or not such violation of the law appears to have been "willful," such conduct may reflect so adversely upon the managerial factors in connection with an application for permission to retain the illegally acquired activity that the conduct, in and of itself, constitutes grounds for denial of such an application.

In view of the repeated warnings of the Board's Legal Division cautioning Florida National's counsel to exercise great care in structuring the transaction whereby Officers acquired control of Bank, the contradictory statements made by Florida National's counsel to the Legal Division, the apparent misrepresentations made in connection with the application, and Florida National's continued failure to comply with the Board's staff's recommendations for remedying the situation, it is clear that insofar as this application is concerned the management of Florida National has not demonstrated a disposition to conform the conduct of Applicant's affairs to the requirements of the Act. Section 3(a) of the Act requires prior approval for acquisitions, and where an acquisition of control is made without obtaining such prior approval, under circumstances such as those presented here, the Board believes it should not approve an application to retain the illegally acquired control position and thereby allow the offending party to reap the fruits of its violation.

There is no evidence in the record that that the banking needs of the community are not currently being adequately served. Florida National has proposed to expand certain of Bank's services. However, in the context of this application, these considerations are not sufficient to outweigh the adverse managerial considerations of Florida National's violation of the Act referred to above. Accordingly, it is the Board's judgment that approval of the application would not be in the public interest and that the application should be denied.

On the basis of the record, the application is denied for the reasons summarized above. Florida National and its Officers are ordered to take all necessary steps to divest the shares of Bank unlawfully acquired by them no later than October 27, 1976 and to submit to the Board for its approval no later than August 29, 1976, a plan to effect such divestiture.

By order of the Board of Governors,[8] effective July 29, 1976.

GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[FR Doc.76-23092 Filed 8-6-76;8:45 am]

[7] As originally enacted, § 3(c)(3) of the Bank Holding Company Act provided that among the factors to be considered by the Board is the "character of [the] management". Also see Senate Report No. 1095, 84th Cong., 1st Sess., at page 10, accompanying the 1956 Act. The present § 3(c) of the Act includes the same standard without any substantive change in its meaning having been made by the 1966 Amendments to the Act which brought this section into harmony with the Bank Merger Act. The Federal Home Loan Bank Board has had occasion in a similar context to consider the scope of the "managerial resources" standard as contained in that section of the National Housing Act dealing with savings and loan holding companies. (12 U.S.C. § 1730a(e)(2)). The Bank Board concluded that its standard was adopted from the Bank Holding Company Act and that the phrase "managerial resources" encompasses considerations relating to the integrity of management. Opinion and Order of the Home Loan Bank Board in the Matter of the Joint Applications of Fidelity Financial Corporation and Fidelity Savings and Loan Association, Sacramento, California, and Six Rivers Savings and Loan Association, Eureka, California (Resolution No. 73-1772, December 7, 1973), at page 20.

[8] Voting for this action: Vice Chairman Gardner and Governors Wallich, Partee and Lilly. Absent and not voting: Chairman Burns and Governors Coldwell and Jackson.

MERCANTILE TEXAS CORP.

Proposed Acquisition of Financial Protection Insurance Company of Texas

Mercantile Texas Corporation, Dallas, Texas, has applied, pursuant to § 4(c)(8) of the Bank Holding Company Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2)), for permission to acquire voting shares of Financial Protection Insurance Company of Texas, Houston, Texas ("FPIC"), a wholly-owned nonbanking subsidiary of Federated Capital Corporation, Houston, Texas ("FCC"). Applicant's acquisition of FPIC would be accomplished as a result of a proposed merger of FCC with and into Applicant; an application, pursuant to § 3(a)(5) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(5)), for the Board's approval of such merger is presently pending before the Board. Notices of the application were published on July 13, 14 and 22, 1976 in newspapers of general circulation in the following locations: Houston, Austin, San Antonio, Corpus Christi and New Braunfels, Texas.

Applicant states that the proposed subsidiary would engage in the activities of underwriting, as a direct insurer and reinsurer, credit life and credit accident and health insurance directly related to extensions of credit by FCC's existing subsidiary banks at the aforementioned locations. Further, Applicant states that such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Dallas.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than September 1, 1976.

Board of Governors of the Federal Reserve System, August 3, 1976.

GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[FR Doc.76-23093 Filed 8-6-76;8:45 am]

SIDNEY HOLDING CO.

Formation of Bank Holding Company

Sidney Holding Company, Sidney, Montana, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) to become a bank holding company through acquisition of 80.5 per cent of the voting shares of The Sidney National Bank, Sidney, Montana. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Minneapolis. Any person wishing to comment on the application should submit views in writing to the Reserve Bank, to be received not later than August 26, 1976.

Board of Governors of the Federal Reserve System, August 2, 1976.

GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

SOUTHERN BANKSHARES, INC.

Proposed Acquisition of Charters Insurance Managers, Inc.

Southern Bankshares, Inc., Richmond, Virginia, has applied, pursuant to § 4(c)(8) of the Bank Holding Company Act (12 U.S.C. § 1843(c)(8)) and § 225.4(b)(2) of the Board's Regulation Y (12 CFR § 225.4(b)(2)), for permission to retain voting shares of Charters Insurance Managers, Inc., Richmond, Virginia and thereby to continue to control indirectly National Union Life Insurance Company, Richmond, Virginia. Notice of the application was published on June 10, 1976 in *The Richmond Times-Dispatch*, a newspaper circulated in Richmond, Virginia and on June 21, 1976 in *The Virginia Gazette*, a newspaper circulated in Williamsburg, Virginia.

Applicant states that the subsidiary would continue to engage directly in the activity of acting as an insurance agent for credit life and credit accident and health insurance directly related to an extension of credit by the bank holding system; and continue to engage indirectly in the activity of acting as an underwriter for credit life and credit accident and health insurance that is directly related to extensions of credit by the bank holding company system. Such activities have been specified by the Board in § 225.4(a) of Regulation Y as permissible for bank holding companies, subject to Board approval of individual proposals in accordance with the procedures of § 225.4(b).

Interested persons may express their views on the question whether consummation of the proposal can "reasonably be expected to produce benefits to the public, such as greater convenience, increased competition, or gains in efficiency, that outweigh possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interests, or unsound banking practices." Any request for a hearing on this question should be accompanied by a statement summarizing the evidence the person requesting the hearing proposes to submit or to elicit at the hearing and a statement of the reasons why this matter should not be resolved without a hearing.

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Richmond.

Any views or requests for hearing should be submitted in writing and received by the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, not later than August 31, 1976.

Board of Governors of the Federal Reserve System, August 2, 1976.

GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

[FR Doc.76-23090 Filed 8-6-76;8:45 am]

UNION HOLDING CO.

Formation of Bank Holding Company

Union Holding Company, Halliday, North Dakota, has applied for the Board's approval under § 3(a)(1) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(1)) to become a bank holding company through acquisition of 80 percent or more of the voting shares of The Union Bank, Halliday, North Dakota. The factors that are considered in acting on the application are set forth in § 3(c) of the Act (12 U.S.C. § 1842(c)).

The application may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Minneapolis. Any person wishing to comment on the application should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551 to be received no later than August 31, 1976.

Board of Governors of the Federal Reserve System, August 2, 1976.

GRIFFITH L. GARWOOD,
Assistant Secretary of the Board.

JACOBUS CO., ET AL.

Acquisition of Bank

The Jacobus Company, Milwaukee, Wisconsin, and its 45.4 percent owned subsidiary, Inland Heritage Corporation, Wauwatosa, Wisconsin, have applied for the Board's approval under § 3(a)(3) of the Bank Holding Company Act (12 U.S.C. § 1842(a)(3)) to acquire, indirectly, 95.4 percent of The Beloit State Bank, Beloit, Wisconsin, through the acquisition of Financial Network Corporation, Beloit, Wisconsin, the parent holding company of The Beloit State Bank, by Inland Beloit Corporation, Milwaukee, Wisconsin, a wholly-owned subsidiary of Inland Heritage Company; and to acquire, indirectly, 75.3 percent of Community Bank of Beloit, Beloit, Wisconsin, through the acquisition of Community Holding Corporation, Beloit, Wisconsin, the parent holding company of Community Bank of Beloit, by Inland Beloit Corporation. At the same time, Inland Beloit Corporation has applied for the Board's approval under section 3(a)(1) of the Bank Holding Company Act (12 U.S.C. 1842(a)(1)) to become a bank holding company through the acquisition of Financial Network Corporation and Community Holding Corporation. The factors that are considered in acting on the applications are set forth in § 3(c) of the Act (12 U.S.C. 1842(c)).

The applications may be inspected at the offices of the Board of Governors or at the Federal Reserve Bank of Chicago. Any person wishing to comment on the applications should submit views in writing to the Secretary, Board of Governors of the Federal Reserve System, Washington, D.C. 20551, to be received not later than September 1, 1976.

Board of Governors of the Federal Reserve System, August 3, 1976.

CIGARETTE TESTING RESULTS

Tar and Nicotine Content

Correction

In FR Doc. 76-22500 appearing in the FEDERAL REGISTER of Monday, August 2, 1976 on page 32294, the table thereon should read as follows:

[In milligrams per cigarette]

	TPM dry	Nicotine
Dawn, 120 mm, filter, soft pack	21	1.6
Dawn, 120 mm, filter, menthol, soft pack	22	1.6
More, 120 mm, filter, soft pack	22	1.6
More, 120 mm, filter, menthol, soft pack	22	1.7

FAILURE TO POST MINIMUM OCTANE NUMBERS ON GASOLINE DISPENSING PUMPS

Extension of Time for Submission of Comments Concerning Environmental Impact Statement

In response to request of the National Petroleum Refiners Association et al., the Commission has extended through August 12, 1976, the time in which interested persons may file written comments or views as to its draft environmental impact statement and its relevant supporting material relating to its Trade Regulation Rule requiring the posting of minimum octane numbers on gasoline pumps. The original period of time for submission of comments terminated on June 28, 1976, and was extended through July 6, 1976. This present extension of time for submission of written comments or views expires on August 12, 1976. The draft environmental statement appears in the Friday, May 14, 1976, issue of the FEDERAL REGISTER, 41 FR 20017.

Issued: August 5, 1976.

INTERNATIONAL TRADE COMMISSION

[AA1921-159]

TANTALUM ELECTROLYTIC FIXED CAPACITORS FROM JAPAN

Investigation and Hearing

Having received advice from the Department of the Treasury on July 22,

V 41 154 AUG 9 76 UMI

1976, that tantalum electrolytic fixed capacitors from Japan, other than those produced and sold by Matsushita Electric Industrial Co., Ltd., are being, or are likely to be sold, at less than fair value, the United States International Trade Commission on August 3, 1976, instituted investigation No. AA1921–159 under section 201(a) of the Antidumping Act, 1921, as amended (19 U.S.C. 160(a)), to determine whether an industry in the United States is being or is likely to be injured, or is prevented from being established, by reason of the importation of such merchandise into the United States.

Hearing. A public hearing in connection with the investigation will be held in the Commission's Hearing Room, U.S. International Trade Commission Building, 701 E Street, NW., Washington, D.C. 20436, beginning at 10 a.m., e.d.t., on Wednesday, September 8, 1976. All parties will be given an opportunity to be present, to produce evidence, and to be heard at such hearing. Requests to appear at the public hearing should be received by the Secretary of the Commission, in writing, at the Commission's office in Washington, D.C., not later than noon, Friday, September 3, 1976.

By order of the Commission.

Issued: August 3, 1976.

KENNETH R. MASON,
Secretary.

NATIONAL SCIENCE FOUNDATION

ADVISORY PANEL ON CHEMISTRY

Meeting

In accordance with the Federal Advisory Committee Act, P.L. 92–463, the National Science Foundation announces the following meeting:

Name: Advisory Panel for Chemistry.
Date: August 29 and 30, 1976.
Time: 9 a.m. each day.
Place: Marin Room, TowneHouse Hotel, San Francisco, California.
Type of meeting: Open.
Contact person: Dr. Jack B. Kinsinger, Division Director for Chemistry, Room 340, National Science Foundation, Washington, D.C. 20550, telephone 202/632–4282,
Summary minutes: May be obtained from the Committee Management Coordination Staff, Division of Personnel & Management, Room 212, National Science Foundation, Washington, D.C. 20550.
Purpose of advisory panel: To provide general advice and recommendations on the impact of the NSF support of chemistry, and the operation and policies of the Chemistry Division.
Agenda:

August 29 (9 a.m. to 5 p.m.) open: Discussion of topics of concern to the Chemistry Division, including the status of the National Center for Computational Chemistry, procedures for review of chemistry division programs, support of sabbaticals, and mechanisms and procedures for postgrant evaluation.

August 30 (9 a.m. to 5 p.m.) open: Continuation of topics discussed on August 29, with remarks and presentations by NSF staff on the FY 77 budget and the Director's recent review of chemistry, as well as other topics of interest to the Panel and observers.

M. REBECCA WINKLER,
Acting Committee Management Officer.

NUCLEAR REGULATORY COMMISSION

[Docket No. 50–293]

BOSTON EDISON CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 18 to Facility Operating License No. DPR–35, issued to the Boston Edison Company (the licensee), which revised Technical Specifications for operation of Unit No. 1 of the Pilgrim Nuclear Power Station (the facility) located near Plymouth, Massachusetts. The amendment is effective as of its date of issuance.

This amendment changes Figures 6.2.1 and 6.2.2 of the Technical Specifications which describe the Boston Edison corporate organization and the Pilgrim Station organization, respectively. The change also adds a requirement to report changes in corporate structure and station organization to the Commission within 30 days.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated January 15, 1976, (2) Amendment No. 18 to License No. DPR–35, and (3) the Commission's concurrently issued related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. and at the Plymouth Public Library on North Street in Plymouth, Massachusetts 02360. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 29th day of July, 1976.

For the Nuclear Regulatory Commission.

DENNIS L. ZIEMANN,
Chief, Operating Reactors Branch No. 2, Division of Operating Reactors.

[FR Doc.76–23036 Filed 8–6–76;8:45 am]

[Docket No. 50–213]

CONNECTICUT YANKEE ATOMIC POWER CO.

Issuance of Amendment to Facility Operating License

The U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 9 to Facility Operating License No. DPR–61, issued to Connecticut Yaukee Atomic Power Company (the licensee), for operation of the Haddam Neck Plant located in Middlesex County, Connecticut. The amendment is effective as of its date of issuance.

This amendment revises the Haddam Neck Plant Technical Specifications for hydraulic snubbers by incorporating features of the latest model technical specifications.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated May 3, 17976, (2) Amendment No. 9 to License No. DPR–61, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Russell Library, 119 Broad Street, Middlesex, Connecticut 06457. A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 27th day of July 1976.

For the Nuclear Regulatory Commission.

CHARLES M. TRAMMELL,
Acting Chief, Operating Reactors Branch No. 1, Division of Operating Reactors.

[Docket Nos. 50–269, 50–270, and 50–287]

DUKE POWER CO.

Issuance of Amendment to Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment Nos. 28, 28, and 25 to Facility Operating Licenses No. DPR–38, DPR–47, and DPR–55, respectively, issued to Duke Power Company which revised Technical Specifications for operation of the Oconee Nuclear Station Units Nos. 1, 2, and 3, located in Oconee County, South Carolina. The amendments are effective as of the date of issuance.

These amendments delete the restriction which limits Oconee Unit No. 3 Cycle 1 operation to 10,944 Effective Full Power Hours.

The application for these amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Notice of Proposed Issuance of Amendment to Facility License No. DPR–55 in connection with this action was published in the FEDERAL REGISTER on June 21, 1976 (41 FR 24955). No request for a hearing or petition for leave to intervene was filed following notice of the proposed action.

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental statement, negative declaration, or environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated April 16, 1976, (2) Amendment Nos. 28, and 25 to License Nos. DPR–38, DPR–47, and DPR–55, respectively, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. 20555 and at the Oconee County Library, 201 South Spring, Walhalla, South Carolina 29691.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesa, Maryland, this 27th day of July 1976.

For the Nuclear Regulatory Commission.

CHARLES M. TRAMMELL,
Acting Chief, Operating Reactors Branch No. 1, Division of Operating Reactors.

[FR Doc.76–22902 Filed 8–6–76;8:45 am]

[Docket No. 50–309]

MAINE YANKEE ATOMIC POWER CO.

Issuance of Amendment to Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 23 to Facility Operating License No. DPR–36 issued to Maine Yankee Atomic Power Company which revised Technical Specifications for operation of the Maine Yankee Atomic Power Station, located in Lincoln County, Maine. The amendment is effective as of its date of issuance.

The amendment makes changes in the Maine Yankee Technical Specifications related to the surveillance requirements and limiting conditions of operation for shock suppressors.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated January 28, 1976, (2) Amendment No. 23 to License No. DPR–36, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Wiscasset Public Library Association, High Street, Wiscasset, Maine.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 22nd day of July 1976.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors Branch No. 4, Division of Operating Reactors.

[FR Doc.76–22903 Filed 8–6–76;8:45 am]

NORTHEAST NUCLEAR ENERGY CO. ET AL.

Issuance of Amendment to Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 16 to Facility Operating License No. DPR–65 issued to Northeast Nuclear Energy Company, The Connecticut Light and Power Company, The Hartford Electric Light Company, and Western Massachusetts Electric Company, which revised Technical Specifications for operation of the Millstone Nuclear Power Station, Unit No. 2, located in the Town of Waterford, Connecticut. The amendment is effective as of the date of issuance.

The amendment modifies the Technical Specifications to increase the Engineered Safety Feature Actuation System Instrumentation Trip Value—Loss of Power, from ≥2912 volts to ≥3700 volts.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated July 29, 1976, (2) Amendment No. 16 to License No. DPR–65, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Waterford Public Library, Rope Ferry Road, Waterford, Connecticut 06385.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555. Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 30th day of July, 1976.

For the Nuclear Regulatory Commission.

GEORGE LEAR,
Chief, Operating Reactors Branch No. 3, Division of Operating Reactors.

V 41 154 AUG 9 76 UMI

[Docket No. 50-206]

SOUTHERN CALIFORNIA EDISON CO. AND SAN DIEGO GAS AND ELECTRIC CO.

Issuance of Amendment to Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 21 to Facility Operating License No. DPR-13, issued to Southern California Edison and San Diego Gas and Electric Company which revised Technical Specifications for operation of the San Onofre Nuclear Generating Station, Unit No. 1, located in San Diego, California. The amendment is effective as of its date of issuance.

This amendment requires operability and surveillance of snubbers necessary for the protection of the reactor coolant system and all other safety related systems and components.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR 51.5(d)(4) an environmental statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated February 4, 1976, (2) Amendment No. 21 to License No. DPR-13, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C. 20555, and at the San Clemente Public Library, 233 Granada Street, San Clemente, California.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 21st day of July, 1976.

For the Nuclear Regulatory Commission.

A. SCHWENCER,
Chief, Operating Reactors Branch No. 1, Division of Operating Reactors.

[Docket No. STN 50-566 and STN 50-567]

TENNESSEE VALLEY AUTHORITY, YELLOW CREEK NUCLEAR PLANT UNITS 1 AND 2

Receipt of Application for Construction Permits and Operating Licenses

The Tennessee Valley Authority, pursuant to section 103 of the Atomic Energy Act of 1954, as amended, filed the remaining portion of its application. This part which consisted of a Safety Analysis Report and general and financial information was accepted for docketing on July 16, 1976, and assigned Docket Nos. STN 50-566 and STN 50-567. Notice of Receipt of the Partial Application for Construction Permits and Operating Licenses was published in the FEDERAL REGISTER under Docket No. P-599-A on November 17, 1975 (40 FR 53324).

The application is for authorization to construct and operate two pressurized water nuclear reactors designated as the Yellow Creek Nuclear Plant on the applicant's site in Tishomingo County, Mississippi. Each reactor is designed for an initial output of 3817 megawatts thermal, with an equivalent net electrical output of approximately 1300 megawatts.

A separate notice will be published on the availability of the environmental report and a Notice of Hearing will also be published separately (at a later date) setting forth the radiological and environmental issues to be considered during the review. A date for submitting Petitions for Leave to Intervene will also be set forth in the Notice of Hearing.

Dated at Bethesda, Maryland, this 2d day of August, 1976.

For the Nuclear Regulatory Commission.

D. B. VASSALLO,
Chief, Light Water Reactors Branch No. 4, Division of Project Management.

[Docket No. 50-271]

VERMONT YANKEE NUCLEAR POWER CORP.

Issuance of Amendment to Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 24 to Facility Operating License No. DPR-28 issued to Vermont Yankee Nuclear Power Corporation which revised Technical Specifications for operation of the Vermont Yankee Nuclear Power Station located near Vernon, Vermont. The amendment is effective as of its date of issuance.

The amendment requires operability and surveillance of shock suppressors (snubbers) required to protect the primary coolant system and all other safety related systems and components.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR § 51.5(d)(4) an environmental statement, negative declaration or environmental impact appraisal need not be prepared in connection with issuance of this amendment.

For further details with respect to this action, see (1) the application for amendment dated January 29, 1976, (2) Amendment No. 24 to License No. DPR-28, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street NW., Washington, D.C. and at the Brooks Memorial Library, 224 Main Street, Brattleboro, Vermont.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 19th day of July 1976.

For the Nuclear Regulatory Commission.

ROBERT W. REID,
Chief, Operating Reactors Branch No. 4, Division of Operating Reactors.

[Docket No. 50-29]

YANKEE ATOMIC ELECTRIC CO.

Issuance of Amendment to Facility Operating License

Notice is hereby given that the U.S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 29 to Facility Operating License No. DPR-3 issued to Yankee Atomic Electric Company (the licensee) which revised Technical Specifications for operation of the Yankee Nuclear Power Station located in Rowe, Massachusetts. The amendment is effective as of its date of issuance.

This amendment requires operability and surveillance of snubbers necessary for the protection of the primary coolant system and all other safety related systems and components.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

For further details with respect to this action, see (1) the application for amendment dated August 18, 1975 and supplement dated January 29, 1976, (2) Amendment No. 29 to Facility Operating License No. DPR-3, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, NW., Washington, D.C., and at the Greenfield Public Library, 402 Main Street, Greenfield, Massachusetts 01581.

A copy of items (2) and (3) may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 22nd day of July 1976.

For the Nuclear Regulatory Commission.

CHARLES M. TRAMMELL,
Acting Chief, Operating Reactors Branch No. 1, Division of Operating Reactors.

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS ENVIRONMENTAL SUBCOMMITTEE

Meeting

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232b.), the ACRS Environmental Subcommittee will meet on August 24 and 25, 1976, in Room 1046, 1717 H St., NW., Washington, DC 20555. The purpose of this meeting is to review:

Revision 1 to Regulatory Guide 1.101, "Emergency Planning for Nuclear Power Plants," and

Proposed Revised Regulatory Guide 8.8, "Information Relevant To Assuring That Occupational Radiation Exposures At Nuclear Power Stations Will Be As Low As Is Reasonably Achievable."

The agenda for the subject meeting shall be as follows:

Tuesday, August 24, 1976, 8:30 a.m. The Subcommittee will meet in closed Executive Session, with any of its consultants who may be present, to exchange opinions and discuss preliminary views and recommendations relating to the above discussion.

Tuesday, August 24, 1976, 9:00 a.m. The Subcommittee will meet with representatives of the NRC Staff and will hold discussions with this group pertinent to the following:

Revision 1 to Regulatory Guide 1.101, "Emergency Planning for Nuclear Power Plants."

Wednesday, August 25, 1976, 8:30 a.m. The Subcommittee will meet in closed Executive Session, with any of its consultants who may be present, to exchange opinions and discuss preliminary views and recommendations relating to the above discussion.

Wednesday, August 25, 1976, 9:00 a.m. The Subcommittee will meet in open session to hear presentations by representatives of the NRC Staff and will hold discussions pertinent to the following:

Proposed Revised Regulatory Guide 8.8, "Information Relevant To Assuring That Occupational Radiation Exposures At Nuclear Stations Will Be As Low As Is Reasonably Achievable."

At the conclusion of the open session at approximately 3:00 P.M. on each day, the Subcommittee will meet in closed session to consider matters related to the above reviews. These sessions will involve an exchange of opinions and discussions of preliminary views and recommendations of Subcommittee members and internal deliberations for the purpose of formulating recommendations to the ACRS.

I have determined, in accordance with subsection 10(d) of Pub. L. 92-463, that it is necessary to conduct the above closed sessions to protect the free interchange of internal views in the final stages of the Subcommittee's deliberative process (5 U.S.C. 552(b)(5)). Separation of factual material from individuals' advice, opinions, and recommendations while closed Executive Sessions are in progress is considered impractical.

Practical considerations may dictate alterations in the above agenda or schedule. The Chairman of the Subcommittee is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the orderly conduct of business, including provisions to carry over an incompleted open session from one day to the next.

With respect to public participation in the open portion of the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda may do so by providing a readily reproducible copy to the Subcommittee at the beginning of the meeting. Comments should be limited to safety related areas within the Committee's purview.

Persons desiring to mail written comments may do so by sending a readily reproducible copy in time for consideration at this meeting. Comments postmarked no later than August 17, 1976 to Mr. R. Muller, ACRS, NRC, Washington, DC 20555 will normally be received in time to be considered at this meeting.

Background information concerning items to be considered at this meeting can be found in documents on file and available for public inspection at the NRC Public Document Room, 1717 H St. NW., Washington, DC 20555.

(b) Those persons wishing to make an oral statement at the meeting should make a written request to do so, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Committee will receive oral statements on topics relevant to the Committee's purview at an appropriate time chosen by the Chairman of the Subcommittee.

(c) Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obained by a prepaid telephone call on August 23, 1976 to the Office of the Executive Director of the Committee (telephone 202/634-1413, Attn: Mr. R. Muller) between 8:15 a.m. and 5 p.m., e.d.t.

(d) Questions may be propounded only by members of the Subcommittee and its consultants.

(e) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session.

(f) Persons with agreements or orders permitting access to proprietary information may attend portions of ACRS meetings where this material is being discussed upon confirmation that such agreements are effective and relate to the material being discussed.

The Executive Director of the ACRS should be informed of such an agreement at least three working days prior to the meeting so that the agreement can be confirmed and a determination can be made regarding the applicability of the agreement to the material that will be discussed during the meeting. Minimum information provided should include information regarding the date of the agreement, the scope of material included in the agreement, the project or projects involved, and the names and titles of the persons signing the agreement. Additional information may be requested to identify the specific agreement involved. A copy of the executed agreement should be provided to Mr. R. Muller, of the ACRS Office, prior to the beginning of the meeting.

(g) A copy of the transcript of the open portion of the meeting will be available for inspection on or after September 1, 1976 at the NRC Public Document Room, 1717 H St., NW., Washington, DC 20555.

Copies of the minutes of the meeting will be made available for inspection at the NRC Public Document Room, 1717 H St., NW., Washington, D.C. 20555 after November 26, 1976. Copies may be obtained upon payment of appropriate charges.

Dated: August 4, 1976.

JOHN C. HOYLE,
Advisory Committee Management Officer.

V 41 154 AUG 9 76 UMI

[Docket No. P-559-A]

COMMONWEALTH EDISON CO., ET AL.

Receipt of Attorney General's Advice and Time for Filing of Petitions To Intervene on Antitrust Matters

The Commission has received, pursuant to section 105c. of the Atomic Energy Act of 1954, as amended, a letter of advice from the Attorney General of the United States, dated July 28, 1976, a copy of which is attached as Appendix "A".

Any person whose interest may be affected by this proceeding may, pursuant to § 2.714 of the Commission's rules of practice, 10 CFR Part 2, file a petition for leave to intervene and request a hearing on the antitrust aspects of the application. Petitions for leave to intervene and requests for hearing shall be filed by September 8, 1976, either (1) by delivery to the NRC Docketing and Service Section at 1717 H Street NW., Washington, D.C., or (2) by mail or telegram addressed to the Secretary, Nuclear Regulatory Commission, Washington, D.C. 20555, ATTN: Docketing and Service Section.

For the Nuclear Regulatory Commission.

JEROME SALTZMAN,
Chief, Antitrust and Indemnity Group, Nuclear Reactor Regulation.

APPENDIX "A"—CARROLL COUNTY STATION UNITS 1 & 2, COMMONWEALTH EDISON COMPANY, INTERSTATE POWER COMPANY, AND IOWA-ILLINOIS GAS AND ELECTRIC COMPANY; NRC DOCKET NO. P-559-A

JULY 28, 1976.

You have requested our advice pursuant to Section 105c of the Atomic Energy Act of 1954, as amended, regarding the above-captioned application.

INTRODUCTION

This is an application to construct two 1120 MW nuclear units at a site in Carroll County, Illinois. The units are to be owned by three companies under a joint venture agreement; the first unit is expected to begin operation in 1984, the second in 1985. Under the agreement, Interstate Power Company will own an 18¼ percent undivided interest, Iowa-Illinois Gas and Electric Company a 15 percent undivided interest and Commonwealth Edison Company the remaining 66⅔ percent undivided interest. Under a companion operating agreement, the project will be operated and maintained by Commonwealth Edison and each party will be entitled to obtain power from the unit in proportion to its ownership interest. The parties propose the joint venture largely because neither Interstate nor Iowa-Illinois alone is of sufficient size to accommodate in its system the large quantities of electricity which can be efficiently generated by a nuclear station. Moreover, neither of these two companies presently has the personnel or experience necessary for the construction and management of such a project.

APPLICANTS

Commonwealth Edison Company is one of the laregst privately-owned electric utilities in the United States. According to the most recent available statistics Commonwealth Edison produces, purchases, transmits, and distributes electricity in a 11,625 square mile area of northern Illinois including Chicago and its suburbs. The population of this territory is presently estimated to exceed 8,000,000. As of December 31, 1974, Commonwealth Edison furnished electric service to 2,728,545 customers and its total generating capacity was 17,067 MW, approximately one-third of which was supplied by three nuclear power stations. At the end of 1974 its total assets were $5,155,734,711, and it reported a net income of $180,044,911. Commonwealth Edison expects its peak load to increase from 13,500 MW for 1976 to 23,780 MW for 1985 and 42,990 MW by 1995. It presently has interconnection agreements with a number of other electric utility companies in its vicinity including Interstate Power Company and Iowa-Illinois Gas and Electric Company.

Interstate Power Company is a privately-owned company engaged in the generation, purchase, transmission, and distribution of electricity in an area of approximately 10,000 square miles in northeast and north central Iowa, southern Minnesota and northwestern Illinois. At the end of 1974 Interstate served a total of 252 communities, the largest of which is Dubuque, Iowa (pop. 63,209). At that time it served 134,920 electric customers.

At the beginning of 1975 Interstate had a total generating capacity of 633 MW none of which was nuclear. It is presently a member of the Mid-Continent Area Power Pool (MAPP), which consists of 12 privately-owned utilities, seven generation and transmission cooperatives, two public power districts, 11 municipalities and the United States Bureau of Reclamation. On December 31, 1974, Interstate had total assets of $240,950,774; its net income for 1974 was $8,440,228. Interstate expects its load to increase from 616 MW for 1976 to 1005MW for 1985 and 1759 MW by 1995.

Iowa-Illinois Gas & Electric Company, also a privately-owned utility, is engaged in generating and distributing electricity (as well as purchasing and distributing natural gas) in parts of Iowa and Illinois. In 1974 the aggregate population of its service area was approximately 570,000. Its most important electric service franchises include the Cities of Davenport, Rock Island, Moline, Fort Dodge and Iowa City. During 1975 Iowa-Illinois had a total generating capacity of 930 MW, of which 405 MW came from the company's interest in the Quad Cities Generating Station, a nuclear facility jointly owned with Commonwealth Edison. Iowa-Illinois also has a number of interconnection agreements with systems in its vicinity. In 1974 Iowa-Illinois' net income was $13,836,064 and its total assets were $398,790,484. In 1976 Iowa-Illinois' peak load was 893 MW; by 1985 it expects this load to increase to 1588 MW, and by 1995 it expects a peak load of 2842 MW.

RESULTS OF ANTITRUST REVIEW

The Department examined the competitive situation and practices of Commonwealth Edison in reviewing that utility's applications for licensing of LaSalle County Units 1 and 2 in 1972 and Byron Station Units 1 and 2 and Braidwood Station Units 1 and 2 in 1974. As a result of our review, Commonwealth Edison agreed to abandon certain practices which had raised antitrust questions, to offer participation in the LaSalle County Units to other systems,[1] and to accept appropriate license conditions—and the need for antitrust hearings on those applications was thereby obviated. See the Department's advice letters of December 20, 1972, 38 F.R. 901 (LaSalle County Units 1 and 2), and March 4, 1974, 39 F.R. 9852 (Byron Station Units 1 and 2 and Braidwood Station Units 1 and 2). No information has come to our attention in the course of the instant review to suggest that an antitrust hearing would now be necessary regarding Commonwealth Edison.

Further, our examination of the information submitted to Interstate and Iowa-Illinois in connection with this application, together with other information relevant to their respective competitive relationships with other electric utilities, disclosed no evidence of an anticompetitive situation or conduct that would warrant an antitrust hearing with regard to these systems.

In view of the above, we conclude that an antitrust hearing will not be necessary in connection with the licensing of these nuclear units.

[1] We have received no information to suggest that any electric systems other than the present applicants have sought the opportunity to participate in the Carroll County Units.

[Docket No. 70-734]

GENERAL ATOMIC CO. (FUEL FABRICATION FACILITY)

Regarding Renewal of License No. SNM-696

The Nuclear Regulatory Commission (The Commission) is considering the renewal of Special Nuclear Material License SNM-696 for the continued operation of the General Atomic Company's Fuel Fabrication Facility at San Diego, California.

The Commission's Division of Fuel Cycle and Material Safety has prepared an environmental impact appraisal for the proposed renewal of License No. SNM-696. On the basis of this appraisal, the Commission has concluded that an environmental impact statement for this particular license renewal is not warranted because there will be no significant environmental impact attributable to the proposed action. The environmental impact appraisal (NR-FM-008) is available for public inspection at the Commission's Public Document Room at 1717 H Street NW., Washington, D.C. A copy may be obtained upon request addressed to the U.S. Nuclear Regulatory Commission, Washington, D.C., Attention: Director, Division of Fuel Cycle and Material Safety.

Dated at Bethesda, Maryland, this 30th day of July, 1976.

For the Nuclear Regulatory Commission.

LELAND C. ROUSE,
Chief, Fuel Processing and Fabrication Branch, Division of Fuel Cycle and Material Safety.

[FR Doc.76-23156 Filed 8-6-76;8:45 am]

ADVISORY COMMITTEE ON REACTOR SAFEGUARDS SUBCOMMITTEE ON THE MONTAGUE NUCLEAR POWER STATION, UNITS 1 AND 2

Meeting

In accordance with the purposes of sections 29 and 182b. of the Atomic Energy Act (42 U.S.C. 2039, 2232 b.), the ACRS Subcommittee on the Montague Nuclear Power Station, Units 1 and 2 will meet on

August 26 and 27, 1976 at the Gill Montague School in Turners Falls, Massachusetts.

The purpose of this meeting is to review the application of the Northeast Nuclear Energy Company for a construction permit.

The agenda for subject meeting shall be as follows:

Thursday, August 26, 1976, 2:00 p.m.—The Subcommitte will meet in closed Executive Session, with any of its consultants who may be present, to exchange opinions and discuss preliminary views and recommendations relating to the above review.

Thursday, August 26, 1976, 2:30 p.m. until the conclusion of business, and Friday, August 27, 1976, 8:30 a.m. until the conclusion of business—The Subcommittee will meet in open session to hear presentations by representatives of the NRC Staff, the Northeast Nuclear Energy Company, and their consultants, and will hold discussions with these groups pertinent to its review.

At the conclusion of the open session, the Subcommittee may caucus in a brief, closed session to determine whether the matters identified in the initial closed session have been adequately covered and whether the project is ready for review by the full Committee. During the session Subcommittee members and consultants will discuss their opinions and recommendations on these matters. Upon conclusion of this caucus, the Subcommittee may meet again in brief open-session to announce its determination.

In addition to these closed deliberative sessions, it may be necessary for the Subcommittee to hold one or more closed sessions with the NRC Staff and Applicant for the purpose of discussing confidential proprietary information.

I have determined, in accordance with subsection 10(d) of Pub. L. 92-463, that it is necessary to conduct the above closed sessions to protect the free interchange of internal views in the final stages of the Subcommittee's deliberative process (5 U.S.C. 552(b)(5)) and to protect proprietary information (5 U.S.C. 552(b)(4)). Separation of factual material from individuals' advice, opinions, and recommendations while closed Executive Sessions are in progress is considered impractical.

Practical considerations may dictate alterations in the above agenda or schedule. The Chairman of the Subcommittee is empowered to conduct the meeting in a manner that, in his judgment, will facilitate the orderly conduct of business, including provisions to carry over an incompleted open session from one day to the next.

With respect to public participation in the open portion of the meeting, the following requirements shall apply:

(a) Persons wishing to submit written statements regarding the agenda may do so by providing 15 readily reproducible copies to the Subcommittee at the beginning of the meeting. Comments should be limited to safety related areas within the Committee's purview.

Persons desiring to mail written comments may do so by sending a readily reproducible copy thereof in time for consideration at this meeting. Comments postmarked no later than August 19, 1976 to Mr. Richard Savio, ACRS, NRC, Washington, D.C. 20555 will normally be received in time to be considered at this meeting.

Background information concerning items to be considered at this meeting can be found in documents on file and available for public inspection at the NRC Public Document Room, 1717 H St. NW., Washington, D.C. 20555 and at the Carnegie Library, Avenue A, Turner Falls, MA 01376.

(b) Those persons wishing to make an oral statement at the meeting should make a written request to do so, identifying the topics and desired presentation time so that appropriate arrangements can be made. The Committee will receive oral statements on topics relevant to the Committee's purview at an appropriate time chosen by the Chairman of the Subcommittee.

(c) Further information regarding topics to be discussed, whether the meeting has been cancelled or rescheduled, the Chairman's ruling on requests for the opportunity to present oral statements and the time allotted therefor can be obtained by a prepaid telephone call on August 25, 1976 to the Office of the Executive Director of the Committee (telephone 202/634-1371, Attn: Mr. Richard Savio) between 8:15 a.m. and 5 p.m., e.d.t.

(d) Questions may be propounded only by members of the Subcommittee and its consultants.

(e) The use of still, motion picture, and television cameras, the physical installation and presence of which will not interfere with the conduct of the meeting, will be permitted both before and after the meeting and during any recess. The use of such equipment will not, however, be allowed while the meeting is in session.

(f) Persons with agreements or orders permitting access to proprietary information may attend portions of ACRS meetings where this material is being discussed upon confirmation that such agreements are effective and relate to the material being discussed.

The Executive Director of the ACRS should be informed of such an agreement at least three working days prior to the meeting so that the agreement can be confirmed and a determination can be made regarding the applicability of the agreement to the material that will be discussed during the meeting. Minimum information provided should include information regarding the date of the agreement, the scope of material included in the agreement, the project or projects involved, and the names and titles of the persons signing the agreement. Additional information may be requested to identify the specific agreement involved. A copy of the executed agreement should be provided to Mr. Richard Savio of the ACRS Office, prior to the beginning of the meeting.

(g) A copy of the transcript of the open portion of the meeting will be available for inspection on or after September 2, 1976 at the NRC Public Document Room, 1717 H St. NW., Washington, D.C. 20555 and at the Carnegie Library, Avenue A, Turner Falls, MA 01376.

Copies of the minutes of the meeting will be made available for inspection at the NRC Public Document Room, 1717 H St. NW., Washington, D.C. 20555 after November 28, 1976. Copies may be obtained upon payment of appropriate charges.

Dated: August 5, 1976.

JOHN C. HOYLE,
Advisory Committee Management Officer.

OFFICE OF MANAGEMENT AND BUDGET

Office of Federal Procurement Policy

EXECUTIVE BRANCH POSITION ON COMMISSION ON GOVERNMENT PROCUREMENT

Recommendations C-1 Thru C-12, Major System Acquisitions

Notice is given that an executive branch position has been reached on the Commission on Government Procurement (COGP) recommendations C-1 through C-12.

OMB Circular No. A-109, Major System Acquisitions, was issued on April 5, 1976, following a review by Congress. This policy will effect reforms throughout the executive branch to reduce cost overruns and to diminish the controversy of the past two decades on whether new systems are needed.

The main thrust of the policy requires:

Top level management attention to the determination of agency mission needs and goals.

Early direction of research and development efforts to mission needs and goals.

Improved opportunities for innovative private sector contributions to national needs.

Avoidance of premature commitments to full-scale development and production.

Early communication with Congress in the acquisition process by relating major system acquisitions to agency mission needs and goals.

OMB Circular No. A-109 is consistent with the unanimous recommendations C-1 through C-12, of the Commission on Government Procurement. Therefore, C-1 through C-12 are considered closed out.

HUGH E. WITT,
Administrator.

SECURITIES AND EXCHANGE COMMISSION

[Release No. 19634; 70-5872]

COLUMBIA GAS SYSTEM, INC., ET AL.

Application for Exemption Under Rule 48 (b) for Loans and Advances Made to Employees for Moving Expenses Related to Transfers Within a Holding Company System

JULY 30, 1976.

In the Matter of The Columbia Gas System, Inc., 20 Montchanin Road, Wilmington, Delaware 19807, Columbia Gas Transmission Corporation, 1700 MacCorkle Avenue, S.E., Charleston, West Virginia 25314, Columbia Gas of Ohio, Inc., Columbia Gas of West Virginia, Inc. Columbia Gas of Kentucky, Inc., Columbia Gas of Virginia, Inc., Columbia Gas of Pennsylvania, Inc., Columbia Gas of New York, Inc., Columbia Gas of Maryland, Inc., 99 North Front Street, Columbus, Ohio 43215, Columbia Hyrocarbon Corporation, The Inland Gas Company, Inc., 340 17th Street, Ashland, Kentucky 41101, Columbia Gulf Transmission Company, 3805 West Alabama Avenue, Houston, Texas 77027, Columbia Alaskan Gas Transmission Corporation, Columbia LNG Corporation, Columbia Gas Development of Canada Ltd., Columbia Coal Gasification Corporation, Columbia Gas Development Corporation, Columbia Gas System Service Corporation, 20 Montchanin Road, Wilmington, Delaware 19807.

Notice is hereby given that The Columbia Gas System, Inc. ("Columbia"), a registered holding company, and its above-named wholly-owned subsidiary companies have filed a declaration and an amendment thereto with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act") designating Sections 3(d), 9 and 20 of the Act and Rule 48(b) promulgated thereunder as applicable to the following proposed transaction. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transaction.

Columbia and its subsidiaries have adopted a Transfer of Personnel Policy ("Policy") in making home purchase loans to its employees. The Policy permits companies within the System to make advances to enable a transferred employee who is selling a residence in the location from which he was transferred to meet obligations such as earnest money, down payments, closing costs and other obligations under his purchase contract for the new residence. Such advances will be evidenced by the employee's promissory note which must be paid in full promptly after the sale of the residence at the old location. The Policy also provides that loans may be made to transferred employees in instances in which the employee has received insufficient funds from the sale of his residence at the old location to enable him to purchase a new residence or where the employee previously lived in a rented residence and has insufficient funds to enable him to proceed with the purchase of a new residence. In these situations System companies may make loans to an employee to enable him to proceed with the purchase of a new residence. The loan is to be evidenced by the joint and several note of the employee and his spouse; is to bear interest at a rate ½% above the New York prime rate in effect at the time the loan is granted, or at the legal limit for such a loan in the state in which the loan is granted, whichever is lower; is to be payable by payroll deductions over a period not to exceed five years, and in any event is to become due and payable in full upon termination of employment for any reason.

Columbia states that the amounts loaned or advanced under this policy may sometimes exceed the sum of $10,000 permitted by Rule 48(b)(2) but that such loans are in addition to the first mortgage financing incident to the acquisition of the residence and do not meet the exception contained in that rule. In support of its request for authorization to make loans or advances in excess of $10,000 Columbia states that many homes in the service area of the system range upward in price from $50,000 and that transferred employees can obtain mortgage financing for only 50% to 75% of the purchase price. The balance must then be paid in cash on closing. Thus, in many cases, especially those in which the employee did not own a home in the old location but also in instances in which the equity sum derived from the sale of the old home is less than the amount required for a cash down payment on the new home, the cash payment required on closing will exceed $10,000. No fixed loan limits exists under the policy, rather, a committee of three senior officers exercises its judgment as to the reasonableness of the loan request in each case, taking into consideration the employee's position with Columbia, his salary and his length of service. In order to facilitate the transfer of employees within the system Columbia feels that it must have the authority to make loans or advances to transferred employees in excess of $10,000. Accordingly, Columbia and its subsidiaries propose that they be excepted from the requirement of Rule 48(b)(2)(iii), that personal loans or advances to employees in an aggregate amount of over $10,000 be secured by a first mortgage on a residence occupied by the employee, provided such loans or advances are made pursuant to the terms of the Policy.

The Columbia System further proposes to file with the Commission, subsequent to the making of any loan exceeding $10,000 to any system employee, a certificate under Rule 24 stating the identity of the employee and the amount of the loan. It is proposed that such certificates under Rule 24 will be filed on a quarterly basis.

A statement of fees and expenses to be incurred in connection with the proposed transaction will be filed by amendment. It is stated that no State commission and no Federal commission, other than this Commission has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than August 23, 1976, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by the filing which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarants at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as amended or as it may be further amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 9385; 811-885]

FOUNDATION STOCK FUND, INC.

Proposal To Terminate Registration Pursuant to Section 8(f) of the Act

JULY 30, 1976.

In the Matter of Foundation Stock Fund, Inc., 100 North Jefferson Avenue, St. Louis, Missouri 63103.

Notice is hereby given that the Commission proposes, pursuant to Section 8(f) of the Investment Company Act of 1940 (the "Act"), to declare, by order on its own motion, that Foundation Stock Fund, Inc. (the "Fund"), registered under the Act as a diversified, open-end management investment company, has ceased to be an investment company as defined in the Act.

The Fund registered under the Act on June 3, 1959. Information in the Commission's files indicates that the Fund's shareholders, at a special meeting of shareholders on November 18, 1975, adopted an Agreement and Plan of Reorganization pursuant to which substantially all the assets of the Fund were transferred to Eaton & Howard Special Fund ("Special") on December 17, 1975. Shares of Special were issued to the Fund's shareholders on a pro-rata basis, shortly thereafter. On May 17, 1976, the Fund received a Certificate of Dissolution from the State of Maryland.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, on its own motion or upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order, which may be made upon appropriate conditions if necessary for the protection of investors, and upon taking effect of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than August 24, 1976, at 5:30 p.m., submit to the Commission in writing a request for a hearing on the matter accompanied by a statement as to the nature of his interest, the reason for such request and the issues, if any, of fact or law proposed to be controverted, or he may request that he be notified if the Commission should order a hearing thereon. Any such communication should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon the Fund at the address stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule 0-5 of the Rules and Regulations promulgated under the Act, an order disposing of the matter will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Rel. No. 9383; 811-1557]

LINCOLN FUND, INC.

Filing of Application for Order Pursuant to Section 8(f) of the Act Declaring That Company Has Ceased To Be an Investment Company

JULY 30, 1976.

In the Matter of The Lincoln Fund, Inc., 300 Main Street, New Britain, Connecticut 06051.

Notice is hereby given that The Lincoln Fund, Inc. ("Applicant"), registered under the Investment Company Act of 1940 ("Act") as an open-end, non-diversified management company, filed an application on April 12, 1976, and an amendment thereto on June 30, 1976, pursuant to Section 8(f) of the Act for an order of the Commission declaring that it has ceased to be an investment company as defined in the Act. All interested persons are referred to the application on file with the Commission for a statement of the representations contained therein which are summarized below.

Applicant represents that it was incorporated under the laws of the State of Delaware on November 25, 1960, and operated as an investment club until November 1, 1967, when it registered under the Act; that its outstanding securities are beneficially owned by less than 100 persons and that it is not making and does not presently propose to make a public offering of its securities; and that its current assets consist of $29,784 cash and securities valued at $24,862 on March 30, 1976.

Applicant further represents that, pursuant to a plan of liquidation and resolution of dissolution unanimously approved by its shareholders on March 15, 1976, Applicant: (1) intends to establish a $3,000 reserve of the fund's assets to defray liquidation costs and other appropriate fund liabilities and to distribute the balance of such assets, pro rata, among shareholders of record as of March 15, 1976; and (2) has filed a certificate of dissolution with the Secretary of the State of Delaware on March 12, 1976.

Section 8(f) of the Act provides, in pertinent part, that when the Commission, upon application, finds that a registered investment company has ceased to be an investment company, it shall so declare by order and, upon the effectiveness of such order, the registration of such company shall cease to be in effect.

Notice is further given that any interested person may, not later than August 24, 1976, at 5:30 p.m., submit to the Commission in writing a request for a hearing on this matter accompanied by a statement as to the nature of his interest, the reason for such request, and the issues, if any, of fact or law proposed to be converted, or he may request that he be notified if the Commission shall order a hearing thereon. Any such communication shall be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request shall be served personally or by mail upon Applicant at the address stated above. Proof of such service (by affidavit, or in case of an attorney-at-law, by certificate) shall be filed contemporaneously with the request. As provided by Rule O-5 of the Rules and Regulations promulgated under the Act, an order disposing of the application will be issued as of course following said date unless the Commission thereafter orders a hearing upon request or upon the Commission's own motion. Persons who request a hearing, or advice as to whether a hearing is ordered, will receive any notices and orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Investment Management, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.76-22984 Filed 8-6-76;8:45 am]

[Rel. No. 19635; 70-5880]

LOUISIANA POWER & LIGHT CO.

Proposal To Sell Certain Transmission Facilities

AUGUST 2, 1976.

In the Matter of LOUISIANA POWER & LIGHT COMPANY, 142 Delaronde Street, New Orleans, Louisiana 70174.

Notice is hereby given that Louisiana Power & Light Company ("LP&L"), an electric utility subsidiary of Middle South Utilities, Inc., a registered holding company, has filed a declaration with this Commission pursuant to the Public Utility Holding Company Act of 1935 ("Act"), designating Section 12(d) of the Act and Rule 44 promulgated thereunder as applicable to the proposed transaction. All interested persons are referred to the declaration, which is summarized below, for a complete statement of the proposed transaction.

In 1965 Union Carbide Corporation ("Union Carbide") completed construction of, and placed in operation a large petro-chemical plant on a site located at Taft in St. Charles Parish, Louisiana. In order to provide the 230 KV electric service required for this plant, LP&L acquired from Union Carbide certain right of way on the plant site for the necessary 230 KV electric lines and a portion of land for use as a 230 KV switching station site and access road. LP&L then constructed and placed in operation such switching station, access road and electric lines. Union Carbide is now engaged in an expansion of its petro-chemical plant. In connection with this plant expansion, Union Carbide and LP&L have agreed that the point of delivery of service and switching station will be relocated to a position substantially farther to the rear of the plant site. In order to improve the reliability of its in-plant electric facilities, Union Carbide proposes to purchase LP&L's 230 KV transmission line together with almost all of LP&L's existing switching station facilities. LP&L and Union Carbide have agreed on a price of $327,515 for the switching station facilities and $197,220 for the transmission line. These prices represent, in both cases, the estimated current replacement cost less depreciation. It is further proposed that the site of the switching station facilities and access road be sold back to Union Carbide by LP&L for $3,383, which is the price which the site was acquired in 1965 and is also the price for which Union Carbide is to sell and convey to LP&L in fee the site for the new switching station in connection with the new point of delivery together with fee title and/or an exclusive servitude to the strip of land which LP&L is to use for a new access road. These items of $327,515, $197,220, and $3,383 produce an aggregate price of $528,118. It is stated that this represents an advantageous price for utility assets which, if not sold to Union Carbide, could only be removed and salvaged, resulting in the realization by LP&L of substantially lesser proceeds.

It is further stated that the existing 230 KV transmission line is to be re-

V 41 154 AUG 9 76 UMI

moved, and in connection with such removal, for which LP&L is to be paid $53,009 cash, representing the depreciated installed cost of the transmission line being removed less salvage and plus the cost of labor to effect the removal, LP&L has agreed that it would not remove but would abandon to Union Carbide, to be retained by it as its own property, the existing foundations for the transmission line which is to be removed. The items of existing switching station facilities which UCC cannot use and is not purchasing are relatively insignificant, and will be removed and salvaged by the Company.

The facilities to be sold are installed at Union Carbide's plant site and are necessarily usable as operating facilities only at that location. Accordingly there is no possibility of a sale of the facilities to any other person.

Since the sale of the facilities cannot be consummated until the replacement facilities are completed and are ready to be energized, and since construction delays are not uncommon, LP&L further requests that the sixty day period provided by Rule 24(c)(i), within which a transaction must be carried out after a declaration relating thereto is permitted to become effective, be extended to one hundred twenty days with respect to the proposed transaction.

The fees and expenses to be incurred in connection with the proposed transaction are estimated at $4,500, including legal fees of $2,500. It is stated that no State commission and no Federal commission, other than this Commission, has jurisdiction over the proposed transaction.

Notice is further given that any interested person may, not later than August 26, 1976, request in writing that a hearing be held on such matter, stating the nature of his interest, the reasons for such request, and the issues of fact or law raised by the filing which he desires to controvert; or he may request that he be notified if the Commission should order a hearing thereon. Any such request should be addressed: Secretary, Securities and Exchange Commission, Washington, D.C. 20549. A copy of such request should be served personally or by mail upon the declarants at the above-stated address, and proof of service (by affidavit or, in case of an attorney at law, by certificate) should be filed with the request. At any time after said date, the declaration, as filed or as it may be amended, may be permitted to become effective as provided in Rule 23 of the General Rules and Regulations promulgated under the Act, or the Commission may grant exemption from such rules as provided in Rules 20(a) and 100 thereof or take such other action as it may deem appropriate. Persons who request a hearing or advice as to whether a hearing is ordered will receive any notices or orders issued in this matter, including the date of the hearing (if ordered) and any postponements thereof.

For the Commission, by the Division of Corporate Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[Release No. 34-12681; File No. SR-PSD-76-2]

PACIFIC SECURITIES DEPOSITORY TRUST CO.

Self-Regulatory Organizations

Pursuant to section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975), notice is hereby given that on July 15, 1976, the above-mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

Statement of the Terms of Substance of the Proposed Rule Change

The proposed rule changes are amendments to the Articles of Incorporation and By-Laws of PSDTC. The amendments increase the size of the Board of Directors and permit payment of fees to directors.

Statement of Basis and Purpose

The basis and purpose of the foregoing proposed rule change is as follows:

The purpose of the proposed rule changes is to expand the Board of Directors in order to provide wider banking and securities industry representation and to permit compensation of outside directors for contributions of time and effort at meetings of the Board of Directors.

The proposed rule changes providing for expansion of the Board of Directors is intended to bring additional expertise to management and, as such, will enhance PSDTC's capability for protection of investors commensurate with the public interest.

Comments were not solicited with respect to the proposed rule changes.

PSDTC is of the opinion that the proposed rule change will not impose any burden on competition.

The foregoing rule change has become effective, pursuant to Section 19(b)(3) of the Securities Exchange Act of 1934. At any time within sixty days of the filing of such proposed rule change, the Commission may summarily abroqate such rule change if it appears to the Commission that such action is necessary or appropriate in the public interest, for the protection of investors, or otherwise in furtherance of the purposes of the Securities Exchange Act of 1934.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted within 21 days of the date of this publication.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

AUGUST 2, 1976.

TEXT OF PROPOSED RULE CHANGE

Acting pursuant to Article V, Section 1 of the By-Laws of the Pacific Securities Depository Trust Company (PSDTC), the Board of Directors of PSDTC has amended the Articles of Incorporation and the By-Laws of PSDTC to allow for an increase to the number of directors and to permit payment of fees to directors.

The changes to the PSDTC By-Laws and Articles of Incorporation are as follows:

BY-LAWS

"Section 2.2 *Number and Election.* The Board of Directors (hereinafter sometimes referred to as the 'Board') shall consist of not less than nine or more than twelve directors, elected as provided in Section 1.7 of these by-laws at the annual meeting of stockholders. The exact number of directors shall be ten, until changed by an amendment of this Section 2.2 adopted either by the stockholders or by the Board of Directors of the corporation. Each director shall be elected to hold office until the next annual meeting and until his successor shall have been elected and qualified or until his death, resignation, disqualification or removal."

* * * * *

"Section 2.7 *Compensation of Directors.* Directors may receive, in addition to personal expenses incurred in their capacities as directors, reasonable compensation, as fixed by the Board of Directors, for services rendered to the Corporation."

ARTICLES OF INCORPORATION

Article V. "(a) The number of directors of this corporation shall be not less than nine nor more than twelve."

[Rel. No. 12675; SR-PSE-76-18]

PACIFIC STOCK EXCHANGE, INC.

Order Approving Proposed Rule Change

JULY 30, 1976.

In the Matter of Pacific Stock Exchange, Inc., 301 Pine Street, San Francisco 94104.

On June 14, 1976, the Pacific Stock Exchange, Inc. filed with the Commission, pursuant to Section 19(b) of the

Securities Exchange Act of 1934 (the "Act"), as amended by the Securities Act Amendments of 1975, and Rule 19b-4 thereunder, copies of a proposed rule change. The rule change revises Sections 1 and 2 of Rule IX regarding the Exchange's procedures relative to the purchase and sale of memberships on the Exchange.

Notice of the proposed rule change together with the terms of substance of the proposed rule change was given by publication of a Commission Release (Securities Exchange Act Release No. 12557, (June 18, 1976)) and by publication in the FEDERAL REGISTER (41 Fed. Reg. 26289 (June 25, 1976)).

The Commission finds that the proposed rule change is consistent with the requirements of the Act and the rules and regulations thereunder applicable to national securities exchanges, and in particular, the requirements of Section 6 and the rules and regulations thereunder.

It is therefore ordered, pursuant to Section 19(b)(2) of the Act, that the proposed rule change filed with the Commission on June 14, 1976, be, and it hereby is, approved.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

GEORGE A. FITZSIMMONS,
Secretary.

[FR Doc.76-22983 Filed 8-6-76;8:45 am]

[Rel. No. 34-12682; File No. SR-NASD-76-7]

NATIONAL ASSOCIATION OF SECURITIES DEALERS, INC.

Proposed Change

Pursuant to Section 19(b)(1) of the Securities Exchange Act of 1934, 15 U.S.C. 78s(b)(1), as amended by Pub. L. No. 94-29, 16 (June 4, 1975) notice is hereby given on July 28, 1976 the above mentioned self-regulatory organization filed with the Securities and Exchange Commission a proposed rule change as follows:

NASD's Statement of the Terms of Substance of the Rule Change

1.(a) *Text of Proposed Rule Change*

The following are the full texts of (a) the proposed amendment to the Policy of the Board of Governors concerning Fair Dealing With Customers under Article III, Section 2 of the Rules of Fair Practice of the National Association of Securities Dealers, Inc. and (b) the proposed amendment to the Interpretation of the Board of Governors With Respect to Review of Corporate Financing, Article III, Section 1 of the Rules of Fair Practice, concerning Issuer Reserved or Directed Securities.

FAIR DEALING WITH CUSTOMERS

(NASD Manual pp. 2051-2053) (Introductory Paragraphs and Numbered Paragraphs 1-5 Unchanged).

6. *Improper Recommending to Customers Purchases of Speculative New Issues of Securities*

Recommending to customers the purchase of securities regardless of the investment merit of such securities, the financial ability of a customer to complete the transaction, or by improper sales practices. Since each customer, regardless of his financial or market sophistication is entitled to rely on the implied representation made by a member or a person associated therewith that he will be treated fairly, particular care must be taken in recommending to customers the purchase of new issues, especially those securities issued by companies going public for the first time in a speculative market, to insure that such recommendations are not violative of the Association's suitability rule.

Interpretation of the Board of Governors—

REVIEW OF CORPORATE FINANCING ISSUER RESERVED OR DIRECTED SECURITIES

(NASD Manual pp. 2030-2031)

[While no exact limitations on company reserved or directed securities are used as guidelines by the Association, the number of such shares shall be reasonable in amount under the prevailing circumstances, shall bear a reasonable relationship to the total number of shares being offered publicly at that time, and shall be reserved only for those persons who are directly related to the conduct of the issuer's business. The contractual purchase commitment for any company directed stock must, however, be made by the designated recipients by the close of business on the business day following the effective date of the offering and payment therefor must be made in accordance with established requirements. Securities directed to persons covered by the Association's Interpretation With Respect To "Free-Riding and Withholding" must be disclosed to the Association at the time of filing the required documents with it. Such disclosure in no way relieves such persons from the provisions of that Interpretation.]

The failure to make a bona fide distribution of an offering of securities to the public can be a factor in artificially stimulating the price of such an offering. Therefore, in order to assure that there will be an adequate number of securities of an initial offering for purchase by the public customers of a member, a member shall not solicit or accept any instructions from an issuer to reserve or direct in excess of 5% of the number of securities being offered. In no event shall such reserved or directed securities be offered to other than bona fide officers, directors and employees of the issuer. Additionally, the contractual purchase commitment for any issuer directed securities must be made by the designated persons by the close of business on the business day following the effective date of the offering and payment therefor must be made in accordance with the established requirements. No more than 5 business days shall be allowed for the contractual purchase commitment on Regulation A offerings or any other offering where circulation to the prospective customers of an offering circular is prohibited prior to the issue being declared effective.

2. *Procedures of Self-Regulation Organization*

The proposed amendments were recommended to the Board of Governors of the Association by its Committee on Corporate Financing and were approved for circulation and comment by the full Board at its March 1975 meeting. These proposals, along with a proposed new statement of policy on due diligence, an amendment to an existing Rule of Fair Practice and a proposed new Rule of Fair Practice, were circulated to the membership for comment on April 25, 1975 (NASD Release No. 75-33). Upon the expiration of the comment period the appropriate changes were made by the originating Committee and the revised proposals were reviewed by the full Board at its September 1975 and May 1976 meetings and approved. The authority granting the Board power to adopt and approve Interpretations and Statements of Policy with regard to the Rules of Fair Practice is set forth in Article VII, Section 3 of the Association's Certificate of Incorporation By-Laws.

3. *Purpose of the Proposed Rule Change*

The proposed amendment to the existing Policy of the Board of Governors concerning Fair Dealing With Customers would add a new paragraph (number 6) to existing paragraphs 1-5 to serve as a guide for members regarding fair dealing with their customers when recommending the purchase of securities which are part of a distribution of an initial issue to the public. The purpose of this paragraph is to remind members of their responsibility to insure that any such purchase recommendations are not violative of the Association's suitability rule. Adoption of a statement of policy approach in this area rather than an amendment to an existing rule leaves the judgment of determining the suitability of a given offering for a particular investor in the hands of the broker/dealer, as is the case with any security, but emphasizes his responsibility to see that an investment is indeed suitable for each customer making a purchase.

The proposed amendment to the existing Interpretation of the Board of Governors—Review of Corporate Financing concerning Issuer Reserved or Directed Securities described here differs from that which was originally proposed to the membership. The original amendment would have prohibited a member from soliciting or accepting instructions from an issuer to reserve or direct any securities to a specified person or class of persons, including persons related to the issuer's business. This proposal was subsequently modified to prohibit the reserving or directing of securities to in-

V 41 154 AUG 9 76 UMI

dividuals who are not bona fide officers, directors or employees of the issuer and in an amount in excess of 5% of the offering. The limiting of these securities to a restricted group which has a direct interest in the company and its future would assist in preventing artificial stimulation of the price of an initial offering, so-called "free-rides," by some company favored individuals and assure that there will be more shares of an initial public offering of securities available for purchase by the public. The limitation of 5% on directed securities also serves as a deterrent to free-rides in that it limits the availability of the securities for such purposes. The Board believes the limitation is not unduly restrictive in that other means are available, such as employee option plans, through which employees can acquire securities of the issuer-employer if they so desire.

The proposed amendmnet to the Policy of the Board of Governors concerning Fair Dealing With Customers requires that all NASD member firms insure that in any recommendations to customers of purchases of securities which are part of an initial issue, by a speculative or promotional issuer or otherwise, emphasis is placed on the *suitability* of that investment for each of the customers involved. This proposal serves as an additional reminder to member firms of their responsibility to insure that any purchase recommendations are not violative of the Association's suitability rule.

The proposed amendment to the Interpretation of the Board of Governors concerning Issuer Reserved or Directed Securities helps insure a *bona fide distribution* in any new public issue by preventing an issuer from requesting that a member firm reserve shares from a proposed public offering for sale to other than its bona fide employees, officers and directors. The Board believes that the use of this procedure will contribute to a more orderly aftermarket since it appears that non-related issuer recipients of directed shares often immediately resell them in the aftermarket if there is an increase in price rather than hold them for long-term investment.

4. *Basis Under The Act For Proposed Rule Change*

Section 15A(b)(2) of the Securities Exchange Act of 1934 provides that an Association of brokers and dealers shall not be registered as a national securities association unless the Commission determines that its rules provide it with the capacity to carry out the purposes of the Act, to enforce compliance by its members and persons associated with its members with the Act, and the rules and regulations thereunder, and to protect investors and the public interest. In addition, three letters dated July 26, 1972 from them Chairman of the Commission, William J. Casey, requested that the Association consider establishing standards for new public issues in the areas of due diligence, suitability and the components of a bona fide initial offering. The requests were prompted by the Commission's study on the "Hot Issue Securities Markets." These proposals have been formulated for the most part with a view toward the Association's responsibilities under 15A(b) and in response to Chairman Casey's requests. Other information pertinent to the "Hot Issue Securities Markets" study and its findings is contained in SEC Release No. 33-5275.

5. *Comments Received on Proposals in Release #75-33*

Amendment to the Policy of the Board of Governors Concerning Fair Dealing With Customers.

The only comments received on this proposal came from the Securities Industry Association and the City Bar Association. The Securities Industry Association questioned the necessity for any suitability statement with respect to underwritings since:

> Section 2 of the Rules of Fair Practice covers "all" securities and the existing Statement of Policy of the Board of Governors Concerning Fair Dealing With Customers already covers the recommendation of speculative low-priced securities.

Its comment also refutes the applicability of the proposal to other than initial public offerings and questions the NASD's apparent attempt to rule out as elements of a defense the customer's financial and market sophistication.

The City Bar Association requests that the text of the proposal be clarified so as to "confine it to the investment merit of new issues and not attempt to deal with the financial ability of a customer to complete the transaction or to improper sales practices." It offers the following in place of the current proposal:

6. *Improper Recommending to Customers of Speculative New Issues of Securities*

> Recommending to customers the purchase of securities regardless of the investment merit of such securities. Since each customer, regardless of his financial or market sophistication, is entitled to rely on the implied representation made by a member or a person associated therewith that he will be treated fairly, particular care must be taken in recommending to customers the purchase of new issues, especially speculative new issues, to insure that such recommendations are not violative of the Association's suitability rule.

Amendment to "Review of Corporate Financing" Interpretation of the Board of Governors Concerning Issuer Reserved or Directed Securities

Among the five comments received on this proposal was one from the Securities Industry Association, one from the City Bar Association, one from a law firm and two from member firms.

The Securities Industry Association feels that "there appears to be no compelling reason to alter existing policy [10% directed stock] in this area" due to the fact that the immediate resale of directed stock, "rather than stimulating the price of the stock, presumably contributes to a more orderly market by increasing the float and thereby lessening precipirous increases in price."

The City Bar Association notes that the justification for the proposed amendment, as contained in the background discussion section of the notice, appears to be based on the assumption that the portion of the offering which is issuer directed is not required to be disclosed in the prospectus and points out that such an assumption is incorrect based on the requirements of Item 2 of Form S-1. Also it feels the present 10% limitation would serve to "in all but the most extreme cases avoid the problem of an inadequate public supply of securities resulting from employee purchases" and that any immediate resale of directed shares "should not contribute to the small public supply problem." At a minimum, it feels the Board should consider revising its proposal to add that "issuer may, concurrently with a public offering and subject to present Association limitations and SEC disclosure requirements, sell securities directly to their employees and business associate without underwriter assistance."

The law firm feels that there should be no change in the current Association policy of allowing an issuer to direct 10% of an issue because it is "a legitimate objective of issuer, particularly issuers going public, to make it possible for employees, customers, and suppliers to acquire stock in connection with the distribution." Further, "stock option plans are not available to sell stock to valued customers and suppliers and generally do not reach all employees."

Of the two member firms commenting on the proposal, one is concerned that even though the language of the proposal makes it clear that friends, relatives, employees, customers and suppliers of an issuer are not entirely barred from purchasing a new issue as long as they do so in the same way as any other member of the public, "no underwriter of sound mind will knowingly accept an order from such a class for fear of tainting the entire offering." This member suggests that the following be added to help clarify the intentions of the proposal:

> Referral of an indication of interest to an underwriter by an issuer shall not be construed as a reservation or direction under the above policy as long as such referral receives the same consideration as any other indication of interest from a new account would receive.

The other member (a sole proprietor) notes that since the proposal does not apply to situations prior to the initial public offering, the Rule should be clarified so as to exclude events such as preincorporation, reorganization subscriptions, etc. from the concept of 'Issuer Reserved or Directed Securities.'

6. *Burden on Competition*

It is the position of the National Association of Securities Dealers, Inc., that the proposed rule change imposes no burden on competition.

Within 35 days of the date of publication of this notice in the FEDERAL REGISTER, or within such longer period (i) as the Commission may designate up to ninety (90) days of such date if it finds such longer period to be appropriate and

publishes its reasons for so finding or (ii) as to which the above-mentioned self-regulatory organization consents, the Commission will: (a) by order approve such proposed rule change, or (b) institute proceedings to determine whether the proposed rule change should be disapproved.

Interested persons are invited to submit written data, views and arguments concerning the foregoing. Persons desiring to make written submissions should file six (6) copies thereof with the Secretary of the Commission, Securities and Exchange Commission, Washington, D.C. 20549. Copies of the filing with respect to the foregoing and of all written submissions will be available for inspection and copying in the Public Reference Room, 1100 L Street, N.W., Washington, D.C. Copies of such filing will also be available for inspection and copying at the principal office of the above-mentioned self-regulatory organization. All submissions should refer to the file number referenced in the caption above and should be submitted on or before September 8, 1976.

For the Commission by the Division of Market Regulation, pursuant to delegated authority.

Dated: August 2, 1976.

GEORGE A. FITZSIMMONS,
Secretary.

INTERSTATE COMMERCE COMMISSION

[Notice No. 10]

ASSIGNMENT OF HEARINGS

AUGUST 3, 1976.

Cases assigned for hearing, postponement, cancellation or oral argument appear below and will be published only once. This list contains prospective assignments only and does not include cases previously assigned hearing dates. The hearings will be on the issues as presently reflected in the Official Docket of the Commission. An attempt will be made to publish notices of cancellation of hearings as promptly as possible, but interested parties should take appropriate steps to insure that they are notified of cancellation or postponements of hearings in which they are interested.

CORRECTION [1]

MC 119792 Sub 52, Chicago, Southern Transportation Company, now being assigned November 15, 1976 (1 Week), at Miami, Fla., in a hearing room to be later designated.

[SEAL] ROBERT L. OSWALD,
Secretary.

[Notice No. 4]

MOTOR CARRIER BOARD TRANSFER PROCEEDINGS

The following publications include motor carrier, water carrier, broker, and freight forwarder transfer applications filed under section 212(b), 206(a), 211, 312(b), and 410(g) of the Interstate Commerce Act.

Each application (except as otherwise specifically noted) contains a statement by applicants that there will be no significant effect on the quality of the human environment resulting from approval of the application.

Protests against approval of the application, which may include a request for oral hearing, must be filed with the Commission or or before September 8, 1976. Failure seasonably to file a protest will be construed as a waiver of opposition and participation in the proceeding. A protest must be served upon applicants' representative(s), or applicants (if no such representative is named), and the protestant must certify that such service has been made.

Unless otherwise specified, the signed original and six copies of the protest shall be filed with the Commission. All protests must specify with particularity the factual basis, and the section of the Act, or the applicable rule governing the proposed transfer which protestant believes would preclude approval of the application. If the protest contains a request for oral hearing, the request shall be supported by an explanation as to why the evidence sought to be presented cannot reasonably be submitted through the use of affidavits.

The operating rights set forth below are in synopses form, but are deemed sufficient to place interested persons on notice of the proposed transfer.

No. MC FC-76614, filed July 23, 1976. Transferee: REMY TRANSPORTATION CORP., Old Post Road, Walpole, Massachusetts. Transferor: J. F. Fiore Co., Inc., P.O. Box 306, South Boston, Massachusetts. Applicant's Attorney: Robert J. Gallagher, Esquire, Suite 1200, 1000 Connecticut Avenue, Washington, D.C. 20036. Authority sought for purchase by transferee of the operating rights of transferor, as set forth in Certificate No. MC-2677, issued January 31, 1968, as follows: Household goods, between points in Massachusetts east of the Connecticut River, including those on the west bank of the Connecticut River, on the one hand, and, on the other, points in Connecticut, Illinois, Maine, Maryland, Ohio, New Hampshire, New Jersey, New York, Pennsylvania, Rhode Island, Virginia, Vermont, and the District of Columbia. Transferee presently holds no authority

[1] This notice corrects the hearing date. November 15, 1976 instead of September 15, 1976.

V 41 154 AUG 9 76 UMI

from this Commission. Application has not been filed for temporary authority under Section 210a(b).

No. MC FC-76676, filed July 27, 1976. Transferee: California and Western States Ammonia Transport, Inc., doing business as California Ammonia Transport, 415 Lemon Ave., Walnut, Calif. 91789. Transferor: Merlin C. Beck and L. E. Peabody, doing business as B & M Tank Lines, 12252 Woodruff Ave., Downey, Calif. 90241. Applicants' representative: George G. Cross, President, California and Western States Ammonia Transport, Inc., P.O. Box 397, Walnut, Calif. 91789. Authority sought for purchase by transferee of the operating rights of transferor as set forth in Certificate of Registration No. MC 120999 (Sub-No. 1), issued July 18, 1974, as follows: Petroleum and petroleum products in tank trucks or tank trailers, between points in California.

Transferee presently holds no authority from this Commission. Application has not been filed for temporary authority under Section 210a(b).

ROBERT L. OSWALD,
Secretary.

[FR Doc.76-23125 Filed 8-6-76;8:45 am]

[Notice No. 100]

MOTOR CARRIER TEMPORARY AUTHORITY APPLICATIONS

AUGUST 4, 1976.

The following are notices of filing of applications for temporary authority under Section 210a(a) of the Interstate Commerce Act provided for under the provisions of 49 CFR 1131.3. These rules provide that an original and six (6) copies of protests to an application may be filed with the field official named in the FEDERAL REGISTER publication no later than the 15th calendar day after the date the notice of the filing of the application is published in the FEDERAL REGISTER. One copy of the protest must be served on the applicant, or its authorized representative, if any, and the protestant must certify that such service has been made. The protest must identify the operating authority upon which it is predicated, specifying the "MC" docket and "Sub" number and quoting the particular portion of authority upon which it relies. Also, the protestant shall specify the service it can and will provide and the amount and type of equipment it will make available for use in connection with the service contemplated by the TA application. The weight accorded a protest shall be governed by the completeness and pertinence of the protestant's information.

Except as otherwise specifically noted, each applicant states that there will be no significant effect on the quality of the human environment resulting from approval of its application.

A copy of the application is on file, and can be examined at the Office of the Secretary, Interstate Commerce Commission, Washington, D.C., and also in the I.C.C. Field Office to which protests are to be transmitted.

MOTOR CARRIERS OF PROPERTY

No. MC 35628 (Sub-No. 382TA), filed July 27, 1976. Applicant: INTERSTATE MOTOR FREIGHT SYSTEM, 134 Grandville Ave. SW., Grand Rapids, Mich. 49502. Applicant's representative: Michael P. Zell (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *General commodities* (except those of unusual value, Classes A and B explosives, household goods as defined by the Commission, commodities in bulk, and those requiring special equipment), (1) Between Kansas City, Kans.-Mo., and Oklahoma City, Okla.; From Kansas City over Interstate Highway 70 to Topeka, thence from Topeka over Kansas Turnpike to junction Interstate Highway 35, thence over Interstate Highway 35 to Oklahoma City, and return over the same route; (2) Between Kansas City, Kans.-Mo., and Oklahoma City, Okla.: From Kansas City over Interstate Highway 35 to junction U.S. Highway 59, thence over U.S. Highway 59 to junction U.S. Highway 169, thence over U.S. Highway 169 to Tulsa, thence over Interstate Highway 44 to Oklahoma City, and return over the same route; (3) Between Kansas City, Kans.-Mo. and Little Rock, Ark.: From Kansas City over U.S. Highway 71 to junction Interstate Highway 40, thence over Interstate Highway 40 to junction U.S. Highway 167, thence over U.S. Highway 167 to Little Rock, and return over the same route; (4) Between Kansas City, Kans.-Mo., and Little Rock, Ark.: From Kansas City over U.S. Highway 71 to junction Missouri Highway 7, thence over Missouri Highway 7 to junction Missouri Highway 13, thence over Missouri Highway 13 to Springfield, thence over U.S. Highway 65 to Little Rock, and return over the same route; (5) Between Kansas City, Kans.-Mo. and Jonesboro, Ark.: From Kansas City over U.S. Highway 71 to junction Missouri Highway 7, thence over Missouri Highway 7 to junction Missouri Highway 13, thence over Missouri Highway 13 to Springfield, thence from Springfield over U.S. Highway 60 to junction U.S. Highway 63, thence over U.S. Highway 63 to Jonesboro, and return over the same route; (6) Between St. Louis, Mo., and Oklahoma City, Okla.: From St. Louis over Interstate Highway 44 to Oklahoma City, and return over the same route.

(7) Between St. Louis, Mo., and Little Rock, Ark.: From St. Louis over Interstate Highway 55 to junction U.S. Highway 67, thence over U.S. Highway 67 to Little Rock, and return over the same route; (8) Between St. Louis, Mo., and Little Rock, Ark.: From St. Louis, over Interstate Highway 55 to junction Interstate Highway 40, thence over U.S. Highway 40 to junction U.S. Highway 67, thence over U.S. Highway 67 to Little Rock, and return over the same route; serving the following intermediate or off-route points in (1) through (8) above: Boonville, El Dorado, Fayetteville, Fort Smith, Harrison, Hot Springs, Jacksonville, Jonesboro, Osceola, Paragould, Pine Bluff, Prescott, Rogers, Russellville, Siloam Springs, Springdale, and Walnut Ridge, Ark.; Ada, Ardmore, Bartlesville, Enid, Muskogee, and Sand Springs, and Tulsa, Okla. Restriction: Restricted at the named points and off-route points in (1) through (5) above to the transportation of traffic moving from, to, or through Kansas City, Kans.-Mo., and further restricted at the named points and off-route points in (6), (7), and (8) above to the transportation of traffic moving from, to, or through St. Louis, Mo. Applicant intends to tack its existing authority with MC 35628 and various subs and interline with other carriers at various points as required by numerous concurrences, for 180 days. Supporting shippers: There are approximately 613 statements of support attached to that application, which may be examined at the Interstate Commerce Commission in Washington, D.C., or copies thereof which may be examined at the field office named below. Send protests to: C. R. Flemming, District Supervisor, Bureau of Operations, Interstate Commerce Commission, 225 Federal Bldg., Lansing, Mich. 48933.

No. MC 52460 (Sub-No. 182TA), filed July 27, 1976. Applicant: ELLEX TRANSPORTATION, INC., 1420 West 35th St., Tulsa, Okla. 74107. Applicant's representative: Albert E. Romain (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Glass containers*, from the plantsite and storage facilities of Midland Glass Co., Inc., located at or near Henryetta, Okla., to points in Arkansas, Colorado, Iowa, Kansas, Louisiana, Mississippi, Missouri, Nebraska, New Mexico, Oklahoma, Tennessee, and Texas, for 180 days. Supporting shipper: Midland Glass Co., Inc., Cliffwood, N.J. 07721. Send protests to: Joe Green, District Supervisor, Room 240, Old Post Office Bldg., 215 Northwest Third St., Oklahoma City, Okla. 73102.

No. MC 103926 (Sub-No. 50TA), filed July 26, 1976. Applicant: W. T. MAYFIELD SONS TRUCKING CO., INC., P.O. Box 947, Mableton, Ga. 30059. Applicant's representative: K. Edward Wolcott, 1600 First Federal Bldg., Atlanta, Ga. 30303. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Structural steel, rail, beams, pipe, and piling*, which because of size or weight requires the use of special equipment, *and related parts, materials, and accessories* when moving in connection therewith, from the plantsite and storage facilities of Valiant Steel and Equipment, Inc., at Savannah, Ga., to points in Florida, Georgia, North Carolina, and South Carolina, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Valiant Steel and Equipment, Inc., No. 1 Hatchcover Road, Savannah, Ga. 31402. Send protests to: Sara K. Davis, Transportation Assistant, Bureau of Operations, Interstate Commerce Commission, 1252 W. Peachtree St. N.W., Room 546, Atlanta, Ga. 30309.

No. MC 113509 (Sub-No. 6TA), filed July 27, 1976. Applicant: DANTE GENTILINI TRUCKING, INC., P.O. Box 194, Chicago, Ill. 60628. Applicant's representative: Philip A. Lee, 120 West Madison, No. 618, Chicago, Ill. 60602. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Vermiculite, vermiculite products, perlite products, plant bed media, and insulation materials*, from West Chicago, Ill., to points in that part of Wisconsin north of a line beginning at Port Washington, Wis., and extending along Wisconsin Highway 33, to Junction Wisconsin Highway 67, thence along Wisconsin Highway 67 to Junction Wisconsin Highway 60, thence along Wisconsin Highway 60 to the Wisconsin-Iowa State line* (Fond Du Lac, Green Bay, Appleton), from Milwaukee, Wis., to points in Illinois and Indiana (Chicago, Ill.; Joliet, Ill.; Rockford, Ill.; Champaign, Ill.; Gary, Ind.; Ft. Wayne, Ind.) *, under a continuing contract with W. R. Grace & Co., Construction Products Division. Applicant intends to tack its existing authority with MC 113509 Sub-No. 5, for 180 days. Supporting shipper: W. R. Grace & Co., Construction Products Division, 62 Whittemore Ave., Cambridge, Mass. 02140. Send protests to: William J. Gray, Jr., District Supervisor, Interstate Commerce Commission, Everett McKinley Dirksen Bldg., 219 S. Dearborn St., Room 1386, Chicago, Ill. 60604.

No. MC 114118 (Sub-No. 3TA), filed July 28, 1976. Applicant: MARSHALL McFARLAND, R.F.D. No. 1, Circleville, Ohio 43113. Applicant's representative: John L. Alden, P.O. Box 5241, Columbus, Ohio 43212. Authority sought to operate as a *contract carrier*, by motor vehicle, over irregular routes, transporting: *Animal and poultry feed*, from Circleville, Ohio, to points in Garrett County, Md., and Brooke, Doddridge, Hancock, Harrison, Marion, Marshall, Monongalia, Ohio, Preston, Taylor, Tyler, and Wetzel Counties, W. Va., under a continuing contract with Ralston Purina Company, for 180 days. Supporting shipper: Ralston Purina Company, P.O. Box 538, Circleville, Ohio 43113. Send protests to: Frank L. Calvary, District Supervisor, Interstate Commerce Commission, 220 Federal Bldg., & U.S. Courthouse, 85 Marconi Blvd., Columbus, Ohio 43215.

No. MC 114274 (Sub-No. 35TA), filed July 28, 1976. Applicant: VITALIS TRUCK LINES, INC., 137 NE. 48th St., Place, Des Moines, Iowa 50313. Applicant's representative: William H. Towle, 180 North La Salle St., Chicaga, Ill. 60601. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat by-products, and articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides and *houses*, as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except commodities in bulk and hides), from the facilities of Bookey Packing Co., a division of Swift & Co., at Des Moines, Iowa, to Lexington, Louisville, Bowling Green, Owensboro, and Paducah, Ky., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Bookey Packing Company, a division of Swift & Company, 115 W. Jackson Blvd., Chicago, Ill. 60604. Send protests to: Herbert W. Allen, District Supervisor, Interstate Commerce Commission, 518 Federal Bldg., Des Moines, Iowa 50309.

No. MC 116045 (Sub-No. 44TA), filed July 27, 1976. Applicant: NEUMAN TRANSIT CO., INC., P.O. Box 38, Rawlins, Wyo. 82301. Applicant's representative: Leslie R. Kehl, 1600 Lincoln Center Bldg., 1660 Lincoln St., Denver, Colo. 80203. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Spent sulphuric acid*, in bulk, from Louviers, Colo., to the production facilities of Western Nuclear, Inc., approximately two miles north of Jeffrey City, Wyo., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Western Nuclear, Inc., Suite 387, One Park Central, Denver, Colo. 80202. Send protests to: Paul A. Naughton, District Supervisor, Interstate Commerce Commission, Room 1006, Federal Bldg., & Post Office, 100 East B St., Casper, Wyo. 82601.

No. MC 118535 (Sub-No. 60TA), filed July 27, 1976. Applicant: TIONA TRUCK LINE, INC., 111 S. Prospect, Butler, Mo. 64730. Applicant's representative: Jim Tiona, Jr. (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Dry beet pulp pellets*, in bulk, from Ottawa, Ohio, Crookston, Minn., and Grand Forks, N. Dak., to East St. Louis, Ill., for 180 days. Supporting shipper: ConAgra, Inc., 200 Kiewit Plaza, Omaha, Nebr. 68131. Send protests to: John V. Barry, District Supervisor, Interstate Commerce Commission, Bureau of Operations, 600 Federal Bldg., 911 Walnut St., Kansas City, Mo. 64106.

No. MC 124774 (Sub-No. 95TA), filed July 28, 1976. Applicant: MIDWEST REFRIGERATED EXPRESS, INC., 4440 Buckingham Ave., P.O. Box 7344, Omaha, Nebr. 68107. Applicant's representative: Arlyn L. Westergren, 7100 West Center Road, 530 Univac Bldg., Omaha, Nebr. 68106. Authority sought to operate as a *common carirer*, by motor vehicle, over irregular routes, transporting: *Meats, meat products, meat by-products, and articles distributed by meat packinghouses*, as described in Sections A and C of Appendix I to the report in *Descriptions in Motor Carrier Certificates*, 61 M.C.C. 209 and 766 (except hides and commodities in bulk), from the plantsite of Farmland Foods, Inc., at or near Garden City, Kans., to points in Kentucky, Tennessee, Ohio, Virginia, West Virginia, Maryland, Delaware, Pennsylvania, Connecticut, Rhode Island, Massachusetts, New York, Vermont, New Hampshire, and Maine, for 180 days. Supporting shipper: Robert E. Chipley, Traffic Manager, Farmland Foods, Inc., P.O. Box 957, Garden City, Kans. 67846. Send protests to: Carroll Russell, District Supervisor, Interstate Commerce Commission, Suite 620, 110 North 14th St., Omaha, Nebr. 68102.

No. MC 125470 (Sub-No. 17TA), filed July 28, 1976. Applicant: MOORE'S TRANSFER, INC., P.O. Box 1151, Norfolk, Nebr. 68701. Applicant's representative: Gailyn L. Larsen, 521 South 14th St., P.O. Box 81849, Lincoln, Nebr. 68501. Authority sought to operate as a *comcon carrier*, by motor vehicle, over irregular routes, transporting: *Carbonated beverages*, in bottles or cans, from Ottumwa, Iowa, to points in Arkansas, Kansas, Missouri, North Dakota, South Dakota, Nebraska, Minnesota, and Illinois, for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: Gerald Brody, President, Chromalloy, Beverage Division, No. 4, Industrial Park, Ottumwa, Iowa 52501. Send protests to: Carroll Russell, District Supervisor, Interstate Commerce Commission, Suite 620, 110 North 14th St., Omaha, Nebr. 68102.

No. MC 139495 (Sub-No. 154TA) filed July 28, 1976. Applicant: NATIONAL CARRIERS, INC., 1501 East 8th St., P.O. Box 1358, Liberal, Kans. 67901. Applicant's representative: James E. McCarty (same address as applicant). Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Lamps*, from the plantsites and storage facilities utilized by G.T.E. Sylvania, at or near Danvers and Salem, Mass., to Seattle, Wash., for 180 days. Supporting shipper: GTE Sylvania, Lighting Products Group, 100 Endicott St., Danvers, Mass. 01923. Send protests to: M. E. Taylor, District Supervisor, Interstate Commerce Commission, 501 Petroleum Bldg., Wichita, Kans. 67202.

No. MC 142237 (Sub-No. 1TA), filed July 28, 1976. Applicant: PERMIT HAULERS, INC., 2400 Cold Springs Rd., Fort Worth, Tex. 76106. Applicant's representative: Billy R. Reid, P.O. Box 9093, Fort Worth, Tex. 76107. Authority sought to operate as a *common carrier*, by motor vehicle, over irregular routes, transporting: *Coal*, in hydraulic dump trailers, from Henryetta, Panama, and McAlester, Okla., to the plantsite of General Portland, Inc., at Fort Worth, Tex., for 180 days. Applicant has also filed an underlying ETA seeking up to 90 days of operating authority. Supporting shipper: General Portland, Inc., P.O. Box 324, Dallas, Tex. 75221. Send protests to: H. C. Morrison, Sr., District Super-

Amdt. No. 9]

NIAGARA FRONTIER TARIFF BUREAU, INC.

Agreement

JULY 30, 1976.

The Commission is in receipt of an application in the above-entitled proceeding for approval of amendments to the agreement therein approved.

Filed July 5, 1976 by:

Robert G. Gawley, Executive Vice President, Niagara Frontier Tariff Bureau, Inc., 3871 Harlem Road, P.O. Box 184, Buffalo, NY 14221.

The amendments involve: Changes to comply with Ex Parte No. 297, 349 I.C.C. 811 and 351 I.C.C. 437.

The complete application may be inspected at the Office of the Commission in Washington, D.C.

Any interested persons desiring to protest and participate in this proceeding shall notify the Commission in writing within 30 days from the date of publication of this notice in the FEDERAL REGISTER. As provided by the General Rules of Practice of the Commission, persons other than applicants should fully disclose their interest and the position they intend to take with respect to the application. Otherwise, the Commission, in its discretion, may proceed to investigate and determine the matters involved in such application, without further or formal hearing.

ROBERT L. OSWALD,
Secretary.

PIPELINES

Tentative Valuations

Notice is hereby given that tentative valuations are under consideration for the common carriers by pipeline listed below:

1975 REPORTS

Valuation Docket No.:

1364 Acorn Pipe Line Company, P.O. Box 5008, Houston, TX 77012

1434 Black Mesa Pipeline, Inc., 610 South Main Street, Los Angeles, CA 90014

1404 Calnev Pipe Line Company, 1901 Slover Avenue, Bloomington, CA 92316

1399 Kenai Pipe Line Company, 225 Bush Street, San Francisco, CA 94120

1435 Kiantone Pipeline Corporation, P.O. Box 780, Warren, PA 16365

1437 Powder River Corporation, Adams Building, Bartlesville, OK 74004

BASIC REPORTS

1438 Pasco Pipeline Co., P.O. Box 1677, Englewood, CO 80110 (1973)

On or before September 8, 1976, persons other than those specifically designated in section 19a(h) of the Interstate Commerce Act having an interest in the valuation of any carrier named above may, pursuant to rule 72 of the Commission's "General Rules of Practice" (49 CFR 1100.72), file an original and three copies of a petition for leave to intervene and, if granted, thus to come within the category of "additional parties as the Commission may prescribe" under section 19a(h) of the act, thereby enabling the party to file a protest. Blanket petition to intervene in all or several of these proceedings is not permissible. Individual petitions to intervene must be filed with respect to each valuation in which participation is sought. It is also required that a copy of the petition to intervene be served at the address shown above upon the carrier whose property is the subject of the tentative valuation and that an appropriate certificate of service be attached to the petition. Persons specifically designated in section 19a(h) of the act need not file a petition; they are entitled to file protest as a matter of right under the statute.

ROBERT L. OSWALD,
Secretary.

PART II:

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

■

ASSISTANCE TO STATES FOR RAIL SERVICE UNDER SECTION 5 OF THE DEPARTMENT OF TRANSPORTATION ACT

Proposed Procedures and Requirements Regarding Applications and Disbursements

V 41 154 AUG 9 76 UMI

DEPARTMENT OF TRANSPORTATION

Federal Railroad Administration

[49 CFR Part 266]

[FRA Economic Docket No. 4, Notice No. 1]

ASSISTANCE TO STATES FOR RAIL SERVICE ASSISTANCE UNDER SECTION 5 OF THE DEPARTMENT OF TRANSPORTATION ACT

Proposed Procedures and Requirements Regarding Applications and Disbursements

The purpose of this proposed amendment to Title 49 of the Code of Federal Regulations is to establish a new Part 266 setting forth the procedures and requirements of the Federal Railroad Administrator ("Administrator") in connection with the filing of applications with the Federal Railroad Administration ("FRA") for rail service assistance under section 5 of the Department of Transportation Act ("Act") as amended by section 803 of the Railroad Revitalization and Regulatory Reform Act of 1976 (Pub. L. 94–210) ("RRRRA"). The Administrator is the delegate of the Secretary for all purposes under subsections 5(f) through 5(o) of the Act, except as related to audits (49 C.F.R. 1.49(u)). The Administrator has determined that these regulations do not constitute a major proposal under Executive Order No. 11821, November 27, 1974, or Department of Transportation Order No. 2050.4, February 2, 1976, requiring an inflationary impact statement. The Administrator has also determined that these regulations do not significantly affect the quality of the human environment (except where highways or highway-related facilities or the acquisition of real estate is involved) under Department of Transportation Order No. 5610.1B (39 FR 35234, September 30, 1974). A negative declaration has been prepared pursuant to this determination and is available to the public upon request. Therefore, applicants for section 803 financial assistance are not required to prepare or submit data on the environmental impact of the projects proposed in the applications, except (1) where the proposed project involves the purchase of real estate, in which case an environmental assessment shall be submitted with the application, or (2) where the proposed project involves highways or highway-related facilities, in which case the Federal Highway Administration regulations on environmental assessments shall apply (23 C.F.R. 771).

Section 5 of the Act establishes a five-year program ("National Program") similar to the rail service continuation assistance program ("Title IV Program") authorized under section 402 of Title IV of the Regional Rail Reorganization Act of 1973, as amended, (45 U.S.C. § 701 et seq.) ("Rail Act"). The Title IV Program provides assistance for rail services in States in the Northeast and Midwest Region ("Region") as defined by the Rail Act. Procedures and Requirements Regarding Applications and Disbursements under section 402 were published on March 5, 1976 in the FEDERAL REGISTER (41 F.R. 9692) as Part 255 of Title 49 of the Code of Federal Regulations.

For the period from July 1, 1976 to April 1, 1978, the National Program authorizes rail service assistance for States outside the Region. Beginning April 1, 1978, the expiration date of the Title IV program, the National Program will extend to all States.

Under section 5(f) of the Act, the Secretary of Transportation ("Secretary"), is authorized to provide financial assistance to States for rail freight assistance programs that are designed to cover:

(1) The cost of rail service continuation payments;

(2) The cost of purchasing a line of railroad or other rail properties to maintain existing or provide for future rail service;

(3) The cost of rehabilitating and improving rail properties on a line of railroad to the extent necessary to permit adequate and efficient rail freight service on such line; and

(4) The cost of reducing the costs of lost rail service in a manner less expensive than continuing rail service.

The Federal share of the costs of any rail service assistance program shall be (1) 100 percent for the period from July 1, 1976 to June 30, 1977; (2) 90 percent for the period from July 1, 1977 to June 30, 1978; (3) 80 percent for the period from July 1, 1978 to June 30, 1979; and (4) up to 70 percent for the period from July 1, 1979 to June 30, 1981.

These regulations do not cover the standards and procedures under which the State share may be provided through in-kind benefits such as forgiveness of taxes, trackage rights and facilities which would not otherwise be provided. However, in a separate notice the FRA is requesting comments from the States regarding their views as to what should constitute allowable in-kind benefits. These comments will facilitate the issuance of such standards and procedures.

Section 5(j) of the Act provides that a State is eligible to receive rail service assistance if:

(1) Such State has established an adequate plan for rail services in such State as part of an overall planning process for all transportation services in such State, including a suitable process for updating, revising, and amending such plan;

(2) Such State plan is administered or coordinated by a designated State agency and provides for the equitable distribution of resources;

(3) Such State agency (A) has authority and administrative jurisdiction to develop, promote, supervise, and support safe, adequate, and efficient rail transportation services, (B) employs or will employ, directly or indirectly, sufficient trained and qualified personnel, (C) maintains or will maintain adequate programs of investigation, research, promotion, and development, with provisions for public participation, and (D) is designated and directed solely, or in cooperation with other State agencies to take all practicable steps to improve transportation safety and to reduce transportation-related energy utilization and pollution;

(4) Such State provides satisfactory assurance that it has or will adopt and maintain adequate procedures for financial control, accounting, and performance evaluation in order to assure proper use of Federal funds; and

(5) Such State complies with regulations of the Secretary issued under this section and the Secretary determines that such State meets or exceeds the requirements of paragraphs (1) through (4) of this subsection.

Projects are eligible for rail service assistance under section 5(k) of the Act only if:

(1)(A) The [Interstate Commerce] Commission has found that the public convenience and necessity permit the abandonment of, or the discontinuance of rail service on, the line of railroad which is related to such project, or (B) the line of railroad of related project was eligible for assistance under title IV of the Regional Rail Reorganization Act of 1973; and

(2) Such line or related projects, has not previously been the subject of Federal rail service assistance under this section for more than 5 fiscal years.

Rail service assistance to which a State is entitled may be used by each State to meet the cost of establishing and implementing the State rail plan required under section 5 of the Act. Such grants shall be made available during the course of the State rail planning process, and shall be distributed by the Administrator as needed by the States. The amount of State rail planning grants to which each State is entitled shall be proportionate to the amount of rail service assistance to which each State is entitled.

Funds not to exceed $5,000,000 are authorized for State rail planning assistance for the fiscal year ending June 30, 1976. An appropriation of $5,000,000 to remain available until expended has been provided (P.L. 94–303).

The State eligibility requirements of these regulations for State rail planning assistance during the planning process is limited to (a) completion of a planning work statement which documents the State's planning process and (b) a description of the State's proposed procedures for the fiscal control of Federal funds.

A key element of the administration of the National Program is the "designated state agency" required under section 5(j) of the Act, as a prerequisite for receiving rail service assistance. At this time, all of the States may not have an agency with the powers enumerated in that section. Because of the great part such agencies will play in the National Program, the FRA has considered it important that, to the extent practicable, each State identify its designated State agency. Accordingly, in a letter of June 9, 1976, the Administrator requested the Governor of each State covered under the National Program to identify that State's designated agency. In the event that the Governor could not make a formal designation at that time, the Administrator requested the identification of an interim contract person.

Under section 5(h) of the Act, each State which is eligible to receive rail service assistance is entitled to a portion of the appropriated funds in proportion to its share of mileage eligible for assistance, except that the minimum entitlement for each State shall not be less than one (1) percent of such funds. Funds appropriated for each fiscal year shall be allocated in proportion to each State's eligible rail mileage as of August 1 of each year.

The calculation with respect to August 1, 1976 shall govern both 1976 and, when appropirated, 1977 fiscal year funds. Effective with the date of these proposed regulations, and in accordance with them, the FRA will accept applications from each State for up to its minimum one percent share of fiscal year 1976 planning funds. As soon as the eligible mileage has been calculated, the FRA will so notify the States and will accept applications for the balance of the planning funds.

A line of railroad in a State is eligible mileage for rail service assistance if:

(1) the Interstate Commerce Commission ("Commission") has found that the public convenience and necessity permit the discontinuance of service on or abandonment of such line pursuant to section 1a of the Interstate Commerce Act, as amended, ("ICA"); and

(2) The Governor of such State annually certifies that the line is suitable for rail freight service, and that it has not been sold, dismantled, or converted to non-rail use.

Section 5(h) of the Act also requires that unused or uncommitted funds be reallocated immediately, to the extent practicable, among other States in accordance with the allocation formula. In accordance with that section, the FRA will reallocate funds which are not used or committed by States by March 31 of each year. Each reallocation will be based on the mileage eligible as of the preceding February 1.

Funds allocated and granted to the States will be deemed committeed. Funds allocated to the States, but not yet granted will be deemed used or committed if (i) such funds are to be used for rail service continuation payments on a line of railroad for which a State has made an offer of subsidy under section 1a(6)(A) of the ICA, and the Commission pursuant to that section, has postponed the issuance of a certificate of abandonment or discontinuance; or equivalent action has been taken by the State with respect to the service in question to commit such funds to provide substitute service; and (ii) the Attorney General of such State has issued an opinion of counsel in a form acceptable to the Administrator, that the State is empowered to use allocated funds to carry out the intended project in accordance with the Act and these regulations.

On May 17, 1976, at the request of representatives of the National Governors' Conference (NGC), FRA and Department of Transportation Officials afforded the NGC representatives an opportunity to view a draft of the regulations and to express their concerns on certain issues.

Among the issues discussed were whether the regulations should require that lines be ranked in priority order, whether States whose designated agencies did not meet the full statutory requirements could be eligible for fiscal year 1976 planning assistance, whether the regulations would permit the use of planning assistance for the reimbursement of past planning expenditures by a state and whether lines which had been abandoned prior to the passage of the Act are eligible for assistance.

These issues have been resolved as follows:

(a) The FRA has included a ranking requirement in section 266.9 of the regulations by requiring that the state rail plan group projects in order of compliance with the State's criteria and goals for assistance.

(b) States whose designated agencies did not meet the full statutory requirements are eligible for fiscal year 1976 planning assistance. As noted above, these regulations provide that the eligibility requirements of subsections 5(j)(1), (2) and (3) of the Act do not apply to planning funds.

(c) Regarding the use of planning assistance for the reimbursement of past planning expenditures by a State, the FRA, in accordance with General Accounting Office rulings, has determined that there is no authority to reimburse states for obligations incurred or expenditures made by States prior to the date appropriations become available to make contributions to the States. Accordingly, the FRA will not reimburse planning expenses incurred by the States before June 1, 1976, the enactment date of the Second Supplemental Appropriations Act of 1976 (Pub. L. No. 94–303).

(d) In answer to the question of eligibility of lines which had been abandoner prior to the passage of the Act, the FRA has determined that section 5(k)(1)(A) may not be implemented retroactively. Thus, as discussed earlier, only lines for which the Commission made the requisite finding under section 1a of the ICA after February 5, 1976, would be eligible for section 5 assistance.

In view of the scope of the rail services assistance program and in view of the diverse interests involved, the Administrator wishes to receive the broadest possible public participation in connection with the development of these regulations. Accordingly, interested persons are invited to participate by submitting written data, views or comments. Communications should identify the regulatory docket number and should be submitted in triplicate to the Docket Clerk, Office of Chief Counsel, Federal Railroad Administration, Room 5101, Attention: FRA Economic Docket No. 4, 400 Seventh Street, S.W., Washington, D.C. 20590. Communications received before September 10, 1976, will be considered by the Federal Railroad Administrator before taking final action on the proposed regulation. Comments received after that date will be considered to the extent practicable. All comments received will be available for examination by interested persons at any time during regular working hours in Room 5101, Nassif Building, 400 Seventh Street, S.W., Washington, D.C. The proposals contained in this notice may be changed in light of comment received.

In consideration of the foregoing, 49 C.F.R., Chapter II is proposed to be amended by adding a new Part 266 to read as follows:

PART 266—REGULATIONS GOVERNING PROCEDURES AND REQUIREMENTS REGARDING APPLICATIONS AND DISBURSEMENTS

Sec.
266.1 Definitions.
266.3 Applicability.
266.5 Eligibility.
266.7 Rail Service Assistance.
266.9 Requirements for State Rail Plan for Rail Transportation Services.
266.11 Certified Program of Projects.
266.13 Applications.
266.15 Environmental Impact Statement.
266.17 Disbursement of Assistance.
266.19 Record, Audit, and Examination.
266.21 Waivers and Modifications.
Appendix A Certificate

AUTHORITY: The Department of Transportation Act, as amended, 49 U.S.C. 1651 et seq.; Regulations of the Office of the Secretary of Transportation, 49 C.F.R. 1.49(u).

§ 266.1 Definitions.

As used in this part—

(a) "Acquisition" means the purchase of a line of railroad or other rail properties under § 266.7(b) of this part.

(b) "Act" means the Department of Transportation Act as amended.

(c) "Administrator" means the Federal Railroad Administrator or the Deputy Administrator or his or her delegate.

(d) "Applicant" means the designated State agency of a State meeting the requirements of § 266.5 of this part.

(e) "Commission" means the Interstate Commerce Commission.

(f) "Designated State agency" means the State agency designated by the Governor under section 5(j)(2) of the Act and § 266.5(d) of this part.

(g) "High and wide load" means freight cars, loaded or empty, whose dimensions exceed the line clearances for a railroad as published in the Official Railway Equipment Register.

(h) "Line of railroad" means (1) a line of railroad with respect to which the Commission has found under section 1a of the Interstate Commerce Act, as amended, on or after February 5, 1976, that the public convenience and necessity permit the abandonment of, or the discontinuance of rail service thereon,

V 41 154 AUG 9 76 UMI

or (2) a line of railroad or related project which was eligible for assistance under Title IV of the Regional Rail Reorganization Act, as amended.

(i) "Maintenance" means performing routine repair work, such as spot tie replacement, spot tamping and lining, tightening bolts and driving spikes, which is necessary to keep track at its existing condition or to comply with FRA Class I Safety Standards.

(j) "Other rail properties" means property or facilities, excluding rolling stock, related to a line of railroad, used in the provision of rail freight services on such line of railroad.

(k) "Planning assistance" means funds granted to a State under section 5(i) of the Act during the course of a States' planning process to meet the cost of establishing and implementing the State's rail plan.

(l) "Planning work statement" means the planning work statement required under § 266.9(c) of this part.

(m) "Rail service continuation payments" means payments provided for rail freight assistance programs for the purposes enumerated in section 5(f) of the Act and § 266.7 of this part.

(n) "Rail service continuation payments" means payments designed to cover the difference between the revenue attributable to a line of railroad and the avoidable costs of providing rail service on such line of railroad, together with a reasonable return on the value of such line of railroad and other rail properties related to that line of railroad, all as calculated pursuant to subsections (6), (7), and (10) of section 1(a) of the Interstate Commerce Act, as amended, except that where a service is subsidized in accordance with subsection 304(d) of the Regional Rail Reorganization Act of 1973 as amended, such payments shall be calculated pursuant to that subsection.

(o) "Rehabilitation or Improvement" means replacing ties and other track and structural materials, sufficient functionally to restore the existing track structure to the level necessary to enable safe and efficient rail transportation over such properties.

(p) "State" means (1) during the period from February 5, 1976, through April 1, 1978, any State in which a carrier by railroad subject to Part I of the Interstate Commerce Act maintains any line of railroad, except that the term shall not include the States of Maine, New Hampshire, Vermont, Massachusetts, Connecticut, Rhode Island, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, West Virginia, Ohio, Indiana, Michigan and Illinois, the District of Columbia and that portion of the State of Wisconsin receiving funds under section 402 of the Regional Rail Reorganization Act of 1973, as amended; and (2) during the period following April 1, 1978, any State in which a carrier by railroad subject to Part I of the Interstate Commerce Act maintains any line of railroad.

(q) "State Rail Plan" means the plan required under section 5(j)(1) of the Act and § 266.5 of this part.

(r) "Substitute service assistance" means assistance pursuant to section 5(f)(4) of the Act designed to reduce the costs of lost rail service in a manner less expensive than continuing rail service. Such assistance may include the acquisition, construction, or improvement of facilities for the provision of substitute freight transportation services.

§ 266.3 Applicability.

The provisions of this part apply to the procedures and requirements regarding applications for and disbursement of financial assistance for the development of state rail plans, for the continuation of rail freight services, for the acquisition or improvement of rail properties and for substitute service assistance under subsections 5(f) through 5(o) of the Act. Compliance with the provisions of this part is a prerequisite for the receipt of such financial assistance.

§ 266.5 Eligibility.

(a) *Eligibility requirements for planning assistance.* A State is eligible to receive planning assistance under section 5(i) of the Act and § 266.7 of this part if:

(1) The State has submitted with its application for assistance a planning work statement documenting the State's rail planning process which will result in an initial or revised State Rail Plan (a current planning work statement is required with each application for planning assistance and, subsequent to completion of the State's initial rail plan, annual updates of the plan are required); and

(2) The State provides satisfactory assurance that it has or will adopt and maintain adequate procedures for financial control, accounting, and performance evaluation in order to assure proper use of Federal funds.

(b) *Eligibility requirements for rail service assistance.* A State is eligible to receive rail service assistance under section 5(h) of the Act and § 266.7 of this part if:

(1) The State has established an adequate plan for rail services in the State which (i) meets the requirements of § 266.9 of this part; (ii) is part of an overall planning process for all transportation services in the State; and (iii) includes a suitable process for updating, revising, and amending such plan;

(2) Such State plan (i) is administered or coordinated by a designated State agency; and (ii) provides for the equitable distribution of resources;

(3) The State agency (i) has authority and administrative jurisdiction to develop, promote, supervise, and support safe, adequate, and efficient rail transportation services; (ii) employs or will employ, directly or indirectly, sufficient trained and qualified personnel; (iii) maintains or will maintain adequate programs of investigation, research, promotion, and development with provision for public participation; and (iv) is designated and directed solely or in cooperation with other State agencies to take all practicable steps to improve transportation safety and to reduce transportation-related energy utilization and pollution;

(4) The State complies with paragraph 3 of subsection (a) of this section; and

(5) The State complies with the requirements of this part, and with the terms and conditions included in the grant of assistance.

§ 266.7 Rail service assistance.

(a) *Allocation of funds.* (1) Funds appropriated for each Federal fiscl year ("fiscal year") shall be allocated for that fiscal year to each State in the ratio which such State's eligible rail mileage as of the preceding August 1 under section 5(k) of the Act bears to the total eligible rail mileage in all of the States. However, no State shall get less than one (1) percent of such funds. The calculation with respect to August 1, 1976 shall govern both 1976 and 1977 fiscal year funds. Each mileage allocation will be published as an Appendix to this part or as an amendment to that Appendix.

(2) Rail service assistance to which a State is entitled under section 5(h) of the Act may be allocated by such State to meet the cost of establishing and implementing the State rail plan. Planning assistance shall be made available by the Administrator during the course of the State rail planning process and shall be distributed by the Administrator as needed by the States in accordance with § 266.17(b) of this part. The amount of planning assistance to which each State is entitled shall be proportionate to the amount of rail service assistance to which such State is entitled under section 5(h) of the Act.

(3) A line of railroad in a State is eligible mileage for rail service assistance if (i) the Commission has found that the public convenience and necessity permit the discontinuance of service on or abandonment of such line pursuant to section 1a of the ICA, and (ii) the Governor of such State annually certifies prior to August 1 of each year that the line is suitable for rail freight service, and that it has not been sold, dismantled, or converted to non-rail use.

(4) The Federal share of the costs of providing rail service assistance under section 5(h) of the Act will be as follows:

(i) 100 percent for the 12-month period from July 1, 1976, to June 30, 1977;

(ii) 90 percent for the 12-month period from July 1, 1977, to June 30, 1978;

(iii) 80 percent for the 12-month period from July 1, 1978, to June 30, 1979; and

(iv) Up to 70 percent for the period from July 1, 1979, to June 30, 1981.

The Federal share shall be determined as of the date of execution of the Grant Agreement or the date of the amendment thereto.

The balance of such costs shall be provided by the State and the State share

may not be augmented by any Federal funds, directly or indirectly, unless the funds are provided through a Federal program which specifically authorizes the augmentation of a non-Federal share of a federally-subsidized program with such funds.

(b) *Reallocation of funds.* Funds not used or committed by the State by March 31 of each year will be reallocated on the basis of mileage eligible as of February 1 of that year. Funds allocated and granted will be deemed committed. Funds allocated to the States, but not yet granted, will be deemed used or committed if (1) such funds are to be used to provide a rail service continuation payment in connection with a line of railroad for which a State has made an offer of subsidy under section 1a(6)(a) of the ICA as amended, and the Commission, pursuant to that section, has postponed the issuance of a certificate of abandonment or discontinuance, or equivalent action has been taken by the State with respect to the service in question to commit such funds to provide substitute service; and (2) the Attorney General of such State has issued an opinion of counsel in a form acceptable to the Administrator, that the State is empowered to use allocated funds to carry out the intended project, in accordance with the Act and this part.

(c) *Purposes.* Rail service assistance may be expended for the following purposes:

(1) To enable an eligble applicant to pay allowable planning costs (including development of a planning work statement) expended in developing its State Rail Plan, in the amount of planning assistance to which it is entitled;

(2) To enable an eligible applicant to provide rail service continuation payments which are likely to cover the difference between revenues which are attributable to such line of railroad and the avoidable cost (including the cost of maintenance) of providing rail freight service on such line, together with a reasonable return on the value of such line of railroad and of other rail properties related to such a line of railroad all as found by the Commission under section 1a(6)(a) of the Interstate Commerce Act, as amended, for those projects that:

(i) The Commission has found after February 5, 1976, that the public convenience and necessity permit the abandonment of, or the discontinuance of rail service on, the line of railroad which is related to such project, or the line of railroad or related project was eligible for assistance under Title IV of the Regional Rail Reorganization Act of 1973; and

(ii) Such line or related projects have not previously been the subject of Federal rail service assistance under section 5 of the Act for more than five (5) fiscal years;

(3) To enable an eligible applicant to purchase an eligible line of railroad or other rail properties to maintain existing or provide for future rail service;

(4) To enable an eligible applicant to carry out rehabilitation and improvement of lines of railroad and other rail properties and lines of railroad;

(5) To enable an eligible applicant to carry out transportation programs which reduce the cost of lost rail freight service on a line of railroad in a manner less expensive than continuing rail service; and

(6) To enable an eligible applicant to pay program operation costs, the Federal share of such costs shall be the same as for the other program elements except that such share shall not exceed five (5) percent of the aggregate funds otherwise received by the State under section 5(h) of the Act.

(d) *Allowable costs.* Allowable planning, program operation, and project related costs shall consist of those costs allowed under Federal Management Circular 74-4 and 74-7 which are properly attributable and allocable to the work performed. Allowable costs of third-party contracts shall be governed by the provisions of 41 CFR 1-15.2. Project related costs shall consist of those costs directly attributable to the purpose for which the assistance is provided. Project related acquisition costs shall include the costs of the valuation appraisals required under § 266.13(f) of this part. Project related improvement costs shall include necessary preliminary engineering costs. Project related costs with respect to the provision of rail service continuation payments shall include the costs of necessary valuation appraisals.

§ 266.9 Requirements for State Rail Plan for rail transportation services.

(a) *State planning process.* Consistent with the purposes of the Act, the State Rail Plan required under § 266.5(a) of this part shall be based on a comprehensive coordinated and continuing planning process for all transportation services in the state. The Plan shall be developed with opportunity for participation by those public and private agencies interested in rail activity in the State and adjacent States where appropriate. Procedures shall be established to provide an opportunity for a public hearing on the contents of the Plan prior to final adoption of the Plan by the State. Such hearings shall be held in accordance with paragraph (d)(6) of this subsection. Also as part of the planning process, the designated State agency shall establish procedures whereby local and regional governmental bodies may review and comment on appropriate elements of the State Rail Plan. Provisions shall also be made for updating, revising, and amending the State Rail Plan.

(b) *Format of the State Rail Plan.* All State submissions under this section shall reasonably conform to the format of this section, and each item submitted in response to a requirement of this section shall reference such requirement by subsection, paragraph, and subparagraph.

(c) *Contents of the planning work statement.* As its planning work statement, a State shall submit a design of the State planning process which is consistent with the purposes of the Act and which shall highlight the work planned for the period covered by the State's application for planning assistance and shall include:

(1) An explanation of the philosophical framework to be used in guiding the development of the State Rail Plan. Part of this explanation should be specifically devoted to the expectations of the State for the future of rail services which receive a subsidy subsequent to the expiration of the rail service continuation payment under the Act including such considerations as likelihood of profitability, continued State or local subsidy, acquisition, substitution of alternate modes, and other long-term alternatives.

(2) Description of the methods by which the State will involve local and regional governmental bodies and the public generally in its rail planning process, including its methods of providing for the equitable distribution of resources.

(3) Criteria and goals for rail services or properties to be considered for assistance.

(4) An identification of the data to be acquired on the rail network and rail services in the State (see § 266.9(d) of this part), the sources of this data, and the methodology to be employed in data collection. In considering the scope of data collection activities and subsequent analysis, it is anticipated that time constraints and limitations of the state-of-the-art will require that the State provide a broad overview of all rail services in the State while concentrating most of its efforts on the services which are eligible for assistance or which are expected to become eligible during the period of the program.

(5) Analytical methodology to be used in the planning process. Such analytical methodology shall include criteria to be used in selecting essential lines to be considered for assistance and shall indicate consideration of the advisory criteria published by the Office under subsection 205(d)(3) of the Regional Rail Reorganization Act of 1973, as amended.

(6) A management plan for the development of the State Rail Plan which shall include an identification of responsible individuals, a flow chart of activities with milestones and a budget, by task, for the period to be covered by the State's application for planning assistance.

(d) *Contents of the State Rail Plan.* Each State Rail Plan shall:

(1) Describe the planning process utilized in the development of the State Rail Plan, specifying the particulars as to State rail policy and objectives, data sources, assumptions, analytical methodology, and other special problems or conditions which would be essential to the understanding of the setting in which the State Rail Plan was developed. In particular, the State shall note any modification of the planning process set forth in its planning work statement.

V 41 154 AUG 9 76 UMI

(2) Contain an illustration of the entire state rail system on suitable scale maps of the state highway system (such as a reduction of the County Highway Planning Series of maps), designating with respect to each line (i) the operating carrier or carriers, (ii) freight traffic density, and (iii) location of passenger service on such lines. These maps shall be accompanied by a written description of the service provided on each line, including an identification, at the two digit level of the Standard Transportation Commodity Code, of commodity types carried on each line.

(3) Identify the following classes of rail service within the State providing both a written description and illustration of each category of service on appropriate scale maps:

(i) Lines which cannot accommodate "high and wide loads";

(ii) Rail freight services to military installations;

(iii) Rail lines in the State which are eligible for assistance under section 5 (k) of the Act;

(iv) Lines of railroad in the State designated as "potentially subject to abandonment" purusant to diagrams submitted by railroads pursuant to section 1a(5)(a) of the ICA;

(v) Rail freight services in the State for which abandonment applications are pending before the Commission;

(vi) Projects for which a State wishes to receive assistance (continuation payments, acquisition, rehabilitation, rail banking, and substitute service assistance) under the Act, including, where practicable, projects not yet eligible for Federal assistance but expected to become eligible during the ensuing year; and

(vii) Rail projects for which a State wishes to provide assistance from sources other than the section 5 program, including the estimated cost of each such project.

(4) Contain with respect to each line or project listed under paragraphs 3 (iii), (iv) and (v) of this subsection: (i) Freight traffic and characteristics of shippers on the line of railroad; (ii) revenues derived from rail freight services on each line and the cost of providing these service; (iii) a discussion of the condition of the rail plant, equipment, and facilities; (iv) an economic and operational analysis of present and future freight service needs; (v) an analysis of the effects of abandonment with respect to the transportation needs of the State; (vi) the relative economic, social, environmental, and energy costs and benefits involved in the use of alternate rail services or alternate modes, including costs resulting from lost jobs, energy shortages, and the degradation of the environment; (vii) an evaluation of methods of achieving economies in the cost of rail service operations on lines on which service will be continued including consolidation, pooling, and joint use or operation of lines, facilities, and operating equipment; (viii) the competitive or other effects on or by profitable railroads; (ix) for lines or projects which the state may consider for rail banking, a description of future economic potential such as development of fossil fuel reserves or agricultural production; (x) a statement of the State's projected future for the line or project upon the expiration of Federal assistance under section 5 of the Act (including such considerations as: profitability; state or shipper subsidy; State, shipper, or carrier acquisition; termination of rail service; and, the substitution of other transportation); (xi) a detailed description of alternatives evaluated, including subsidy or discontinuance, and abandonment of service and potential for moving freight by alternate rail service or alternate modes, an explanation of the analysis of each alternative, including the criteria considered in selecting or rejecting the proposed line or project for assistance and identification of the relative costs and benefits of each alternative; (xii) the conclusion of the State as to whether or not the line or project should be selected for Federal or State assistance; and (xiii) a discussion of how each line or project selected for assistance is related to the criteria established as part of the overall State rail planning process.

(5) Group projects for which the State may seek assistance (continuation payments, acquisition rehabilitation, rail banking, rail service substitution) in order of compliance with the State's criteria and goals for assistance as determined under paragraph (d)(4) of this section. This shall be set forth as a summary table which clearly identifies the location of the project and describes the type (subsidy, rehabilitation to Class "X", etc.), estimated amount and expected timing and duration of assistance to be sought.

(6) Describe the participation in the planning process by local and regional governmental bodies, the railroads, railroad labor, rail service users, and the public generally. In the project selection stage, public participation should be specifically sought regarding each project described and analyzed in accordance with paragraph (4) of this subsection and regarding the determination of which of these projects will be implemented. As one element of this participation, the State shall afford an opportunity for a public hearing. Public notice shall be given (in accordance with applicable State law and practice concerning comparable matters) that a draft of the Plan is available for public inspection at a reasonable time in advance of the hearing.

(7) A description of the overall planning process for all transportation services in the State.

(e) *Inclusion of additional information.* If the scope of the State's rail planning process covers matters additional to those required under this section, the State shall, where practicable, include such additional information in its State Rail Plan. Additional information may also be required by the Administrator to clarify specific elements of the plan.

(f) *Adoption of State Rail Plan.* An original and nine (9) copies of the State Rail Plan, and any amendments thereto or revisions thereof, shall be submitted with a certification by the Governor, or by his or her delegate, that the submission constitutes the State Rail Plan or portion thereof established by the State as provided in section 5(j) of the Act. In accordance with Office of Management and Budget Circular No. A-95 Revised, 41 F.R. 2052 (1976), the State Rail Plan shall also be submitted with a certification by the Chief Executive Officer of the designated State agency that the Governor or his or her delegated agency for plan coordination has been afforded a period of 45 days in which to comment on the State Rail Plan. Such submittal shall include an original and nine copies of either these comments or a statement to the effect that there were no comments.

(g) *Submission of the planning work statement.* The planning work statement shall be submitted to the Administrator for review with the State's application for planning assistance.

(h) *Submission and Review of the State Rail Plan.* The Rail Plan should be submitted to the Administrator for review at least 90 days prior to the filing of any application in which the applicant will seek rail service assistance under section 5 of the Act. If the Administrator determines that the State Rail Plan is not in accordance with this part, he will notify the State setting forth his reasons for such determination and afford the State an opportunity for a hearing and an opportunity to amend its State Rail Plan to bring it into compliance with the Act and this part. Where hearings are necessary, they will be conducted on an expedited basis to afford the State maximum opportunity to submit an acceptable State Rail Plan on a timely basis.

(i) *Revisions and amendments of the State Rail Plan*—(1) *Submission.* State Rail Plans shall be updated including revisions and amendments at least on an annual basis but may be revised more frequently at the discretion of the State. The annual update shall be submitted to FRA no later than August 1, of each year, beginning in 1977. All such updates, revisions, or amendments shall be adopted by the State as provided for in paragraph (f) of this section and shall be subject to the same review and approval procedures as the original State Rail Plan.

(2) *Contents.* Annual amendments and revisions shall include as a minimum the following:

(i) A response to FRA comments on previous submittals;

(ii) An update of information in previous submittals which has proven to be incomplete or incorrect as a result of plan implementation;

(iii) Inclusion of revenue and cost information from the past year's operating experience and a reevaluation of service for which assistance is received based on these new data;

(iv) Identification of lines and services which have been discontinued or abandoned since the last submission of the State's plan;

(v) Changes in constitutional or legislative position of the designated agency, including appropriation of State funds for rail purposes;

(vi) Changes in agency designation or responsibilities;

(vii) Revisions in the State's policies, goals or long-range expectations; and

(viii) Other updates which may be appropriate as a result of recent ICC, FRA or railroad activities (such as changes in lines designated as potentially subject to abandonment on the transportation system diagrams published under section 1(a)(5)(A) of the ICA or petitions for abandonment) and FRA's comments on funding applications, program of projects, or grant agreement conditions.

Other amendments or revisions may be limited to the matter which produces the need for such amendments or revisions.

§ 266.11 Certified program of projects.

(a) *Contents.* Except as provided in paragraph (b) of this section, a State shall submit an annual program of projects based on the State Rail Plan, which will lead to specific project applications and which has been certified by the chief executive officer of the State or his or her delegate. The program shall (1) cover the period of October 1 through September 30 of each year, (2) list all projects for which applications will be submitted during such period, (3) provide the anticipated timing of such applications and a written statement by the chief executive officer that the State intends to file such applications during the period, and (4) include the anticipated amount of funds to be obligated and disbursed for the project during the term of the section 5 program, including a quarterly breakdown of needs for the current Federal fiscal year. The chief executive officer shall certify that these costs represent the State's best estimate of costs for the period. The program shall also be the product of the planning process required by § 266.9(d).

(b) *Submission.* The program of projects shall be submitted to the Administrator for review no later than November 1 of each year beginning 1977. The first program of projects shall cover the period from October 1, 1977 through September 30, 1978. When the Administrator has approved a program or a portion thereof, he will notify the State in writing.

§ 266.13 Applications.

(a)(1) *Submission.* Applications for rail service assistance shall be submitted by the designated State agency. All applications for assistance shall be consistent with the current State Rail Plan and with the Certified Program of Projects. Such applications for assistance shall be submitted only for those projects related to eligible services, lines of railroad, or improvements specifically identified in the current State Rail Plan, including where appropriate, revisions and amendments thereto.

(2) States may apply for planning assistance at any time during the planning process. Each application for planning assistance shall comply with paragraphs (a) and (b) of this section, and each such application shall include a copy of the planning work statement required under § 266.9(c) of this part.

(3) Exhibits previously filed with the State Rail Plan or pursuant to a prior application under this part need not be refiled except that such prior filing shall be appropriately referenced.

(b) *Contents.* All applications for rail service assistance shall include:

(1) Full and correct name and principal business address of applicant;

(2) Name, title, and address of the person to whom correspondence regarding the application should be addressed;

(3) Budget estimates for total amount of assistance required for the projects (or development of the State Rail Plan) during the term of the section 5 program;

(4) For applications after the first year of the section 5 program, evidence of the applicant's ability and intent to furnish its share of the total assistance;

(5) Assurance by the applicant that the Federal funds provided under the Act will be used solely for the purpose for which the assistance is sought and in conformance with the limitations on the expenditures allowed under the Act and applicable regulations;

(6) Evidence that the applicant has established adequate procedures for financial control, accounting, and performance evaluation in order to assure proper use of Federal funds;

(7) An opinion of the legal counsel to applicant showing that he or she is familiar with the corporate or other organizational powers of the applicant, that the applicant is authorized to make the application, that the applicant is eligible to receive rail service assistance under the requirements of the Act and of this part, and that the applicant has the requisite authority to carry out actions proposed in the application and to assume the responsibilities and obligations created thereby;

(8) Certification that the applicant is in compliance and agrees to comply with title VI of the Civil Rights Act of 1964, (78 Stat. 252, 42 U.S.C. 2000d et seq.) ("Civil Rights Act"), section 905 of the Railroad Revitalization and Regulatory Reform Act of 1976 (February 5, 1976, Pub. L. 94-210, 90 Stat. 31) ("RRRR Act"), and all requirements imposed by Title 49, Code of Federal Regulations, Part 21, Nondiscrimination in Federally-Assisted Programs of the Department of Transportation ("Civil Rights Regulations"), and other pertinent directives, and that, in accordance with the Civil Rights Act, the RRRR Act, the Civil Rights Regulations, and other pertinent directives, no person in the United States shall, on the grounds of race, color, national origin, or sex, be excluded from participation in, be denied the benefits of, or be otherwise subjected to discrimination under any program or activity for which the applicant receives assistance from the Federal Railroad Administration, and the applicant will promptly take any measures necessary to effectuate this agreement; and

(9) Such other information as the Administrator may require.

(c) *Additional contents.* In addition to meeting the requirements of paragraphs (a) and (b) of this section, each application for rail service assistance shall include:

(1) Evidence of review and coordination of the application within the State in accordance with the applicable sections of the planning work statement and approved State Rail Plan as provided in paragraphs (a) and (d)(6) of § 266.9 of this part; and

(2) Evidence that the applicant has the statutory authority and administrative jurisdiction to develop, promote, supervise, and support safe, adequate, and efficient rail services; that it employs or will employ, directly or indirectly, sufficient trained and qualified personnel; that it maintains or will maintain adequate programs of investigation, research, promotion, and development with provision for public participation; that it is designated and directed solely, or in cooperation with other State agencies to take all practicable steps to improve transportation safety and to reduce transportation-related energy utilization and pollution; and that it has the statutory and other authority to perform its obligations under the Act and the regulations under this part.

(d) *Applications for rail planning assistance.* In addition to meeting the requirements of paragraphs (a) and (b) of this section, each application for rail planning assistance shall include the planning work statement required under § 266.9(c) of this part.

(e) *Applications for rail service continuation payments.* In addition to meeting the requirements of paragraphs (a), (b) and (c) of this section, each application for rail service continuation payments, shall include the following:

(1) The amount of the required rail service continuation payment for each project; and

(2) Description of the arrangements which the applicant has made for operation of the rail services to be subsidized including copies of the proposed operating agreements, leases or other compensation agreements under which the service is to be provided.

(f) *Applications for acquisition.* In addition to meeting the requirements of paragraphs (a), (b) and (c) of this section, each application for acquisition and any necessary rehabilitation or improvement, including for the preservation of future rail freight service, shall include, to the extent applicable, the following:

(1) Copies of the offer of purchase, the proposed contract of sale, and the basis for the proposed acquisition price including two independent valuation appraisals by qualified and certified appraisers;

(2) A description of the steps necessary, and the cost and timing thereof, for the acquisition and necessary rehabili-

V 41 154 AUG 9 76 UMI

tation or modernization of the rail properties for the current calendar year and each succeeding year until completion;

(3) A description of the means by which the State will continue rail freight service after the subsidy period;

(4) A description of the proposed method of repayment of assistance if the rail properties are abandoned, sold, or converted to non-rail use; and

(5) For applications regarding rail banking, evidence that the properties for which assistance is requested have potential for rail freight service such as plans for agricultural development or existence of fossil fuel reserves, including analysis of alternative mode potential or alternative rail service.

(g) *Applications for rehabilitation or improvement assistance.* In addition to meeting the requirements of paragraphs (a), (b) and (c) of this section, all applications for rehabilitation or improvement assistance shall include the following:

(1) A detailed estimate of the materials and labor required to complete the improvement, including, the estimated costs for the current calendar year and each succeeding year until completion, the estimated numbers and kinds of ties and other material involved, and the milepost termini involved;

(2) A description of the method by which the improvement work will be completed, including proposed contracts, as well as a schedule for accomplishing the work, such work to be done;

(a) As force account work by the operator or the Grantee;

(b) By either the operator or the Grantee contracting with the lowest qualified bidder based on appropriate solicitation; or

(c) Under an existing continuing contract between the operator and another firm for such work, provided the Grantee can demonstrate that the costs are comparable to those under (1) and (2); and

(3) If improvement above that necessary to maintain at FRA Class I Track Safety Standards is proposed, the long range plan of the State for operation of the line, accompanied by an evaluation of the merit of attaining the higher track safety standard and an economic analysis of the benefits to be achieved by the higher standard within the State's proposed minimum period of operation of the line, including: (i) evidence that the applicant has considered the costs and benefits of alternatives including use of alternate modes of transportation and alternate facilities, acquisition, discontinuance, and abandonment of service, and other pertinent alternatives in accordance with § 266.9(d)(4) of this part; (ii) projected financial statements identifying the anticipated revenues and expenses over the proposed minimum operation period including a comparison of the revenues and expenses associated with the proposed level of rehabilitation and those associated with rehabilitation only up to that necessary to maintain at FRA Class I Track Safety Standards; (iii) the proposed method of financing the operation of such rail services; and (iv) any additional financial or supporting data as requested by FRA.

(h) *Applications for substitute service assistance.* In addition to meeting the requirements of paragraphs (a), (b) and (c) of this section and of § 266.15 of this part, all applications for substitute service assistance shall include:

(1) A description of the steps necessary, and the cost and timing thereof, for the construction or improvement for the current Federal fiscal year and each succeeding year until completion;

(2) A detailed description of the construction or improvement project which the applicant plans to accomplish, including (i) the goals and related objectives which the project is designed to achieve; (ii) reference to the section of the State Rail Plan containing the evaluation of alternatives; (iii) the proposed method of repayment of assistance if the properties are abandoned, sold, or converted to non-freight uses; (iv) any additional financial or supporting data requested by FRA;

(3) Assurance that the rail freight service which the substitute service is designed to replace will be discontinued and that further Federal assistance will not be requested after the facilities for substitute service are in place;

(4) Assurance that funds provided for highway or bridge construction will not be used to pay the State share of any highway projects under Title 23, United States Code; and

(5) Evidence that the cost and scope of the proposed project is limited to that necessary to replace the rail service being discontinued.

(i) *Execution and filing of application.* (1) Each original application shall bear the date of execution and be signed by the Chief Executive Officer of the applicant. Each person required to execute the application will execute a certificate in the form of Appendix A to this part.

(2) Each original application and certificate, and nine (9) copies thereof, shall be filed with the Federal Railroad Administrator, Department of Transportation, 400 Seventh Street, SW., Washington, D.C. 20590. Each copy shall show the dates and signatures that appear in the original and shall be complete in itself.

(j) *Review and approval of applications.* Applications for rail service assistance shall be submitted to the Administrator for review and approval. When the Administrator has approved an application he will notify the applicant in writing.

§ 266.15 Environmental impact statement.

(a) The Administrator has determined that assistance provided for the purposes of planning assistance, rail service continuation payments, acquisition, rehabilitation or improvement or substitute service (other than service involving highway or highway-related facilities) does not significantly affect the quality of the human environment, except where the acquisition of real estate is involved.

(b) Therefore, applicants for financial assistance for those purposes are not required to prepare or submit an environmental assessment. When applicants request assistance for which the purchase of real estate is required, an environmental assessment shall be submitted with the application. Substitute service involving highway or highway-related facilities shall be subject to the applicable substantive Federal Highway Administration regulations on environmental assessments (23 CFR 771).

§ 266.17 Disbursement.

(a) *Rail service continuation payments.* (1) After receipt, review and approval of an application meeting the requirements of § 266.13 of this part, the Administrator will enter into a grant agreement with a grantee for the Federal share of the estimated amount of project funds necessary to continue the service described in the application. Payments of the Federal share shall be made either in an advance by a letter-of-credit or a Treasury check or by reimbursement.

(2) To be eligible for advance payments, the grantee must demonstrate to the satisfaction of the Administrator a willingness and an ability to establish procedures that will minimize the time elapsing between the receipt of funds by the grantee and their disbursement. In addition, the financial management system of the recipient must provide for effective control over and accountability for all Federal funds. If the grantee is not eligible for advance payments or elects not to receive such payments, the grantee will be reimbursed for eligible expenditures at the end of each fiscal quarter.

(3) A letter-of-credit will be used when the rail service continuation assistance is expected to be provided by FRA for a minimum of one (1) year, and involves or is expected to involve annual payments aggregating at least $250,000. Otherwise, payments will be made only by Treasury check.

(4) Grant agreements for operating assistance will be limited to the period for which the Federal appropriations have been provided for such assistance.

(5) The settlement under the grant agreement shall be made on the basis of a Federal audit which has determined the actual revenues and costs, over the entire term of the agreement, provided that any additional payments of Federal assistance may not be made unless (i) the Administrator determines that the grantee has fulfilled its responsibilities for ensuring the proper and efficient administration of its subsidy program; (ii) the required State share is available; (iii) the necessary Federal funds are available; and (iv) the parties execute a grant agreement or grant agreement amendment for the additional funds determined due. A Federal audit may also establish that a portion of the grant assistance received by the grantee shall be refunded to FRA. Such refunds shall be made as part of the settlement process.

(b) *Other rail service assistance.* After receipt, review, and approval of an application for assistance for State rail planning, acquisition, improvement, or substitute service assistance, which meets the applicable requirements of § 266.13 of this part, the Administrator will enter into a grant agreement for the appropriate Federal share of the allowable costs of acquisition or improvement or both as determined by the Administrator. The terms of payment of the Federal share will be set forth in the grant agreement which may be in the form of either advance payments or reimbursements, in accordance with paragraph (a) of this section.

§ 266.19 Record, audit, and examination.

(a) Each recipient of financial assistance under this section, whether in the form of grant, subgrants, contracts, subcontracts, or other arrangements, shall keep such records as the Administrator shall prescribe, including records which fully disclose the amount and disposition by such recipient of the proceeds of such assistance, the total cost of the project or undertaking in connection with which such assistance was given or used, the amount of that portion of the cost of the project supplied by other sources, and such other records as will facilitate an effective audit.

(b) The Adminstrator or any of his duly authorized representatives shall, until the expiration of three (3) years after completion of the project or undertaking referred to in paragraph (a) of this section, have access for the purpose of audit and examination to any books, documents, papers, and records of such receipts which in the opinion of the Administrator may be related or pertinent to the grants, contracts, or other arrangements referred to in such paragraph.

§ 266.21 Waivers and modifications.

The Administrator may, with respect to individual requests, upon good cause shown, waive or modify any requirements of this part not required by law or make any additional requirements he deems necessary.

PART III:

FEDERAL POWER COMMISSION

SALES OF NATURAL GAS

Opinion and Order Prescribing Uniform National Rate

V41N154 AUG 9 76 UMI

Title 18—Conservation of Power and Water Resources

CHAPTER I—FEDERAL POWER COMMISSION

SUBCHAPTER A—GENERAL RULES

SUBCHAPTER E—REGULATIONS UNDER NATURAL GAS ACT

[Docket No. RM75-14; Opinion No. 770]

PART 2—GENERAL POLICY AND INTERPRETATIONS

PART 154—RATE SCHEDULES AND TARIFFS

Opinion and Order Prescribing Uniform National Rate for Sales of Natural Gas

JULY 27, 1976.

This proceeding was initiated to review the rates established in Docket No. R-389-B pursuant to 18 C.F.R. 2.56a(n) for the 1975-1976 biennium and to consider such changes in the rate structure prescribed in 18 C.F.R. 2.56a as may be required in the public interest. Based upon the evidence of record, we find that a new uniform national base rate for post-January 1, 1975 gas of $1.42 per Mcf, escalating one cent per quarter (equivalent to less than 3% per annum), subject to adjustment for Btu content, State or Federal production, severance, or similar taxes, and gathering allowances where applicable, is just and reasonable and is hereby adopted effective on the date of issuance of this order. This rate is fully cost-based and justified. Additionally, non-cost factors have been examined to ensure that the cost-based rate is just and reasonable.[1] This rate is applicable for (1) sales of natural gas made from wells commenced on or after January 1, 1975, and (2) sales made pursuant to contracts executed on or after January 1, 1975, for the sale of natural gas in interstate commerce where such gas has not previously been sold in interstate commerce.

We also find that a new uniform national base rate for 1973-1974 biennium gas of $1.01 per Mcf, subject to adjustment for Btu content, State or Federal production, severance, or similar taxes, and gathering allowances where applicable, is just and reasonable and is hereby adopted effective on the date of the issuance of this order. This rate is applicable for (1) sales of natural gas made from wells commenced on or after January 1, 1973, and prior to January 1, 1975, and (2) sales made pursuant to contracts initially executed on or after January 1, 1973, and prior to January 1, 1975, for the sale of natural gas in interstate commerce where such gas had not previously been sold in interstate commerce.

The Commission had previously established a single uniform national rate applicable to all producing areas for post-December 31, 1973, gas supplies for the 1973-1974 biennium in Docket No. R-389-B.[2] The Commission also established in Docket No. R-478,[3] as a companion to Docket No. R-389-B, just and reasonable rates for pre-January 1, 1973 natural gas supplies. The rates established herein update the rates established in Docket No. R-389-B pursuant to 18 C.F.R. 2.56a (n).

Contrary to the discussion of the biennial review in Opinion No. 699-H,[4] the gas which initially qualified for the rate prescribed by Opinion No. 699 will not be priced at the same level as the qualifying gas in the 1975-1976 biennium. However, a new rate reflecting updated costs, productivity and a different income tax treatment, is prescribed for sales of natural gas qualifying in Opinion No. 699-H under Section 2.56a(a)(2)(i) and (ii) of the Commission's Regulations. The rates prescribed herein do not apply to sales of natural gas made under new contracts, where prior contracts had expired of their own terms under which such gas had previously been dedicated to interstate commerce.

I. SCOPE OF THE OPINION

A. OVERVIEW

We have determined that a rate of $1.42 per Mcf for qualifying post-January 1, 1975 gas and a rate of $1.01 per Mcf for qualifying 1973-1974 biennium gas is just and reasonable. These rates were derived from an analysis of many factors, including drilling productivity, drilling costs and all of the other costs associated with the production of natural gas. We also considered pursuant to recent court decisions, certain non-cost factors, including the price of competitive fuels, the impact upon supply and demand, inflationary pressures, the nation's natural gas shortage and conservation factors.

In computing the costs for the 1975-1976 biennium, we employ a discounted cash flow analysis by costing the averaging successful well that is drilled in the test year 1976. We also use an additional model to test and extend the validity of the 699-H methodology. A 15% rate of return is allowed on the investment necessary for the exploration and development of natural gas. We employ a depletion life of 15 years, with a pre-production period of 3 years. An income tax component is included in the costing model to reflect the tax reductions experienced in the pre-production years and the tax liability incurred in productive years.

Productivity, expressed in terms of annual non-associated gas reserves added divided by successful drilling footage, has declined significantly from that used in Opinion No. 699. Nineteen seventy-four successful well drilling costs were 14% greater than the trended values used in that opinion. The marginal income tax rate of 48% is used where none was used in Opinion No. 699. These factors account for the significant rate increase over that prescribed in Opinion No. 699-H.

In revising the rate prescribed in Opinion No. 699-H, we employ the same discounted cash flow analysis as used in that opinion with modification of four of the factors used therein. Drilling costs are changed to reflect the higher costs actually incurred during 1973 and 1974. The productivity range has been expanded from seven years (1966-1972) to nine years (1966-1974) to include the reported productivities for 1973 and 1974. The tax treatment has been altered to reflect the tax liability resulting from the repeal of the percentage depletion allowance.[5] The depletion life has also been changed from 18 to 15 years.

Since 1968, the annual consumption of natural gas has exceeded the annual addition of new reserves. Opinion No. 699-H was issued by the Commission to establish a uniform national rate with an underlying purpose of reversing the trend of diminishing dedications of new gas supplies to the interstate market. After

[1] The Supreme Court has previously held that both cost and non-cost factors must be considered in establishing a just and reasonable rate. Permian Basin Area Rate Cases, 390 U.S. 747 (1968), *Mobil Oil Corporation* v. *F.P.C.*, 417 U.S. 283 (1974).

[2] Just and Reasonable National Rates for Sales of Natural Gas From Wells Commenced On Or After January 1, 1973, And New Dedications Of Natural Gas To Interstate Commerce On Or After January 1, 1973, Opinion No. 699, et al.

[3] Just And Reasonable National Rates For Sales of Natural Gas From Wells Commenced Prior To January 1, 1973, Opinion No. 749, et al.

[4] See Opinion No. 699-H, ---- F.P.C. ----, slip opinion at 50.

[5] See Int. Rev. Code of 1954, § 613A(b)(2), added by the Tax Reduction Act of 1975, Pub. L. § 94-12, 601.

review of the actual dedications since the issuance of Opinion No. 699-H, we find that this purpose was not achieved. Total new qualifying gas flowing in interstate commerce is only slightly more than one and one-half trillion cubic feet per year at this time. This low level of new dedication is largely due to substantial cost increases in 1974, increases that could not have been predicted, and thus were not taken into account, in establishment of the rate prescribed in Opinion No. 699-H. Active intrastate markets with higher prices captured most new onshore gas.

The recognition of these cost increases in this proceeding will encourage the dedication of new reserves to the interstate market. The rates established herein will permit increased drilling activity and will place interstate pipelines in a more competitive position in the onshore markets.

We estimate that the immediate impact of pricing post-January 1, 1975 natural gas at $1.42 per Mcf and January 1, 1973 to December 31, 1974 natural gas at $1.01 per Mcf is to add about $1.5 billion to the consumer's cost for natural gas in the first year. Of this amount, approximately 55% goes to the Treasury in higher taxes, 25% compensates for higher costs, and 20% accrues to the producers. Over the longer run, we expect consumers will benefit as a result of reduced reliance on expensive alternate fuels. We believe that this decision will lead to increased gas supply and to greater gas conservation. It will make more gas available for residences and it will help to relieve the pressure of shortages on business and industrial consumers.

B. PROCEDURAL HISTORY

This proceeding was initiated December 4, 1974, with an Order Instituting National Rate Proceeding[6] issued pursuant to the Administrative Procedure Act[7] and the Natural Gas Act.[8] The Commission in that order did not propose any specific rates, terms or revisions to the rules prescribed in Section 2.56a, but stated that it would rely upon the responses filed in this proceeding by the various parties and the staff as the basis for modifying Section 2.56a. To assure the effective and expeditious resolution of these proceedings, all natural gas producers[9] with annual jurisdictional sales in excess of ten million Mcf and all interstate pipeline companies were made respondents to this proceeding. In addition, any interested person, including those persons named as respondents, desiring to participate in this proceeding, were required to file a notice of intention to participate by December 20, 1974.

The December 4, 1974, order initiating this proceeding was modified by notices issued on December 31, 1974, March 4, 1975, May 13, 1975, May 30, 1975, June 10, 1975, July 10, 1975, and July 25, 1975, extending the time for the filing of initial comments to August 11, 1975, and for the filing of reply comments to September 11, 1975.[10]

On June 13, 1975, in this docket the Commission issued an order instituting the "31-lease investigation"[11] to update a prior staff study[12] of offshore Louisiana gas reserves. The order required natural gas companies holding reserves in the subject fields to submit their respective reserve estimates to the Commission by July 25, 1975. Notice was issued on July 11, 1975, extending the time for such filings until July 31, 1975. On July 24 and August 4, 1975, the Commission issued orders denying a number of applications for rehearing of the June 13, 1975 order. Subsequently, a number of producers[13] filed petitions for review of the June 13 and July 24 orders in several courts of appeals. The cases were consolidated in the Court of Appeals for the Fifth Circuit, which denied a motion for a stay of the orders, but directed that the data submitted be kept in confidence. In the face of the court's confidentiality order, the Commission was unable to publish the base data obtained from the producers and seek public comment thereon, as it had originally intended. However, the Commission was able to complete its investigation by subpoena of data from the American Gas Association. On June 21, 1976, after notice to the parties, the Commission incorporated in the record in this proceeding a report by staff of its generalized conclusions from all data, believing the publication to be consistent with the court's confidentiality order. On July 2, 1976, the Court of Appeals entered its opinion, holding that the release of the base data obtained from the producers was within the power of the Commission, if an appropriate basis for release is established.[14] However, release of the base data is not presently contemplated, inasmuch as the purposes of the 31-lease investigation have been largely accomplished.

On June 16, 1975 in this docket, the Commission issued an order[15] inviting the views of the parties on the weight, if any, that should be given to current prices in intrastate natural gas market. The order required comments to be filed by July 24, 1975, and reply comments to be filed by August 15, 1975. By notice issued August 11, 1975, the time for filing comments was extended to September 5, 1975.

On August 4, 1975 in this docket, the Commission issued an order setting forth rate recommendations of the Bureau of Natural Gas (BNG) and the Office of Economics (OEC) and provided parties the opportunity to file comments in reply to staff's comments by September 5, 1975.[16] On October 3, 1975, in this docket, the Commission issued an order clarifying the rate recommendations made by OEC and provided parties a further opportunity to reply to OEC's response by November 3, 1975.[17] In addition to the aforementioned staff rate recommendations, the Pipeline and Producer Rates Division of the Bureau of Natural Gas also made rate recommendations. These were set forth in a Notice of Further Staff Rate Recommendations[18] after the commenting procedure had terminated. In this notice, the Commission provided parties another opportunity to file comments on these additional rate recommendations by April 23, 1976, with replies thereto to be filed by May 14, 1976.

Several complete prospective cost studies were filed by other parties to this proceeding. The United Distribution Companies (UDC) submitted a cost study dated May 14, 1975, that excluded from consideration Alaska, Appalachia, the Gulf of Mexico, and Texas Permian. Indicated Producer Respondents (IPR) submitted on May 30, 1975, a nationwide cost study. On July 24, 1975, UDC submitted estimated costs of natural gas from the Gulf of Mexico. All parties were given the opportunity to comment upon each of the cost studies and numerous reply and supplemental reply comments were received.

The recommended prices in the comments range from a high of $2.84 per Mcf[19] to a low of $.56 per Mcf.[20] The comments contain wide variation on all major elements of the estimated price, including methodology, productivity, well cost, and federal income tax. All of the cost studies were founded upon 1973 and earlier Joint Association Survey (JAS) cost data and 1974 and earlier American Gas Association (AGA) reserves data.

V 41 N 154 AUG 9 76 UMI

The 1974 JAS data and the 1975 AGA data has since been published, and are incorporated herein.

In summary, the natural gas shortage [21] and shortages of other energy supplies require that this Commission take all prudent steps to insure that the rates allowed for natural gas sold in interstate commerce are adequate to bring forth the requisite supplies to meet demand while protecting the "consumers against exploitation at the hands of natural gas companies." [22] Thus, the Commission faces a formidable task: establishing rates high enough to stimulate additional new gas supplies, but not so high as to burden consumers with prices in excess of those needed to elicit such supplies.

To that end and in accordance with § 2.56a(n) of the Commission's General Policy and Interpretations, we have determined that the uniform national rates for gas qualifying hereunder, as set forth in Section 2.56a(a)(1) (i) and (ii) and Section 2.56a(a)(3) (i) and (ii) of the Regulations, is necessary in order to assure an adequate supply of natural gas for the Nation.

C. POLICY DETERMINATIONS

After careful review and consideration of all the evidence submitted in this proceeding, we conclude that the new base national rate herein established for 1975–1976 biennium gas should be made applicable where:

(i) The sale is made from a well or wells commenced on or after January 1, 1975;

(ii) The sale is made pursuant to a contract for the sale of natural gas in interstate commerce for gas not previously sold in interstate commerce prior to January 1, 1975, except pursuant to the provisions of 18 C.F.R. §§ 2.68, 2.70, 157.22, or 157.29 (including sales made pursuant to those sections as modified by Federal Power Commission Order No. 491, et al.), or 18 C.F.R. § 2.75(n), where such a sale is initiated on or after January 1, 1975, provided that no certificate for the subject sale has been issued under the optional procedure (18 C.F.R. § 2.75). [23]

Rather than increasing the rate for new gas qualifying under Opinion No. 699–H to the rate level for post-January 1, 1975 gas, we believe that a separate rate determination is necessary to reflect the additional cost and productivity data gathered for the period from January 1, 1973 to December 31, 1974, and to reflect increased income taxes resulting from repeal of percentage depletion allowances.

Our decision to modify the policy set forth in Opinion No. 699–H, [24] with respect to the effective date on which gas initially qualifies for a new rate, is based on a determination that the increased costs of exploration and production and the decreased productivity of wells should only be reflected in the rates for the corresponding period, and not for a prior period. Since the attendant cost and productivity data for the 1973–1974 biennium can be considered separately, we have determined that the more recent 1975 data should only be considered prospectively and should not affect a 1973–1974 cost-based national rate. The $1.42 per Mcf rate prescribed herein reflects the current costs of finding and producing new gas and exceeds the rate necessary for the lower costs previously incurred in finding and producing gas qualifying under Opinion No. 699–H.

We are aware of the problems occasioned by the continuance of the vintaging concept. The Commission, however, has a responsibility to minimize severe and harmful economic dislocation due to increased rates. [25] In light of the magnitude of the increase of the rate prescribed herein for post-January 1, 1975 gas over the revised rate for 1973–1974 biennium gas, the Commission must abandon its intended policy to establish a single uniform national rate for gas dedicated or wells drilled after January 1, 1973, and must vintage by a 1973–1974 cost grouping to preclude the exaction of excessive and unjustifiable economic rent from flowing gas. [26]

Although the Commission expressed concern in Opinion No. 669–H that such vintaging could discourage the dedication of new gas supplies to the interstate market, [27] we did not anticipate at that time such a dramatic increase in costs and decrease in productivity, necessitating the rate of $1.42 per Mcf.

The Commission also has considered factors other than the traditional cost-based formulary in establishing this rate. We have elicited comments as to the bearing intrastate prices should have on interstate rates and have considered these prices in establishing the rate. In addition, we have considered the Btu equivalency values of residual oil, distillate oil, crude oil, synthetic natural gas and liquefied natural gas. Accordingly, we believe that the price established herein for post-January 1, 1975 gas is sufficiently high to encourage dedication of additional supplies of natural gas to the interstate market and increased exploratory and production activity.

We are aware that the rate prescribed herein for post-January 1, 1975 results in a 173% increase over the base rate established in Opinion No. 699–H. However, this disparity is substantially lessened when actual costs for the 1973–1974 biennium are considered in lieu of the projected costs utilized in that proceeding. [28] While actual drilling costs for 1973 approximated those projections made in Docket No. R–389–B, the actual dry hole costs and successful well costs for 1974 were, respectively, 57% and 14% greater than those projected. The average 1973–1974 actual dry hole cost was 35% greater and the average actual successful well cost was 3% greater than the trended values used in Opinion No. 699–H. Similarly, exploration and lease acquisition expenditures were substantially greater than those projected while average productivity fell substantially below that used in Opinion No. 699–H. Moreover, it is necessary to make a rate adjustment for future production from the 1973–1974 wells due to the increased income taxes resulting from the repeal of the percentage depletion allowance. [29] When these and other adjustments are made to reflect actual costs and increased tax liability, the rate established in Opinion No. 699–H is increased to $1.01 per Mcf. The disparity between that rate and the rate prescribed for 1975–1976 biennium gas amounts to a 41% increase.

For these reasons, it is necessary to establish a new rate for gas from dedications and wells drilled on or after January 1, 1973 and prior to January 1, 1975. This rate would be applicable where:

(i) The sale is made from a well or wells commenced on or after January 1, 1973, and prior to January 1, 1975;

(ii) The sale is made pursuant to a contract for the sale of natural gas in interstate commerce for gas not previously sold in interstate commerce prior to January 1, 1973, except pursuant to the provisions of 18 C.F.R. §§ 2.68, 2.70, 157.22, or 157.29 (including sales made pursuant to those sections as modified by Federal Power Commission Order No. 491, et al.), or 18 C.F.R. § 2.75(n), where such a sale is initiated on or after January 1, 1973 and prior to January 1, 1975 provided that no certificate for the subject sale has been issued under the optional procedure (18 C.F.R. § 2.75). [30]

The rates prescribed herein will not apply to sales made pursuant to contracts executed prior to or subsequent to the expiration of the term of the prior contract where the sales were formerly made pursuant to the permanent certificates of unlimited duration under such prior contracts which expired of their own terms on or after January 1, 1973, or pursuant to contracts executed on or after January 1, 1973, where the prior contract expired by its own terms prior to January 1, 1973. Such sales will continue to be governed by the rate level, including appropriate annual escalations, prescribed in Opinion No. 699–H. [31]

[29] See Int. Rev. Code of 1954, § 613A(b)(2), added by the Tax Reduction Act of 1975, P.L. § 94–12, 501.

[30] 18 C.F.R. § 2.56a(a)(3)(i) and (ii).

[31] 18 C.F.R. § 2.56a(a)(4) and (5).

Opinion No. 749 [32] was issued by the Commission on December 31, 1975, establishing "just and reasonable" rates [33] for gas flowing in interstate commerce prior to January 1, 1973. In that proceeding a comprehensive review of rates for such gas was made which resulted in the establishment of national rates. Rather than allowing flowing gas subject to expiring contracts to increase to the rate prescribed herein, we believe that the rate adjustment for such gas under expiring contracts should be limited to the rate level prescribed in Opinion No. 699–H.

Many comments have been received on this issue. Some advocate the continuance of the policy followed in Opinion Nos. 699 and 639 of allowing the renewal contract to receive the new gas rate upon expiration of the term of the prior contract. Other comments argue for the abandonment of this policy.

Our determination of this issue in this proceeding, however, is governed by different circumstances than those which existed when Opinion No. 699 was issued. In that proceeding, the underlying reason for allowing gas subject to expiring contracts the new gas rate was to insure that the additional revenues generated by this class of sales would be available for expanded exploration and development programs. The level of exploratory and developmental dollars generated by this treatment will remain the same as that found necessary in Opinion Nos. 699 and 699–H by permitting an increase to those rates rather than to the rates prescribed herein.

We have carefully scrutinized the disparity between new prices and old prices to avoid an unreasonable increase in rates. By permitting expiring contracts to increase to the rate established in Opinion No. 699–H, a large increase in rates for "flowing gas" is avoided [34] while additional revenues are insured for expanded exploration and development programs which are required to discover and produce new supplies of natural gas. [35]

Accordingly, a new national base rate of $1.42 per Mcf for post-January 1, 1975 gas and a revised rate of $1.01 per Mcf for 1973–1974 biennium gas will apply on or after the date of the issuance of this order. These rates are applicable to all qualifying sales of natural gas in interstate commerce, including oil-well (casinghead) gas, as well as gas-well gas, and shall remain in effect until modified by the Commission.

These rates are applicable only to jurisdictional sales of natural gas within the United States excluding Alaska and Hawaii ("the lower 48"). These national rates are subject to adjustment for Btu content, state and Federal production taxes, applicable gathering allowance, and the annual escalation provided herein.

II. INTRODUCTION TO METHODOLOGY

The basic new gas costing model or methodology that the Commission has employed in the past has its origins in the *Permian I* proceeding. [36] The model was modified with the initiation of the nationwide rate in Opinion No. 699–H by the inclusion of expenditures for unsuccessful ventures [37] in the investment base, and by the adoption of a discounted cash flow analysis to improve the accuracy of the rate of return calculation. Most of the cost studies submitted by the parties in this proceeding are variations upon the *Permian I* model as revised by Opinion 699–H ("699–H model"). However, the Office of Economics has proposed a further substantial revision in the model with the objective of injecting greater realism in the process ("OEC model").

The business of producing natural gas begins with preliminary geological and geophysical activity followed by lease acquisition and then exploratory wildcat activity at one or more sites. If gas in economically recoverable quantities is found, further exploratory (non-wildcat) drilling continues. This may result in new reservoir discoveries and extensions of previous reserve estimates as the field is delineated. Successful exploratory drilling usually is highly productive (as measured by estimated Mcf recoverable per successful foot drilled) but many dry holes also are drilled. Gas production begins when sufficient gas is ready to flow to warrant gathering costs.

Further drilling in the proven field and further delineation usually continues for a number of years. This "developmental" drilling normally results in further extensions of reserve estimates. While the productivity rate is much lower than for exploratory drilling, far fewer dry holes are drilled.

The 699–H model is directed at costing the average successful well that is drilled during the test year. Obviously, the successful wells that are commenced during any period of time are mixed in purpose—some are exploratory wells that discover new fields or reservoirs and others are developmental wells that capitalize upon fruits of earlier exploratory wells and expenditures. Since exploratory activity is the marginal endeavor that is the principal source of enlarged gas supplies for the future, it should be given careful consideration in a prospective rate determination.

The principal differences in cost between exploratory and developmental activity derive from three elements—costs of exploration and lease acquisition, productivity, and the dry-hole expense that is associated with all drilling. The associated overhead and allocated joint costs of developmental wells drilled or being drilled during the 1975–1976 biennium were incurred in earlier years and presumably are lower than the corresponding current costs. However, that fact is offset by the carrying charge that must be added to these costs until production actually commences. The relatively higher productivity of exploratory wells tends to decrease cost, but the relatively higher dry-hole expense tends to increase cost. On the other hand, the relative lower productivity of developmental wells tends to increase cost while the relatively lower dry-hole expense tends to decrease cost. Since these counteracting factors tend to equalize the costs of developmental and exploratory wells, one cannot conclude that the average cost that is derived from the 699–H model is necessarily erroneous.

The burden of future natural gas supply falls predominately upon exploratory activity. The results of the 699–H model should be tested by a methodology that enables the inquiry to be focused upon the exploratory wells that will be drilled in the biennium and the development that follows.

The OEC Comments in this proceeding outline such a methodology which postulates the pattern of development commencing with geological and geophysical expenditures, proceeding through lease acquisition to a successful exploratory well that is drilled in the test year, and ultimately to additional developmental wells. Estimated reserves that are initially discovered through an exploratory well usually will increase over time as the area (field) is further developed and delineated. Witness Marsh in the IPR comments has suggested a statistical method for estimating the amount and rate of the reserve increase. [38] When this data, coupled with reasonable assumptions regarding the timing of developmental expenditures and the depletion rates of the exploratory and developmental wells, is used in the OEC model, the result is a reasonable estimate of the cost of exploratory wells that are drilled in the test year and of the cost of development of the entire project.

Therefore, we will base our rate determination in this proceeding upon consideration of the results of the 699–H and OEC models.

Both of the models employ the same basic cost elements and data. The OEC model relies upon additional data sources for the separation between exploratory and development costs, but these are separate allocations of the same data rather than the use of different data.

The identity of the base data suggests that if reasonable assumptions concerning operating conditions are held constant between the two models, the indicated price will be in the same general range. [39] While the OEC cost studies suggest a lower price than would be pro-

[32] See Footnote 3, *supra*.

[33] Sections 4(a) and 5(a) of the Natural Gas Act, require that all rates received by a "natural gas company" be "just and reasonable." 52 Stat. 822, 823 (1938); 15 U.S.C. §§ 717c(a), 717d(a), (1970).

[34] Over 500 Bcf of natural gas would fall into this category. This volume would significantly increase in future years.

V 41 154 AUG 9 76 UMI

duced by the 699–H model,[40] they contain:

1. An arithmetic error in the initial OEC comments;

2. Unacceptable assumptions regarding operating conditions; and

3. Policy choices that we must reject.

1. The arithmetic error is the omission of the joint costs of Exploratory Overhead, Other Exploration and Lease Acquisition attributable to the 2.36 Mcf of developmental reserves.[41] If all other factors in the initial study were held constant and only the error was corrected, the indicated price would be approximately 90 cents,[42] excluding any allowance for Federal Income Tax. The error was acknowledged in the Revised OEC Cost Studies,[43] but the magnitude of the correction is obscured because the revised study made other changes in the assumptions underlying the model that had the effect of reducing the corrected price, i.e. the level of joint costs and the lag times for preproduction investment were reduced."

2. The OEC study assumes that exploratory wells have depletion lives of 18 years. However, the OEC model terminates both exploratory and developmental production at the end of 18 years with the consequence that the newer developmental wells are assumed to have successively declining productive lives. The final developmental expenditure in the 17th year is thus assumed to lead to a well that depletes in only one year. There is no evidence in the record to support such assumptions, nor could there be. To the contrary, evidence herein and before the Commission in earlier area rate proceedings demonstrates a much longer depletion period for an overall project or field. Experience also suggests that the principal developmental wells in the same field will have a substantially identical number of productive years.

3. OEC recommends that the offshore expenditures be excluded in computing the lease acquisition element of cost.[45] We cannot accept that recommendation for reasons hereinafter discussed. OEC further recommends that the Federal Income Tax considerations be excluded until additional information is available. OEC suggests the value of the accelerated deductions to the industry be ignored and that no income tax allowance be included with respect to the revenue that is derived from the production. The repeal of the percentage depletion allowance by the Tax Reduction Act of 1975 compels us to consider henceforth both the benefits and burdens of existing Federal Income Tax law.

When appropriately corrected and revised, the OEC format provides a broader and more realistic view of the exploration and development process that commences with the exploratory wells which are drilled in the test year. Certainly, the industry does not premise investment decisions in new field development on an assumption that the exploratory wells are the terminal investments and the reserves therefrom are the ultimate recovery potential. Rather, producers undoubtedly consider the complete developmental costs and potential reserves of a field in their exploratory decisions. Initial overhead investment in exploratory activities and lease acquisitions are considered in relation to the ultimate development of the entire field and the decision to proceed is premised on a recovery of these as well as other costs over the productive life of the field. Thus, conceptually, the OEC model when properly applied offer a valid method of establishing rates for the future, both extending and testing the adequacy of the 699–H model.

A. PRODUCTION AND DEVELOPMENT PATTERNS

Both of the models employ a discounted cash flow method of computing the return element; thus, both require assumptions concerning the timing of the incurrence of costs, tax deductions and revenues. In the 699–H model, the principal costs or negative cash flows occur in the preproduction period and the negative cash flows in the production period (operating expenses, etc.) vary proportionally with the timing of the revenue stream or positive cash flows in that period.

The OEC model, however, introduces an additional timing consideration—when do the costs for developmental drilling occur? The OEC studies assume that the developmental well expenditures occur in proportion to, but are lagged one year behind, the annual increment of reserve additions.[46] There is no direct evidence that would support this pattern of development expenditure. In reality, not all changes in reserve estimates are attributable to drilling or to any significant additional expenditure. Production experience is the most significant contributor to reserve estimate revision. The Marsh reserve addition curve begins to flatten out appreciably after 7 to 10 years and reserves added after the 10th year constitute only 11 percent of the 3.36 Mcf total.[47] We find that in the application of the OEC model, it is more reasonable to assume that the developmental expenditures occur on the average over the 10-year period after production initially commences, and that reserve changes thereafter should be attributed to information enhancement rather than to additional outlays. The assumption of earlier development expenditures is to some extent supported by UDC Comments: "developmental drilling in most fields occurs prior to the commencement of production from exploratory wells; and, in many offshore fields, all development drilling occurs prior to that point in time." [48]

We also shall correct the well depletion life error of the OEC study by adjusting developmental expenditures so as to be recovered over the basic fifteen year well-depletion period that we adopt for this opinion. The resultant field production pattern is a somewhat compressed (because of shorter development and depletion periods) version of the pattern suggested by Witness Ogden [49] and should also be compared with the study of offshore fields submitted by Witness Root.[50]

We, of course, recognize that the OEC model could be utilized with other possible and, perhaps, equally reasonable assumptions that would tend to raise or lower indicated prices and that the evidence is sketchy in relation to any assumptions. However, in view of the fact that the OEC model and the integral assumptions do not constitute the sole basis for supporting the rate that is herein established, those evidentiary limitations provide no basis for attacking the ultimate conclusion.

B. OPERATION OF THE OEC MODEL

The OEC model divides the project development into an exploratory phase and a developmental phase. The exploratory phase consists of the expenditures for exploratory overhead, other exploration, lease acquistion, successful exploratory wells and related dry holes and production facilities for those successful wells. The developmental phase contains expenditures for successful developmental wells and related dry holes, production facilities and recompletion. The costs will in turn be recovered from production from both the exploratory and developmental phases.

The exploratory overhead, other exploration, and lease acquisition items apply to both phases, but no division is required since these costs are common to and precede both types of drilling activity.

The drilling costs and production facilities' costs must be allocated between the exploration and development phases, but the significance of the allocation can be overstated. If the basic pattern of development expenditure is established and it is assumed, as we do herein, that equal developmental expenditures produce equal amounts of natural gas and that all development expenditures have the same recovery rates, the price determined by the OEC model is not very sensitive to the allocation of drilling costs and other production facility costs between the exploratory and developmental phase.[51] If, however, either of the assumptions is changed, the price becomes more sensitive to the relative exploratory and developmental unit costs. In any event, it is necessary to describe the method by which drilling costs and production facilities' costs are allocated between the two phases.

Drilling costs consist of successful well expenditures and dry-hole expenditures reduced to a per Mcf basis. Production facilities' cost is directly proportional to unit successful well cost. Unit successful well costs are derived by dividing the cost of successful drilling per foot by the estimated productivity. Dry-hole costs are derived from dry-hole drilling cost per foot divided by productivity multiplied by the ratio of dry-hole footage to successful wells footage. Thus, the process of determining drilling costs for exploration and development requires the division of the two elements. Separate productivities and the relative dry-hole ratios must be established.

Productivity is defined as reserves added divided by drilling footage. Reserves data published by the AGA is divided into four categories: New Field Discovery, New Reservoir Discovery, Extensions and Revisions. The OEC recommendations excluded Revisions because they are not traceable to drilling activity.[52] New Field Discovery and a portion of New Reservoir Discovery [53] are assigned by OEC to the exploratory phase. Successful well drilling footage categories reported by API are New Field Wildcat, Other Exploratory and total. New field wildcat and a portion of Other Exploratory drilling [54] is assigned by OEC to the exploratory phase. The result is:[55]

$$\text{Exploratory productivity} = \frac{\text{Assigned Exploratory Reserves}}{\text{Assigned Successful Exploratory Drilling}}$$

$$\text{Developmental productivity} = \frac{\text{Assigned Developmental Reserves}}{\text{Assigned Successful Developmental Drilling}}$$

UDC objects to the OEC allocation of reserves, asserting that the AGA New Field reserve data includes some reserves that the estimator anticipates will be produced by developmental wells.[56] However, the AGA has consistently urged that its definition of proved reserves includes only reserves that are closely related to actual drilling. In the AGA letter to which UDC alludes, it is stated:

> In • • • (a new exploratory drilling) area, the Committee will estimate *proved* reserves for areas immediately adjacent to wells which have been tested and found productive. Good geophysical data is not considered adequate reason to estimate large undrilled areas of prospective reservoirs at this point in time.[57]

It is, of course, possible that some new Field Discovery reserves should be placed into the developmental phase. But the only impact of such a shift would be that exploratory productivity would be reduced and developmental productivity increased. Exploratory drilling would then have a higher cost and developmental drilling a lesser cost. It was earlier observed that the model that we here employ is not very sensitive to differing unit cost allocations between exploratory and developmental phases.

III. THE RATE DETERMINATION

A. THE TIMING OF EXPENDITURES

Both the OEC and 699–H models use discounted cash flow analysis to take account of the timing of the cash outflows and inflows. In DCF analyses, it is convenient to label investments that are made prior to the first revenues with negative numbers, –1, –2, etc. We shall denominate 1976 as Year "0", the year which production is assumed to commence.

The timing of the occurrence of the preproduction expenditure is very much in dispute in the record. The cost elements that must be allocated to appropriate preproduction years are Other Exploration, Exploratory Overhead, Lease Acquisition, Dry Hole (Exploratory only in OEC Model) and Successful Well (Exploratory only in OEC Model). The wide divergence among the comments is displayed in Exhibit 1.

In assessing the conflicting evidence, the overall impact that varying the time periods has upon the DCF models also must be considered. Moving a cash outflow back in time by one year increases its present value at year "0" by the discount rate. However, moving a cash outflow back in time by one year also hypothesizes the expenditure to an earlier year's data. The large increases in expenditure levels of recent years, caused principally by inflation, would be successively removed from the base data by additional lagging of outflows. For example, if dry hole expenditure is placed in year –2 rather than –1, the year for the incurrence of the expenditure would be 1974 rather than 1975. We estimate that the dry hole costs increased by approximately 14.9% between 1974 and 1975, offsetting the additional lag effect.[58] Moving the lease acquisition expenditure date back would lead to a similar counteracting impact. For example, if leasc acquisition was moved to year –4, the expenditure year would be 1972. The lease acquisition ratio for the earlier period could be at least 30% less than that which is derived by including the 1973 and 1974 expenditures in the data series. The exploratory overhead and other exploration expenditures are relatively less significant in amount.

[6] UDC comments, May 14, 1975, statement 7 of Ogden, app. B. Comments exclude Alaska, Appalachia, Gulf of Mexico, and Texas Permian.
[7] The BNG recommendation of Aug. 4, 1975, appears to adopt the Permian I approach to timing, with preproduction outlays occurring 1.5 yr before production commences.

Therefore, the ultimate price in this proceeding is not as sensitive to the varying lag time assumptions as it may first appear. In fact, in the precise circumstance of extraordinary recent cost inflation here presented, the significance is quite minimal.

Witness Allen testified for IPR regarding the experience of Phillips Petroleum Company between 1959 and 1974 on 170 leases in 13 states. He estimates that the average time between initial lease acquisition cost and first revenues was 56 to 63.2 months.[59] While Mr. Allen testified to his opinion that the experience was representative of the industry as a whole, onshore and offshore, we also note the testimony of Assistant Secretary of the Interior Carlson that "[I]f all goes well, the average successful gas discovery will be in production within 3½ to 5 years after the lease sale",[60] and this estimate

includes all developmental drilling from the platform. Offshore development involves more elaborate and time consuming preproduction physical activity than onshore development, and we are hesitant to base a nationwide finding upon the experience of a single company when that study suggests an average that exceeds the average offshore period as estimated by the Department of the Interior, and when the report does not reflect the relative mix of onshore and offshore activity. In view of the relatively small impact at this time of a change in the time periods and the lack of definitive evidence of the necessity for change, for this biennial review, we will adhere to the preproduction time lag assumptions that were utilized in Opinion 699–H.

In the DCF analysis we shall continue to reflect the impact of early income tax deductions that are available to producers of natural gas. That approach was adopted in Opinion 699–H. IPR has contended that the 699–H approach was illogical since the Commission there did not include an income tax allowance upon the net revenue.[61] The IPR recently stated that the 699–H "* * * treatment is only appropriate if the Commission is now ready to recognize the existence of a new federal income tax cost applicable to gas."[62]

We herein, consistent with principles established in Opinion 749, include a properly computed income tax payment at the marginal statutory rate of 48% in the cash flow stream of the DCF analysis. It, therefore, is proper to continue to recognize the time value of the accelerated income tax deductions in computing the rate.

The initial BNG Recommendations stated that "the negative tax assumptions utilized in Opinion No. 699–H should be eliminated."[63] Three arguments were offered to support that conclusion but those arguments largely have been overtaken by subsequent events.

First, it was argued that the "negative tax" used in Opinion 699–H would "tend to establish a preference for existing producers and discourage new entrants into that phase of the industry."[64] We note, however, that the "new entrant" by definition has less natural gas production, namely zero, than the amount that is exempted from repeal of the depletion allowance for independent producers.[65] The new entrant will be entitled to take a percentage depletion allowance for several years into the future.[66] The availability of a depletion allowance, for which we have not accounted in this analysis, tends to compensate for any bias embedded in the assumption that intangible drilling costs can be written off immediately against other jurisdictional taxable income. Finally, it is not possible in average rate-making proceedings to account for all possible disadvantages that such a rate might induce.

Second, "no allowance for income taxes has been allowed in existing flowing gas rates, meaning that no taxable income is generated from flowing gas to which this negative income tax can be applied."[67] We have since incorporated into flowing gas rates a six-cents per Mcf allowance for income tax liability.[68] As of July 1, 1976, flowing gas will commence generating a significant income tax component for the industry, which tax can be deferred by reinvestment in new gas exploration and development.

Third, the "time value of money attached to this negative tax is illusory for it does not generate any cash flow—its only effect * * * is to reduce return * * * (or) result in an indirect regulatory intrusion into other non-natural gas activities of the enterprise."[69] Today, the time value is no longer illusory. The industry is realizing or will realize in the near future from its jurisdictional natural gas operations a large amount of taxable income that will be subject to the marginal statutory rate. That income will be derived from rate increases for expiring contracts to the new gas rate established in Opinion 699–H, the increase in rate for gas from wells drilled between January 1, 1973, and January 1, 1975, and flowing gas under Opinion 749. Also, it would be improper to ignore for the long term the impact of the income tax component that we here implement. We do not intrude upon the non-jurisdictional activity of the natural gas producers by recognizing in our rate the immediate cash flow consequences in terms of time value of the income tax deferral (the model does *not* assume a permanent tax saving) that results from continued investment in natural gas exploration and development.

BNG also alludes to but does not implement or advocate,[70] the use of the carry-forward provisions of the Internal Revenue Code [71] to delay the deductions until income is generated by the project. That method was also used without extended comment in a cost study relating to the 699–H price that accompanied several comments.[72] The method would place the focus of the inquiry on revenue and income tax consequences of an individual project or well. However, we do not in this proceeding cost an individual well or a project in isolation. The well or project is the surrogate for the average conduct of the industry in an ongoing enterprise. In fact, the industry does not await production from a new well to deduct the costs of that well—the deduction is taken immediately against taxable income. The value of the tax deduction is realized immediately. It would not be appropriate for us to hypothesize contrary to observed reality.

We also take account of the relatively small investment tax credit that is available for the tangible property investment that is not expensed as intangible drilling costs. We utilize the 30% of successful well cost that is not expensed plus 100% of other production facilities,[73] and apply the investment tax credit of 10%.[74]

B. PRODUCTIVITY

Productivity in terms of Mcf per successful foot drilled is the cornerstone of the analysis used to determine the cost for "new" gas. The productivity for any one year is calculated by dividing the annual non-associated gas reserve additions by the total successful gas footage for that year. Multi-year productivity is the average of annual productivities weighted by drilling footage. In making that computation in the past, the Commission has relied upon the reserve additions published by the American Gas Association and the successful gas well footage published by several sources.[75]

The practice adopted in earlier area rate opinions [76] and in Opinion Nos. 699 and 699–H, and which will be adopted herein, was to average the reserve additions and the successful gas well footage figures over a number of years to determine an average productivity figure that would be used in the calculation of a new gas cost. The magnitude of the productivity calculated by this method is influenced by the number of years that are averaged into the calculation.

The practice of averaging reserve additions and successful gas well footage over a number of years stems from the need to smooth out the year-to-year variation experienced in productivity. Also, the use of multi-year averages helps to correct the known time lag between drilling and discovery and reporting of reserves and to rectify any over or understatement of reserve additions or well footage for a given year or number of years.

Because of the observed instability in year-to-year productivity,[77] the use of short-run productivity data would incur the risk of injecting comparable instability into our rate determinations. For example, if in an earlier period we had used the years 1959–1963, our rate determination would have been based upon an average productivity of 509 Mcf per foot drilled. If we had then reviewed the rate four years later, using the 1964–1967 period, the rate would have been based on 712 Mcf per foot drilled. The increase between the two four-year periods would have required a substantial downward revision in the rate. Updating to the next four years, 1968–1971, would have resulted in a large upward revision in the prescribed rate, since the 1968–1971 productivity was 412 Mcf per foot drilled. For the most recent four-year period, 1972–1975, the productivity was approximately 195 Mcf per foot drilled.[78] We, thus, believe that the rate instability that would follow from rates based on short-run productivity would have an adverse effect on future gas supply.

In Opinion No. 699, the Commission relied upon reserve additions for a ten-year period (1963–1972) to compute the low end of the reasonable cost range and a seven-year period (1966–1972) to compute the high end of this range. The ten-year average resulted in a productivity factor of 552 Mcf per foot drilled while the seven-year period resulted in a productivity factor of 485 Mcf per foot drilled. The Commission ultimately employed the productivity factor of 485 Mcf per foot of successful well drilled in order to reflect the downward trend in productivity and to insure that the rate derived from the cost was sufficient to encourage the exploration and development of more marginal wells.[79]

[74] I.R.C. § 46. The 10% rate has been in effect since Jan. 22, 1975 and is scheduled to be reduced to 7% after Dec. 31, 1976.
[75] There are several sources for the annual successful gas well footage: World Oil since 1947, Oil and Gas Journal for 1947 to 1965, Joint Association Survey (JAS) beginning in 1959, and the American Association of Petroleum Geologists (AAPG) and the American Petroleum Institute (API) reports, both starting with 1966. Over the years, there has been substantial agreement between JAS, AAPG and API figures while World Oil figures were either greater or less than the other reported footage figures by approximately four to five percent.

[77] BNG Recommendations, March 23, 1976, Schedule 2, Sheet 2.

Among the initial comments filed in this proceeding were those of IPR, in which Mr. Marsh argued that 250 Mcf per foot was an optimistic productivity estimate for 1975–1976,[80] while Mr. Roe recommended a productivity factor of 300 Mcf per foot drilled.[81] Mr. Marsh based his recommendations on the application of the linear least squares method to data for the period 1970 to 1974. Mr. Roe based his recommendations on the most recent four-year average (1971–1974). Mr. Roe added that, at the outside, a productivity factor of 320 Mcf per foot could be used if a five-year average were used (1970–1974).

BNG in its recommendations used productivity factors of 454 Mcf per foot drilled based on a 12-year average (1963–1974) and 375 Mcf per foot drilled based on a nine-year average (1966–1974).[82] OEC, using its new costing approach which differentiated between exploratory and developmental productivity, based its productivity recommendations on data for the 1970–1974 period. OEC's recommendations, as clarified in the October 3, 1975 order of the Commission, utilized an exploratory productivity factor of 801.7 Mcf per foot and a developmental productivity factor of 295.5 Mcf per foot. These correspond to a productivity of 333 Mcf per foot calculated in the traditional fashion that ignores the distinction between the two types of activity.[83]

In response to the Staff recommendations, IPR objected to BNG's use of nine-year and twelve-year periods for averaging data to estimate productivity. In light of BNG's recognition of the downward trend in productivity,[84] IPR argues that these longer historical averages are not representative of future projections. IPR also indicated that the Commission should have no uncertainty as to the reliability of AGA reserve data.[85]

The American Public Gas Association (APGA), on the other hand, attacked BNG's cost estimates for reliance on unverified and untested industry reserve and cost data, and argued that the BNG analysis is a gross understatement of the productivity figure. Moreover, APGA stated that only eight months after the issuance of Opinion No. 699–H, BNG's productivity factor had dropped from 485 Mcf per foot to 375 Mcf per foot, a 22% decline, which would indicate that the underlying industry data is "extremely suspect."[86]

On June 21, 1976, we issued a final Staff report [87] on the investigation of AGA reserve data instituted on June 13, 1975, in this proceeding. In this report BNG concluded that although the AGA reserve additions were not accurately reflected for either the Gulf of Mexico 1971–1972 discoveries or the ultimate reserves at year end 1974, the reserve estimates were reasonable in the aggregate.

The primary reason for the uncertainty of the AGA reserve data is the inaccuracy of discovery dates. Of the 29 fields that the Staff determined from producer data to be 1971–1972 discoveries, five were reported by the AGA to have been discovered in other years, one as far back as 1967; five of the fields had not been reported as being discovered at the end of 1974; and Staff could determine that four of the fields reported by AGA as 1971–1972 discoveries were actually discovered in previous years, one as far back as 1965. On the other hand, in 19 fields where Staff, the producer and the AGA all had reserve estimates for 1971–1972 discoveries, there is only a minor difference in the totals of the producer reserves and the AGA reserves. Staff reserves estimates are approximately 25 percent lower in total, but only because Staff adhered strictly to the AGA definition of proved reserves.

With respect to the reasonableness of the reserve estimates in the aggregate made by or reported to the AGA, we conclude that the estimates averaged over an adequate period of time provide a reasonable basis for estimating productivity. The Staff's report of inaccurate reporting of discoveries, the reporting variance between actual field discoveries and the inclusion of the field reserves in the AGA annual report, and the disparity in reserve additions reported by the AGA reinforce our conclusions that using only the most recent data on reserve additions in the suggested four or five-year period is unreliable, and should not be the primary basis for our decision in this proceeding.

As Exhibit 2 indicates, the recent level of productivity reflects a pronounced decline from earlier years. However, we believe a substantial part of this decline can be explained by the change in the composition of drilling activities over the past four years. As Exhibits 3 and 4 indicate, there has been a significant reduction in the fraction of and change in the composition of drilling footage in the higher productivity offshore drilling. We anticipate that a renewal of offshore drilling activity would increase overall gross productivity.

[2] Source: American Petroleum Institute (API), "Quarterly Review of Drilling Statistics for the United States."

Accordingly, we have examined the reserve additions for the most recent ten-year period (1966–1975), nine-year period (1967–1975), eight-year period (1968–1975), and seven-year period (1969–1975). By taking the weighted average gross reserve additions per successful foot drilled for these time periods, we derive average projected productivities of 353 Mcf, 323 Mcf, 279 Mcf, and 248 Mcf per successful foot drilled, respectively. This seven to ten year range of average productivities is the same as that used in Opinion No. 699–H, and is reflected in Exhibit 2, herein.

We have determined that the productivity factors of 279 Mcf and 323 Mcf, per foot drilled, which are derived from eight and nine-year averages, should be used to calculate the "zone of reasonableness" for the estimated cost of new natural gas supplies in this proceeding. Eight and nine-year time spans are of sufficient lengths to insure that reporting lags, lack of information required to make a reserve estimate in any given year, and inaccuracies found in the AGA reports will not unduly influence the end result. At the same time, eight and nine-year averages permit the requisite consideration to be given to the more recent industry experience in finding new supplies of nonassociated and associated natural gas.

We further find that the productivity range of 279–323 per Mcf per foot drilled is appropriate in establishing a just and reasonable rate. These factors fall within the range of the 375 Mcf productivity used by BNG,[83] the 333 Mcf productivity used by OEC,[84] the 250-to-320 Mcf productivity suggested in the IPR comments filed in this proceeding,[85] and the productivity of 291 Mcf estimated by UDC.[86]

We have utilized this productivity range in determining a reasonable cost for producing new gas supplies in order to reflect the downward trend in productivity and to insure that the rate derived from the cost of new gas supplies will be sufficient to encourage the exploration for and development of more marginal gas reserves. These productivity levels also account for the fact that the data for the past four years indicate that there has been a definite decline in the industry's ability to find sufficient supplies of natural gas for the Nation. The Commission has previously recognized that productivity trends would depend upon "whether the dwindling resource effect, or the improved technology will dominate in the future. If the former, productivity over time will decline; if the latter, it may increase." [87] While one or two years of low productivity would not be indicative of the "dwindling resource effect," the data for the past few years show a definite decline in productivity.

The rate prescribed herein based upon a productivity range of 279–323 Mcf per foot drilled should provide an incentive to producers to develop more marginal prospects that were formerly considered uneconomical. The lowering of productivity from that used in Opinion No. 699–H increases the rate allowed for new gas supplies which, in turn, makes more attractive the production of gas from higher cost developments and helps offset higher unit costs associated with gas supplies produced from reservoirs evidencing a low productivity. If we are to reduce the existing gap between supply of natural gas and the reasonable demand therefor, all reservoirs practicably capable of producing significant quantities of natural gas must be found and developed.

The final determination with respect to the appropriate estimate of productivity rests largely upon judgment that reflects consideration of a productivity that realistically may be achieved in this biennium and a productivity that yields a price adequate to induce the necessary drilling activity. We, accordingly, find that the middle of this productivity range provides us with an appropriate basis for determining a just and reasonable rate. The rate of $1.42 per Mcf prescribed herein reflects the use of a productivity factor of approximately 300 Mcf per foot drilled.

We further find that exploratory and developmental productivity estimates reflected in Exhibit 5, are reasonable estimates to use in the application of the OEC model. These estimates fall within the range of the exploratory and developmental productivity estimates determined by OEC.[88] These are also consistent with the overall productivity estimates and Witness Marsh's ratio of ultimate recovery to initial discovery of 3.36: [89]

EXHIBIT 5.—*Productivity reconciliation*

$$\frac{\text{Overall}}{\text{Exploratory}} = \frac{323}{96} = 3.36$$

C. DRILLING COST

The second major factor in the cost of gas production is drilling costs. The basic data from the Joint Association Survey is presented below as Exhibit 6.

EXHIBIT 6.—*Drilling costs per foot (excluding Alaska)*

Year	Successful well cost	Dry-hole cost
1967	22.90	12.14
1968	23.69	12.60
1969	24.35	12.78
1970	26.62	14.33
1971	27.63	15.83
1972	27.53	16.94
1973	27.43	18.99
1974	34.00	26.27

Source: Joint Association Surveys.

In Opinion No. 699–H, the Commission adopted a least squares method for trending actual drilling cost to the 1973 test year. Subsequently, actual data for 1973 revealed that the linear regression line predicted dry hole costs too low and successful well costs too high by equally significant amounts.

Of the three staff studies in this proceeding, all based on data through 1973, two used least squares trending to arrive at a 1976 cost figure for successful and dry hole drilling while the third chose the most recent (1973) figures at the time of the submission. Their estimated drilling costs were:

	Successful	Dry hole
BNG I [1]	$32.61	$18.78
BNG II [2]	27.43	18.93
OEC [3]	32.61	19.78

[1] BNG recommendations, Aug. 4, 1975.
[2] BNG recommendations, Mar. 23, 1976.
[3] OEC recommendations, Aug. 4, 1976.

IPR approved of updating available data, but chided the Commission for being deficient in prescience and advocated the use of more judgment and a curvilinear regression line to provide a more reliable estimate.[95] Utilizing such method, Witness Auten for IPR estimated successful well cost for 1974 of $28.07 per foot and for 1975 of $28.08 per foot.[96]

Witness Ogden for UDC estimated that 1974 drilling costs would be 40% greater than 1973.[97]

The actual 1974 successful well cost reported by JAS was $34.00 per foot, an increase of approximately 24% over 1973, $5.93 greater than Witness Auten's estimate and $3.75 greater than would be indicated by a 1973–1974 linear regression line. Dry hole cost has increased similarly. A linear regression line would predict 1974 costs between approximately $18.00 and $22.00, varying with the length of the series used to fit the line. Witness Auten, relying upon curvilinear regression analysis, estimated the 1974 dry hole cost at $20.49. Witness Ogden applied his estimated 40% increase in drilling to dry holes. The actual 1974 dry hole cost reported by JAS was $26.27, an increase over the 1973 level of approximately 39%.

The extraordinary inflation of recent years suddenly has affected drilling costs to a degree that no submitted statistical trending method would yield an accurate prediction. We are, however, again confronted with a "test" year for drilling, 1975, that is one year ahead of the available JAS cost data. The continuing general inflation requires that the task of updating actual data be once again undertaken. There is no comprehensive, long-term price index for petroleum industry drilling. The IPAA for several years published only quintennially a comprehensive oil and gas drilling cost survey and index, but in 1973, the IPAA commenced issuing the reports annually.[98] Between 1969 and 1973, the IPAA index tracked actual experience as reported by JAS reasonably closely. While the 1969 index was 100 and the 1973 index was 131.5,[99] the average increase in successful well and dry hole costs as reported by JAS between 1969 and 1973 was approximately 24%. Furthermore, the extraordinary increases from 1973 to 1974 provide a rigorous test of accuracy. The 1973 IPAA cost per foot index is 83.0, 1974 is 100.0, and 1975 is 114.9. If the 1973 and 1974 IPAA indices had been used to estimate 1974 JAS costs, the indicated costs per foot would have been $33.05 (compared to $34.00 actual) for successful gas wells, and $22.81 (compared to $26.27 actual) for dry holes.[100] For that period, the accuracy of the IPAA index substantially exceeds the accuracy of any submitted form of regression analysis.

The IPAA index shows a further 14.9% increase from 1974 to 1975.[101] The continued upward pressure upon oil and gas-well drilling costs is borne out by the Bureau of Labor Statistics (BLS) index for drilling machinery which increased 24% between 1974 and 1975, and 14% from February 1975, to February 1976.[102] Also the BLS shows similarly escalating wage costs; average hourly earnings rose 14.6 and 12. 2 percent between February 1974–75 and 1975–76, respectively.[103] Thus, the IPAA appears to be a reasonably accurate reflection of actual experience, and we here adopt it in preference to regression analysis for the purpose of trending the 1974 JAS data to the 1975 test year.

To obtain the 1975 drilling costs per foot we converted the 1973 and 1974 JAS costs to constant dollars, using the IPAA index for drilling costs per foot. The averages of the 1973 and 1974 constant dollar costs for successful wells and dry holes of $33.53 and $24.56 per foot, respectively, were adjusted to 1975 dollars by applying the 14.9% increase indicated by the IPAA index. The 1975 projected costs are:

EXHIBIT 7.—*Well costs (excluding Alaska)*

[Dollars per foot]

Year	Current dollars		Index[1]	Constant dollars	
	Successful	Dry hole		Successful	Dry hole
	(1)	(2)	(3)	(4)	(5)
1973	27.43	18.99	83.0	33.05	22.81
1974	34.00	26.27	100.0	34.00	26.27
1975	[2] 38.53	[2] 28.20	114.9	[3] 33.53	[3] 24.54

[1] Projected: 1973–74 average × 114.0.
[2] Average 1973–74.

Sources (1) and (2): Joint Association survey. (3): IPAA report of the cost study committee, "Summary of Committee Activities," May 1976, adjusted index. (4) and (5): (1) and (2) divided by (3) for 1973 and 1974.

1. *Successful well costs*

The estimated successful well costs per Mcf for 1975 are obtained by dividing estimated successful well costs per foot by the estimated productivity of such drilling. In the 699–H model, the cost per foot of drilling of $38.53 divided by the overall productivities of 279 and 323 yields a succesful well cost of 13.81 and 11.93 cents per Mcf, respectively. The various cost studies submitted herein all utilized the same methodology, but, of course, arrive at different unit costs because of differing estimated well cost and productivity.

To convert the overall successful well cost to the separate elements of exploratory cost and developmental cost for the OEC model, the same base drilling cost is used for both, but the differenng produc-

874

Developmental successful well cost=
38.53=17.76¢/Mcf

217

2. *Dry hole costs*

Dry hole costs are estimated by multiplying the drilling cost per foot by the fraction of dry hole feet drilled per successful well foot drilled to obtain dry hole cost per successful foot and then dividing by the productivity of successful drilling to obtain dry hole costs.

The dry hole to successful well footage factor is derived by allocating dry hole footage between oil and gas production and relating the allocated gas dry hole footage to successful gas well drilling footage.[104] Both BNG studies use a dry hole to successful well factor of .84 derived from 1974 data. IPR used a factor of 1.0,[105] the same as used in Opinion No. 699-H. This factor has been declining in recent years. The data from 1969 through 1974 shows a more or less steady decline. The factors for more recent years are:

1973	.85
1974	.84
1975	.80

We find that the factor for the most recent year is a reasonable projection for the future and we adopt .80 as the factor for this proceeding.

Historically, the Commission has increased the dry hole factor by 1.08 to reflect an earlier finding that deeper dry hole drilling occurs where the objective is non-associated natural gas. There is no evidence that would modify that earlier finding and we adopt it here.

We, therefore, find the dry hole cost for 1975 to be:

$28.20\times.80\times1.08\div323=7.54$ cents per Mcf.
$28.20\times.80\times1.08\div279=8.73$ cents per Mcf.

In the OEC model dry hole costs for exploratory and developmental drilling activity follow the same logical development, using their respective dry hole factors and productivities:[106]

Productivity=323
Exploratory:
$28.20\times4.98\times1.08\div960=15.80$¢/Mcf
Developmental:
$28.20\times.3717\times1.08\div252=4.49$¢/Mcf
Productivity=279
Exploratory:
$28.20\times4.98\times1.08\div874=17.35$¢/Mcf
Developmental:
$28.20\times.3717\times1.08\div217=5.22$¢/Mcf

D. OTHER PRODUCTION FACILITIES

The generally accepted method for estimating other production facilities cost is to use a fraction of successful well costs. This fraction is the ratio of other production facilities costs plus the cost of production overhead investment to successful well costs as reported to the Commission by producers and pipeline affiliates.

All of the cost studies in the record adopt this method, differing only with respect to the fraction employed. UDC used the fraction 0.226 that was adopted in Opinion No. 699-H [107] and was derived from data in Docket No. AR69-1. BNG derived a 0.232 fraction from the more recent data in Docket R-478.[108] OEC adopted the BNG figures.[109] IPR, also relying upon data in Docket No. R-478, computes the fraction at 0.268.[110] The difference between BNG and IPR is attributable principally to the inclusion by IPR of a $152,568 item for "Incomplete Construction Application To Production." [111] We find that it is appropriate to include the cost of incomplete construction applicable to production to make the base data consistent. The Docket No. R-478 well costs data include expenditures for drilling that is not complete at the reporting date, and it therefore is proper in developing the ratio to include the comparable item for incomplete production facilities. We therefore find the ratio to be 0.268.

Productivity=323
Other production facilities=
$11.93\times0.268=3.20$¢/Mcf
Productivity=279
Other production facilities=
$13.81\times0.268=3.70$¢/Mcf

We employ the same cost per Mcf for other Production Facilities in both the 699-H and OEC models.

E. OTHER EXPLORATION

The submitted cost studies offer several methods for computing the Other Exploraton Cost element. BNG followed the traditional method of multiplying the lease acquisition cost by the ratio of national other exploration costs divided by national lease acquisition costs. Initial BNG comments determined the ratio to be 0.3042 on the basis of 1972–73 data [112] while the subsequent BNG comments found the ratio to be 0.5258 based upon the 1967–73 average.[113] IPR used a slightly more elaborate process but maintained the relationship of Other Exploration costs to Lease Acquisition costs. IPR trended its data to 1975 and found the cost to be 4.18 to 5.20 per Mcf.[114] UDC combined national other exploration costs and national exploration overhead expenditures and related them to national dry-hole expenditures.[115]

Given the erratic nature and the basic determinants of lease acquisition expenditures, a stable relationship between Other Exploration and Lease Acquisition is not to be expected.

OEC related Other Exploration costs to successful well costs (a method used by IPR in Docket No. R-389-B) and found a more stable relationship.[116] Given the basic arbitrary nature of these allocated costs, no better relationship could be expected. We therefore adopt a ratio based upon successful well costs and average data for the five years 1970–1974 as reflected in Exhibit 8.

EXHIBIT 8.—*Exploratory Other Cost*

(Millions of dollars)

Year	Exploratory other	Gas Allocation factor	Gas other exploratory costs	Successful well costs	Fraction
(1)	(2)	(3)	(4)	(5)	(6)
1967	740			502	
1968	770			494	
1969	782			606	
1970	728	0.3764	279	618	0.451
1971	746	.3800	293	613	.478
1972	766	.3825	299	802	.373
1973	867	.3704	270	998	.271
1974	1,174	.4538	338	1,267	.267
Average 1970 to 1974					.368

Sources: (2): JAS. (3): OEC, table 7, column (4). (4): (2, lagged 3 years) times (3). (5): JAS. (6): (4)/(5).

Other Exploration costs occur in year −3 in our models; therefore, the Other Exploration expenditures attributed to gas are lagged three years behind successful well costs in developing the fraction. A two-year lag would be more precise for the 699-H model since it assumes that all drilling occurs in year −1. The OEC model spaces drilling over several years and year 0 is assumed to be the 50th percentile year. There would be no significant difference in the ratio between two and three-year lags and we therefore use the same ratio in both models. We find Other Exploration to be 0.368 of successful well costs.

Productivity=323
Successful well=$11.93\times0.368=4.39$¢/Mcf
Productivity=279
Successful well=$13.81\times0.368=5.08$¢/Mcf

[104] **The allocation data is contained in Appendix A for 1974 and 1975.**

[116] **OEC Recommendation, October 3, 1975, Table 14.**

F. EXPLORATORY OVERHEAD

BNG, OEC and IPR follow Opinion No. 699-H and relate Exploratory Overhead to Exploratory Other costs plus dry-hole costs. UDC combined Exploratory Overhead with Other Exploration and related both directly to dry-hole costs. BNG and OEC used a fraction of .1319. IPR trended data to 1975 and arrived at a fraction of 0.1509. In the model used herein, the expenditure occurs in year −3 or 1972, and thus there is no necessity to trend data. Given the time sequence of cash flows we are observing, technically the Exploratory Overhead should be related to Other Exploration in year −3 and to dry-hole costs in year 0. But given the small difference that such an elaborate procedure would make, we use a concurrent relationship and derive an average fraction for 1967–74 data of 0.133 as developed in Exhibit 9.

EXHIBIT 9.—*Exploratory overhead costs*

[Millions of dollars]

Year	Exploratory other	Exploratory overhead	Dry hole costs	Coincident fraction
(1)	(2)	(3)	(4)	(5)
1967	740	206	802	0.133
1968	770	204	826	.128
1969	782	210	888	.136
1970	728	189	873	.118
1971	746	206	864	.128
1972	766	239	1,606	.135
1973	867	293	1,070	.151
1974	1,174	387	1,660	.137
Total 1967 to 1974	6,573	1,934	7,989	.133

(2) through (4), Source: JAS
(5)=(3)/[(2)+(4)]
We find exploratory overhead costs to be:
Productivity=323
Exploratory overhead=$0.133\times[4.39$ (OE) $+7.54$ (dry hole)$]=1.59$ cents per Mcf.
Productivity=279
Exploratory overhead=$0.133\times[5.08$ (OE) $+8.73$ (dry hole)$]=7.84$ cents per Mcf.

G. LEASE ACQUISITION

All of cost studies submitted in this proceeding relate lease acquisition costs to successful well data. BNG and UDC used the ratio of total lease acquisition costs to total successful well costs.[117] IPR converted lease acquisition expenditures to dollars per foot of successful wells drilled.[118] OEC allocated lease acquisition costs to gas on a relative value basis and then related gas lease acquisition costs in period −2 to successful gas well costs in period zero, following the timing scheme we adopt here.[119]

All these procedures reveal that there is no systematic relationship between the two components, nor should there necessarily be one. Lease acquisition costs will fluctuate with both the offshore lease activity by the Federal government and the prospective price/cost relationship assumed by producers, while successful well costs or footage drilled should exhibit greater stability. As shown in Exhibit 10, lease acquisition costs increased greatly in 1973 and 1974, so that, depending upon the time period over which we choose to average for our projection purpose, the ratio of lease acquisition to successful well costs or footage drilled could vary greatly. At the one extreme, using 1973–74 data, we find the ratio of the lease acquisition cost to producing well cost to be 1.97, while for the 1967–72 period the ratio is 0.67.

EXHIBIT 10.—*Lease Acquisition Cost*

[Millions of dollars]

Year	Lease acquisition cost	Cost of producing wells	Fraction
(1)	(2)	(3)	(4)
1967	829	1,497	0.55
1968	1,578	1,583	1.00
1969	1,137	1,723	0.66
1970	714	1,706	0.42
1971	642	1,507	0.43
1972	1,722	1,808	0.95
1973	3,646	2,005	1.82
1974	5,659	2,707	2.09
Total 1973 to 1974	9,305	4,712	1.97
Total 1967 to 1972	6,622	9,824	0.67
Total 1967 to 1974	15,927	14,536	1.10

Sources (2) and (3): JAS, joint oil and gas costs. (4)=(2)/(3).

Given this variability and the underlying process, we find it reasonable to assume the 1967–74 average lease acquisition costs are 1.10 times the cost of successful wells. This should be compared with the ratios in the record: 1.408 in the initial BNG cost study; [120] 0.868 in the subsequent BNG cost study; [121] the effective ratio of 1.42 submitted by IPR; [122] and ratio of .507 implicit in the OEC cost study.[123]

OEC contends that offshore lease acquisition costs should be excluded from the cost computation because they have been determined by the profit prospects while onshore lease acquisition costs are a reasonably accurate measure of the value of the land in alternative uses and the damage associated with drilling and production operations.[124]

It can equally well be argued that since the offshore productivity is much higher than the onshore productivity the high offshore lease costs are simply reflective of the true resource value of the natural gas. That value belongs to all citizens of the United States, not merely to the bare majority who consume the bulk of interstate natural gas. It is quite appropriate for the government to demand a price for offshore leases that returns the true value to the rightful owners through the U.S. Treasury.

In any event, the argument is somewhat academic in the context of our decision. In fact, the Department of the Interior follows a policy of rejecting bids that do not adequately reflect the value of the reserves underlying the leases. In addition, the natural gas producing industry has committed large sums of money for existing leases. We must therefore include an increment for lease acquisition cost in our rate determination that reflects costs already incurred by the industry, and that recognizes the realities of reasonable offshore costs to support a high level of future leasing.

We thus apply the ratio of 1.10 to successful well costs to obtain the estimated lease cost component:

Productivity=323
Lease acquisition cost=11.93×1.10
=13.12¢/Mcf
Productivity=279
Lease acquisition cost=13.81×1.10
=15.19¢/Mcf

H. RECOMPLETION AND DEEPER DRILLING

The allowance for recompletion and deeper drilling originated in the *Permian II* proceeding [125] where we found that such expenditures were approximately three to five percent of successful well costs.[126] Based upon successful well costs at the time, the amount was .21 cents per Mcf. In Opinion 699, the Commission on the basis of the cost studies submitted by the parties allowed .20 cents per Mcf without relating it to the successful well costs. In this proceeding, IPR trended the percentage and suggested that the allowance should be 5.5 percent of the successful well cost.[127] The other cost studies in this proceeding used the 0.20 cents per Mcf derived from Opinion 699-H. In view of the significant increases in drilling costs in recent years, we find that the recompletion and deeper

[117] **BNG Recommendations, August 4, 1975, Schedule A–3, March 23, 1976, Schedule 3. UDC Comments, May 14, 1975, Statement 7, Exhibit A, Schedule 9. The UDC study relates only to onshore areas and excludes also Alaska, Appalachia, and Texas Permian so the derived ratio is quite low.**

V 41 I 154 AUG 9 76 UMI

drilling allowance should be increased to remain in the three to five percent range of successful well costs and should be established at .50 cents per Mcf.

I. OPERATING EXPENSES AND REGULATORY EXPENSES

All cost studies use essentially the same operating expense of 3.10 cents per Mcf.[126] That amount was derived initially from data in *So La II* [127]; was used in Opinion 699 and was reconfirmed by data from Docket R–478.[128] We find that the amount of 3.10 cents per Mcf should be applied in this proceeding.

In Opinion 699–H the Commission adopted .20 cents per Mcf as the allowance for regulatory expense. IPR and UDC continued the use of that amount.[131] However, a subsequent analysis by BNG of data in Docket R–478 suggests that the allowance should be reduced to .10 cents per Mcf and BNG proposed that amount in this proceeding.[132] We accept the latest available data and find that regulatory expense to be .10 cents per Mcf.

J. WORKING CAPITAL

All parties used the methodology employed in Opinion No. 699–H to compute working capital, differing only in the parameters applied.

The basic methodology assumes working capital is needed to support (1) direct exploratory and production expenses, (2) related materials, supplies and prepayments, and (3) "lease play". Items in the first set are assumed to amount to one-eighth of the annual expenditures (corresponding to a 45-day collection period). Items in the second set are related proportionally to the first, and lease play requirements are proportioned annual lease costs.

UDC employed the same proportionality factors that were used in Opinion No. 699 and which were derived from the data in Docket No. AR69–1. BNG, OEC and IPR, on the other hand, derive their proportionality factors from the data in Docket No. R–478 and we believe the more recent data is preferable.

While BNG, OEC and IPR all agree on the proportionality factors of 1.48 for the items related to production expense and 1.5 for lease play, there is slight disagreement between the first two and the latter on the factor for items related to exploratory expenses, 1.21 and 1.2357, respectively. We accept the former. Thus we obtain the working capital needed to produce 1 Mcf per year as:

Productivity=323
1.5×13.12 (lease acquisition) $+\frac{1}{8}$ [1.48×3.10 (production expenses) $+1.21\times13.52$ (exploration expenses)] $=22.30¢$
Productivity=279
1.5×15.19 (lease acquisition) $+\frac{1}{8}$ [1.48×3.10 (production expenses) $+1.21\times15.65$ (exploration expenses)] [133] $=25.73¢$

Since we are assuming production of 1 Mcf over 18 years (−3 to +14) one eighteenth of the above figures are appropriate:

$$\text{Working capital} = \text{in} - 3 = \frac{1}{18}\times 22.30 = 1.24¢/\text{Mcf}$$

$$\text{Working capital} = \text{in} - 3 = \frac{1}{18}\times 25.73 = 1.43¢/\text{Mcf}$$

Recovery is assumed to occur at the end of +14.

	323	279

K. ALLOCATION OF COST TO LIQUIDS

Some liquid hydrocarbons are produced jointly with most nonassociated natural gas. The price of the natural gas is subject to the jurisdiction of this Commission, but the price of the liquid hydrocarbons is not. A portion of the total cost of exploration and development for the joint products must be assigned to the liquids to prevent the natural gas consumer from bearing an excessive cost burden, but, since the products are joint, there is no single correct method of allocation. We have recently reviewed various allocation methods in Opinion 749,[134] and concluded that the "modified-btu" method was the most appropriate method for flowing gas.

Historically, the Commission has utilized the "net liquid credit" method for new gas costing. With that method, the estimated net revenues to the producer from the three basic types of liquids—lease condensate, plant condensate, and plant liquids—are related to a single Mcf of natural gas production,[135] and treated as a credit in the process of determining a price that is based upon the total costs of exploration, development and production for natural gas and liquids. Thus, the net liquid credit method inherently regulates, indeed it insures, the rate of return recovery from liquids production at the level determined to be just and reasonable for natural gas. The producer is ensured, but limited to, the just and reasonable rate of return for the liquids, without regard to the return that the marketplace might dictate therefor.

The BNG Comments and OEC Comments herein all utilized the same net liquid credit estimate of 8.45 cents per Mcf that was derived upon a 1974 Staff estimate of prices.[136] IPR submitted a cost study that utilized the 2.89 cents net liquid credit from Opinion No. 699. That was based upon pre-1973 prices,[137] which, of course, were significantly lower than the current liquid price levels. UDC proposed a "vapor volume" method by which costs are allocated upon the basis of the relative volume of the reservoir that is occupied by the respective products.[138] UDC assigned approximately 2.5% of costs to liquids.

In Opinion No. 749 we rejected the allocation methods that are based solely upon physical characteristics, such as volume or relative Btu content. We therein determined that the highest degree of fairness was most likely to result from an allocation method that is founded upon the relative economic values as established in unregulated markets. That proposition is applicable equally to the gas-liquids allocation in the costing of new gas. The net liquid credit method relies upon the economic values of only one of the products (the liquids), ignores relative values and places the benefits, as well as the burdens of regulation upon the unregulated product. On the other hand, the modified-Btu method is based upon the estimated relative unregulated prices of both of the joint products. Thus it allows the markets to regulate the return on the liquids. We reaffirm that the modified-Btu method is the most appropriate allocation method.

Having recently reviewed the data and established a prospective modifying factor in Opinion 749, we reaffirm the factor of 1.5 for the condensate liquids.

The liquids that are extracted in the processing plant consist largely of the heavier liquefied petroleum gases, and some light gases e.g. propanes and butanes. These products have a lesser Btu-content per barrel, a lesser relative value, and are more nearly related to natural gas than the condensate, which is similar to a light crude oil. Therefore, we find that the plant-extracted liquids should be placed upon Btu parity with natural gas and the modifying factor should be 1.0. The most recent available production data for 1975 from the Bureau of Mines and the AGA is used to establish the prospective allocation. The allocation ratios are derived from Exhibit 11. We find that 9% of the costs should be assigned to liquid production, and the remaining 91% assigned to natural gas.

[126] IPR arrives at 3.03 cents because of an assumed 17% royalty. IPR Comments, May 30, 1975, Appendix L, Exhibit DWA–1, Schedule 9.

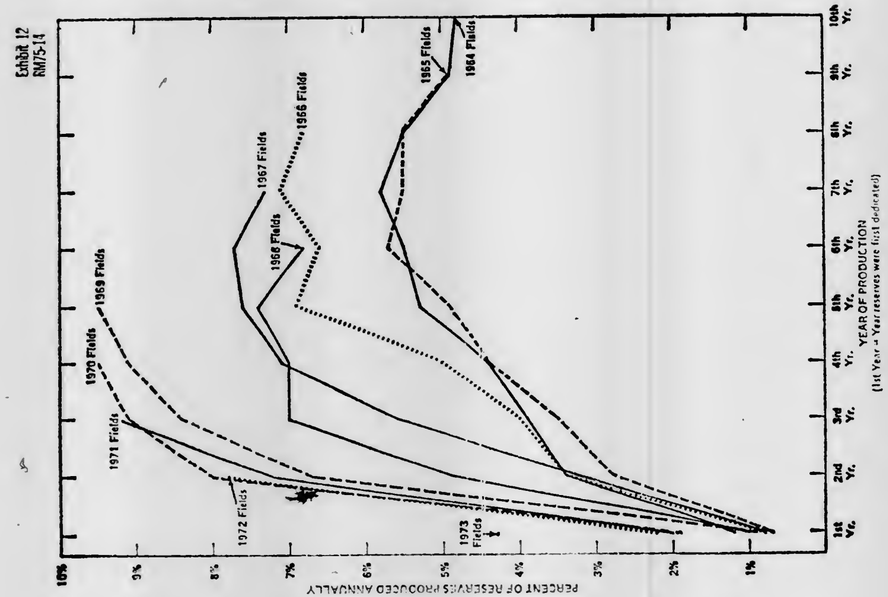
L. DEPLETION PERIODS

The assumed depletion rate and life for the well or project determines the rate of recovery of the investment and thus significantly affects the amount of return on investment that is required and the resultant cost-based price. In *Permian I* [139] the Commission adopted the examiner's finding of a 20-year well life and level annual production. The 20-year period was derived from the typical contract term of that era. The producers argued that the actual well life was at least 22 years, but the Commission rejected the exception on the ground that the bias was more than offset by the level production assumption. The Commission noted that wells commonly do not produce at a level rate, rather "production begins to decline some 7–12 years after the well begins to flow" [140] with the result that cost recovery is more accelerated than cost recovery under level production.

In *SoLa I* [141] the Commission perceived a "downward" trend in the depletion period and relied upon the cost studies that assumed an 18-year depletion period. In *Permian II* [142], the Examiner noted the admission by the Producers that an accelerated draw-down was occurring and stated that a "level closer to 18 years than 20 years is clearly indicated • • • " [143]



The Commission again addressed the issue of declining depletion periods in Opinion No. 699, observing that the "present needs for additional supplies of natural gas have caused reservoirs to be depleted at greater rates than in the past." [144] The Commission specifically rejected the 20-year period and adopted an 18-year period, noting that even it might be "somewhat overstated." [145] The evidence in this proceeding and the evidence in the records of other recent proceedings before the Commission, suggest that the 18-year period indeed is an overstated average for the product of current and future drilling.

First, an analysis of the FPC Form 15 data demonstrates a pronounced trend over the past ten years toward more accelerated production rates from reserves dedicated to interstate pipelines. Exhibit 12 displays the ratio of annual production to the most recent reserve estimates at the end of the year for the fields. The table demonstrates that the more recent fields added to Form 15 display progressively more rapid rates of depletion. For example, using the third year of field life as a baseline, the percentage of production in that year in relation to the gross reserve estimate (cumulative production plus remaining reserves) for the fields at the end of that year has increased steadily from 3.9% for fields added in 1964 to 9.2% for fields added in 1971. We recognize that Form 15 data includes associated, as well as nonassociated reserves and thus may tend to understate actual rates of take in nonassociated gas fields. But that tends only to support the observed trend.

A = Amount of annual production.
R = Gross reserves (plus remaining cumulative production).

Second, a study of 14 trillion cubic feet of offshore reserves by Witness Root for UDC indicates that the larger offshore fields (more than 400 Bcf) will be depleted in approximately 18 years and the smaller fields in 14 years. The pattern of field development that is indicated by the production rise and decline necessarily implies an average well life substantially less than the life of the entire field.[146]

Third, the "Optional Procedure" [147] cases that have been before the Commission involve more than 2.5 trillion cubic feet of reserves in such diverse areas as offshore Louisiana, onshore Louisiana, the Permian Basin, the Hugoton-Anadarko area and the State of Alabama. The evidence submitted by the producers in those proceedings estimated the well depletion periods typically at about ten years, never in excess of 17 years.[148]

Fourth, the evidence submitted in Docket No. RI75–112 contains detailed production patterns for approximately 140 reservoirs in the offshore area. The average reservoir life for those reserves is estimated by the producers to be between four and six years.[149] The reservoir life, of course, does not relate directly to well life because many wells, particularly in the offshore area, involve successive completions in a single well bore. Reservoir life is relevant to the present inquiry because recompletions into new reservoirs are treated as new wells for rate purposes.

Fifth, the evidence in the *IOGA* case involving 1,000 wells establishes accelerated early production even in the relatively low-permeability sands of the Appalachian area.[150] The average well life is 26 years, but 53 percent of the reserves are produced within the first five years and the composite production schedule has a present value equal to level production for less than 13 years.

Sixth, while IPR used the 699–H 18-year depletion life in its basic cost studies, its gathering study indicated that the weighted average life of the gathering systems, all of which were installed since January 1, 1970, to be 16.1 years.[151]

Seventh, UDC recommends a 15-year depletion period because such a period "would more nearly reflect anticipated future experience due to the need to maintain production of maximum levels to satisfy current needs." [152]

Finally, as the Commission noted in *Texas Gulf Coast* [153] "shortening of the (depletion) period is evidenced as the shortage of gas becomes more pronounced."

We find, therefore, that the available evidence establishes the necessity to reduce the assumed well-depletion period from the 18-year period. The 18-year period originated at a time when the more typical gas sales contract called for a daily production to reserve ratio of 1 : 7300 or a twenty-year life. Today, there is a continually worsening national shortage of gas in the interstate market and the more typical contract calls for minimum daily production of from 85% to 100% of the daily well capacity. The maximum rate of take of an average or typical well, of course, is much faster than a constant rate of take implied by an 18-year level production pattern.[154]

We find that a 15-year period for well depletion will more nearly conform both to the actual experience reflected by the evidence and to the need to encourage a relatively high deliverability from future wells.

We will continue to assume a level production for the 699–H model because the record does not reflect precise data from which the typical well depletion rate could be determined.

The OEC model is based upon a pattern of field or project development. In the application of that model we also shall use a 15-year well depletion period. There is, however, evidence from this and other proceedings that suggests patterns of production from fields as opposed to wells. The following graph (Exhibit 13) indicates the field production curve that was placed in evidence in *Permian I* [155] which is based upon a 37-year production life. That curve is, of course, heavily influenced by the onshore production and the moderate take levels of the pipelines prevalent at the time of Permian I. UDC submitted in this proceeding an analysis of the production schedule for 14 trillion cubic feet of offshore reserves with a field life of 18 years.[156] That also is charted. Since, in this proceeding, we must attempt to reach an average of all areas, we have attempted in the application of the OEC model to derive a hypothetical field production pattern that falls between the indicated onshore and offshore activity. We have made reasonable assumptions concerning well depletion rates and the rates of developmental drilling. The resultant production pattern is charted as the middle curve in Exhibit 13.

V 41 154 AUG 9 76 UMI

M. RATE OF RETURN

Among the initial comments filed in this proceeding, IPR submitted cost studies based upon a 17% rate of return that yielded a unit cost of $2.37 per Mcf.[157] On behalf of the Producers, Dr. Solomon recommended a rate of return in the range of 17% to 18% computed on a DCF basis after taxes. He stated that the rate of return should be increased to reflect the rise in utility bond rates from 1965 to the present and the increased risks accompanying new investments in gas production from deeper and more remote locations.[158] The GHK Company and Gas Anadarko Ltd. recommended a rate of return of at least 33% for wells drilled below a depth of 15,000 feet because of the high costs and risks associated with such drilling.[159]

Both BNG and OEC in their recommendations employed a 15% rate of return using the DCF methodology.[160] OEC pointed out that Opinion No. 699–H increased the effective rate of return by using a true rate of 15% rather than a nominal 15% rate on the average rate base. OEC further noted that inflationary expectations have moderated since the issuance of Opinion No. 699–H, which has the effect of raising the real rate of return over that implicit in the 15% nominal rate of return allowed in Opinion No. 699–H.[161]

In response to Staff recommendations, IPR stated that in calculating true yield on investment, BNG amortized investment on a unit of reserve basis over the productive life of the gas property which resulted in a declining annual revenue rate. It was argued that this rate design was contrary to the rate design of Opinion No. 699–H.[162] The Producers further argued that the 15% rate of return utilized by Staff was inadequate. UDC submitted cost studies using overall rate of return levels of 15% and 17% but without endorsement of either.[163]

The increasing rate of return allowed in the various area rate proceedings reflected the changing economic conditions. Where a 12% rate of return was found to be adequate in the first two area rate proceedings,[164] the higher cost of capital and the need for additional incentives to encourage greater investment in exploration and development programs resulted in the allowance of a 15% rate of return in the most recent area rate opinions.[165] In response to Dr. Solomon's comments we note that the 300 basis point increase in the allowed rate of return from the mid-1960's to the present approximately matches the rise in longterm interest rates over the same period.

In Opinion Nos. 699 and 699–H, the Commission adopted a comparative approach in determining a 15% rate of return, based upon the opportunity cost of capital concept. In that proceeding, the Commission determined that a 15% rate of return was comparable to the returns earned by other extractive industries, utility companies, industrial concerns, and the overall earnings of large integrated producers and the predominantly pure producer firms.[166]

More recently, in Opinion No. 749, we again used a 15% rate of return to establish the just and reasonable national rate for gas flowing prior to January 1, 1973.[167] In this opinion, however, less reliance was placed on the "comparative earnings" of the petroleum industry,[168] and greater emphasis was put on the comparison of returns on equity. Therein, we determined that a 15% overall rate of return yielded a 17.73% return on common equity while all industry groups examined showed returns on equity of 13.3% and 14.1% in 1972 and 1973, respectively.[169]

For these same reasons, we adopt the 15% overall rate of return employed in Opinion Nos. 699–H and 749. No evidence introduced in this proceeding is persuasive that a change in that judicially reviewed rate of return is now required or justified. The 15.00% overall return represents a 16.98% return on common equity [170] which is higher than that realized by most other industries examined, as reflected in Appendix C.

Although the 15% return on total capital as well as the equity returns under it are higher than the average returns realized by most industries, it is necessary to compare it with the returns necessary to attract new venture capital, rather than with the average established returns on combined total investment which involves a lower degree of risk. Unfortunately, we have no precise way of determining the marginal rates of return for new venture capital which are required for the average new natural gas project before funds will be invested. However, when all of the factors herein discussed are evaluated, the total return allowed by the Commission is within a permissible "zone of reasonableness." [171]

On that premise, it is our judgment that the 15% overall return is the appropriate incentive rate required to finance the exploration, development and production programs which must be undertaken to produce the new natural gas supplies necessary to fulfill the existing and future interstate demand.

However, we must account for the fact that the interest on the debt portion of the capital is deductible for tax purposes. Rather than computing the interest deductions throughout the production life of the property, we shall, for convenience, adopt the equivalent method of adjusting the computational rate of return to reflect the tax deductibility of interest costs. In implementing this approach, we have relied upon the most recent capital structure for the group of petroleum companies reported by Chase Manhattan Bank. This data reveals that a computational 14.16% rate will be the equivalent of 15% overall before consideration of the interest deductions.

EXHIBIT 14.—*Rate of return* [1]

(1) Type of financing	(2) Amount (millions of dollars)	(3) Composition (percent)	(4) Direct cost (percent)	(5) Direct weighted cost (percent)	(6) After-tax cost (percent)	(7) After-tax weighted cost (percent)
Long-term debt	25,591	21.81	[2] 8.00	1.75	[5] 4.16	0.91
Preferred equity	335	.29	[3] 8.25	0.02	8.25	0.02
Common equity	91,405	77.90	[4] 16.98	13.23	16.98	13.23
Total	117,331	100.00		15.00		14.16

[1] Alternate derivation:
(i) Overall return 15.00
(ii) Less interest on debt 1.75
(iii) Equity return 13.25
(iv) Tax on equity return $\left(13.25\times\frac{.48}{.52}\right)$ 12.23
(v) Before tax return [(i)+(iv)] 27.23
(vi) After tax return [(v)×.52] 14.16

[2] Assumed; 1974 actual interest expense was $2,478 million on an average total short- and long-term debt of $32,047, implying an average rate of 7.7 pct. We adjust upward slightly to allow for refunding since 1974 at higher rates than embedded cost.
[3] Assumed.
[4] Implied allowance in setting 15-percent overall rate of return.
[5] After-tax cost equals Before-tax cost multiplied by (1.48), where .48 is the marginal tax rate.

V 41 154 AUG 9 76 UMI

N. FEDERAL INCOME TAXES

Several parties have expressed concern over the treatment of Federal income taxes. In essentially identical initial comments filed on May 30, 1975, the Pennzoil Companies, the Rodman Corporation, Tenneco Oil Company and Texas Gulf, Inc. urged the Commission to provide an allowance for Federal income taxes in computing the new national base rate.

In Opinion Nos. 699 and 699–H, the Commission did not provide an allowance for Federal income taxes due to the absence of an evidentiary basis and its inability to hypothesize potential tax liabilities in a tax system that provided immediate write-off of intangibles and contained a percentage depletion allowance. Producers were considered to have no ascertainable income tax liability since those deductions were available as a deduction to offset income that would otherwise be taxable. Where producers sought special relief for Federal income taxes payable, the Commission referred producers to special relief procedures wherein submission of the appropriate tax returns would be required to establish the allowance for such taxes.[172]

The Staff in its recommendations issued in this proceeding stated that there was insufficient data for estimating the income tax liability of producers [173] and that it was impossible to evaluate the impact of the Tax Reduction Act of 1975 [174] on producer costs.[175] It was accordingly recommended that the Commission obtain an evidentiary basis to permit income tax estimation. In response to these recommendations, however, IPR, UDC, Pennzoil, Rodman, Tenneco, and Texas Gulf argued that no additional evidence was needed with respect to the rate impact of the elimination of percentage depletion on actual tax liabilities.

The Tax Reduction Act of 1975 amended the Internal Revenue Code as it applies to the exploration for and production of natural gas. This legislation effectively repealed percentage depletion for natural gas produced on or after January 1, 1975. Excepted from this repeal, however, were natural gas sold under a "fixed-price contract," [176] "regulated natural gas prior to July 1, 1976," [177] and specified quantities of natural gas sold by independent producers and royalty owners. Unlike most other provisions of that Act which were drafted to reduce taxes, the provisions dealing with percentage depletion were designed to increase the Federal income taxes paid by the petroleum industry.[178]

Subsequent to the enactment of this legislation, the Commission issued Opinion No. 749 [179] establishing a just and reasonable national rate for pre-January 1, 1973 gas supplies. In that opinion, the Commission made an allowance for increased Federal income taxes as of July 1, 1976 principally because of the repeal of precentage depletion. This allowance was based on the statutory rate of 48 percent [180] and resulted in an increment of 6.08 cents per Mcf.

As previously discussed, the costing models that we employ recognize the income tax deductions that are available to the producing industry at the earliest point at which the deduction may be taken under the Internal Revenue Code. The time value of the accelerated deductions that are available to the natural gas industry is thereby preserved for the benefit of the consumer. Of course, a deduction once taken is not again available to a taxpayer. Therefore, only the amount of the investment that is not "expensed" in the preproduction period is available to be recovered by cost depletion or depreciation during the productive life of the well or the property. The income tax deductions that are available during the production period thus consist only of the rather small annual depreciation item plus the additional ordinary and necessary business expenses, i.e., production, interest, and regulatory expenses.

We recently reviewed the legal authorities regarding income tax treatment of producers and concluded that the "regulated activities are properly viewed as a separate corporate entity and the Federal income tax allowance computed accordingly." [181] In this proceeding we have accounted for all income tax deductions and credits that are relevant to the exploration and development of natural gas that is jurisdictional to this Commission.[182] Once the appropriate deductions have been accounted for, the Internal Revenue Code specifically requires that an income tax be imposed upon the remaining income at the statutory rate for corporations—48% on income above $25,000.

Some have assumed that the natural gas producers will pay zero or very little tax, notwithstanding the repeal of the percentage depletion allowance. However, in the present context, that assumption can be founded upon only one underlying premise—that the industry in the future will expend a constantly increasing amount for exploration and development and that the increased level of intangible drilling cost deductions generated by those increased expenditures will be available to offset additional taxable income from the wells or projects that we are here costing.

Increases in gross exploration and development expenditures may be caused by either of two distinct phenomena: (1) increases in unit costs resulting either from general inflation or the "depleting resource" effect (the more scarce the resource the more expensive it is to find), or (2) increases in overall production reflective of a growing industry.

It is not necessary or appropriate to establish rates in this proceeding in reliance upon a projected increase in intangible drilling expense deductions if that projected increase is predicated upon a future increase in the unit cost of exploration and development. Those unit cost increases will be fully and properly accounted for in each subsequent biennial review.

In each successive review the full extent of an increase in income tax deductions that is generated by increasing unit costs will then be deducted from the gross investment in determining the rate. The net investment cost (hence the rate) for that future natural gas will be reduced accordingly. If we attempted to "capture" that future level of deductions in this proceeding, logic and fairness would require that the amount thus captured not be deducted once again in the future. The consequence would be a quagmire of calculus suitable only for an ethereal mathematician with a crystal ball. For present rate purposes, it is quite sufficient to recognize increased unit costs (and the income tax deductions generated thereby) at the time when the increase actually is realized. In addition, the taxable income from the natural gas wells that are drilled in this biennium provides a portion of the continuing justification for recognizing the full impact of the future deductions in the year in which the future investment is made.

Therefore, the only source of future income tax deductions that properly could

[172] The Commission's treatment of Federal income taxes in those opinions was affirmed by judicial review. *Shell Oil Co., et al.*, v. *F.P.C.*, 520 F. 2d 1061, 1080–1081 (5th Cir. 1975).

[173] See Comments of the Office of Economics, August 4, 1975.

[174] 89 Stat. 26, Pub. L. 94–12, § 401 adding § 613A to the Int. Rev. Code of 1954.

[175] See Comments of the Bureau of Natural Gas, August 4, 1975.

[176] Under § 613A(b)(2)(A) of the Code, "natural gas sold under a fixed-price contract" refers to gas sold by a producer under a contract in effect on or after February 1, 1975, under which the price cannot be adjusted to reflect the increased tax liability occasioned by repeal of the depletion allowjusted to reflect the increased tax liability ance. Price increases for such gas after February 1, 1975 are presumed to take the increased tax liability into account unless the taxpayer can prove otherwise.

[177] Under § 163A(b)(2)(B) of the Code, "regulated natural gas" refers to gas produced and sold by the producer before July 1, 1976 which is subject to the jurisdiction of the Commission, the price for which has not been adjusted to reflect the increased tax liability. Price increases for such gas after February 1, 1975 are presumed to take the increased tax liability into account unless the taxpayer can prove otherwise.

[178] See e.g., 121 Cong. Rec. H 1151–H 1161; H 1162; H 1163–H 1166; H 1168–H 1170; H 1171–H 1172; H 1177–H 1191 (February 27, 1975, daily ed.).

[179] Docket No. R–478, issued December 31, 1975.

[180] Int. Rev. Code of 1954, § 11.

[181] Opinion No. 749–C, issued July 19, 1976, mimeo. See also pp. 14–17.

[182] The foreign tax credit, for example, is not at all relevant to the producer activity that we directly regulate—the sale of natural gas in interstate commerce. We could not apply profits from foreign oil operations to reduce the price of domestic natural gas, nor could we do the same indirectly by appropriating tax credits that are traceable solely to the foreign operations.

be considered as potentially reducing taxes with respect to natural gas that we here price is deductions generated from real resources growth in the industry. Any such projection would be pure speculation. We of course anticipate that the industry will exhibit some growth as a result of the rate that we here establish, but precise quantification and allocation of the income tax consequences thereof is no more possible than precise estimation of the supply elasticity for natural gas. In any event, unless the United States Geological Survey (USGS) estimates of probable hydrocarbon reserves are extremely pessimistic, it would be incorrect to project a long term increase in the production of natural gas.

An additional reason for employing the full 48% tax rate, even if producers are not now paying an average rate that high, is that new supplies come from decisions to explore for and develop new fields. Marginal income therefrom is likely to be taxed at the 48% rate. Thus to employ any lower rate or extraordinary write-offs would be unrealistic. Therefore, a tax allowance based on the statutory rate has been included in our cost-based analysis, hereinbefore discussed, and is reflected in the rate prescribed.

Initial and reply comments were also submitted by several respondents with respect to the treatment of income taxes, seeking modification of the DCF methodology utilized in Opinion Nos. 699 and 699–H. These comments argued that the DCF costing models in that proceeding were inconsistent and discriminatory. For these same reasons, the Bureau of Natural Gas in its recommendations also suggested elimination of the negative income tax assumptions utilized in Opinion No. 699–H.[183] These comments and recommendations have been carefully considered and addressed in detail in the discussion of timing herein.[184]

O. ROYALTY

Royalty expenses represent the percentage of the gross receipts the producer must pay to the landowner for the privilege of extracting the gas from reserves underlying that land.

Opinion 699 adopted an allowance of sixteen percent to reflect increased royalty expenses, whereas prior Commission opinions employed an average royalty allowance of fifteen percent. Both BNG and OEC recommend retention of the 16 percent figure for the 1975–76 biennium. Those parties, who in their comments addressed the issue directly, proposed a royalty allowance of 17 percent.[185] We have previously considered some identical data and similar arguments and arrived at 15% royalty.[186] We believe it both reasonable and prudent to adopt the 16 percent allowance recommended by our staff.

The basis for this determination is our belief that the lower onshore royalty expense tends to reduce slightly that royalty expense incurred offshore. The Commission prices gas for a particular well either from the date the drilling or the sales commence, which is an approach that gives no consideration to the age of the lease that is being drilled. In view of the fact that many new onshore wells are drilled on existing leases which traditionally append only ⅛ royalty (12½%), it is reasonable to believe that the federal offshore royalty of 16⅔% is mitigated by the lower onshore rate.

Therefore, pending more reliable or convincing data we choose not to alter the 16% royalty allowance found to be just and reasonable in Opinion No. 699.

P. ESCALATION

While we have departed in this Opinion from the general objective of avoiding vintaging if possible, we still find this objective desirable and believe a properly constructed escalator might avoid the need for vintaging the 1975–1976 gas in subsequent biennial reviews. In periods of rising cost due to inflation and declining productivity, we would expect the rates for subsequent biennia to rise. If we failed to take that increase in rate into account in establishing the price for the current biennium, producers could earn in excess of the fair rate of return as the subsequent rates rose above those set in the previous biennial reviews.

Thus, we find it desirable to employ an escalator that takes future expected price increases into account. In order to avoid delayed drilling or dedication toward the end of each year in anticipation of escalation, we have decided to depart from the use of an annual escalator, and to use, instead, a quarterly escalator. We have chosen an escalator of 1.0¢ per quarter as a minimum escalator, implying a modest inflation in cost and some recovery in productivity with renewed exploratory drilling effort. The effect of this escalation is to move from a constant price of approximately 163¢/Mcf (based on the assumption that no further price increases are to be expected) to an escalating price beginning at 142¢/Mcf in 1976 and increasing by 4.0¢/Mcf in each succeeding year. The revenue stream with the escalator has the same present value as it would with a level price. In using an escalator, we are committed to permit the price of gas from wells drilled during the current biennium to escalate by at least the amount chosen here or its comparable present value so as to provide a 15% rate of return on investment. We therefore find that the escalator is an integral part of this rate.

Q. PRICE DETERMINATION

We have found that a productivity factor of 279 and 323 should be used to establish the upper and lower limits of the "zone of reasonableness." The prices resulting from these limits, derived below, are:

Model	With escalator	
	279	323
699–H	154.1	131.3
OEC	153.5	131.0
Average	153.8	131.2

We thus find that the "zone of reasonableness" is 131¢ per Mcf for the low case and 154¢ per Mcf for the high case, each escalating at 4 cents annually.

1. The 699–H Model Applied

a. 279 Productivity. The cost components and policy choices discussed above can now be brought together in the 699–H model of cost-based price determination.

Exhibit 15 consolidates the cost elements and tax effects to determine the after-tax cash flows. The percentage expensed for income tax purposes (intangibles) is the same as used in Opinion No. 699–H and in both the IPR and UDC and one BNG study. A 48% tax rate is used to compute the tax savings. A 10 percent investment tax credit is assumed taken in period −1 on the depreciable assets associated with successful well and production facilities outlays. Of the total gross outlays of 48.85¢/Mcf, 36.72¢/Mcf is expensed, resulting in a tax reduction in the pre-production period of 18.40¢/Mcf (including 0.78¢/Mcf investment tax credit) and after-tax cash flows totaling 30.45¢/Mcf.

EXHIBIT 15.—*Cost summary and tax treatment for 699–H model at 279 productivity*

[Cents per thousand cubic feet]

(1) Component	(2) Gross outlay	(3) Percent expensed	(4) Expensed amount	(5) Tax reduction from expensing	(6) Net cash flow	(7) Time

[184] Section III. A., *supra*.

[185] IPR comments, May 30, 1975, Appendix B, p. 14.

[186] Area Rate Proceeding (South Louisiana Area), 46 F.P.C. 86, 132–3 (1971).

V 41 N 154 AUG 9 76 UMI

Using the 699–H timing sequence outlined in Exhibit 1, supra, and a 14.16% [185] rate of return, the present value at year 0 of the after-tax cash flows is 40.42¢/Mcf. Taking 91% of this cost as the share allocatable to natural gas production [186] results in a present value cost of 36.78¢/Mcf.

Exhibit 16 displays the after-tax cash flows resulting from the sale of 1 Mcf with a 16% royalty rate, 91 percent cost allocation and a 48% tax rate. At a price of P cents per Mcf, the after-tax cash flow is (.4368P+3.79) ¢ per Mcf.

[185] This is the computational rate that equals a 15% overall return adjusted to reflect interest deduction. See p. 80, supra.

[186] See Cost Allocation, pp. 64–66, supra.

EXHIBIT 16.—*Cash flow from sales (cents per thousand cubic feet) at 279 Mft*[3]

Price		P
Royalty		.16P
Net revenue		.84P
Less:		
Operating expenses	3.10×.91= 2.82	
Regulatory expenses	.10×.91= .09	
Depreciation	12.13×.91=11.04	13.95
Income before taxes		.84P−13.95
Taxes at 48 percent		.4032P− 6.70
Net income		.4368P− 7.25
Add:		
Depreciation		11.04
After-tax cash flow		.4368P+ 3.79

The price determining process is to equate present value of the cash flows from the cost items to the present value of the cash flows from the sales. The present value of a dollar per year for 15 years starting at time 0 is

$$\left\{\sum_{t=0}^{14}(1.1416)^{-t}=6.9562;\right.$$

the present value of the cash flows from the sale of 1/15 Mcf per year for the 15 year period from 0 through 14 is

$$\left\{\frac{1}{15}\times 6.9562\times(.4368P+3.79)=.2026P+1.758\right.$$

Equating this to the pesent value of the cost items results in a constant price of

$$\left\{\begin{array}{l}.2026P+1.758=36.78\\ \text{or}\qquad P=172.9\text{¢ per Mcf.}\end{array}\right.$$

As we indicated earlier, we find that 4¢ per year escalator is appropriate. Since the present value of a 1¢ escalator, adjusted for income tax and royalty, is 0.948¢, i.e.,

$$\frac{1}{15}\sum_{t=0}^{14}t(1.1416)^{-t}(.52)(.84)=.948\text{¢},$$

using a 4¢ per year escalator results in a base year price of P_o, where P_o is such that

$$.2026P_o+1.758+.948(4)=36.78$$

or

$$P_o=154.1\text{¢ per Mcf}$$

Thus the 699-H/cost-based price is 154.1¢/Mcf beginning in 1976 and escalating at 4¢ per annum.

b. *323 Productivity.* Exhibits 17 and 18 are patterned after Exhibits 15 and 16 but with cost and revenue computations based upon a 323 Mcf productivity. Equating the present value of the cost items to the present value of the revenue stream we find a constant price of

$$\frac{1}{15}\times 6.9562\times(.4368P+3.08)=.2026P+1.428=31.82$$

or

$$P=150.0\text{¢ per Mcf}$$

With a 4¢ per annum escalator, the base year price of P_o is

$$.2026P_o+1.428+.948(4)=31.82$$

or

$$P_o=131.3\text{¢ per Mcf.}$$

EXHIBIT 17.—*Cost summary and tax treatment for 669–H model at 323 Mft*[3]

[Cents per thousand cubic feet]

2. *The OEC Model Results*

a. *Project Development and Rates of Take.* Unlike the 699–H model, which costs the average successful well drilled during the test year, the OEC model is based upon the full development of a field or project, from preliminary geological and geophysical activities to shutdown.

As discussed in Section III.L, supra, we find it reasonable to assume a fifteen year life for a well, with declining rates of take for the well over time. In order to arrive at a field rate of take which falls between the limits set forth in Exhibit 13, we find that a developmental period of 10 years, with steadily declining rates of developmental drilling activity, is a reasonable assumption. Exhibit 19 displays the results of these assumptions in terms of the production of 3.36 Mcf over a 25 year field life.

Exploratory drilling, which alone yields 1 Mcf of ultimate recovery for every 3.36 of ultimate recovery from the field, is done in year −1 with production spread over the 15 years, denoted years 0 through 14. Developmental drilling, resulting in an additional 2.36 Mcf, takes place over the next 10 years, 0 through 9. Reserves from developmental drilling produce for fifteen years, following the same rate of take as applied to the exploratory well. The resultant total annual production, as set forth in the next to the last column of Exhibit 19, sums to 3.36 Mcf over the 25 year period. Dividing annual production by 3.36 results in the rate of take curve for the field found in the last column of Exhibit III and plotted as the curve No. 2 in Exhibit 13.

b. *279 Productivity.* The OEC model has preproduction exploratory expenditures in the same time sequence as the 699–H model previously described. The developmental drilling expenditures, however, are spread over 10 years, in the proportions set out at the bottom of Exhibit 19. The resultant outlays and their timing are found in Exhibit 20.

The exploratory outlays of Exhibit 20 are based upon exploratory activity which is assumed to produce 1 Mcf ultimate recovery from exploratory wells and leads to 3.36 ultimate recovery from the field through subsequent developmental drilling. Thus, the exploratory expense items, Exploratory Other, Exploratory Overhead, and Lease Acquisition are entered at 3.36 times the values used in the 699–H model as set forth in Exhibit 15 (slight differences are due to rounding).

Exploratory and developmental successful well and dry hole costs are as determined in Section III.C., supra. Production Facilities and Recompletion costs are the same per Mcf as used in the 699–H model.

The present value at time 0 using the computational discount rate of 14.16% of the after-tax cash flows from the exploratory cost outlays detailed in Exhibit 20 is 81.66¢, including the related investment tax credit assumed taken in year −1.

Assuming a 4 percent rate of inflation on developmental drilling costs beginning in year 1, and using the developmental Mcf production totals found in Exhibit 19 in conjunction with the cost per Mcf for developmental activity from Exhibit 20, the present value of the after-tax cash flows associated with the developmental costs of the field is 30.94¢, including investment tax credit considerations (also escalating at 4% per year).

Working capital is 3.36 times that employed in the 699–H model application, but spread over 28 rather than 18 years. Thus,

working capital=$1.43\times 3.36\times\frac{18}{28}=3.09$¢.

Total	99.75		80.81	38.79	60.97	
Developmental (cents per thousand cubic feet): [2]						
Successful wells	17.76	70	12.43	5.97	11.79	0-9
Dry hole	5.22	100	5.22	2.50	2.71	0-9
Production facilities	3.70	0	0	0	3.70	0-9
Recompletion	.50	70	.35	.17	.33	0-9
Total	27.18		18.00	8.64	18.53	

[1] Depreciable or depletable assets: 99.75−80.81=18.94; investment tax credit: .10(4.41−3.09+3.70)=0.50; present value at time 0 of net cash flows at .1416=81.66.

[2] Depreciable or depletable assets: 27.18−18.00=9.18; investment tax credit: .10(17.76−12.43+3.70)=0.90; present value at year 0 of net cash flows at .1416=30.91.

NOTE.—(4)=(2)×(3); (5)=(4)×.48; (6)=(2)−(5).

Exhibit 21 summarizes the present value of the after-tax cash outflows from the cost components. A present value at time 0 of 106.52¢ is required to produce 3.36 Mcf of natural gas after total costs have been allocated between gas production and liquids.

EXHIBIT 21.—AFTER-TAX CASH OUTLAYS AT 279 PRODUCTIVITY (CENTS PER M FT.[3])

Cost component:	*Present value at 14.16% at time=0*
Exploratory outlays	81.66
Developmental outlays	30.94
Working capital:	
Outlay In −3 of 3.09	4.59
Recovery In +24 of 3.09	(0.13)
Total present value in time=0	117.06
Allocation factor (multiplied by)	.91
Present value of cost item Cash flows (cents per 3.36 M ft[3])	106.52

The present value at time zero of the production of 3.36 Mcf according to the rate of take given in Exhibit 19, using a 14.16% discount rate, is 1.3015 Mcf. Thus, at a price per Mcf of P, with a 16% royalty rate, allocated operating costs of 2.82¢ per Mcf and allocated regulatory expense of 0.09¢/Mcf, the present value of the after-tax cash flows from the sale of 3.36 Mcf over the 25-year production life of the field (exclusive of the tax savings from depreciation) is

$$(.84P-2.82-.09)\times.52\times1.3015=.5685P-1.9694$$

Further analysis would show that the present value of the tax saving arising from the depreciation charges of the tangibles is 8.03¢ per 3.36 Mcf.

Equating the present value of the cost item outlays with the present value of the after-tax cash flows from sales, results in a constant price of

$$.5685P-1.9694+8.03=106.52$$

or

$$P=176.7¢ \text{ per Mcf}$$

Including the effect of a 4¢ escalator per year reduces the base-year price. In this case, the present value of a 1¢ escalator is 3.292¢ (somewhat higher than 3.36 times the 699–H case, since the rate of take is faster in the OEC model). Using a 4¢ escalator we find the base year cost-justified price to be:

$$.5685P-1.9694+8.03+3.292(4)=106.52$$

or

$$P=153.5¢ \text{ per Mcf}$$

Thus, the OEC cost-based price is 153.5¢ per Mcf beginning in year 1976 and escalating at 4¢ per year.

c. *323 Productivity.* Exhibits 22 and 23 are patterned after Exhibits 20 and 21 but with cost computations based upon a 323 Mcf productivity. The present value of the revenue stream is

$$(.84P-2.82-.09)\times.52\times1.3015=.5685P-1.9694$$

With the present value of the tax savings arising from depreciation charges of the tangibles at 6.956¢ per 3.36 Mcf, the equating of the present value of revenues with costs leads to a constant price of

$$.5685P-1.9694+6.956=92.61$$

or

$$P=154.1¢ \text{ per Mcf}$$

Using a 4¢ escalator results in a base year cost-justified price of:

$$.5685P_o-1.9694+6.956+3.292(4)=92.61$$

or

$$P_o=131.0¢ \text{ per Mcf}$$

IV. RATE DETERMINATION FOR 1973–1974 VINTAGE GAS

The current price for natural gas of the 1973–1974 vintage, as established in Opinion No. 699–H, is 52 cents per Mcf. That price was established without the benefit of actual drilling cost data for 1973 or 1974, and without reserves added data for 1973 and 1974, included in the rate determination and before enactment of the Tax Reduction Act of 1975. Subsequently, the data revealed dramatic increases in costs between 1973 and 1974, and continued declines in average productivity. Current and future production of that gas will not receive the benefits of percentage depletion and, therefore, future income from the sale of that gas will be subject to a greater income tax than the treatment provided in Opinion No. 699–H.

Thus, while we "vintage" the gas of the 1973–74 biennium so as to preclude it from receiving the 1975–1976 new gas rate, we must adjust the 699–H price to reflect those changing factors.

To develop the adjusted costs we adopt the following changes:

Productivity.—In Opinion No. 699–H the Commission based the rate upon a seven-year average for the years 1966–1972 and a consequent estimated productivity factor of 485 Mcf per foot. We update that estimate by including in the underlying series the reserves data for 1973 and 1974 and derive a lower productivity of 373 Mcf per foot.[188]

Drilling Costs.—We find the average of 1973 and 1974 drilling costs to be appropriate. The average successful well cost was $30.71 per foot and the average dry-hole cost was $22.60 per foot. These figures are higher than the $29.83 successful well and $16.69 dryhole cost estimates used in Opinion No. 699–H.

Finally, we employ the 15-year depletion period, the tax treatment and the computational rate of return used in determining the 1975–1976 new gas rate. Otherwise, all parameter and cost estimates follow Opinion No. 699–H as summarized in Appendix C of that opinion. The cost component derivations are displayed in Exhibit 24, herein.

[188] Exhibit 2, supra.

EXHIBIT 24.—COST COMPONENTS FOR 1973–74 VINTAGE GAS

[Cents per thousand cubic feet]

Successful wells	8.23=30.71÷373.
Recompletion and deeper drilling [1]	0.20.
Lease acquisition	5.73=8.23×.6957.
Other production facilities	1.86=8.23×0.226.
Subtotal	16.02
Dry holes	6.54=22.60×1.08÷373.
Other exploration	3.75=5.73×.6546.
Exploration overhead	1.31=(6.54+3.75)×0.127.
Subtotal	11.60
Operating expense	3.10
Regulatory expense	0.20
Net liquid credit	(3.89)
Working capital	0.75 {[(11.60×1.336) + (3.10×1.689)].125 + (5.73×1.5)}/15.

NOTE.—Computational rate of return, 14.16 percent.

[1] Opinion No. 662.

Exhibits 25 and 26 are patterned after Exhibits 15 and 16, but with cost and revenue computations based upon the cost components displayed in Exhibit 24. Equating the present value of the cost items to the present value of the revenue stream, we find a constant price of

$$15\times(6.9562)\times(.4368P+3.23)=21.99$$

or

$$P\ 101.2$$

We therefore judge the just and reasonable rate for the 1973–74 vintage gas to be 101¢ per Mcf.

V. NON-COST FACTORS

As was pointed out in our earlier discussion of cost methodology, a careful examination of costs and revenues associated with the various facets of producer activities is essential in determining a just and reasonable rate. However, it is also important to consider this cost-based price in relation to other economic factors, including market values, inflation, supply and demand, and the costs of alternative fuels. In *Mobil Oil Corporation* v. *F.P.C.*, 417 U.S. 283, 301, the Court noted that the Natural Gas Act provides for the setting of rates equal to the utilities' cost of service plus a reasonable rate of return. The Court went on to state, however, that the Act is not limited only to the concept of cost plus a reasonable rate of return.[189] Accordingly, we utilize a cost-based rate determination as the foundation for our rate-making function, but we examine the non-cost elements in an economic framework to insure that the "end result" is just and reasonable.[191]

In the *Permian Basin Area Rate Proceeding*,[192] the Commission first used an experimental costing methodology to establish maximum and minimum rates for an entire gas producing area. This same methodology was again the basis in Opinion No. 699 in initiating a nationwide rate. Although the Supreme Court affirmed the Commission's *Permian* decision in full,[193] the Court noted that the Commission made no assessment of the effect of its prices on supply, demand, reserves or industry structure. The Supreme Court advised that in future cases the Commission should state more "fully and carefully . . . its assessment of the consequences of its orders for the character and future development of the industry." [194] Furthermore, the Court unequivocally stated that the Commission is not bound by the sum of cost and return even if it adopts cost as the primary basis of the calculations.[195]

Similarly, in affirming the Commission's decision in the *Southern Louisiana Area Rate Cases* (Austral),[196] the Court of Appeals found that the need for dramatically increased production justified the inclusion of non-cost factors, and that the Commission had the power to include non-cost elements that reflect its assessment of the need to use price as a tool to influence such economic rela-

tions.[197] Although the Commission's area rate decision was affirmed, the Court of Appeals noted the Commission's failure to approach supply and demand, and other non-cost factors, in either a semi-quantitative or qualitative fashion.[198] In conclusion the Court said that in the future the Commission must estimate the needs of consumer service, explain how that level of service is related to actual demand, and then fix a rate stating how it will affect the industry's tendency to meet that level of service.[199]

In the reopened *Southern Louisiana Rate Proceedings*, the Commission issued Opinion No. 598[200] in which it noted that "[we] would be derelict . . . if we were to be guided by the legalism of the past in seeking solutions to the problems which have grown like barnacles as this case has aged and its size has mounted."[201] In affirming the Commission's opinion, the Court of Appeals observed that the overriding objective of the Commission was to adopt "a total rate structure to motivate private producers to fully develop resources."[202]

The most recent decision of the Supreme Court, with respect to the consideration of non-cost factors, occurred in *F.P.C. v. Conway Corp.*, No. 75-342 (June 7, 1976). There, the Court found that the Commission must consider regulated non-jurisdictional retail rates in establishing wholesale rates for jurisdictional electric utilities. The Court noted that "consideration of the relationship between jurisdictional and non-jurisdictional rate structure is commonplace, and is nothing more than is required by *Colorado Interstate Co. v. Commission*, 324 U.S. 581 (1945), and by *Panhandle Co. v. Power Commission*, 324 U.S. 635 (1945)."

In Opinion No. 699, the Commission noted the Austral requirements[203] that non-cost factors such as the effect of the new national rate upon supply and demand be considered.[204] The producers, however, objected to the cost-based methodology employed, and argued that other non-cost factors such as the "commodity value" of natural gas should have been considered.[205] In affirming the Commission's opinion,[206] the Court rejected this argument stating that the "approved practice of basing rates on cost carries a substantial presumption of validity."[207] Consequently, the Commission can hardly abandon its traditionally cost-based methodology, i.e. that costs must be the point of departure in arriving at a just and reasonable rate. *City of Detroit, v. F.P.C.*, 230 F. 2d 810 (CADC 1955) cert. denied, 352 U.S. 829, in the absence of legislative action or judicial mandate.

At the same time, the Natural Gas Act requires examination of a broad spectrum of economic factors. *Colorado Interstate Gas Co. v. F.P.C.*, 324 U.S. 581, 605. The Supreme Court has held that the total effect of the rate order must be just and reasonable. *F.P.C. v. Hope Natural Gas Co.*, 320 U.S. 591 (1944). Thus, we will build upon evidence that supports a just and reasonable cost-based rate determination, and go on to consider its relationship to such non-cost factors as commodity value, inflationary impact, and supply and demand effects.

A. INTRASTATE MARKETS

The regulation of the price of natural gas was based on the premise that workable competition does not exist in the gas-producing industry. If this premise is true, then observed prices in unregulated markets will be higher than would prevail under competitive conditions. Others contend that in the absence of barriers to entry, production is competitive.

We have been mindful of these opposite views in factoring in the price of gas in the unregulated intrastate markets into our price determination.

Intrastate prices have risen dramatically over the past few years, as the prices reported in Exhibit 27 indicate. The most recent average intrastate price is 1.55¢/Mcf for the first quarter of 1976. Since a competitive market price tends toward the cost of producing the good or service in question, insofar as the intrastate markets are competitive, this price indicates a cost-based price for natural gas. The price we set with this opinion is somewhat lower than that of many recent intrastate prices. The differential may be due to a lack of workable competition in those markets or supply/demand imbalance in those markets that results in the current price not being that which would prevail in long-run equilibrium.

We are also mindful that there is some reluctance upon the part of producers to permanently dedicate fields to the interstate market. Such a long-term commitment carriers a cost that must be borne. We take this into account in establishing the rates herein.

[207] *Id.*, slip opinion at 185.

B. COMMODITY VALUE

The commodity value of natural gas also plays a role in our price determination. Our mandate is to achieve an adequate supply of natural gas at the lowest possible price. So long as gas is priced below its commodity value (as set by the price of other energy alternatives, including conservation), there will be excess demand. This simply means that at that price, consumers will demand more gas than producers will supply.

Regardless of the origin of today's energy pricing structure, interstate gas clearly is priced well below its commodity value in relation to that structure, and substantial excess demand is therefore present. This excess demand is reflected in the curtailments of firm delivery contracts by many pipelines and the limits on new customers in most parts of the country. Gas production peaked in 1973 and has fallen steadily since then.

Of course it would be improper to increase the ceiling price of natural gas if we believed that both supply and demand were totally inelastic. But we do not believe that they are. Not only have many empirical studies indicated substantial supply and demand elasticities, but supply conditions are also right. There are millions of acres of OCS leases that have yet to be explored and many onshore fields where it is not profitable to produce gas at historic prices but will be so at the price we set herein. There is an ample supply of drilling equipment available both on and offshore.

We are mindful that if we were to set the price herein solely on the basis of its

[203] *Southern Louisiana Area Rate Cases v F.P.C., supra.*
[204] See Opinion No. 699, __ F.P.C. __, slip opinion at 16.
[205] The term "commodity value" referred to the value of natural gas calculated by determining the price and availability of substitute fuels to the consumer, and subtracting a reasonable allowance for transportation and distribution to arrive at a field price for natural gas. See Appendix B of IPR Response in Docket No. R-389-B.
[206] *Shell Oil Co. v. FPC*, __ F. 2d __ (USCA 5th Cir. 1975), *cert. denied*, __ U.S. __, June, 1976.

commodity value, the excess demand for natural gas would not be reduced to zero because of rolled-in pricing by pipelines and the existence of a large base of pre-1/1/73 flowing gas at low prices. Pricing near commodity value over time will, however, lead to a gradual reduction in the excess demand as post 12/31/72 gas becomes increasingly dominant in total supply.

Thus, we find it useful to examine the commodity value of natural gas in today's energy markets.

Exhibits 28 and 29 detail some of the actual prices of competitive fuels within the U.S. economy. To compare these prices, we have taken observed prices of oil in various sectors of the country, and estimated the well-head price for natural gas which would be competitive at the average market. This estimation takes account of the cost of transporting gas from well to the average market, and of the historic energy relationship of gas and oil, with gas selling at about 85% of the Btu-equivalent price of oil.[208]

Exhibit 28 reports prices paid by electric utilities for residual (No. 6) fuel oil over the twelve months ended January 1976, for the major oil-consuming sections of the country. Exhibit 26 uses the most recent spot price data from the Oil and Gas Journal. When the regional prices prices are weighted by each region's gas consumption, we get the following results:

	1,000 ft³ equivalent
Contract No. 6 oil to utilities	$1.43
Spot market No. 6 oil to utilities	1.28
Recent spot No. 2 distillate	1.57
Recent spot No. 6 residual	1.31

We also note that the FEA's $11.40 per barrel upper tier price for oil at the wellhead in early 1976 translates to a gas wellhead value of $1.67 per Mcf at 85% Btu-parity. This is well above the $1.42 price of this decision, since both prices include comparable escalation factors.

A further comparison with liquified natural gas (LNG) and synthetic natural gas (SNG) equivalent values requires attention. A recent report[209] noted that "The delivered cost to the pipeline of liquified natural gas to planned projects will be anywhere from 86.6¢ per million Btu (MMBtu) to $3.34." These equate to equivalent rates of 86.6¢ per Mcf and $3.24 per Mcf on a 1,000 Btu basis. The price of high-Btu SNG is uncertain, but unlikely to be lower than these LNG prices.

[208] This relationship was also used by the Canadian National Energy Board in their recent gas pricing decision. In that decision, the export price for natural gas to the United States was raised from the current $1.60 per Mcf to $1.80 per Mcf, effective September 10, 1976, and to $1.94 per Mcf, effective January 1, 1977. Statement of The Honorable Alastair Gillespie, Minister Of Energy, Mines and Resources On Export Gas Pricing, June 10, 1976.
[209] Oil & Gas Journal, V. 74, No. 28 (July 12, 1976), p. 20. The report makes note of plans to purchase gas f.o.b. Algeria and Indonesia at $1.25 to $1.50 per MMBtu (or per Mcf), with additional shipping and terminal costs of $1.30 to $1.60 per MMbtu (or per Mcf). The only LNG cited at less than $1.42 per MMBtu is that contracted from Algeria in 1972 at a base price of 30.5 cents.

C. ECONOMIC IMPACT

Sections 4(a) and 5(a) of the Natural Gas Act require that the rate prescribed herein be just and reasonable. The Courts have set forth several guiding principles for judging the economic impact of natural gas rate regulation. In the *Hope* case, the Supreme Court declared that the purpose of the Natural Gas Act was "to protect consumers against exploitation at the hands of natural gas companies".[210] The Courts have also recognized that consumer protection embraces adequacy of supply as well as the lowest reasonable price.[211] We do not view these as competing objectives, but rather as a dual requirement for a "just and reasonable" rate. The cost to consumers is just as real whether it takes the form of inadequate service or an excessive price.

We have determined that a national base rate of $1.42 per Mcf, plus annual escalations of 4 cents per Mcf, is necessary to induce producers to make long-term investments to replace the volumes being consumed and to find additional reserves for the anticipated market growth. Such investments will not be made unless producers are offered the prospect of a reasonable rate of return after all costs and taxes are paid. While we know of no data that will enable us to estimate the amount of new reserves this price will elicit, we are convinced that a cost-based rate, inclusive of a competitive market rate of return and an adequate tax allowance, is the appropriate supply-eliciting price in this proceeding. Not only will such a ceiling price safeguard consumers against "exploitation", since it is demonstrably below the maximum prices that could be exacted for new interstate gas in today's sellers' market, but it will also provide the economic incentive for producers to risk their capital in drilling for new reserves in areas where the prospective discoveries were not economically attractive at the pre-existing ceiling price.

The new national rate will affect gas supplies available both to current gas users and non-users, as well as reducing general demand for gas. Based on our understanding of current gas supply prospects, we would hesitate to predict that higher prices will reverse the downtrend of gas production that has been experienced during the past few years—we note, for example, that marketed production in the first quarter of 1976 was 2.8 percent lower than a year earlier and that domestic sales to interstate pipelines were 4.3 percent lower.[212] Nevertheless, we are confident that the supply situation will deteriorate more rapidly, especially in the interstate market, if prices are not allowed to increase. The consequence of such deterioration will be the further shift of energy use to higher-priced alternate fuels, notably oil imported from the Middle East. The increased availability of incremental gas supplies at the national rate was have prescribed herein will be a less expensive alternative for the Nation's consumers.

It should also be noted that natural gas has been supplying almost 50 percent of the energy consumed by the industrial

[210] *FPC v. Hope Natural Gas Co.*, 320 U.S. 591, at 610 (1944).

V 41 N 154 AUG 9 76 UMI

sector of the economy.[213] The availability of increased gas supplies to the industrial sector, particularly to those industries where gas cannot be efficiently replaced with other fuels, will contribute to increased productivity and a growing national economy.

These direct and indirect benefits to all Americans cannot be achieved at the current level of prices for natural gas. The higher prices authorized by this order will impose certain higher costs on some existing gas users as a necessary concomitant of creating the overall benefits.

It would be possible to make assumptions as to the amount of gas now flowing whose price would increase and the amount of new gas that would be called forth by the new price. These numbers could then be used to calculate a price impact for different usage levels.[214] But such an exercise would be simplistic and invalid. It would be assuming that the usage patterns of present consumers will be unaffected by price, and it would ignore the savings from reduction in the use of alternate fuels. While the magnitude of such impacts may be disputed, their direction is quite clear.

Appendix D presents a staff study which attempts to quantify all of the impacts of higher prices, and concludes that there will be a net benefit to all Americans, primarily because of the lessening of dependence on foreign oil. While we do not depend on the exact validity of the numbers in that study, we do maintain that it demonstrates the offseting costs and cost-savings of a proper cost-based national rate. Whether the true result is a net benefit of the size argued in the Appendix, or a smaller benefit or even a small net cost, cannot be known until the event. But the reasoning of that Appendix correctly demonstrates that higher costs to those who happen to have access to an assured supply of natural gas will be approximately offset by the benefits to those who will now be able to get gas for high-value economic activity. Conservation considerations have been taken into account as required by the Energy Policy and Conservation Act.[215]

[213] Data from U.S. Bureau of Mines, as published in 1974 Gas Facts, American Gas Association, page 58.

[214] *E.g.*, assuming 0.85 Tcf per year of 1973–74 vintage gas sells at a price of 107.1¢ per Mcf (including gathering allowance and state taxes) rather than the current 55.6¢ per Mcf, and that all gas qualifying under this Opinion (assumed to amount to .90 Tcf per year initially and increasing steadily to 1.35 Tcf by the end of the forthcoming year) sells at 150.1¢ per Mcf to 153.1¢ per Mcf over the year rather than 55.6¢ per Mcf, we could estimate the price of gas will increase 13¢ per Mcf in the forthcoming year, and thus estimate the average residential gas user, consuming 120 Mcf per year, will pay about $15.60 more per year. But for the reasons indicated in this section, such an analysis would be misleading and inaccurate if extended to the long run.

[215] Public Law 94–163, 89 Stat. 871, 939–40. 42 U.S.C. 6362.

D. OTHER ECONOMIC FACTORS

1. Supply/Demand

The effect of the higher price for new gas established herein will be to increase supply and reduce demand for natural gas relative to what they would have been in the absence of such an increase. The extent of such effects cannot be predicted with a sufficient degree of accuracy to warrant reporting herein. Yet outlining the nature of the impact is useful.

(a) Insofar as gas supply is increased, it will substitute for the more expensive energy alternatives. With imported oil currently selling at a Btu equivalent gas price of nearly $2.25 per Mcf, the substitution of less expensive gas for more expensive oil will have a significant effect on the overall inflationary impact of this price.

(b) It has been estimated [216] that the national gain from all cost-effective conservation measures would be about $9 billion in 1980. Present natural gas consumers account for a disproportionate share of the costs of energy waste, in large measure because their gas has been so cheap. We must recognize the significant degree of conservation which is possible in each sector if consumers take those efficiency-improving steps that did not pay for themselves at old prices, but do pay in saving the higher-priced gas (even at the rolled-in price.)

2. Outer Continental Shelf (OCS) Lease Bonuses

There is, of course, some uncertainty regarding OCS drilling costs and productivities. If higher offshore productivities more than offset higher drilling costs, producers will have an opportunity to earn higher profits. Some or all of these profits can be captured by the Federal government through competitive bidding for leases, with the extent of this offset determined by the degree of competition in the bidding. Thus, insofar as OCS gas might be overpriced, this method of sharing the national benefits of OCS gas appears more equitable than a simple distribution, through lower prices, to consumers who happen to have access to gas supplies.

3. Tax Revenues

Given our decision to employ the full corporate tax treatment for producers, the effect of this decision on Treasury receipts should be significant. Exhibit 30 contains a reconciliation between the cost and price determination components of Opinion No. 699–H and this opinion. The net effect of the change on taxes is estimated at 43.7¢ per Mcf using a productivity factor of 300 Mcf per foot. If a total of 2.1 Tcf of gas produced during the next year is subject to the price set herein, producers will pay $918 million in federal income taxes. Insofar as this reduces the need to tax consumers to support governmental activities, the impact of the higher price set herein is mitigated. Insofar as the gas from wells drilled during the previous biennium cost less than the current cost estimates employed herein, further tax liabilities will be incurred by producers. It should also be noted in Exhibit 30 that with the increase in price due to the inclusion of taxes, royalty payments would increase $175 million dollars [2.1 Tcf x (.2579—.1746)], with Federal domain royalties going to the Treasury and with an unknown fraction of the remaining amount also going to taxes.

To the extent our decision stimulates more drilling activity, immedate producer cost write-offs will allow many of these tax payments to be deferred, but the incremental tax liability will remain. Indeed, the rate calculations recognize the time value of this deferral to producers.

VI. RATE ADJUSTMENTS

A. DEEPER DRILLING AND DEEPER OFFSHORE WATER DEPTHS

In the order of December 4, 1974, instituting this national rate proceeding, the Commission specifically requested the participants to address the issue of whether an increased allowance for deeper drilling and deeper water depths should be incorporated in the national rate structure. Opinion No. 699 provided no such allowance because the Commission therein determined that there was not a sufficient data base to establish a nationwide allowance. The Commission anticipated the compilation of a sufficient data basis in this biennial review to enable the Commission to determine the appropriate allowances for drilling efforts in deeper water and to greater depths. Four parties here addressed the costs associated with these extraordinary drilling activities.

The GHK Company and GasAndarko, Ltd. comments recommended a rate of return of at least 33% for wells drilled below a depth of 15,000 feet in lieu of the 15% rate of return adopted in Opinion No. 699–H. The recommendation was based upon greater capital risks, a 13% greater risk due to a lower average success ratio, a 51.6% greater risk for unanticipated drilling and completion problems, and an additional increment of 1.2 percentage points for the time value of money during longer drilling periods. GHK also stressed the problems of obtaining capital for deep drilling ventures.[217]

UDC submitted a study prepared by Dr. Root that estimated the initial recoverable reserves by size of field in the Deep Permian Basin formations in excess of 15,000 feet.[218] The study indicated that four large fields representing 9.3% of the total number, contained 63.7% of the total gas reserves discovered to date. Twenty-six intermediate fields, accounting for 60.5% of the total fields, contained 36.2% of the total reserves. Thirteen small fields contained only 0.1% of the total reserves.

UDC's evidence, although limited to deep drilling in the Permian Basin, estimates the well costs and the gas reserves found for certain fields at depths of 15,000 feet and greater. This evidence suggests a productivity for the deep wells of over 1100 Mcf per foot. If the large fields of over 400 Bcf are excluded, the productivity drops to about 845 Mcf per foot.

UDC estimated that the cost of drilling a deep gas well in the Permian Basin in 1974 was approximately $100 per foot. For the U.S., excluding Alaska, Joint Association Survey (JAS) drilling data for 1974 indicates a cost of $96 per foot for gas wells drilled below 15,000 feet. Assuming that the cost inflation for deep wells is comparable to that for all wells, the estimated cost of deep wells for the year 1975 would be $110 to $115.

Applying the productivity factors to the assumed cost of $115 per foot yields estimated successful well costs of about 10 cents per Mcf at 1100 productivity and 13.5 cents for 845 productivity derived from the medium and smaller fields. Thus, it appears that the average successful well cost for the deep Permian Basin is not greatly different from the average costs for the nation. Dry-hole risk and expense appears to be somewhat higher for the deep wells than for average wells,[219] but again the higher productivity would tend to offset the increase.

The evidence of GHK and Anadarko, Inc. demonstrates that the technical difficulties and substantial capital related to deep drilling entail more risk than average drilling. However, this evidence offers no indication of the rewards associated with deep drilling in terms of the amount of gas reserves found or the deliverability of the deep wells.

We once again do not have sufficient evidence to establish the extent to which costs of the average deep well may exceed the national average costs. Because of the nature of ultradeep drilling, there is not a large volume of nationwide cost and productivity available for such drilling activity.[220] Productivity, of course, is a key element and may not be as great for the average deep well as the data from Permian would suggest. Until such time, however, as we are presented with a broader sample of productivity data for deep wells, we have only the Permian data upon which to rely. That data does not adequately support nor enable quantification of a rate increment for the deep wells.

Two parties addressed the cost of drilling in ultra-deep water.

Initial comments were filed by Mr. Geer on behalf of IPR.[221] Mr. Geer compared the cost of producing nonassociated gas at water depths of 100 feet, 300 feet, 600 feet and 1,000 feet and estimated that Gulf of Mexico wells at water depths of 300 feet, 600 feet and 1,000 feet would cost 15%, 44% and 124% more, respectively, than a well at a water depth of 100 feet. Similar cost projections were made for the South Atlantic, North Atlantic, South Pacific and North Pacific offshore regions which reflected even higher costs at successive water depths.

Sun Oil Company (Sun) recommended an allowance for deep water drilling indicating that costs in deep waters are much greater than similar costs in shallow waters. In both instances, only expenditures were considered with the underlying assumption that productivity is the same in both deep and shallow waters.

Sun recommends that the deep water allowance be 1.5 times the nationwide rate. The evidence amply demonstrates that the cost of equipping the exploration and development effort in the ultra-deep water is substantially in excess of costs in the more shallow water or on shore. Further, there is no sound geological reason to anticipate productivity to differ vastly relative to water depth. Nevertheless, while a simple multiplier would be appealing, there is not a sufficient evidentiary base for determining the multiplying factor.

The JAS report does not categorize offshore well costs by water depths, and the AGA does not report offshore reserves by depth below the ocean floor or by the overlying water depths. The absence of this information in the record makes the computation of a deep water drilling increment impossible in this proceeding.

Nevertheless, should adequate data become available, we would consider the initiation of the proceedings required to determine the appropriate allowances for drilling efforts to depths greater than 15,000 feet and drilling efforts in ultra-deep water.

B. BTU ADJUSTMENT

In Opinion No. 699, the Commission provided an adjustment for Btu content allowing both upward and downward adjustments in the rate from a base of 1,000 Btu per cubic foot. The same adjustment will be provided in this proceeding.[222] This is the basis which was utilized in the prior rate proceedings.

For natural gas containing more than 1,000 Btu's per cubic foot, at 60° F. and 14.73 psia, upward adjustments shall be made on a proportional basis from a base of 1,000 Btu's per cubic foot; and for natural gas containing less than 1,000 Btu's per cubic foot, at 60° F. and 14.73 psia, downward adjustments shall be made on a proportional basis from a base of 1,000 Btu's per cubic foot. This adjustment shall be made after the base rate prescribed herein is adjusted for all state or Federal production, severance or similar taxes.

C. TAX ADJUSTMENTS

The rate prescribed herein will be adjusted upward for all state or Federal production, severance, or similar taxes, effective the date deliveries are commenced, and shall be adjusted upward by 100% of any increase in such taxes subsequent to the date deliveries were commenced, and shall be adjusted downward by 100% of any decrease in such taxes subsequent to the date deliveries were commenced.

D. PIPELINE PGA FILINGS

We have determined that jurisdictional pipelines having effective Purchased

[217] Comments of GHK Company and GasAnadarko, Ltd., May 30, 1975.

[218] UDC Comments, May 14, 1975, Statement 5, Appendix A.

[219] See Comments of GHK Co., and GasAnadarko, Ltd., May 30, 1975, Exhibit V.

[220] The 1974 JAS report noted only 77 oil wells, 152 gas wells and 170 dry holes drilled to depths of 15,000 feet or greater. Oil wells and dry holes decreased significantly and gas wells decreased slightly from 1972 levels. The superdeep wells in 1974 accounted for less than 1.3% of all wells drilled in 1974.

[221] IPR Comments, May 30, 1975, Appendix E.

[222] Texaco, Inc., 33 F.P.C. 1228 (1965).

V 41 154 AUG 9 76 UMI

Gas Adjustment Clauses on file with the Commission should be permitted to make a one-time special purchased gas adjustment (PGA) filing to track the increased rates prescribed in this opinion. This reflects the same treatment afforded pipelines in Opinion Nos. 699–H and 749–A.

Accordingly, we shall waive the requirements of Section 154.38(d)(4)(iv) to permit the filing of this special PGA increase on or before September 27, 1976, to track all increases in purchased gas cost attributable to the rate prescribed herein which have been filed by natural gas producers under Section 2.56(j) on or before August 26, 1976. We shall permit an effective date of October 27, 1976. We recognize that requiring pipeline companies to file 30 days after the filing date for independent producers and requiring adherence to the 30-day notice requirements will delay recovery by the pipelines of the increased purchased gas cost. Therefore, we will provide for a surcharge to be added to the September 27, 1976, adjustment to enable the pipelines to recover the costs incurred prior to the adjustment in rates. No other increases in purchased gas cost shall be included in such filing. If a pipeline does not make this special PGA filing on or before September 27, 1976, such pipeline will be permitted to track the rates prescribed in this opinion solely through its regular semiannual PGA filings.

E. REFUNDS AND RATE REDUCTIONS

We have determined that natural gas producers who elect to discharge their existing refund obligations under prior area rate opinions by dedicating new supplies of natural gas to the interstate market covered by the opinion will be required to price such natural gas at the applicable area rate.[225] Those natural gas producers making small producer sales who elect to discharge their existing refund obligations by such new dedications will be required to price such natural gas at the rates established in area rate proceedings as modified by Opinion No. 742.[226] Producers who desire to obtain the contingent escalations for flowing gas as provided in Opinion Nos. 595, 598, 607, and 662 will be required to dedicate those new natural gas supplies which they seek to have applied toward triggering the flowing gas escalations at the rates provided in those opinions.

This treatment is consistent with that afforded producers in Opinion Nos. 699[227] and 749[228] for the same reasons as specified therein. Where a producer has commenced a sale of natural gas in interstate commerce and the volumes of gas from that sale are being credited toward the producer's refund obligation or applied to triggering the contingent escalations in the aforementioned area rate opinions,[229] the producer will not be allowed to receive both the price prescribed herein and continue to receive the refund credit or contingent escalation credit. The producer must make a decision as to whether it is more beneficial to receive the higher rate prescribed by this opinion and waive the refund credits and contingent escalations or to sell the gas at the applicable area rate or small producer rate and retain the refund credits and contingent escalations.

To help insure that producers do not gain both the higher rate under this opinion and the refund write-off or contingent escalation of prior orders, we shall require a written waiver of the contingent escalations and refund credits with respect to gas which is dedicated under the provisions of this opinion. That waiver shall state whether such gas has previously been sold in interstate commerce in discharge of refund obligations or toward the triggering of contingent escalations, the date the subject wells were commenced, and whether the gas was previously sold in interstate commerce under 18 C.F.R. §§ 2.68, 2.70, 154.-22, or 154.29.

F. SPECIAL RELIEF

In Opinion No. 699, the Commission provided for special relief when the producer could demonstrate that out-of-pocket expenses incurred in the operation of a particular well were greater than revenues from the sale of the subject gas.[230] The Commission, therein, also permitted the producer to seek special relief when continued production became uneconomical or when Federal income tax liability required such relief. This same treatment was afforded producers in the previous area rate opinions.[231]

Similarly, in Opinion No. 749, we required the submission of a petition for special relief if the producer sought to charge a rate in excess of the national rate for "flowing gas" prescribed therein.[232]

Among the comments filed in this proceeding, Phillips Petroleum Company, in a supplemental response to that of the Producer Group, argues that the special relief approach utilized in Opinion No. 699 was sumbersome and time consuming. Phillips asserts that although the Commission provided procedures for special relief to cover the installation of compression equipment, relief was often too late to be effective. As an alternative, Phillips suggests the inclusion of an additive allowance where a seller performs compression and the seller and buyer jointly certify the need for such compression.[233]

From the evidence before us, it is impracticable to enumerate all of the circumstances which would form an adequate basis for granting special relief. It would be even more difficult to quantify an additive allowance which would be generally applicable to all compression expenditures or any other circumstance warranting special relief. For these reasons, we reject the suggestion of Phillips to isolate compression expenditures as a separate element in the rate structure. Accordingly, we have determined that it should be incumbent upon the producer seeking special relief to specify the circumstances that warrant such relief and to prove by his books and records that special relief is justified.

G. GATHERING ALLOWANCE

The Commission has provided for gathering allowances in both of the previous nationwide rate opinions (Opinion No. 699–H and Opinion No. 749). In those opinions we determined that a gathering allowance should be added to the base rate on an area basis. We find no reason to depart from the procedures set forth in our prior opinions.

Producer Witness Click, on behalf of IPR, presented certain evidence with respect to recently installed gathering systems and recommends a 6¢ per Mcf allowance be added to the national rate where substantial gathering takes place.[234] The data presented purports to show the costs of 13 gathering systems which have been installed since 1970. The data is presented basically on a state by state basis and as such prevents us from identifying precisely where the systems are located. Additionally, no distinction can be made as to whether the lines are carrying intrastate or interstate gas. For example, the second highest gathering cost per Mcf shown in Exhibit RRC–1 of the IPR Comments is in California where all of the gas remains in intrastate commerce.

Accordingly, without specific details on the lines as to capacity, there is no way to determine a time cost per Mcf. From the evidence presented we find no justification for changing from the previous allowances recommended in Opinion No. 699–H.[235]

H. SMALL PRODUCERS

The Commission did not make small producers respondents to this proceeding since small producer rates are the subject of a separate proceeding. We are contemporaneously issuing an order upon rehearing of Opinion 742 which will govern small producer rates. Small producer rates will be governed by that opinion.

I. RATES FOR THE APPALACHIAN–ILLINOIS BASIN AREA

As we stated in Opinion No. 699–H, the IOGA proceeding[236] "• • • will develop information which may be useful in determining whether separate rates should be established for the Appalachian area in the future and the potential level of those separate rates. • • •"[237]

On March 19 and 22, 1976, respectively, the Commission issued orders approving settlements in Docket No. RI74–188[238] and Docket No. RI75–21. The rates approved therein applied to both old and new gas produced by small producers in West Virginia meeting the criteria set forth in the Commission's orders issued April 10, 1975, in each docket.[239] The rate authorized in Docket No. RI74–188 was 62.85 cents per Mcf, effective March 19, 1976, for all gas flowing before January 1, 1973. The rates established in Docket No. RI75–21 were $1.00 per Mcf for gas from wells commencing jurisdictional sales during 1973, 1974, or 1975 and $1.158 per Mcf for wells commencing on or after January 1, 1976.

We find that the rate structure prescribed in this opinion is adequate for new gas from the Appalachian-Illinois Basin.

J. PIPELINE PRODUCTION

By Opinion No. 568,[240] the Commission determined that natural gas produced from leases acquired after October 7, 1969, by a pipeline or pipeline affiliate would be priced at the area rate applicable to gas of the vintage which corresponds to the date that the first well on the lease is completed.[241] Opinion No. 568 also continued the cost of service treatment for pipeline production from leases acquired prior to October 7, 1969.

Opinion No. 699–H amended the Commission's Regulations with respect to the vintaging of pipeline or pipeline affiliate production by providing that natural gas qualifying under Section 2.56a(a) of the Regulations would be entitled to the rate established in that opinion regardless of the date the lease was acquired or the first well was drilled, thereon.

We have determined that it is in the public interest to continue the policy adopted in Opinion No. 699–H. The rate prescribed herein applies to pipeline or pipeline affiliate production which qualifies under Section 2.56a(a)(1) as amended herein[242], regardless of the date on which the subject lease was acquired or the first well was drilled thereon.

VII. ENVIRONMENTAL IMPACT

Implementation of this decision will result in increased exploration and development activity. The extent of such increased activity is not known and is not susceptible of meaningful quantification. The location and extent of such activity will further depend upon the results of the initial exploratory activity and the size of the gas reserves ultimately discovered or not discovered. This Commission has no authority to compel private entities to explore for natural gas supplies for the interstate market; our jurisdiction merely extends to the regulation of the rates and service for natural gas that is sold in interstate commerce. Since we lack the power to compel exploration, we cannot compel these private entities to explore for new natural gas supplies in any given geographical area. As a result, it is impossible to determine in advance what environmental impact will occur as a result of increased exploration and development activity, or where within the continental United States such environmental impact will occur.

With respect to the development of new natural gas supplies from the offshore Federal domain, the Department of the Interior prepares final environmental impact statements before particular blocks are proposed to be leased. These statements are supplemented by the detailed environmental impact statements which this Commission requires before a major pipeline project to connect new offshore reserves is approved and construction allowed to commence.[243]
